Caught without funds, Robert Castro busily can turn to: the financial aids office.

Emergency funds available

When students are caught without any funds this Summer Quarter, there is a place for them to turn to: the financial aids office.

Lawrence Wolf, director of financial aids, said there are two types of loans available to students for the Summer Quarter, the short term and the emergency loan. The short term loan is available to full-time students. The loan is for $300 and must be repaid by Sept. 1. 1974.

The emergency loan can be obtained by any full-time student, said Wolf. "In order to get the $100 loan I must be able to tell him, 'I need the money.' This loan must also be paid back by Sept. 1, 1974.

No grants or scholarships are available during the Summer Quarter, according to Wolf.

Students in need can apply for an emergency loan up to $300 through the Bank of America. Wolf said, "Emergency consist of car repairs, medical expenses and any unusual emergency costs."

Controversy over canyon continues

by RICHARD McMILLAN

As construction of PG&E's power station at Diablo Canyon station continues, so does debate between its opponents and proponents over the operation and safety of the soon-to-be-completed nuclear plant.

The first reactor is scheduled for operation at the end of next year, and the second will follow in mid-1975. Both units will generate 1,860,000 kilowatts of power and are being jointly served by PG&E.

PG&E maintains that its procedures for transportation and disposal of nuclear waste are safe. It also maintains that the minute amounts of radiation the plant will release into the air and water during operation are negligible.

Intervening groups don't see the situation that way: At this point we are against licensing the plant as it's proposed to be licensed, said the Mothers for Peace. Any amount of radiation in the atmosphere for an extended time, she said, can have detrimental effects on living organisms.

Results of a 1969 study by the New York State Department of Health showed that radiation from a nuclear plant is likely to increase that rate of cancer among the local population, according to the Mothers, and the Air Agency.

The study measured the occurrence of cancer among residents of four towns in a New York county over a five year period before and after the installation of a nuclear power plant in the area. Leukemia cases increased from nine cases before the station was built to 33 cases in five years following. Brain cancer cases increased by nine and breast cancer rose by 18 cases.

Lyke La Faver, project, information specialist for PG&E, said, "No cases can release more than five milligrams of radiation annually. A milligram is a scientific measurement of radiation's effect on the body. To do this, at least 10,000 milligrams are needed, La Faver said.

The emergency core cooling systems (ECCS) of nuclear planes are closely criticised by intervening groups. The system is cool to the hot core of a reactor by spraying or flooding should the cooling system fail.

This is the potential danger for catastrophic events in a nuclear plant. If the emergency core cooling system fails, the hot core would heat to a terrific temperature and melt through the concrete containment of the reactor. The release of radiation to the air, scientists predict, would be minimal. If they're as safe as they should be," said Ray Bracken of the Santa Lucia Chapter of the Sierra Club. Brackem and the club has taken a position that the negative stand on nuclear plants because of the lack of satisfactory answers to our questions on the handling and storage of nuclear wastes. Diablo Canyon is also criticised in an intervention operation written by two Cal Poly students - John O'rourke and Connie Pitts.

"We, the people, shouldn't be allowed to accept the siting of a nuclear power plant when the safety is in question," the students wrote. "It is a very good method of getting the public involved."

Because the emergency core cooling systems may be suspected by experts, the paper read, the plant shouldn't be allowed to be built. The system is shown to function under all conditions, that is, natural or man made.

La Faver also criticises the fact that the Atomic Energy Commission hires its own reactor and systems for testing the reliability of the reactors they take over from the different companies in a dual role as regulator and promoter of the nuclear industry.

PG&E's LaFaver said that he can't speak for the Atomic Energy Commission, but it has not a plant at Diablo. LaFaver said that the contamination of the plant site for six months to allow the radiation and temperature to reduce before it is then placed in a durable, encapsulated storage container and transported from the site.

The waste is then shipped by road or rail to a commercial reprocessing plant where it is continued on page 3

Inflation increases meal ticket prices

Even though students are paying 10 per cent more for their meal ticket plans this summer, the popularity of the meal plans has increased.

John Lee, food services director, Cal Poly Foundation, said the meal ticket plans were still a bargain. The cost of the$18 meal-per-week ticket for the academic year will increase from $60 to $63.50.

Besides the 18 meals-per-week plan and the $13 meal plan are available to the student. Students will pay $62 a quarter for the 37 meal plan. Students interested in the $80 charged last year. A 12 meal plan is $55 a quarter, up 838 from the previous price.

Lee said that 400 per cent more meal tickets have been sold this year. In the last three months, meat and potatoes have increased in price, he said. Rice has increased 300 per cent and pinto beans are up 500 per cent over last year's prices.

Lee noted that food services is operating under the same conditions. "We pay our own expenses plus 5 per cent of our income," he said. Expenses include salaries, equipment and food services.

Lee said students do not need to fill out an annual plan before the school year begins. "They can fill out whatever plan they want in monthly installments," he said. "In the month of April, we will raise our meal ticket rates during the months of May and June. We will have to raise our ticket rates in June," he continued.

Lee said that for the meal prices are set, Lee said that he can't speak for other Cal Poly student groups. "The department of student life is in the academic year, students on the meal plans must six to 13 per cent continued on page 7

SIC meets tonight

The Summer Interim Committee (SIC), the summer replacement for the Student Affairs Council, meets tonight at 8:30 p.m. in Rim 325 of the University Union.

SIC is a strong replacement, however, according to Mike Hurstd, newly elected SIC vice- president. "It is one of the most important bodies of all student government, because it assumes more responsibility than other groups on campus.

The committee that meets during the summer, comprised of a representative from the seven schools, and members of various campus boards, can do a great deal of the groundwork for the upcoming year.

Scott Plunkat, ABI president, agrees with Hurstd and adds that different administrations interpret the rules of SIC in different ways. Some used it to initiate programs and others just used it as an emergency body.

Plunkat want SIC to be effective this year in planning and starting his administration off on the right foot toward more student input.

Plans for tonight's SIC meeting include introducing the new administration, informing the body of the plans that have been set down, establishing the rules of SIC, as well as a review of SIC's actions this past year.
Beach News
Proposal to make park of coastline

Measure AB 4158, by Assemblyman Robert Ntimmo (R-Assendale), proposes that 38 acres of the scenic coastline be transferred from the Department of Transportation to the Department of Parks and Recreation.

The Department of Transportation acquired the property in the early '70s, and it is generally known as Moonstone Beach. The measure was introduced, by Ntimmo, in order to clear the way for inclusion of the property in a plan for the area proposed by the Moonstone Beach Association. More than a mile of scenic coastline between Cambria and San Simeon, and the Department of General Service, will transfer without cost to the Department of Transportation by the assembly, Senate, and the assembly and the Department of General Service.

In announcing adoption of the measure by the assembly, Ntimmo praised the efforts of the Moonstone Association, and interested citizens of the area who are working to enhance the beauty, utility and public accessibility of the north county coastline.

Moonstone Beach is just one of several beaches included in Assemblyman Ntimmo's bill. The bill would make more than a mile of scenic coastline between Cambria and San Simeon into a separate state facility.

Mini-grant monies
a good possibility

by LEA BROOKS
There is a good possibility for state funding of the Mini-grant program for ladder, according to the campus coordinator of innovative projects, David Grant.

For the first time, $250,000 might be made available for Mini-grants to divide among the 19 state universities in amounts of $5,000 to $15,000, depending on the size of the school.

Applications for proposals are available for faculty and staff for Administration 316. Grant hopes that the proposals will involve new modes of instruction, different methods of learning and new approaches to career development and information. Grant says, "Cal Poly is a career development school and I hope some of the proposals will help students find the best careers for their talents.'

Proposals are limited to $8,000 because if the Mini-grants are passed by the California legislature, Cal Poly will have $30,000 to be made available.

Proposals will be reviewed by the 19-member Instructional Innovation Coordinating Committee headed by Grant. The committee consists of a faculty member from each school nominated by the dean, one student appointed by the ASI president and curriculum-minded deans.

Recommendations will be given to President Kennedy for final appointments.

The idea of Mini-grants has been around a long time, says Grant. Foundations have usually provided small sums of money for buying materials and faculty expenses. But if the Mini-grant proposal is passed, funds will be made available from the federal government.

The official deadline was June 16 but extensions of time may be granted now under certain circumstances.

The funding period will be for the academic year of September 1974 through June 1975.

Mini-grants to divide among the 19 state universities in amounts of $5,000 to $15,000, depending on the size of the school.

Sunset Mustang: Trends toward tuition increase

by BRUCE WRIGHT

Students are being bombarded by powerful spokesmen and commissioners with further costs that may determine whether or not they receive an education. In five recent reports by eminent national groups the implications are widespread. According to some reports, conclusions are that tuition should be established or raised. The report that was completed the report is for the Committee for Economic Development, the Carnegie Commission of Higher Education, the National Commission of the Financing of Postsecondary Education, the National Board on Graduate Education, and a special task force of the Department of Health, Education, and Welfare.

Owen D. Lummus, chancellor of the California State University and Colleges has endorsed a tuition in the neighborhood of $100 plus. This tuition of $100 would double the existing state tuition in some areas.

Students in the California State University and Colleges system pay no tuition. But fees are charged, the largest of several mandatory fees is the materials and services fee. This fee represents the cost of instructional supplies and services, coordination of various student activities, student union supplies and services, salaries of counselors, campus information, and administration of financial aid programs, health services, and housing.

The opponents of tuition cite Historical data indicating that tuition, once established, increases by leaps and bounds. President Robert F. Kennedy of Cal Poly stated, "If we are to increase student costs on the assumption that the student benefits more from the educational experience than does the remainder of society, we are making a tragic mistake. The mistake could lead us virtually into an elitist concept of education which, historically, has prevented many nations from achieving the level of prosperity enjoyed by the citizens of the United States of America."

Advocates of tuition claim that government has reached its limit of support for higher education from tax funds. They say that tuition money is needed for three reasons: to alleviate widespread financial distress in higher education; existing public subsidies are inequitable in that a disproportionate share goes to middle and upper-income students; to improve the educational system by helping to solve the student tuition gap.
McKibbin is new dean

Dr. Carroll R. McKibbin has been appointed as Dean of the School of Business and Social Sciences by President Kennedy, in agreement with the recommendation of the Dean Selection Committee. McKibbin was selected from a field of 111 candidates for his outstanding qualifications, according to Les Vanoncini, chairman of the Dean Selection Committee. Committee members were elected faculty from each school.

from the University of Kansas. He also has taught at both institutions.

He has attended Geneva University, George Washington University and the University of Michigan as well as the Foreign Service Institute and the Internal Revenue Service Training.

The new dean has served as vice-consul and third secretary of the American Consulate General in Geneva, Switzerland. He has been a staff assistant for the assistant secretary of state in Washington, D.C.

His government experience includes service as an internal revenue agent with the U.S. Treasury Department in Wichita and Emporia, Kansas, and duties with the Iowa Air National Guard.

McKibbin has held a number of fellowships including the Wilder Fellowship, Kansas University, National Science Foundation Fellowship and two NDEA Title I grants, University of Nebraska. He is a member of the American Political Science Association, American Academy of Political Science, Pi Sigma Alpha and the Western Political Science Association.

McKibbin is completing his second term as president of the Nebraska Political Science Association. McKibbin is succeeding Owen Servallas who has been acting dean of the School of Business and Social Sciences since former dean Edward Barker was appointed State Savings and Loan Commissioner in the spring of 1973.

McKibbin, his wife, Mary and two daughters expect to be in San Luis Obispo between July 31 and August 15, so he can conclude his assignment at the University of Nebraska-Lincoln.

Pat Kirby chosen new rodeo pres

Pat Kirby has been selected to serve as the new president of the Cal Poly Rodeo Club. Kirby is a junior agricultural business management major from Madera.

Brian Shiffman will take the post of vice-president. Rena Armstrong will serve as secretary and Robin Conley will act as club treasurer. Holly Cyrgna has been chosen as representative to the student council of the School of Agriculture and Natural Resources.

Lee Kaiser will function as rodeo chairman for the coming year. The club is open to all students interested in rodeo participation.

Ketchum berates postal subsidies

Congress cheated the American taxpayer again when it passed legislation authorizing further postal rate subsidies said Republican Congressman William Ketchum.

The congressman from California's 18th District labeled the bill an unjustified $755 million raid on the Treasury, especially since it passed on the heels of House approval of a Budget Control Act.

Congress had previously appropriated $1.6 billion in postal subsidies to allow for the phase in of full rate increases.

"If the subscriber wants home delivery, let him pay for it, but don't require the taxpayer to foot the bill,"

According to Ketchum, the largest recipients of postal subsidies are "Readers Digest," "Time" and "Wall Street Journal" who will receive $184 million dollars in addition to the current $194 in subsidies.

"This doesn't make any sense when you consider the company's financial situation. In 1973, "Readers Digest" did $800 million dollars in business, and in May of 1973 carried $81 million in advertising. This was a world record for a single issue of any periodical!"

Ketchum also said "Time" has a current subsidy of $17.9 million and will receive an additional $63.9 million.

The "Wall Street Journal" already receives $25.5 million and will get an additional $6.3 in subsidies.

Ketchum criticized the editorialists and news accounts demanding subsidies in agriculture, aviation and transportation but never an article against the huge sums spent on subsidizing publishers.

"American taxpayers are having a hard enough time making ends meet. They should not be forced to pay the postal costs of home delivery of magazines, newspapers, books or records."

El Corral's new phones

Are you experiencing difficulties in locating certain textbooks or class materials? Or is an instructor do you want to place some textbook orders?

Mary Green, manager of El Corral Bookstore, advised new telephone numbers are being used by the bookstore. To reach the general office call 546-1101, for textbook orders phone 546-1111 and lastly if you have need to reach the warehouse call 546-1172.

Cabaret type play planned this weekend

Two cabaret style performances of "The Campbells are Coming!" by the Morro Bay Centennial Players and a hang ten sparrow rib dinner will be held during the Morro Bay 4th of July weekend celebration.

"The Campbell's are Coming!" and a full vaudeville type revue will be performed on Friday and Saturday, July 1 and 2, at the Morro Bay Veterans Building, 209 Surf Street. The curtain will rise promptly at 8 p.m.

Prior to the play-on Friday night, the Morro Bay Lions Club invites the public to attend a delicious barbecue sparrow rib dinner from 4:30 to 7 p.m. Prices for the dinner will be $3.50 for adults and $2.50 for children.

"The Campbells are Coming!" a three-act comedy drama directed by Maria Hulsebus, was written by Jay Tobias in 1909.

Comical situations are created when the Bannigan family try to entertain Mrs. Augusta Campbell and her son, Kingston.

All tickets are $2 and can be obtained at Flowers From Plants located in San Luis Obispo and at the door.

Proceeds from these two events will help to build the new Centennial Railway leading to the Embarcadero from downtown Morro Bay at the foot of Morro Bay Boulevard.

Sunny plans of recreation for summer

Volunteers are needed for the San Luis Obispo Recreation Department summer program. This year’s program will have handicapped children integrated with non-handicapped children and special volunteers will be needed. The programs will be held at the following schools: Quintana, Peach, C.L. Smith, Hawthorne and Straker.

The program is designed for children between the ages of six and 10. The playground activities include arts, crafts, music, drama, sports and nature programs.

A modified day camp program will be held one week out of the summer at each of the playgrounds. The camp program will also be held in the local parks and will be nature oriented.

The summer program also has a library program. This program will include story hours, puppet shows and crafts.

The program is from Monday through Thursday between 10:30 and 4:30 p.m. The summer program will continue until August 21.

Applications are available at the Student Community Services Office located in UC 217. Additional information can be obtained by calling the Student Community Services at 540-2479 or by contacting the president of the organization, Carol Frost at 540-2515.

The Student Community Services is a campus club that serves San Luis Obispo for public service projects.

Backpack outing planned

If the lack of wildlife in San Luis Obispo is getting to you, why not visit the real thing at Garfield Grove.

The Outings Committee is planning an intermediate backpacking trip this weekend. People wishing to attend this outing can sign up at the Escape Route which is located in the University Union.

The group will leave at 5 p.m. Friday from the Administration Building's parking lot and return about 8 p.m. on Sunday. The hike will center in Garfield Grove which is located in Sequoia National Forest near the Mineral King area. The campsite is at the 7000 foot level and the trail leading up covers a 4000 foot elevation gain in five miles.

Bill Blakely, spokesman for the group, advises participants to bring their own camp gear, food and a bathing suit. If you need any gear such as a backpack it can be rented at the Escape Route for a nominal fee. The only cost involved will be that of gas which will be split up among those attending.

For information on future outings attend any of the committee meetings on Tuesday's at 7 p.m. in UC 217 or at the University Union. Meetings will feature a brief slide show of the previous weekends's trip and a preview of scheduled outings.

Wrestling seasons. If this comes to pass, then Poly wrestling wrestling could go even farther than it already has. And what's more, there is a guy named Terry Hitchcock in junior high. "Steve and I have been extremely close throughout his young wrestling career. Because of our excellent working relationship I feel that I will be able to coach him," said the senior Hitchcock.

So, if young Hitchcock can come close to performing as well as his dad has coached, Mustang wrestling could go even farther than it already has. And what's more, there is a guy named Terry Hitchcock in junior high.

Steve Hitchcock (left) and his father, Mustang wrestling coach, Vaughan, arm wrestle as they contemplate Steve's debut at Cal Poly next season. Steve should be wrestling in the middle weight classes.

Coach's son to tangle here

by LANCE YOUNG

Mustang wrestling fans should hope for a "like father—like son" combination the next four seasons. If this comes to pass, then Poly wrestling fans should get even more exciting for years to come.

San Luis Obispo wrestling star Steve Hitchcock has announced his intent to wrestle at Cal Poly under his father, Coach Vaughan Hitchcock.

Young Hitchcock compiled a record of 118 wins and six losses during his three year career at San Luis High. He placed third in the Southern CIF at 141 pounds as a sophomore, finished fifth at 145 pounds this spring, and won the state high school freestyle championship. He has qualified to go to the Junior Olympic High School championships this August in Lincoln, Nebraska.

During the summer of 1972, Hitchcock was a member of the United States cultural exchange team representing southern California. The group toured Japan for four weeks.

Says Steve, "I didn't have any ambitions of going to any other school but Cal Poly, although I had scholarship offers from UCLA, Alabama, Arizona State, Arizona and Arkansas."

"Steve and I have been extremely close throughout his young wrestling career. Because of our excellent working relationship I feel that I will be able to coach him," said the senior Hitchcock.

So, if young Hitchcock can come close to performing as well as his dad has coached, Mustang wrestling could go even farther than it already has. And what's more, there is a guy named Terry Hitchcock in junior high.

Steve Hitchcock (left) and his father, Mustang wrestling coach, Vaughan, arm wrestle as they contemplate Steve's debut at Cal Poly next season. Steve should be wrestling in the middle weight classes.

Two high school baseball stars, both who both come from the northern San Joaquin Valley, have signed national letters of intent to attend Cal Poly.

The pair, catcher Joe Budleselich of Linden and pitcher Dave Pencille from Stagg High School in Stockton, were highly sought after by some major universities, and both were picked in last month's major league free agent draft.

Budleselich was the 63rd round choice of the Chicago Cubs and Pencille the 17th round choice of the Milwaukee Brewers.

The 6'2" Budleselich is a left-handed hitting catcher, a fact which makes him very valuable to coaches. Says head coach Randy Harr, "Joe will add a new dimension to our offense. Left-handed hitting catchers are at a premium. He's big and strong and has professional talent."

This past season for Linden High School, Budleselich hit .366 and drove in 43 runs while playing in 18 games. He was named to the all-league team and has professional talent."

In addition to baseball, Budleselich will also play for Poly's football team. He was the All-Trans Valley league quarterback and Most Valuable Player as a junior. A shoulder separation kept him sidelined last season.

Pencille logged a 6-4 win-loss record while pitching for the Stagg Delta Kings last season. The 6'1" right-hander compiled a 1.09 earned run average, allowing only 10 earned runs in 66 innings, struck out 80 batters, and walked only 33. Three of his four losses were one-run decisions against the league champions.

"Pencille is one of the most highly publicized high school pitchers in Northern California this spring. I saw him in the Radding tournament and was impressed by his explosive delivery curve which he throws for strikes. His style and delivery are perfect, to such a degree that we won't have to do a reconstruction job on him," said Harr.

The 6'6" Pencille was named to the all-Central California Conference team and the all city team in Stockton this past season.

Track stars beat USSR

With the help of two Cal Poly freshmen, the USA Junior A clinical team defeated the Russian team 106-93 this last weekend in Austin, Texas.

Curtis Byrd set a meet record in the 400 meter run with a 46.38 time besting the old record of 46.6. Byrd also anchored the winning 100 meter relay team.

Clancy Edwards took first place in the 100 meter dash with a 10.31 clocking and a first in the 200 with a 21.37 time. The 400 relay team, which he anchored, did not finish when the baton was dropped during a pass from Charles Hopkins to Edwards.

Hammer given top honors

Dave Hamer, a senior pole vaulter from Santa Barbara, was named Cal Poly's Athlete-of-the-Year for 1973-74.

The two time NCAA division II pole vault champions, who set a meet record two years ago at the Championships and wiped it out this year with a 10'2" vault, became the first College Division pole vaulter ever to clear 17' in both indoors and outdoors, and was also a finalist in the 1973 Olympic Trials.
