Next year might well be the most important year I increased Poly's history with respect to student government. There has been a growing movement in our California and State universities.

Last year there were separate tuition bills introduced at the state level of initiative a "modest" tuition of $100 over and above the fees we already pay. And what's more, our present fees are constantly being raised. Last year each Cal Poly student will pay a total of $984 when he registers for fall, winter, and spring quarters. This total is broken down as follows: 600 student activity fee, $18 University Union fee, and 1944 materials and service fee. Each student's materials and service fee will be increased by 1946 the amount he paid last year because the Board of Trustees overhauled their budget by $1 million dollars. More and more programs are being funded out of the student's pocket.

Mike Louden

As a senior journalism student, I have been actively involved in student government for the past 3.5 years. I feel an active and experienced vice-president must serve the needs of students and the student body at all levels, that is why I seek the office. For the past 3 years I have been involved in student government as member of the State Executive Cabinet, A.I.P. Editors Board, University's Conversational Speakers Committee and many more.

My active involvement which includes administrative analysis for the city of San Luis Obispo, and as member of the State Board of Trustees in California Rural Legal Assistance, will allow me to serve the students interest in the community and the state level. It is extremely important that students be aware not to fall asleep at community decision making. I will expect students to attend all city council meetings.

Mike Haradke

As a senior Journalism student I have been actively involved in student government for the past 3 years. I feel an active and experienced president must serve the needs of the student body at all levels and change where necessary. My policy will not be one of strict ideological formulation. In my quietness I cannot, and I will always remain the right to be organized, and to use complete and rational freedom of thought in the pursuit of my goals and objectives, or in matters that come before me in situations of decision.

The Plotkin administration will not be right or left—it will be humanistically, at the very least, and rational at its best.

Mike Louden

Next year might well be the most important year I increased Poly's history with respect to student government. There has been a growing movement in our California and State universities.

Last year there were separate tuition bills introduced at the state level of initiative a "modest" tuition of $100 over and above the fees we already pay. And what's more, our present fees are constantly being raised. Last year each Cal Poly student will pay a total of $984 when he registers for fall, winter, and spring quarters. It is extremely important that students be aware not to fall asleep at community decision making. I will expect students to attend all city council meetings.
Caitlyn Harris

I'm Caitlyn Harris and am running for ASI secretary. After working with Laura Lampson, this year's ASI secretary, I was impressed by how much has been accomplished. The Cal Poly community is composed of many different types of individuals, each with different needs. The person you choose to fill these roles should be capable of representing and serving not just a limited number of these individuals but rather the composite of all of them. When you vote for ASI Vice President May 5 and 6, be sure and vote for proven leadership. Vote for Recky Camp. Vote for a team with great! Louden, Camp, Harris.

**ASI Secretary**

Cheryl Justice

I am running for A.S.I. chief justice because I feel that a strong, independent judiciary can be the ultimate program. The best way to organize and work for the student body, and provide a buffer to our Student Executive Board.

**Chief Justice**

Ben Rogers

My goals are to see that the School of Architecture and Environmental Design is well represented in student government.

**Architecture and Design**

Marni Huristo

As an A.S.I. member and student in Architecture & Environmental Design, I see that the success of the educational system is less than adequate. Poor money spent on a project is the determining factor of the good. Why are courses offered which will neither help nor make? Why are freshman out of high school made to compete with students who have had several years of work experience from other schools? Student Affairs Council can be instrumental in restructuring the educational system. However, change will require individuals who are generally interested in student government. I am one of these individuals and I believe I would be able to tackle many of the problems facing our administration and their methods of decision making. As the A.S.I. chief justice, I promise to work hard and represent the school of Architecture and Environmental Design to the best of my ability.

**Architect and Design (continued from page 2)**

Apathy is the result of lack of leadership and student involvement. Only through self-awareness can leadership be acquired and the needs of all Cal Poly students be met. Some of the main areas of concern for students are: working closer with the legislature in Sacramento for improvement in intercollegiate dealing with tuition, housing, tax initiative bills, dorm revisions, campus parking, and student representation in the State College and University Board of Trustees. As A.S.I. Vice-President I can provide the momentum that is necessary to initiate improvements on curriculum committees to allow for more student input in decisions that affect them in the class room. It is time that the student body is involved and concerned about the work for students on campus, local government and at a state wide level. Students are no more than voting numbers.

**Hurtado**

(continued from page 1)
GARY SHIMOTOMI 1st Vice President

As your Student Affairs Council representative from the School of Engineering and Technology, I am prepared to devote whatever time is necessary to represent you. I feel that your representation is of the utmost importance, and therefore, I will make it a point to talk to as many students, and as many clubs as possible, to hear their views before casting a vote in Student Affairs Council. I will work diligently to promote any type of programming that will be beneficial to the students of this university, and especially programming that is engineering oriented.

I am just completing my second year as mechanical engineering major with a 3.40 grade point average and was on the President's Honor List last year. So as you can see, school work will not be a problem, and in no way will it interfere with my representation of you in Student Affairs Council. I am also a member of the W.O.M. program and would like to become more active in school.

Student Affairs Council is for the students, and the more participation you get from the students, the more representative it becomes of the university.

Related Vision

As a Student Affairs Council representative, I plan to improve the student involvement on this campus. I have worked in WOW this year, and Roundhouse last year. These two groups have showed me what the current situation is on campus. The problems we face are very evident, and I have several ideas to improve our conditions. Next year I will devote a great deal of time to SAC, and I want to become involved with student affairs. Also, I have been developing my leadership abilities by joining Delta Sigma Phi Fraternity and A.A.M.E. earlier this year. The time has come for effective leadership, and I believe I have the qualifications to fill the job.
RICHARD BLACKTON
Being a nine year native of San Luis Obispo on top of being a student, I see things from both sides of that brick wall that is built around Cal Poly. I try to understand within my own mind why the people of San Luis Obispo and the student of Cal Poly do what they do.
Being a member of SAC could help bring these two ends together. Have a closer tie with the city and county in the way we do things. We have the ideas and they can help us put our ideas into working projects.
True I am a freshman and new to Cal Poly, but as an active member of "Legal Aid", "AG Council" and "3-E", I said the "O.H. Club" as well as coaching an O.H. Judging Team from San Luis Obispo Beside High School, I feel as though I could fit into SAC and not be left in the dust.
We need to see some new and flowing blood into SAC so we can get something done instead of playing games with each other. SAC is Agriculture and Natural Resources. The last school here at Poly we should take an active part in what is going on, instead of sitting on our rear, for there are some important issues at hand; like the judging teams and money in order for them to go to the national meets. On top of that all our judging teams are rated quite high in the nation.
So let us have some pride in our school and work together for a common goal.

Bob Tobe
I have no real platform statement other than I am interested in more student involvement in the school of Agriculture and Natural Resources. If I am a member of SAC, I will use these experiences to better the way I deal with people. Whether it is in my professors, or the student body, I am very interested in what is going on in the school of Agriculture and Natural Resources.
I have been active in several different organizations such as Young Farmers, Dairy Club, Alpha Beta, being a member of SAC Program Board, Poly Royal Board General, Ag. Council and was chairman of Western Student Farm Organizations Committee. Through these involvements I have had many workings with administration, University Union staff, and SAC personnel and can adequately express my opinion on SAC and understand the financial needs of the various groups and therefore support the priority list for budget determination.
When a problem arises both on and off campus, I will be part of the solution, not part of the problem.

Danae Lewis
To be responsive to the students of Agriculture and Natural Resources Management, I will always be open to suggestions or just plain talk from students of the School of Agriculture and Natural Resources. This has not occurred many of their proposed plans as well as the ones that need to be expanded on and created a more exciting atmosphere for our student body. I believe this is an important point.
Please become involved! You can begin by voting May 9 for the candidates of your choice.

**Business, Social Science**

Mary Anne Crawford

I feel that it is not only important, but vital that the structure of the School of Business and Social Sciences be fairly and equitably represented by a student Affairs Council. Student Affairs Council is responsible for the disbursement of nearly half a million dollars a year. We need a representative who is experienced in this area. Policies and procedures are initiated by this body. Each year it is the disbursement of nearly half a million dollars to which is the responsibility of the student government. I am running for Student Affairs Council next year and continuing commitment to the all and the students of Cal Poly. One of the biggest handicaps in the lack of continuity from year to year. Unfortunately, programs and services which really benefit students are often left out or overlooked in the transition of student body officers. I hope to give my time, team, and the experience that this year has gained this year to help next year student government be more productive for all students.

**School of Arts, Humanities**

Mike Nefly

I am running for SAC president because I believe that I have a successful, public government, one must combine with others that is representative of the whole student body. SAC representative is to carry out the wishes of the students in the school and as my primary goal, I would strive to achieve a better communication between students and SAC.

I have the time needed to devote to this SAC position and I am confident I can perform well.

My present school activities include Matt Pica Pi and W.O.M.

Don Marmel

As a candidate for BAC representative because I believe that I have the time and skills to be a BAC representative. To carry out the wishes of the students in the school and as my primary goal, I would strive to achieve a better communication between students and BAC.

I have the time needed to devote to this BAC position and I am confident I can perform well.

My present school activities include Matt Pica Pi and W.O.M.

Steve Pruner

At your present Student Affairs Council Representative for the School of Communication Arts and Humanities I have guided the Associated Students. I have also introduced the Ethnic Studies Committee, S.A.C., and treasurer of Mat Pica Pi to bring beneficial programs and make decisions that will benefit the students of Communication Arts and Humanities, and the college as a whole. If I am elected I will continue to guide the Associated Students Incorporated closer to the needs of the students and initiate programs that reflect the student needs and wants.

As a closing statement, it is needless to add the importance of the election, so be sure to vote.

Carlton Vel

If being fairly fair in the College of Arts and Humanities does not mean that I am new to the problems of students in general, or of Communication Arts and Humanities students in particular. As a newcomer my main goal is to find out just what is the situation in my area. Once this has been a lot of talk about increasing tuition through this trial. Costs of a college education is high enough as it is. I also believe that the P.E. program needs funding to keep the female student on my campus. There should be an equal budget representation for women.

I also feel that the ethnic minority should have just representation in student government. I have been a full circle of communication is necessary for effective function efficiently.

Specific issues that I feel are important is one that include that there is a parking shortage, an issue since to most people's hearts. Also, the possibility of having an open campus needs to be examined as to its plausibility. In conclusion, SAC is a body that needs to have many divergent points of view to increase its effectiveness, and as a female I feel I can offer a point of view different from that of some of my colleagues. I feel of all our students and women, and the experience that is necessary for further decisions and actions.

Fowler

(continued from page 2) and informed at the lunar.

Finally, I should like to say that, as usual, of two weeks ago, I am unprepared for public justice. I have and will vigorously campaign for the job...

Why? Because of my perception of the job of chief justice and the A.B.1—don't have to worry wider in without enjoining myself and my ideas to so many students as I possibly can.

I ask for your support of my candidacy because I am seriously interested in making it a more responsible, more effective, and more meaningful job...

Carleton Vel

(continued from page 9)

I believe that B.A.C. has taken a giant step forward in representing students. It is my opinion that the students who are members of B.A.C. have been acting in their own self interest and not in the interest of those students who they represent. How many members of B.A.C. really try to reach out to the students they represent for their opinions and ideas? How many students know who their B.A.C. representative is? and how B.A.C. functions? Not many is the answer.

 generosity in the school of Business and Humanities will be my main goal.

I will place a board within each department of our school and as it will be placed B.A.C. minutes. My activities in the meeting, my current ideas, and room for student responses and comments. My plans and ideas will only reflect the thinking I receive from the students I represent. As president and chairman of the Student Activities Committee, I have an open mind toward new ideas and am unaffiliated towards old ideas which are viable. I will work toward broadening the representation of my school. My main concern is to the quality of education. Thank you.

**Robert's**

I have been a member of Cal Poly for less than a year and already I've seen instances of conflict between the School of Business and Social Science. We are facing questions and challenges that need to be addressed. I would like to help the School of Business and Social Science face these challenges. If elected, I would like to be able to work closely with my colleagues and students to help solve these problems.
Human Development, Education

Mike Coffman: There are so many different issues that arise and in order to run for office, I believe that I can solve these issues. I have served in student government for three years and I want to continue to do it.

The Student Affairs Council is a hard one to govern but it is a hard one to govern but in the Student Affairs Council, you have the Student Affairs Council representatives. I feel that I can continue to do the job for three more years.

As a student, I have been involved in many activities and in the Student Affairs Council, I have been involved in the Student Affairs Council. Therefore, I feel that I can continue to do the job for three more years.

John Bellamy: I am running for the position of the Student Affairs Council for the position of the Student Affairs Council. I have been involved in many activities and in the Student Affairs Council, I have been involved in the Student Affairs Council.

As a student, I have been involved in many activities and in the Student Affairs Council, I have been involved in the Student Affairs Council. Therefore, I feel that I can continue to do the job for three more years.

Science, Math

Be a special kind of Navy Flyer: Be a Naval Flight Officer.

Whenever a Navy plane is under electronic control, that plane is in the hands of a Naval Flight Officer. Naturally, as a candidate for Naval Flight Officer training you need some very special qualifications. First, you must really want to fly, even if you’ve never flown before. You’ll also need a college degree and a sharp mind.

As a student, I have been involved in many activities and in the Student Affairs Council, I have been involved in the Student Affairs Council. Therefore, I feel that I can continue to do the job for three more years.

Matmen put move on state plaudits

The Mustang wrestlers and their coach are going to get a bit of their own medicine.

After spending most of the winter months putting opponents quickly on the mat, the Mustangs are starting to get a few official pats on their own shoulders.

Wrestling mentor Vaughan Hitchcock recently garnered the Southern California Coach-of-the-Year award for the fifth time in the six-year history of the honor.

Meanwhile, four of Hitchcock's wrestlers were nominated for the plaudits at the 19th annual California College Rodeo Writers-Of-The-Year.

Those nominated in the current issue of Southern California Roping Review publication are NCA Division II champions Cliff Hatch (110) and Keith Leland (110). NCA runner-ups Rodger Warner (110) and Bruno Lyon (119) are also up for the honor.

In his 15 seasons here, Hitchcock has checked up on a record of 156 wins, 19 losses and 8 ties in dual meets and competition for glistening the winning percentages.

His team have won the CCAA conference wrestling championships every year that Hitchcock has been here. They have also grabbed eight NCAA Division II titles.

This year Hitchcock added championship No. 9 to his line-up which contained only three seniors. Inexperience didn't seem to hinder the Mustangs, however, as they set a new point record during the championships at Cal State Fullerton.

Team co-captain Leland wrested his way to an 8-6 season record in his final year as a Mustang. Besides winning the national crown, the senior also captured the CCAA championship for his weight class. His career record ended at 35-6.

Hitchcock grabbed his way to a 38-6 season record. The junior also netted top honors in CCAA competition in addition to his national championship.

Junior Warner became the eighth Cal Poly wrestler to ever place in the NCAA Division I championships. Warner mustered a third-place finish to add to his second-place in the collegiate division and 38-6 season mark.

Lynn, another junior, was named the Mustangs' "outstanding and most valuable" student-athlete for his efforts during an 8-1 season mark and won the CCAA championship in the 190-pound division.

He has a sparkling career mark of 48-1.

Weekend win increases title hopes for netters

Little man on a big bull...

(continued from page 1)

In 1971 he won the building in the Golden State Roads at the Forum. He won three or more, placed in the other, and was the only man to win all four of his bulls. That was his best money championship. He won about $20,000 of which about $8,000 was left after expenses.

Being part of last years national championship team at Cal Poly, "you work for something like this," he said. Dave Jorgensen must compete for the championship due to his team injury, which was quite a disappointment.

Another big moment for Clark came last October when, bowing gracefully, he got bison. His wife, Jo, a Velvet Crest native, although having shown heroes and running as the top Calif. team in the country, only didn't get interested in rodeo until she saw the movie "Little Man on a Big Bull.

"And she didn't get interested in rodeo until she saw that movie," said her new husband. As animal animal lover, the rodeo is the cheapest in the country and satisfies the desire to do something for his father. Her father was an actor in the country, and son of a rodeo prize winner back in his day.

"But at Cal Poly, the women are missing out on all the teaching aids that a first-class P.E. program can offer. And these girls who want to take activity classes in sports, have to do so in a different setting, in the P.E. dorms.

The situation is similar to having a women's studies faculty in a men's dormitory, only because they are women. There are no real reasons to it.

The P.E. department is purported to be training future P.E. teachers and athletic coaches, and the students need for physical education seems. Why should the Poly try to train really different men's P.E. teachers and be satisfied in turning out women coaches who have learned their stuff in a not-so-good way setting.

And why should the women who are not necessarily P.E. majors have to be trained in sport activity classes set up just for that of the men.

Raising this need, the women were supposedly going to be built a new $6 million gym, west of where the men's gym is now.

According to Associated Students Inc. Pres. John Fennel however, the women are instead going to probably get a four-hundred-thousand-dollar renovation undertaken at Crandall Gym.

This means that the women's facilities will be at the men's facilities because there will be no female locker room in that building. Girls taking tennis classes will have to dress at Crandall Gym, as they do now, for a change behind the men's gym.

Apparently, there was no need for the women to have to get equality. They already have a healthy self-off.

Women can buy the money for their P.E. department but indeed they don't deserve more for their athletic program.

According to Dr. V. H. Mathews, men's athletic director, sports here are justified because they give national recognition to the school and provide entertainment to the students. This didn't happen overnight, the sports didn't start in the men's setting. They fought a long slow fight in building their program in its present level.

I don't think that the women have completed that fight yet. Women's sports won't be as an entertainment package nor will they gain Cal Poly much national recognition.

Likewise neither do the eight men's sports that are not expected to earn a penny next year. (For in names, the empty-pressed Miltonics are: cross-country, golf, soccer, swimming, tennis, track and field.) These estimates come from the A.S.I. office's office.

These sports that don't draw as much and gain little national notice, are dead weight and, at least, should not be more than what three women's sports also fall into this category.

The athletic program should not be put on a level with the man's until they show they can do the things that justify having an athletic department in the first place.

But again, P.E. departments are a different matter.

Give the women equal facilities and a curriculum equal to men's. Or maybe better yet, take that locker room in the men's gym so they can use those facilities.

For the sake of their health and education, the women are entitled.

In these all important round-robin, the Mustang tennis team just keeps top-to-bottom ahead.

The Mustangs took a strong command of the CCAA league by sweeping the record of three conferences round-robin tournaments played here last weekend.

The Mustangs now have a perfect 6-0 league mark while Cal State Northridge, lagged behind with a 4-2 record.

The final round-robin will be on May 19-21 if U.C. Riverside decide to play their matches this coming weekend.

With this most of win under his belt, coach Ed Jorgensen is fairly confident that his team will win the CCAA crown for the fourth time in five seasons.

"We're in a good spot," he said. "We can lose one and still win. It. We still can't lose by two, but I'd say we've got a corner on the championship."
