Five reports say student tuition should be raised

ARCHIES ASK

Is sex more fun in urban setting?

Transforming the sex act into an urban form, yoga, balloon structures, kite workshops, the architecture critic for the Los Angeles Times, and politics in architecture will all be part of a student symposium in Los Angeles this weekend.

"City Systems vs. Natural Systems" will be the theme of the weekend, hosted by the California Institute of Architecture, University of California at Los Angeles, and Cal Poly Pomona.

The symposium will be attended by architecture students from ten Western states.

The issue of discussion for the weekend will be the compatibility of man's natural forces with man's built forms. Relations in problems of urban areas will also be discussed.

On Friday, the symposium will deal with the city. It will include sensory tours of Los Angeles, followed by an address by John Porter, architecture critic for the Los Angeles Times, at the Bradbury Building downtown. This building has been called L.A.'s "time capsule.

There will also be a 10-minute five-story multi-media presentation.

A twilight encounter at Malibu, which will include slide shows, yoga, and awareness heightening exercises, will yield this Saturday's theme of the Natural Bite. Saturday's emphasis will be on natural energy workshops on solar and geothermal energy.

Elpidio Bocca will speak on the topic "Transforming the Sex Act into Urban Form." Bocca is a former architecture instructor here and now is on the Cal Poly Pomona faculty.

The workshops will continue Sunday. Harold Hay will lecture on solar energy. Hay has been a frequent guest lecturer at Cal Poly, and designed the solar energy house at Livermore.

The role of the student in architecture as a profession, the evaluation of existing architecture, and the evaluation of existing architecture education programs will be discussed Sunday in seminars on the environment, politics in architecture, and getting the most out of the environment.

The symposium will reconvene the following weekend, April 26, at Cal Poly's Design Village in Poly Royal.

All architecture students are invited, and should contact Cal Poly's student chapter of the American Institute of Architects for more information.

Dogg's Life—If you've led a dog's life while at Cal Poly, your bright student spirit will eventually come full circle. An in-depth interview with your favorite student will be charged at the weight of 15 minutes. Entry prices are available in the Mustang Daily office (O.A. 708). The deadline for entry is April 1 at 4 p.m. For more information call 416-300 and ask for Christie or Dave.

California Polytechnic State University

Lobby program enables students to 'have a voice'

Editor's note: This is the second part of the article that appeared in Wednesday's edition of the Mustang Daily.

The other important guidelines include that any governmental affairs representative to be involved in any campaign or any candidate for public office, of any issue before the state, or any local government, unless it pertains to the welfare of the students, in his role as the governmental affairs representative.

The whole program must be reviewed by the Chancellor to be reviewed by the Board of Trustees to be made as needed. The next session will be the expenditure for the program to be reviewed, although that can be easily changed when the need arises.

Students may feel that all this will have no great effect upon them. However, it has already had some major successes that haven't been noticed, since it usually means prevention of a bigger bill later on out of the student's pocketbook, or loss of student programs.

One of the biggest victories was a bill that would have abolished the collection of student fees. On the surface this might appear to have been helpful, but an in-depth look shows different.

Through a lack of funds all ARI sponsored programs would have been abolishes. Therefore there would have been no art concerts, films, or any other activities the ARI is responsible for the efforts of Kay and his staff. The bill was killed in committee.

Bills that have passed with CRUI/PA backing included a proposal to reimburse students for travel costs incurred when attending meetings of the trustees, the Academic Senate, or any other governing body of the state.

Another proposal would have abolished the Board of Trustees as an equal voting body, and was voted on by four of the officers of the Board, but was vetoed by Gov. Reagan.

A key measure before the legislature this year would have the state pick up the tab for institutionally related programs that are now funded through the student fees.

This would include inter-collegiate athletics, musical, drama, and forensic activities as well as other programs which would be considered to be essential to a quality education program.

The measure, AB 811 by Assemblyman Ray Johnson (L.A.), could not get the existing student fees passed but was voted on by Gov. Reagan.

It is true that the existing student fees are halved that a measure drop from the (continued on page 8).
Effective lobby program...

(continued from page 1) present 80 per year to $10 a year. Through Roy the CRCUCA is actively lobbying in support of this measure.

The student lobby implements the policy decisions of the CRCUCA in supporting or opposing legislation. It cannot introduce legislation either, but must work with the senate and assemblymen in getting bills introduced. Each year the CRCUCA draws up a legislative program in which it proposes legislation, and supports, opposes, or proposes changes to already introduced legislation.

Holley feels that the program has a very good percentage of success. "A good deal of the measures we have backed or opposed have been successful or defeated as we had hoped. We have also had a great deal of effect where it wasn't really noticed, such as getting bills amended or killed while in committee."

Holley said, "I think the legislators have some respect for us and listen to our ideas and proposals carefully. They realize that the student vote is very large and can exert a lot of influence. Do you see, students really do have a voice in the decision making process. They really can make their two cents—or in this case 10 cents—worth known."

KCPR show debuts today

Speakers from Inter-Varsity Christian Fellowship, a campus Christian organization, and Transcendental Meditation will be featured on KCPR's new live interview talk show "What's Happening?"

The two way talk show will have its first airing on Thursday, April 11, at 7 p.m. The host of the show will be Mike Murray, a senior broadcast major.

The show will be transmitted live complete with phone-in facilities. Listeners may phone guests and host by calling KCPR at 510-4040.

The show is designed to create interest in campus and community organizations and activities.

After Poly Royal, KCPR will be broadcasting with 8,000 Watts. Hits will make it possible for the show and other programs to be heard throughout San Luis Obispo County.

(continued from page 1) social and economic benefit to the state and not just to the individual. I support that concept and believe that it should never be changed," he said. "If we are to increase students' costs on the assumption that the student benefits more from the educational experience than does the remainder of society, we are making a tragic mistake. This mistake could lead us eventually into an elitist concept of education which, historically, has prevented many nations from achieving the level of prosperity enjoyed by the citizens of the United States," he said.

Kennedy said that the use of tuition as a means of solving the problem of financing higher education does not solve the deeper problem of providing equal access to higher education.

"In my opinion, those who will be hurt most by an increase in costs under the guise that we cannot afford to support higher education from tax funds will be our vast middle class," he said. "I have always been opposed to tuition for publicly-supported institutions, and the present consideration of this item by the Trustees, legislators, etc. should be made with the understanding that students and faculty consider to the student benefits of tuition or no tuition in institutions such as Cal Poly.

Students "should be vigilant and pay attention" to this issue, he added. "Each student, and especially the student's parents, should contact their legislators in support of the adoption of a tuition law in a way of supporting the California State Universities and Colleges.

"PLEASE HELP MAKE NEXT WEEK THE BIGGEST OF MY CAREER."

The brewers of Budweiser, in cooperation with ABC Radio, asked me to remind you that April 22-27 is National College "Pitch In!" Week.

All week, all over America, students like you will be filling up litter cans like me.

If there's an official "Pitch In!" Week program in your campus community, join up. If there isn't, you can still support the national effort. Just pick up any litter in your path next week and bring it to me. Thank you then.
Help yourself through your last two years at Cal Poly.

The Army ROTC Two-Year Program.

The Army ROTC Two-Year Program is a better way to do your last two years of college. Because by taking a six-week Basic Camp, you'll be able to start our Advanced Course in your junior year.

You'll be paid $100 a month while you're in school, and you'll earn an officer's commission while you earn your college degree.

The Army ROTC Two-Year Program gives you a better chance for a better career, military or civilian.

For more information, call Lieutenant Colonel Silva at 546-2371.
Track team cleans up

by ROBERT DRUMMOND

The Mustang track team demonstrated their growing strength as Poly won easily the dominant team in the UC Santa Barbara Invitational track meet last weekend.

The competition, which was called "The Meet," was on.

The Mustangs finally ironed out some of the problems as the specialists grouped into first placers and recorded as many lifetime best marks.

Poly seems to have solved the problems in the middle and long distance events, to the delight of track coach Steve Simmons. "It all came together out there," said Simmons.

Dave Marlow and Mike Lamb finished in first place and recorded as many lifetime best marks.

The Muatanga track team

The competition, which was called "The Meet," was on.

The Muatanga finally ironed out some of the problems as the specialists grouped into first placers and recorded as many lifetime best marks.

Poly seems to have solved the problems in the middle and long distance events, to the delight of track coach Steve Simmons. "It all came together out there," said Simmons.

Dave Marlow and Mike Lamb finished in first place and recorded as many lifetime best marks.

On top of his events, the 100 and 400-yard sprints, Edwards has never been beat in the 100 this year and has only been topped in the 400 once, by teammate Joe Prince.

Edwards is getting pressure for the top spot by Curtis Byrd who blew a 4:50.8 race, only a blink behind Edwards.

The most amazing feat of the day and possibly the track year was set by Rick Christopher. He came out for the triple jump only three days before the weekend meet and said he wanted to jump. After three days practice Christopher jumped to a respectable 14 feet in the triple jump which was good enough for second place. He finished ahead of all his teammates and it was his first college track meet.

Just to keep up with the trend of speeds, Miller Gordon Raro ran his first three miles of his life and turned in a 10:23 third place performance. His time was only two-tenths of a second off the school record.

The Poly vaulters became the first tandem in the nation this year to vault over 16 feet together in one meet.

Chris Rimmer, coming off a victory in the 100-yard high hurdles, vaulted 16-4 for a second place. Hamer took second as well.

Ken Haagen went higher than he has ever vaulted as the sophomore jumped 16-4 for third place.

Bob Gordon seemed to eliminate all problems in the jumps when he grabbed first in the high jump with a 6' 4 1/2 leap. Jerry Hougen followed to get the second at 6' 2 1/2 jump.

The Mustangs were once again tops in the relays as the Poly specialties sped to firsts in the 400-yard and the mile relays.

Coach Simmons was pleased with the teams performance in "The Meet" and expects his team to keep improving.
