Reagan to talk at graduation

Gov. Ronald Reagan will give the commencement address to 8,000 graduating seniors in Cal Poly's 86th observance of the graduation rites.

The commencement exercises will begin at 11:30 a.m. on Saturday, June 16, in Mustang Stadium.

Reagan's Mustang address was announced by Cal Poly Pres. Robert E. Kennedy and Bruce Snow, student chairman of the Board of Trustees meeting here in March, when Reagan's appearance was held on the university's schedule for future academic consideration. These committees range anywhere from the administration, faculty, staff, and students. PAC, as it is known to its members, consists of approximately 35 students who serve on a variety of student, faculty, and administrative committees, where student-faculty interaction is their hallmark. The Student Affairs Council was established in the fall of 1972 by the Administra- tion, student body, and faculty to provide a channel to communicate student needs and concerns. The administration has been committed to maintaining open lines of communication between the administration, students, and faculty.

Reagan's address will be held on the university campus to inform the students of the importance of their participation in the decision-making process. Reagan will discuss the significance of their role in the decision-making process and the importance of their involvement in the future of the university.

President's board gets inside look

The All President's Ad-

visory Cabinet serves as a liaison between the administration and faculty.

'Virginity—a curiosity'
Sexual habits among youth

Sexual liberation is causing more problems than solutions for college students. In an article for "McCall's," a national women's magazine, authors Kenneth and Betty Woodward, explored the world of the sexual revolution. According to the article, appearing in the April issue, hundreds of thousands of young American are entering college to find themselves in the midst of the sexual revolution they did not create but one that has shaped their lives.

The authors found that many students now find that sexual liberation has not been liberating at all. This newfound sexual freedom has not only failed to solve old problems, but has created a whole set of new ones, causing students to look back to the days when dating, not making was the expected behavior on the college campus.

Said co-ed interviewed in the article, "When I was growing up, it was regarded as taboo to admit you weren't a virgin. Today it's almost the reverse. If you're a virgin you're considered a curiosity."

"It now seems clear," say the Woodwards, "that after a period of promiscuous sexual experimentation, a growing number of young men and women are embarking what Columbia University psychiatrist, Joel Moskowitz calls 'secondary virginity,' a self-imposed chastity born of sexual disillusionment, insecurity and, oftentimes, emotional confusion."

**Lecture centers on peace hopes**

Professor Bernard Codner of Cal State Los Angeles will speak about "Prospects of Peace in the Middle East" Thursday at 11:00 a.m. in University Union Room 417.

Codner, dean of continuing education at the School of Business and Economics of Cal State Los Angeles, is Chairman of the Western California Region of the American Professors for Peace in the Middle East and member of the National Council of the organisation.

In 1978 and 1979, he was a member of national study mission as part of the organisation, which consulted with Israeli political, military and academic leaders, and Palestinian political and intellectual leaders. Prospects for a peaceful resolution of the Middle Eastern conflict were discussed extensively with the Israelis and Palestinians.

In 1971, Codner participated in a research study of Israel's Economic Cooperation Program with Developing Nations, assisted by the Israeli Foreign Ministry.

Codner has also served as a Technical Consultant for Industrial Development for the United States Agency for International Development, as part of the Alliance for Progress, in Northeast Brazil. There he studied the feasibility for new industrial enterprises and initiated academic marketing programs at several federal universities of Northeast Brazil.

Codner is being sponsored by the Political Action Club in conjunction with the Political Science Department.

**Consumer tips: Be cautious of small print**

Consumers should be aware of the small print in advertisements for a whole side of beef or a "bundle" of beef to see if it says "hanging weight."

"Hanging weight" means the weight of the meat while hanging on a hook. When it is cut, the consumer finds he has lost from 20 to 50 per cent. Since you don't see it being cut, it will often be done to 50 per cent.

You may see a list of cuts you will get, and at the top will be a file mignon and porterhouse. You may get a half pound of file mignon, and a half pound of porterhouse, and 10 pounds of steering meat.

It may be cow and not steer; it may be commercial grade or good grade, instead of the better quality prime or choice. Most often you will find you could have gotten a better price by going to your supermarket and buying the cuts you like.

**PAC seeks new members...**

The basic qualification for participating in PAC is a willingness to put in time and energy to help the student cause. From most of the committees have expressed direct interest in joining. Student representatives are vital.

**Construction to start near Med Center**

The temporary sidewalk on the south side of the Health Center will be removed within the next two weeks. According to Executive Dean R. Douglas Gerard, a permanent walk will be available for use when the temporary walk is removed.

Pedestrians and bicyclists are cautioned to stay off the walkway as there will be construction activity and equipment still occurring in the area.

India's new free handout tactic

We wonder if you—a Montana Daily reader among other good things—want to meet and solve all your disturbing personal problems by yourself. If it seems reasonable to ask for help but for the moment you've got a hang-up about coming to the Health Center, we've got another answer—the Help Center. It's an appendage of the Health Center, and all you need to use its services is knowledge of its existence, its location, and the push to get yourself there.

Help Center...all you need to use its services is knowledge of its existence and location...

The Help Center was set up about two years ago in the Student Union. It was born in the Student Health Council and is nurtured by AS.

You'll find the Help Center on the second floor of the Union in Room 118, opposite the information desk. Look for the sign. In there you will find an experienced professional medical person and you can sit down and let loose with your problems. It's not even necessary to identify yourself if you don't want to, although we would hope to be able to call you by your first name. There is no paper work, just confidential discussion. No records are kept.

The Help Center is open from 11:30 to 1:30 p.m. every weekday except Thursday. No appointments necessary, just drop in. If there is a student ahead of you, hang around a few minutes. Usually no more than three or four attend during the hour.

Frankly, we hope it doesn't get too big. It will lose something if it gets too personal. However, it is planned to expand if the demand develops.

No effort is made to draw lines between "normal" and "abnormal" physical and mental states. Distinguishing between degenerative problems (arising within oneself) and situational problems (situational) is often difficult and beyond the specialist of the mental health unit. The "helper" is in a steering position as well as explaining what to expect. It is surprising how many students haven't the foggiest notion of the health services available to them, many without any exposure to students whatsoever.

It is well to know what the Help Center is not. It is not a first aid station. You won't even find a bandaid there. It is not a pharmacy, and it is not a physical or mental examination station. Spreading our health resources around the campus into routine or emergency care satellite stations would dilute our quality of care. This we are not interested in, even if we could talk the holders of the purse strings into it.

But if you are troubled by uncertainty about the type and extent of your medical coverage at the center or through insurance; if you have a little "lack" and can't decide whether or not to get a pregnancy test; or if you wonder who to see about an itchy nose, whether it is your roommate's or your roommate's cat that is aggravating your asthma, it's on the house, and you're welcome.

No effort is made in the Help Center to draw lines between "normal" and "abnormal" physical and mental states. Distinguishing between endogenous problems (arising within oneself) and exogenous problems (situational) is often difficult and beyond the specialist of the mental health unit. The "helper" is in a steering position as well as explaining what to expect. It is surprising how many students haven't the foggiest notion of the health services available to them, many without any exposure to students whatsoever.

Equine Education

Horse Enterprises is a class offered by the Animal Science Department to acquaint students with one of the many methods of training young horses. Safety to both horse and rider is the first concern. The class starts in three separate groups to prevent overcrowding in any one training area. After the colts are gentle and ridden a few times, they are taken out to the back hills of Poly to round out their education. To get their “diploma” horses must be able to step, break up, turn left and right willingly, maneuver their rider through gates, and be confident around cattle. The class is open to all Poly students, but names are chosen from a sign-up list which is located in Bill Gilford’s and Bob Hadley’s office in the Ag building.

Garden will see changes by '75

After 18 years of planning and building, the first major improvement in the Cal Poly Botanical Gardens will be installed by I.B.T.

Jim Owens, a biological science student is assisting Dr. Robert L. Hoover, director of the Botanical Garden in developing the 56 acre campus as a special project.

The garden will be surrounded by a new wall and a small redwood grove is some community planned for the Botanical Garden. The village will consist of a greenhouse and a few Indian huts.

As soon as an underground watering system is installed, many varieties of native edible plants will be planted nearby to show foods on which the Indians subsisted on. Across from the edible plants will be a garden of poisonous plants as living examples to be avoided.

Post bridges built by architecture students make the gardens more accessible than they were in the past but a few problems remain. The soil being serpentine (clay in magnesium) but high in cladium) slows and restricts plant growth, and local rainfall is insufficient for some plants to survive. However, these problems do not pose too great a difficulty that cannot be solved.

11 YEARS OF HASSELBLAD SPACE PHOTOGRAPHY

Victor Hasselblad made the only camera to go to the moon. In fact, only 40 Hasselblad cameras were made for NASA's successful space flights. The staff at Jim's Campus Camera is proud to announce that we have two of these forty cameras on display. We constantly invite you to see these historic cameras along with a special showing of the world famous Hasselblad camera system. On Thursday, May 23, a Hasselblad technician will be on hand to show and answer any questions you may have about the Hasselblad camera and how it can make you a better photographer. In addition, we will have a portfolio of color photographs taken on the Hasselblad camera aboard the American space ship. Hasselblad can do for your photography! Also on display will be a complete line of Topcon camera lenses and accessories; another product of the people that brought you Hasselblad.

MID STATE Electronic Supply Inc.

ARE YOU GOING TO EUROPE OR ASIA?

Then you better take along a converter-adapter to change foreign Voltage to American Voltage so that you can use your American electric iron, hair dryer or curlers, tape recorder or cookie. Mid-State Electronic Supply has in stock voltage in 40 and 120 volt units priced at $9.95 plus a bit for power. Call 543-2770 or visit us in person.

Opinions clash on latest tape

WASHINGTON (UPI)—The House Judiciary Committee will hear the taped testimony of President Nixon's March 21, 1973, Watergate discussions but will not take any action on whether a transcript was more damaging to Nixon than the actual tape.

The 81 members listened to the tape during a three-hour morning session and returned later to hear a tape of Nixon's discussions with aid John W. Dean III on the morning of March 21, 1973—considered a key factor in the committee's impeachment inquiry. Nixon's attorney, James B. St. Clair, meanwhile told reporters he would tell the committee later in the week whether Nixon intended to reject or deny the panel's request for tape transcripts dealing with ITT and milk producers' contributions.

A denial was almost certain to bring about the panel's fourth subpoena, probably to be voted on Thursday. The second and third subpoenas issued last week for more Watergate material (for responses by 9 a.m. EDT Wednesday, Ill. Clark said he would reply to that in writing.

The March 21 tape contains Nixon's controversial quote: "It would be wrong." Dean denied that Nixon meant that the grating of democracy later would be wrong.

Patty may face kidnapping charge

LOS ANGELES (UPI)—Patricia Hearst, the 20-year-old newspaper heiress who claimed she was a member of a mass murder and carjack following the shooting at a sporting goods store in Los Angeles, was arrested Thursday by the Los Angeles police department. The Los Angeles district attorney's office late Tuesday was drawing up a complaint against Patricia Hearst, based in part on the abduction of a 15-year-old high school student who allegedly was forced to work, and held by Patricia and two companions during a desperate attempt to extort a $20,000 ransom.

Nixon has acknowledged for different people can have different views on whether a transcript was more damaging to Nixon than the actual tape.

Authorizing such money is to pay to court defendants and, one committee member said, "There is no way to define these things." Nixon would face an article of impeachment.

The tape will be reviewed generally along party lines and asked whether listening to the March 21 tape would help the committee. The President, it is not too early to start the trial," he said.

He also said the committee was carried on in a conventional tone and it got along as well as the participants were discussing opinions.

Poly ropes Western title

The Mustangs won the all-around team title with 111 points, followed by Montane with 174. John McDonald of the Mustangs was fourth behind Dudley Little.

Montana as a team, although individual Collisone Samms did qualify as an individual.

Lee Roeser and Dave Clark’s double-barreled attack paved the way for the Mustang victory. Roeser won the all-around cowboy honors with 188 points, and Clark was close behind with 174. John McDonald of the Mustangs was fourth behind Dudley Little.

Roeser was first place in the calf roping with a time of 17.5, was second in the saddle bronc riding and fourth in the ribbon roping. Clark won both the bareback bronc riding and the bull riding with scores of 96 and 87 respectively.

McDonald was second in the opening round of the saddle bronc, 89 in the bareback, tied for fifth and sixth in the bull riding and was sixth in the ribbon roping.

Roeser picked up second in the bulldogging, which Presno dominated. Tree Moore was third in the calf roping.

Leigh Samms won the goat tying with an 11.6 time. Collison Samms took top honors in the breakaway with a fast three-second time.

MARSH STREET ANNEX

SAN LUIS OBISPO, 544-6277

Contrary to a growing belief on college campuses across the nation, athletics is not a dirty word.

It’s not something that you would write on a bathroom wall or do in the dark corner of a wild, exotic party.

Why, at one time, athletics used to be considered highly honorable, something you’d want your son to go out and do—toss the ball around and All-American things like that.

Well, athletics still is not an explosive thing that needs to be deleted, especially at this campus.

Sure, no program at any university is perfect and Cal Poly’s athletic program is certainly not an exception.
