Proposals suggested to get voters to polls

During the '60s, officials in Illinois placed the names of neglected voters on jury lists, a practice which undoubtedly improved voter turnouts and reduced the quality of juries.

Many states, especially in the South, have tried to embarrass citizens to the polls by posting lists of delinquent voters.

Australia, Belgium and many Latin American countries have long required citizens to vote.

Where voting has been enforced report that four to six per cent of the voters will deliberately cast blank or spoiled ballots, said Beverly.

"If there is a privilege granted individual citizens for the purposes of gaining the consent of the governed, it becomes something of a paradox to require consent and to compel free expression. You can't have a law which in effect tells you, "You will vote and you will enjoy it." This is not likely to diminish voter disillusionment with public officials. Beverly had some suggestions to encourage voting. He said excessive residency requirements should be scrapped; access to registration facilities could be improved and polling hours might be extended.

He added, "Voting is a function of public confidence in government something which is lost quickly and rebuilt slowly."

Mandatory voting would be a great, cosmetic success; but the public trust won't be reacquired by the force of law."

Proposals to attract voters to the polls are being considered by the California State Assembly, according to Bob Bever, minority leader.

Consumer advocate Ralph Nader proposed a compulsory voting law last month which was seconded, by San Francisco Assemblyman Willie Brown.

Another bill by San Diego's Lawrence Kaploll would give voters a $5 tax credit for showing up at the polls. The bill is being studied this summer by an Assembly committee.

This proposals are being offered as a remedy for the low voter turnouts which have characterized recent elections in California.

Beverly said a low turnout is only a symptom of various causes. Reasons range from bad weather and boring campaigns to voter disillusionment; especially the Watergate scandal.

"Today, voters and non-voters alike have plenty of reasons to be angry, and many a once-faithful voter is sitting out elections," said Beverly.

Mandatory voting is nothing new. A section of the city charter of Kansas City, Missouri, requires residents there to vote in all local elections. The county drew it out 20 years ago, said Beverly.

Applications for summer session are now available

Applications for the second Summer Session are now being accepted, according to Dr. Donald Russell, associate dean of Continuing Education.

Summer Session is particularly designed to meet the needs of practitioners, visiting students, teachers and others who wish to further their education, said Morris.

There are 13 courses in education, English, geography, physical education and psychology offered during the summer.

Courses are designed for local high school music faculty and also provide professional development courses for teachers in education.

Each course is worth three units and are held Monday through Thursday, during the four-week session. The courses will be held in Chumash Auditorium on Monday July 25 starting at 10 am.

Mandatory voting is nothing

A section of the city charter of Kansas City, Missouri requires residents there to vote in all local elections. The county drew it out 20 years ago, said Beverly.

Planes now underway for Mozart Festival

CATHY CARRIE

For the fourth year the San Luis Obispo community will be honoring the works of child prodigy Wolfgang Amadeus Mozart during the annual Mozart Festival, July 25 through August 4.

The festival, conceived in 1971, is to honor Mozart and his works, and draws inspiration from the composer's influence of his genius by presenting music from other periods and styles. The concerts this year include two new programs; a piano concerto on Sunday at 8:15 p.m. in the Cal Poly Theatre.

Five other concerts will be given including an orchestral concert August 15 and 16 sponsored by the Associated Students Inc. and an August 8 concert featuring the orchestra and Festival Singers at 8:15 p.m. in Mission San Luis Obispo de Tolosa.

To round out the week, a chamber orchestra concert at 8:15 p.m. will be held in the Cal Poly Theatre, an evening of chamber music will be held in Chumash Auditorium at 8:15 p.m.

Wolfgang Mozart was considered as the greatest musician of his period and his music is still performed and enjoyed today. Mozart's music has been adapted to various instruments and genres from classical to contemporary.

Additionally, Mozart's music has been adapted for various instruments and genres from classical to contemporary, making it a popular choice for modern audiences.

The festival continues to honor Mozart's legacy and showcases the range of his musical genius through performances by local and international artists. The festival is a celebration of the composer's contributions to music and his enduring influence on contemporary musicians.

The festival is attended by music enthusiasts and performances are held in various venues around the city, including the Cal Poly Theatre and Mission San Luis Obispo de Tolosa.

The festival also features concerts with local and international musicians, highlighting the diversity of Mozart's music and his impact on the musical world.

Lastly, the festival offers educational and outreach programs, providing opportunities for attendees to engage with the music and learn about its significance.

The festival's continued popularity demonstrates the enduring appeal of Mozart's music and the festival serves as a testament to his lasting influence on the musical world.
Architectural barriers made more accessible

By Mary Anne Lapointe

Disabled students will find it a little easier to get onto the sidewalks by the end of July. Douglas Gerard, executive dean, said that 17 ramps are being installed on the northeast corner of the campus this summer. "The curb cuts will make the campus more accessible to the students," Gerard said.

Cal Poly is complying with a resolution passed by the California Legislature, that all public buildings must be made accessible to physically handicapped students. The resolution requires that a report be submitted to the legislature in 1975 on what is being done to resolve the architectural barriers," Gerard said.

The first phase of the program began last summer when the University installed 18 ramps on the south corner of the campus. The ramp being installed now should be finished by the end of July," he said. Wheeler Construction of San Luis Obispo is the contractor for the project, is doing the job for $80,000.

Gerard said the University is also creating more parking areas for disabled students which will be more identifiable. "The parking spaces will be marked with a stencil on the curbs before erecting a handicapped parking sign to the south of the railroad," he added.

The movie will be shown in the University Union at 8 p.m. Admission price for this film is 75 cents.

Problems hit KCPR radio this quarter

Cal Poly's radio station KCPR has had its problems since it went to 200 watts on May 11, 1974.

As soon as the station went to 200 watts, a problem developed in the power supply. Only two weeks later, the transmitter blew up. The station is back down now, but station co-manager Tony Leon said the transmitter should all be in by August.

But the problems with the transmitter have not affected the station's programming. KCPR plays a variety of music, from the classical and semi-classical music of the Pacific Coast to the jazz of the big bands or Sunday afternoon.

KCPR also handles a "oldies" program from noon to 3 p.m. Sunday, besides a program of old radio and movie themes Sunday evening. Sunday by Request tops off Sunday evening, when listeners can call in their favorite programs.

During the week, KCPR plays a variety of tapes, with agriculture, international problems and public interest news. The station has local, campus, state and national news weekdays between 6 and 9 p.m.

"KCPR gets all its power back in August, the station will reach from parts of Morro Bay to parts of Santa Barbara. Residents of Pismo Beach and Avila will not be able to pick up the station because hills block the transmission," said Leonard.

Students in Journalism 341 run the radio station. Leonard said the station is open to students who are interested in going "on the air, the students can serve with the student council of the School of Agriculture and Natural Resources.

The club serves all farm management majors at Cal Poly.

Lohse elected to serve for next year

Kenneth Lohse has been elected president of the Farm Management Club at Cal Poly for the 1974-75 academic year. Lohse, the son of Mr. and Mrs. William Lohse of Willows, is a senior farm management major.

Other officers to serve with Lohse are Ken Buley of San Luis Obispo, vice-president; Greg Ruddell of Saugus, secretary; Charles Bordewich of Brawley, treasurer; and Ray Rall of Alameda, activities chairman.

Students interested in going "on the air" can be selected to serve with the student council of the School of Agriculture and Natural Resources.

The club serves all farm management majors at Cal Poly.

Tennis courts to see light

by LEA BROOKS

A lighting system for the tennis and outdoor basketball courts adjacent to the Men's Gym will be under construction this summer, according to E. Douglas Gerard, executive dean.

A contract was signed Monday, July 15 with the computerized security company of Monterey for $66,444. A pre-job meeting was held for Wednesday, July 24 and construction should start shortly thereafter, Gerard said.

ARENDI-MASHER GRANT AR-" "chitects, Santa Barbara, are the project architects and Jack Wilson, president of AHR Enterprises, is the general contractor for the project

The 10 tennis courts will be on a time switch. A card reader system consists of a meter box with a slot where a card is inserted to turn on the lights for a specific time span. Gerard said cards will probably be checked out in the residence halls and the University Union desk by handing in an ASI card. He said most of the details will be determined when the Student Affairs Council returns in fall quarter.

Cal Poly students will have priority on the tennis courts although Gerad feels the campus owes the community a responsibility. Cards good for one year might be sold to downtown people for a specific price, he said.

"Cards will be changed every year so they won't carry over," Gerard said.

The venture was second-hand cooking and a use of un-used food.

When Wrasse decided to create his scholarship fund, he visited the university and college campuses of this state. Fortunately for Cal Poly, one university campus embarrassed Wrasse by thinking him a vagrant. Julian McPhee, president of Cal Poly at the time of the Wrasse embarrassment, German and Wrasse to look at the Cal Poly campus.

When Wrasse arrived, he hung up his hammock behind the Agriculture Mechanics buildings and inspected the campus. Wrasse liked what he saw. When he died, Wrasse left his estate to Cal Poly, and to 45 continuing students.

The scholarships this year are meant for all of his estate to go to Poly campus.

By BRUCE WRIGHT

Leopold Edward Wrasse was rich, eccentric, and felt that he earned his fortune by making shrewd investments. Wrasse lived long enough to enjoy the fruits of his labor and to see the fruits of some of his investments before he died.

The Wrasse estate increased. During that interval, the Wrasse challenge took up a bit of time. Gerard said if another energy problem, but SAC overrode his veto and included it in the campus budget. Wrasse liked what he saw. When he died, Wrasse left his estate to Cal Poly, and to 45 continuing students.

Recent vet increases may be delivered late

The Veterans Administration reminds some 2.5 million persons who receive dependency and indemnity checks due July 1, were paid at the old rates.

Gerard said that August 1 checks will reflect the increased rates authorized by the new law.

"If it is not necessary to inquire about or apply for the increases to receive them," he said, "since they will be paid automatically to all eligible veterans and dependents."

Summer concert beneath the stars next Wednesday

Here's a chance to sit under the stars and enjoy the musical talents of the Cal Poly Summer Band. The band will perform in their first summer concert next Wednesday evening at 7:15 in the H.P. Davidson Music Center Amphitheater.

The concert, featuring a variety of music suitable for easy listening, will last over an hour. Among the many selections to be played will be a Spanish march, "First Lady." The crowd was 50 to 60 musicians The nucleus of the band was already attending Cal Poly, and going to 70 first time students at the university campus embarrassed Wrasse by thinking him a vagrant. Julian McPhee, president of Cal Poly at the time of the Wrasse embarrassment, German and Wrasse to look at the Cal Poly campus.

The scholarships this year are meant for all of his estate to go to Poly campus.

By BRUCE WRIGHT

The veterans administration recently provided me with an update on the status of the new law providing for increased veterans benefits.

The law provides for 18 percent to service-disabled veterans, and 10 percent to non-service-disabled veterans who have dependents.

Miller stated, regular monthly checks due July 1, were paid at the old rates. Miller then went on to say that August 1 checks will reflect the increased rates authorized by the new law.

"If it is not necessary to inquire about or apply for the increases to receive them," he said, "since they will be paid automatically to all eligible veterans and dependents."

Payments to single veterans with 10 percent disabilities were increased from $52 to $62, while payments to the most severely disabled veterans were increased from $1,232 to $1,454 monthly.

Veterans rated 50 percent or more disabled by the VA receive additional allowances if they have dependents.

Officer changes in upcoming year for Poultry Club

The president of the Poultry Club for the upcoming school year will be Benjamin Koh, a senior from Buena Park.

Other newly elected officers for the club are Kevin McConnell, vice-president; Linda Kelly, secretary; William Warwick, treasurer; Mary LaRoache, representative to the student council of the School of Agriculture and Natural Resources; and Nancy Norton, historian.

Fifty majors are represented in the Poultry Club.
Explore the mini-Eden at Stenner Creek

by BRAD BROWN

Most of this campus is in a transitional stage. Much of what is here now will be something else in the near future. This means anyone interested in getting a feel of the beauty and comfort of the campus should do it now.

Stenner Creek has had its share of hard times. It has been channeled, dredged, drained, silted, dammed, charmed and blamed for the death of a Poly student.

Right now, at a very low point, the creek barely wavers the lush foliage covering its banks. The trees and many of the muddy flora along the creek's path offer a cool respite than can be reached, enjoyed, and left in a single hour.

Probably the most comforting area is between the now defunct access road from Highway 1 and the new access road under construction.

Here, Stenner Creek runs parallel to Highway 1 behind newly plowed fields (behind the Crop Department field unit) but the creek is slow to follow the highway's path. The vibrations are mollifying, and the traffic is hidden by radio hill and another large field of crops.

Beside the creek are the elderly sentinels of local ecology; the eucalyptus trees. Accompanying these masters are the willows, the oaks and walnut trees.

In this mini-Eden, the low buzzing of ardent bees and high-pitched percussion of wind in the leaves conduct restful concerts.

The only flies in the anti-neurotic atmosphere are the poison oak booth and the difficulty in attempting to cross the train tracks by way of W. Bishop Road.

A bit of care and ingenuity will suffice.

The Stenner Creek hike offers a short, unimposing jaunt to begin the summer exploration of Cal Poly.

Summer is the best time to get out and breathe fresh air and get your head together with the aid of the beautiful California Coast.

Callahan elected CEA president

The new president of the Construction Engineering Association at Cal Poly is Patrick Callahan.

Callahan, a junior construction engineering major, is the son of Mr. Mrs. Herman Callahan of Walnut Creek, Calif.

Other officers are Colin Cresswell of Whittier, vice president; Mike J. Courtois of San Luis Obispo, secretary; and James E. Lagnariolino of Ormond, treasurer.

The association serves the 64 majors in construction engineering, which is one of the five bachelor's degrees offered by the School of Architecture and Environmental Design at Cal Poly.

Conversationists select new pres.

Paul Kanaien will serve as the student representative chapter of the Soil Conservation Society of America. This is a professional association of soil science majors at Cal Poly.

Kanaien is the son of Mr. and Mrs. Raymond Kanaien of Newark and is a senior soil science major.

George Boero will act as vice-president and Peter Herber will serve as secretary-treasurer. The representative to the student council of the School of Agriculture and Natural Resources will be Luke Marden.
A little more than a racket

Sometimes it seems that the only thing swinging on campus in the summer is a tennis racket. And for the next couple of days, Pacheco Grade School will be part of the action.

Picture it. Sixteen summer-schoolers from kindergarten to the sixth grade swinging away with rackets from home. Unfortunately, there are not always enough tennis balls to go around, even though one or two can always be found in the bushes. Leftovers from some overzealous swinger.

Instructing this group of aspiring pros is Chuck Greenall, a former Poly grad. "The kids love this," he says. "There's a lot of enthusiasm out here on the courts."

Also offered during summer school at Pacheco are arts and crafts, creative writing and drama (taught by Becky Shaub, a recent Poly graduate) math and reading.

Attention on the courts wanders as teacher Chuck Greenall points out a few techniques.

Barefoot Jon Hovdal, first grader, swings with novice form.

Summer school teacher, Chuck Greenall, helps Jon Hovdal with his grip on a racket, almost his equal in size.

For third grader, Kim Plumer, It's the tongue that does it.

Photo essay by Rondi Wald
Pulling a sled weighing over 30,000 pounds behind a tractor, a member of the Cal Poly Tractor Pull Team drags the load over the dusty field until both sled and machine grind to a halt.

Tractor Pull team will pour it on at 9 fairs

BY LANCE YOUNG
The Cal Poly Tractor Pull Team will be involved in nine fairs throughout the San Joaquin Valley this summer until October 31, and lugging around a 30,000 pound sled just isn't that easy. Don't let the title fool you, this is not like your ordinary college team that competes against rival colleges. Rather, the Agriculture Engineering Department here at Cal Poly, along with support from Cal Poly Foundation, rents out the sled and the team that goes along with it to local farm groups. According to Ron Merson, co-chairman of the team, the sled and team rent out at a base price of $250 with a two man team. If the fair wishes more men on the team, there is an added cost of $50 for each man. The team, up to seven men, handles all aspects of the pull from weighting in to supplying an announcer. "Our motto for preparation at a pull for our team is five hours before, five after, although we usually don't take that long at the end of the pulls," said Merson.

The team also charges for transporting the sled, but this summer, the people in the San Joaquin Valley got together and all will divide the cost among them. Merson said that leaving the sled in the valley instead of bringing it back each time cuts down costs for the fairs. The sled can pull over 30,000 pounds. Roy Shaffner, also co-chairman of the team, described the sled as a weighted semi-trailer connected to a steel sled. In the front is the actual sled which is connected to the trailer and drags along the ground. When a tractor begins to pull the sled, the weights are in the back over the wheels, making the load lighter. As the sled moves forward, the wheels in the back are connected to a chain which is connected to the weight menu moving them forward. As the weight moves forward, the load on the sled gets heavier until it stops the tractor. The distance it takes for the sled to go from starting until it stops is then used as the determining factor in the pull. Shaffner said that the participants are usually local farmers with their tractors. There are two divisions to enter under, Stock and Modified, and these divisions are divided into weight classes. In the stock division, there are two subdivisions of drivers; one that the driver and owner of the tractor must be from a local area in reference to the fair, and the other is an open division. In the modified, there is only the one division which is open to anyone.

The title for the pulls will be October 13 at Fresno. This will be the California Mid-State Finals. Besides the regular open divisions in both stock and modified, this day all the previous winners in the Stock-local classes will compete. The prize money at the pulls is taken from the entry fee of $10, except at the Mid-State Finals where it is $25. This money is split, with first place taking 50 per cent, second place getting 30 per cent, and third place getting 20 per cent. At the Mid-State Finals, an extra $100 will be added to the total.

The Tractor Pull Team has been around for three years at Cal Poly. As far as Shaffner knows, Cal Poly is the only college in the west to have one. The team, which also handles the annual pull at Poly Royal, is thinking of building another sled for garden tractors. Also serving on the team are Chris Park and Scott Bell who act as assistants to Merson and Shaffner.

Shaffner estimated the cost of the sled in just parts alone to be near $20,000.
The next pull the team will be involved in will be July 22 at the Madera District Fair at 4 p.m.

Added load limit to save on fuel

A decision by the State Department of Business and Transportation to increase the weight limit by 10,000 pounds per unit should make a substantial decrease in the fuel consumption used to move California farm commodities. This ruling went into effect at the beginning of March 1973 and concerns only the carrying of agricultural products from the farm to the first point of sale. This ruling was opposed by groups who were afraid of a decrease in jobs or a denial of additional jobs for truckers. Says Allan Grant, president of the California Farm Bureau Federation, "a close check shows the harvest season produces an especially heavy demand on all available transportation equipment. An even greater demand is expected this year due to the anticipated record crop production which will compound an already tight situation." According to Grant, the expected weight allowance was authorized first last summer and then showed a great savings in fuel consumption. He also said that last year's concern was mainly for improving product flow during the peak harvest season, but because of the recent fuel crisis, the savings of fuel is of added importance.

Grant also said that the added load limits should allow harvest and processing equipment to function smoothly, since the added capacity per load will reduce the number of trucks at the waiting point.

Sports brochure is best in nation

Wayne Shaw, Sports Information Director at Cal Poly, had a real winner with his 1974 track brochure when it was named the best in the nation at the College Sports Information Directors of America Convention last week. Shaw also noticed divisional awards for two of his other sports brochures. Both the 1973-74 football and basketball brochures were judged best in the western college division.

This was the fourth time in ten years for Shaw to win a best-in-the-nation award. He received the first award while at South Dakota State University. The other three have been during Shaw's eight years at Cal Poly.
Ups and down of colt training

Rapport between man and beast on campus

by RICHARD McMillen

“C’mon, baby doll, get up!” The horse lay awkwardly in the dirt, defying urging from trainer Bath Territo. Her head, clipped by a halter line to a ring in the wall of the training yard, was protected from the cement by two mattresses.

“Boy, these two are a pair,” said Bath, in exasperation to Loretta Watrin, Territo’s horse, an Appaloosa named Sundown, who was also in the dirt, saddled and haltered. Both horses were partially hobbled by a Bolin loop looped around their shoulders and tied to their left rear hoofs. And both were not cooperating with the training program.

Sundown emitted groans and looked highly uncomfortable with his head slung up on the halter line. The students, though, insisted the horses are only being stubborn. “Just like a little kid that gets mad and won’t get up,” said Laird Cooper, a student assistant at the horse unit.

A stream of water from a hose held by instructor Gene Armstrong splattered on Sundown’s muzzle. He squirmed and thrashed against the mattresses and grunted in his efforts to free himself and stand. Armstrong advised Loretta to remove the saddle and let Sundown have the remainder of the afternoon off.

A veteran cowboy and instructor, Armstrong advises his students in colt breaking to establish a rapport between themselves and their horse. “It must be understood before it can be effective; it must be effective before it can be understood,” he repeats to students having difficulty getting their horses to comply with commands.

“We go slow,” said Armstrong, explaining that each horse, as with individual people, has its own capacity for learning. Most of the horses are 3½ to three years old and have a mentality equivalent to a four-year old child.

“You always have to be on your guard,” said Mary Burks, an animal science senior, as she moved about her horse, Lady, modifying her with a gunny sack. “That’s what all this ground work is for, to prevent the horse from being hurt.”

Most of the young horses, or colts, that were haltered to rings along the wall in the first, or “ground work,” stage of colt training. This involves “sacking out,” hitting the horses with gunny sacks to accustom them to brushing or bumping against objects without becoming nervous when carrying a rider.

Jean Armstrong, an instructor in the colt training class, advises his students to go slow. Armstrong is shown here slowly getting a colt used to a bit. Armstrong is a veteran cowboy and instructor.

Escape from pressure
Intramural program goes into full swing
by CONNIE FITTS

The Cal Poly intramural sports program is in full swing this summer. It's a good way for students to socialize and relieve themselves from academic frustrations and pressures.

Larry Gay, assistant to intramural coach Ernest Wheeler, said the program has received a good turnout of students. The program meets Monday through Thursday from 7 to 10 p.m. and Sunday from 1 to 4 p.m.

On Mondays and Wednesdays, a practice round-robin basketball tournament is held. From 7 to 8 p.m., free recreation time is offered to anyone not on the basketball team. The tournament is held from 8 to 10 p.m., with the rest of the time until 10 p.m. given to free recreation again. Those who play in this tournament will have gained the practice for the real tournament at the end of August.

On Tuesdays and Thursdays, intramural teams are formed with volleyball. On Tuesdays, there are scheduled tournaments. Thursdays are more relaxed with free recreation time offered.

Softball players get to show off their skills on Wednesday afternoons, from 4 to 6 p.m. Gay said the teams are short a few players and anyone interested should contact the intramural sports office, Room 104 in the Men's Gym.

Sundays are the most relaxed, with the gym being open to anyone wishing to use the facilities. Gay encourages everyone to come, saying he and the other members of the program would be happy to put up badminton and volleyball nets or any other sport equipment.

Referees and scorekeepers for the tournaments are the sixteen students enrolled in Coach Wheeler's intramural sports class.

The program, which started the first week of Summer Quarter, will last until August 1 when the Men and Women's Physical Education Workshop will take over the intramural facilities. The workshop is held for a week at Cal Poly for college and high school P.E. instructors from all over California.

The intramural program will resume its activities after the end of August, with added attractions of jogging and badminton.

AAU Championship
Hour run under the sun

BY LANCE YOUNG

Starting off under overcast skies and finishing under the hot sun, 13 competitors ran in Saturday's Coastal Section, National and Southern Pacific Association AAU One Hour Run Championship. Being held for the first time at the Cal Poly Women's track, 11 men and two women entered the run.

At the end of the 60 minutes, there was a tie for first place with Cal Poly's John Wessolon and Ida Downs of United States International University in San Diego running the distance of 6½ miles and 7 yards.

The furthest distance run by a woman was 7½ miles and 45 yards which was accomplished by Jean Sparrin of Arroyo Grande. It was birthday number 7 for her the day of the run.

Ken Harvey at 40, the oldest runner on the track, ran for 8 miles and 213 yards while the youngest runner, Lisa Verdugo, 16, of San Luis Obispo, ran 5½ miles and 360 yards.

Two Cal Poly teachers were in the run also. Don Williamson, an Economics professor, ran 9½ miles and 174 yards, and Larry Bridges, Cross Country Coach and Physical Education teacher, ran 9½ miles and 62 yards.

The run was sponsored by the San Luis Distance Club and was for National and Regional honors. The AAU holds many races of this type over the summer, with the results getting mailed in. They are tabulated and the person with the best distance overall wins the championship. Also, a person wins in his region if he got the best time there. A winner will only be in one race, and their results are final.

There will be another run like this to be held in Santa Barbara next weekend.

Cal Poly coach Barry Bridges (l) and Stan Rosenfeld (r) compete in last Saturday's coastal section National and Southern Pacific Assoc. AAU One Hour Run Championship.
