Community project creates gardens from unused lands

Our purpose is to turn idle land in the community into productive gardens. This land is plentiful throughout the community. These are empty lots that grow healthy weeds, but nothing else. Through our gardens, we hope to help the community meet the challenge of producing food for the people and for our own environment.

There are many people in the San Luis Obispo area who are in need of the basics of life, but lack the knowledge to improve their situation. That's where the Crandall Gymnasium comes in.

The Cal Poly community has a wealth of know-how, experience, and energy which could be put to productive use through the Community Gardens Project. If you are a student in one of the agricultural sciences, this project offers a great opportunity for you to make productive use of what you've learned in the classroom. These students unfamiliar with the many aspects of gardening will have the opportunity to learn the correct way of maintaining a garden.

We hope to initiate the Community Gardens with a donated section of land and a small group of interested students and non-student members of our community. Fifty percent of the produce grown in the community gardens will be divided among those students working in the gardens. The other 50 percent of the produce will go to certain non-profit community agencies or to a family facing an emergency situation in need of the produce.

If you can donate idle land, or know someone who can provide tools, fencing, seeds, suggestions or help, please contact the Community Gardens with a donated section of land and a small group of interested students and non-student members of our community.

Vacancies are still available in the Veterans Work Study Program. Clerical work will be required in the Veteran Affairs Office and hours will be arranged around the students' needs. Students will be chosen on the basis of financial need by the VA Office in Los Angeles.

To qualify a vet must presently be in full-time attendance at Cal Poly receiving VA Educational Benefits. General work will be required in the Veteran Affairs Office and hours will be arranged around the students' needs. Students will be chosen on the basis of financial need by the VA Office in Los Angeles.

Ford has a better (?) idea with WIN button

Dear President Ford:

I was glad to hear your speech on inflation last week. I was particularly pleased to know you've decided to make the Whipping Inflation Now (WIN) button the sounding board for your outmoded and corporation-biased policies.

I'm glad a man of your intelligence has decided buttons are going to be one of the most effective ways of fighting inflation. The housewife, the unemployed factory worker all appreciate the effort that was put into your economic scheme. Words cannot express how happy these people (like the one hit hardest by inflation) were when they found out buttons would be the solution to all of our economic problems.

The WIN buttons will be very popular at unemployment offices throughout the nation. Labor unions will be especially glad to know the buttons will be there to turn to when some of their members start getting laid-off. You can expect a phone call from George Meany any day now congratulating you on this fine example of a Madison Avenue job.

Mr. President, you really have upon a novel idea with these WIN buttons. We are going to whip inflation in no time. My only regret is other Presidents should have used this tactic in the past. Consider Mr. Johnson and the Vietnam war—what a difference buttons would've made there.

Just think what the WIN (Westernland And Nagami) button could've done for his foreign policy. I think that kind of button could've had great potential on our college campuses.

It's also a pity you didn't think of the buttons when the news came out that the $4 million that was spent to help overthrow the Allende government in Chile. Those buttons could have been called CIA (Cointelpro Infiltration of Allende).

But we can't cry over past events so I guess I'll have to be happy with your buttons on inflation.

Before you came out with these buttons, a lot of people were worried you wouldn't do anything serious about inflation. Mr. President, you sure showed them who plays football without a helmet! I'm overjoyed you didn't mention another way to help the fight against inflation would be to stop all financial support of all the military dictatorships that are our friends. The control of millions of peasant lives is more important than just a few million dollars of our tax money.

Another part of your speech that was great was the one place where you talked about coal burning instead of oil burning for power plants. Some advice Mr. President: don't let people give you the old line that coal burning causes air pollution. There's little evidence to back up the accusation.

Americans must choose between clean air (and a bad economy) or a healthy money picture with plenty of power to run television sets and lights necessary for our football games.

But it's the buttons that has me really enthused. Before you, other Presidents would try to stir the country with talk of the "The Only Thing to Fear..." and "What I Can Do for My Country?" But not you, Mr. President.

Who needs idle rhetoric when we can have shiny buttons that have "WIN" painted on them?

It's also a pity you didn't think of the buttons when you talked about the coal you're spending millions of peasant lives is more important than just a few million dollars of our tax money.

Ford has a better (?) idea with WIN button.

Holley's death: did he leave us with honor?

Editors:

Like most Cal Poly students, I was surprised to read about the death of John Holley in yesterday's Mustang Daily. I am sure that our sympathies are with his family at this time.

It is also honorable that the ADL should take some steps toward greater respect to our former President. However, the steps that have been taken seem to be taken out of an overwhelming sense of guilt and not reason.

When one lowers the flag at half staff, one is taken in preparation for a memorial fund, it implies that the person so honored is one who has served, in this case Cal Poly, with dignity and respect to his fellow students.

This is not a libelous crabapple. John Holley was a young man who seemingly did not have the courage to help himself out of his problems, so far as to see the flag lowered in honor of a man who seemingly did not have the courage to help himself out of his problems or to seek outside help. It seems that this is the crucial question nagging at the heart of the steps taken by the ADL. I will be as bold to suggest that there

Foreign study applications now available

The Scandinavian Seminar is currently accepting applications for the 1976-1977 academic year. Individuals that qualify will have an opportunity to live in Denmark, Norway, or Sweden. The program is open to college students, graduates and adults interested in living and studying in a foreign country while learning the language.

Those who qualify will attend a three week language course before staying with a family in one of the countries. Participation in the program will then live and study with Scandinavians at either residential schools for continuing education or some other type of specialized learning institution.

The student's studies, experiments and progress will be reviewed and discussed during mandatory introductory, midyear and final sessions. The primary objective of the overseas program is to enable participants to work on independent study projects in their specialized field of interest. Full or partial credit is given by many colleges and universities for the work-study program.

The cost for tuition, room, board, one-way group transportation from New York and all course connected travels in Scandinavia is $3,300. Some scholarship loans are available.

With honor...

(Continued from Page 2)

are people around, maybe at Cal Poly, whose personal situation is much worse than that of John Holley's at the time of his death. It would be a time-consuming effort in trivial historical knowledge to point out examples of past figures who overcame personal obstacles and achieved greatness. I will go so far as to say this is (or should be) one of the reasons that we are here at Cal Poly: to gain access to knowledge, plus the socialization process that automatically occurs to solve not only our problems, but those of others.

Certainly, there must be some other way of showing our respect to John Holley, a way that not only shows respect to him and his family at his death, but a way that shows respect to the personal who have the courage to face their problems head-on.

TELL IT LIKE IT IS
by Mary Anne Lapointe

Should Nixon testify at Watergate trial?

Dale Duke, Industrial Arts, Junior:
No. It would be bad for the American image. We proved we could get Nixon out of office. We should leave it at that.

Kevin Langara, History, Junior:
If he got the chance to testify, he would never make it to the witness stand. Before he got there he would create a diversion that he was dying. He showed he lacks in confidence.

Jean Nel, Biological Sciences, Junior:
Yes. There's been too much doubt about where he stands. It should be cleared up about what went on. All those reports from his doctors sound like excuses.

Renee Sharer, Industrial Engineering, Junior:
I'd say yes. He's a citizen like anyone else. He has the obligation to testify since he was served with a subpoena. He should not be treated differently.
