New fuel for old autos

by CANDI IRVING

Decent of people told said it couldn't be done, but 11 engineering students did it to prove that sewer gas can be used as a viable fuel for automobiles.

The team converted a 1946 Cadillac sedan to run on reclaimed sewer gas and entered the car in the 1994 International Collegiate National Emissions Reductions (RED) Rallye earlier this month.

The idea of using the sewer gas as a fuel started with Darrell Richards, an employee for the City of Morrow Bay. Richards saw much potential energy was being burned off by the city's sewage treatment plant, and thought that this energy could be put to better use. Richards and Morrow Bay Mayor Murray Ward ley approved the Morrow Bay City Council for the idea of reusing the sewer gas and what it was to go to the rallye.

A formal notice of the project was submitted on April 1, 1994, to the rallye.

It was then that the university was approached with the idea of giving the Morrow Bay Council some technical advice and help in developing this method of energy recovery. Dr. William Bine, Mechanical Engineering Department faculty member and head of his students accepted the challenge.

By mid-month, the Cal Poly Foundation was offering a financial help to any department that was interested in further investigating solutions to

10 per cent

Budget rise for athletics

The ASI Finance Committee has recommended about a 10 per cent increase in the athletic budget for next year.

The ASI increase will be divided with 80 per cent going to the Board of Athletic Control (BOA) and 80 per cent going to the Women's Recreation Association.

The recommendation will go to the Student Senate Committee as a part of the ASI budget. The oldest council will have the final decision on the budget.

Wonderland of chemistry for visitors

by DIANE BOOTH

"Alice in a Chemical Wonderland," a chemistry show for children, will be presented by adult volunteers from the Student Senate Chemistry Club. The show will be presented on weekends and during the ASI rallye. The show is aimed at teaching children to explore basic chemistry.

Environmental discussion for Women Voters

"Where do we grow from here?" will be the question discussed at a lecture sponsored by the League of Women Voters of San Luis Obispo. The 11th annual program will feature a panel on land gardening by Dr. Fred Black, executive secretary of Citizens for Environmenal Balance and Executive Director.

Mrs. Penny of the San Luis Obispo Planning Department will give the lecture, "Environmental Balance: An Economic Reality."

The recommendation will go to the Student Senate as the final student decision on the budget.

Poly women have chance at football

Women's committee will have a chance at winning the Cal Poly Women's Athletic Program at Poly's Athletic Committee. The program will be presented by the Women's Athletic Committee. The program will be presented by the Women's Athletic Committee. The program will be presented by the Women's Athletic Committee. The program will be presented by the Women's Athletic Committee.

Ethnic humor apology said

Mastang Daily readers may have noted in the paper a cartoon that appeared in an issue of the paper last winter that was offensive and Asian character digging his way "up" from China on the opposite side of the earth. The cartoon was run because the artistic and members of the staff felt it was humorous. The Chinese Students Association did not find it so. Its officers asked, in a letter to the editor, for retraction. Mastang Daily is preparing to publish the retraction last week and as soon as possible.

We cannot retract a non-published cartoon. We can assure our Chinese students that we did not think it possible to dig through the earth, and that all racial stereotype will be avoided in the future.

Sewer gas runs auto...

Sewer gas, and the fuel is essentially free. This fuel is in the sewer gas that has been burned off, and the amounts is essentially zero. It is a burning thing in the sewers gas.

Cohn adds that India already operates for cooling steam and other utilities on the gas. The production of this fuel, usually as a by-product of sewage, can be utilized as an energy source. Cohn also emphasizes the need for further research and development in this area.

Chemical exhibit...

(continued from page 1)

In conjunction with the Poly Royal theme of "42 Years and Better With Age," the department will be tracing the history of chemistry through old glassware and antiquated equipment. A way of contrast, new methods of experimentation such as atomic absorption may of hair experimentation such as the senior project of Math Club Pres. Grand Slamada. Set up outside the entrance, the mate is related to the decision-making theory regarding the consequences of choosing a turn.

One inside, one may try his luck in beating the odds at the gambling tables of the "Casino Royal," complete with blackjack, craps, roulette and play money. Along with gambling, other games such as electronic frisbee will be set up in the Pussies and Toys room.

Another facet of the Math Department's exhibit is math in the artistic sense, depicted in paintings of mathematical concepts and relations. High school students, competing in the annual Math Contest for California high school students, will meet on Friday for the round of written exams, chain talks and "Quiz Bowl" contests. Winners will be awarded cash prizes during the awards presentation in the Little Theatre.

The Army equipment display will be set up in the campus Computer Center and Cal State Northridge. Visitors will be able to match wits with a computer in football, poker and other games.

Visitors may also receive computer programs recording the number of hours they have slept since birth and their age completed in days, hours and minutes.

While visiting the Math building will wind their way through a striped maze, the senior project of Math Club Pres. Grand Slamada. Set up outside the entrance, the mate is related to the decision-making theory regarding the consequences of choosing a turn.

Pimples in top ten health worries here

In the whirl of changing attitudes, values and customs, health worries remain fixed. One is the desire to look healthy, to appear attractive and, similarly, to have happy-appearing skin. This is a requirement for the individual, for others who stand ready to fulfill your desire to be accepted. And some say that pimples on your skin would improve your biggest headache.

It's big this year at the Health Center—in the top ten of problems bringing students for help and it has been for years. A lot more about psychotherapy than we know now, it's going to stay big. Acne is a condition of the glands of the skin. It is thought by many to be an inevitable part of growing up. The skin glands, as with all body organs, are under the influence of all sorts of factors, many of which are predetermined. Genes (hereditary determinants), hormones, stress factors, seasonal, environmental conditions and psychological factors, emotionally with one self and surroundings all bear on how the skin behaves.

The size of glands and their speed of production is much the more important. Environmental conditions, psychological make-up and emotions contribute to one's emotional and general skin behaviour. They act more or less in tandem with the glands, producing pimples and acne.

Acne occurs most commonly in the teen years and tends to disappear or be seen entirely in its early teens or in the twenty years. There is no cure for acne. It occurs on the whole body, but more commonly on the face. Variability in severity is common, many cases clearing at times even without treatment and then breaking out (naturally) producing acne and acne scars. The patient's self-image is of great importance. To the young person acne scars are an embarrassment. Pimples and acne leave scars on the skin.

It's difficult to get a lot more about acne than we know now, it's going to stay big. Acne is a condition of the glands of the skin. It is thought by many to be an inevitable part of growing up. The skin glands, as with all body organs, are under the influence of all sorts of factors, many of which are predetermined. Genes (hereditary determinants), hormones, stress factors, seasonal, environmental conditions and psychological factors, emotionally with one self and surroundings all bear on how the skin behaves.

The size of glands and their speed of production is much the more important. Environmental conditions, psychological make-up and emotions contribute to one's emotional and general skin behaviour. They act more or less in tandem with the glands, producing pimples and acne.

For those few whose acne leaves them to depression and with withdrawal of self-esteem, it may be necessary to be reassured that self-esteem is not important enough to change anyone's evaluation of his worth. Pimples and acne leave scars on the skin.

Housing meet will be held

A three-day series of meetings on housing will be held by the Los Angeles Valley College Union at the campus in the Lula Olso April 26-28 in Los Angeles.

The meetings will cover present prevailing legislation at the national and state level about housing and the effect of the legislation on Los Angeles City and County housing. The Potomac Housing Alliance will be discussed by the panel leader Valerie Endress, who attended a seminar about the Housing Program.

At the last meeting, the panel will begin at 6 p.m. at 1477 Olive Avenue, San Lula Olso. On Thursday evening, meeting will be held at the First Baptist Church, 801 Olive Avenue. The final meeting will be held Friday, April 11 at 7:30 at the Lula Olso, San Lula Olso.
EDITOR'S COMMENT

A school, does maybe it should and will continue to be Mustangs in the world of sports as unrivaled as the football team and name Mustangs in a league that almost every team that bears the same is losing. The usually mild-mannered coach was thumbed-out of the game Friday, marking the first time Harr has been ejected in 10 years of coaching. Rodgers' blast, according to witnesses, landed wall to left of the foul pole, but the ump ruled it a foul. Poly doesn't have one or two spares that are dominant in their fields, as most schools do. Almost every team that bears the same Mustangs is a league champion or serious contender.

The record proves this point. The world of wrestling recognizes Poly as the undisputed college grappling king. Seven straight CCAA league division titles underscores this claim. Our school has known the national rankings for two seasons now, and is the reigning CCAA champions.

The basketball team nabbed any non-season predictions and that their way is a league title and the third best defense in the nation. The track team, at the moment, is one of the best in the nation with Mustangs authors writing the top marks in the land up to this point.

by ROBERT DRUMMOND

This may not go down as a "re-run" but behind your school, you have some sports... typical high school editorial, if it does maybe it should.

Our school is a very small school in a student population that is in the world of sports this university is to and will continue to be big. Our school is fortunate enough to furnish a sports program that has provided us with nothing short of successful teams and winning seasons.

Poly doesn't just have one or two sports that are dominant in their fields, as most schools do. Almost every team that bears the same Mustangs is a league champion or serious contender.

Baseball squad lose two more

The Mustang baseball team had to go to Pomona over the weekend and beat the Broncos in order to have any hope of staying in the league race.

The small elder that was still burning for the Mustangs in the CCAA conference race was extinguished by the Broncos bats over this weekend.

The Poly nine was best two out of three at Pomona as the three rivals took Friday's contest 6-4 and the final game of the three-day set Saturday, 5-1. The Mustangs outlasted the Broncos in a slugfest duel, 10-9, in Saturday's first game.

The old saying, "you can't win them all," has been little comfort to Mustang skipper Berry Harr and his frustrations are beginning to show.

The usually mild-mannered coach was thumbed-out of the game Friday, marking the first time Harr has been ejected in 10 years of coaching.

Harr was given the cut sign resulting from disagreements resulting over a eighth inning strike called on Jim Fisher.

The umpire ruled it the straw that broke Harr's back, but note he should be mentioned here. Harr got his team in trouble.

With the Broncos leading 6-4, Dennis Rodgers hit a very questionable home run that two more runs on the Poly total.

Rodgers' blast, according to witnesses, landed wall to left of the foul pole, but the ump ruled it a foul. Poly doesn't have one or two spares that are dominant in their fields, as most schools do. Almost every team that bears the same Mustangs is a league champion or serious contender.
