GSU expected to get SAC's endorsement

by FRED VULIN

Final approval of the revised bylaws of the Gay Student Union is expected tonight when the Student Affairs Council meets to vote on the laws governing the controversial group.

SAC Chairman Mike Hurtado believes only three to six council members will cast no votes on the bylaws after student representatives to AIS attorney Rich Carles. SAC approved the original bylaws in March, 1973, but University President Robert E. Kennedy refused to give the AIS official university recognition.

Kennedy cited one section of the old bylaws that prohibited membership to non-homosexual students as a reason for withholding official recognition. The group hopes this will be provided now that they have changed the laws. SAC has approved its new laws, which read:

"The Gay Student's Union is hereby organized for the purpose of providing a forum for the.institutional study of the phenomena of homosexuality on a campus and community level."

After Kennedy's denial of recognition, the group, headed by Larry Bland, met back the University. The Gay Student's Union is expected to be approved tonight when the Student Affairs Council meets to vote on the laws governing the controversial group.

Poly's expansion: TGIF's cause poor city relations

by CLAUDIA BUCK

Cal Poly seems under fire by the Human Relations Commission for Monday night's City Council study session.

According to commission member Mike Raymonds, the group sees two areas of serious concern in city-campus relations. The university's growth and problems with fractal TGIF's.

"The university is being unfair to the city because we can't grow as fast as Poly is forcing us to," Reynolds said. "Our concern is that Poly is expanding beyond San Luis Obispo County community's ability to cope.

Citing this year's 100-plus-jump on predicted enrollment figures, he added that Poly "can't keep up after the fact, leaving the city to cope with inadequate water, sewage and housing facilities."

In response to the commission's report, Councilman Keith Gurnes moved that Poly be required to prepare an Environment Impact Report (EIR) so that resources can be compared with growth of the university. He said the EIR would be "a constructive, positive way of ascertaining the correct balance between city-campus expansion.

Gurnes sees Poly's continued growth outside the city as an impact, affecting the quality of education for Poly and TGIF's, past, forcing students into an environment of TGIF's and other non-student residents.

However, he withdrew the motion until the Dec. 5 regular council meeting to allow the Poly administration to review the report and make suggestions to the university representatives to present their side.

In terms of the TGIF situation, Councilman Jules Porteous proposed that the council give Poly a chance to present their case before presenting possible acts to the council. The motion continues at the Dec. 5 council session and in conformance with the ASI, the Interfraternity Council and in an act of "good faith to the community.

The moratorium will last for the remainder of the quarter and will give members of the AIS, the Administration and the community a chance to find a possible solution to the problems from the Friday gathering when sometimes acted more than 700 people.

One of the areas the various groups will explore will be a permanent location for the parties. Locations within the city, the county and the university itself will be considered.

The council will also study a mandate an amendment to the SLO Municipal Code which says: "Community dining facilities in student housing complexes shall not sell or serve alcoholic beverages except occasional guests of residents, or pursuant to, and in accordance with the terms and conditions of a use permit granted by the city.

Nothing to alleviate the problem while the city has," Gurnes said. "Our concern is not the responsibility of the university in confronting the problem, but also extending an invitation to representatives of the ASI, the Interfraternity Council, the Human Relations Commission, the League of Women Voters, City Administration, the Police Department to the City Council and the Los Obispo media. The meeting is scheduled for Nov. 30 at 10 a.m. in the City Hall Conference Room. The council is now discussing the commission's report and will continue with the Dec. council meeting for possible action by the council.

Vets to get more details on benefits

Veterans may receive a portion of the new benefits when President Ford signs the bill into law.

If veterans wish to learn more about their rights and benefits under the new law, they should attend the hearing on the bill Wednesday at 11 a.m. at the Benicia Administration and Educational Building in Benicia.

Energy consumption: assemblyman's topic

Gary Breen, senior consultant to the energy commission, California State Assembly, will speak on "Architecture and Energy" Thursday, Nov. 8, at 11 a.m. and 2 p.m. in the Architectural Gallery. Breen will discuss several aspects of the Warren-Alquist Bill. The bill will try to reduce the unnecessary consumption of energy.

This past month hearings have been held in Sacramento in the energy commission which will be established this coming January and the standards that will be enforced.

Within 15 months the war on the war will end and help him or her to secure those rights and benefits guaranteed under the law."

ASI hosts plaza dance

Live music and a chance to mingle with AIS officers will be afforded Thursday, 11 p.m. in the University Union Plaza. The ASI, the Inter-Fraternity and Concert Commissions, as well as the entertainment and concert hour will feature the usual dance.

According to Vice-President Mike Hurtado, the concert is to be an experience that "will make us all ask any questions they may have."
Solutions offered for TGIF problem

Editor:
At InterFraternity Council President this year, I have become involved with the problem of TGIF’s (Friday afternoon beer parties) and the resulting poor relations which have occurred between the fraternities and the community. While TGIF’s have always been a minor inconvenience to community residents, an increased enrollment this year has heightened the parking disturbance, sexual assault and sanitation problems. It has reached the point where an alternative to the weekly beer party at the local fraternity houses must be sought.

Last spring when the TGIF problem began to mushroom, I.F.C. began to work with the Human Relations Commission and came up with a set of guidelines for the fraternities to follow where the parties were concerned. These guidelines have been followed as much as possible since that time.

A moratorium on TGIF’s has been declared in order that members of the community, Cal Poly administration, and various fraternities might work together to come up with a solution satisfactory to all concerned. While this is only temporary, it provides a reasonable amount of time in which a more lasting and final solution may be found.

One suggested answer has been to discourage TGIF’s permanently, thus eliminating the most immediate problems. However, do not believe this solution would solve the basic problem of student relations within the community. Instead of one big gathering once a week, constant, minute parties might cause much annoyance to surrounding residents.

Another alternative is to take TGIF’s out of the city limits altogether to a more sparsely populated area in the county where I.F.C. or the individual fraternities could lease land. However this would cause over difficulties concerning county ordinances, and the driving hazards after TGIF’s would be increased as the drive would be a longer one.

The most practical solution I foresee would be to hold the parties in an unplatted area of the campus. Hereby solves the problem of disturbing near-by residents and keeping the gathering close enough to where students live to prevent possible long distances driving inconveniences. This would allow students to have a good time while eliminating any disturbances with the community.

Avila Bay Party Cruise Raffle Tickets will be drawn today at Sailing Club Meeting at Ag Engr 123 7:30 p.m.

Don’t let it happen!

Editor:
A couple of weeks ago I was driving up the coastal highway and drove to Point Sur, one of the few accessible beaches in the Vandenberg area. Being a week day it was deserted, save a few fisher folk fishing boat offshore. The wind blew in an offshore direction so the way the point was situated and swept the water clean and emerald. I felt a certain contentment, gorging myself on these visual feasts.

I chuckled, cynically, thinking of the area in the work-a-day rush to the south; that energy giant, the wind farm, said some of us here, L.A., and I said out loud, to nobody there; "Don’t it happen here." But it is happening here. If so...

Arctic winter lecture topic

A veteran polar explorer will tell how he and his party survived a violent arctic winter in a film lecture on Nov 13 at 8 p.m. in the Cuesta College Auditorium.

In "The Romeo Expedition to Antarctica" Norwegian-born explorer, geographer and lea­ surer Capt. Finn Ronne will describe his 400-day trip through the cold, snow-covered South Pole where he and members of his party endured a harsh winter to capture on film the ancient beauty and unusual polar life of the South Pole.

For all your battery-operated equipment try Mid-State’s batteries. They are fresh. They have not been on a shelf for months. We order in small quantities and we order fre­ quently—assuring you of fresh­ness. Naturally, we have re­ chargeable batteries and battery chargers as well. And all at wholesale prices. While you are at Mid-State take a look at the Sony-SuperScope C-101 recorder, it has built-in microphone and anemometric wind-off. Only $40.95. 1441 Monterey 543-2770

Letters

members and city and county government.

At the present time this solution would be impossible as alcohol is not permitted on the campus grounds. It should be noted that only two out of the nineteen State Universities within California are serving alcohol and that there is no legal reason why this is not.

Another factor is that most other campuses around the world have all the same problems. This of course is merely ad­ dition, but is relevant, that this type of problem does occur in other parts of the world.

While I.F.C. presently has no concrete answer to the problem, it is willing to communicate with the city government and school administration in coming up with a viable solution. It hopes in organizing such a conference whereby members of the commu­ nity, administration, and fraternities may get together and discuss what can be done.

Joe Maynan

Film critics lecture topic

"Movies vs. Cinema" is the title of a lecture to be presented by H. David Evans of the Cal Poly English Department Nov 14 at 11 a.m. in Room 150 of the University Union.

Evans says, "People have widely varying attitudes toward film. During the lecture, I will describe my personal per­ spective that exists within the realm of film itself. In the "Low Brow" critics who write film reviews in terms of the history of the film. During the lecture, I will describe my personal per­ spective that exists within the realm of film itself. Tell it like it is

What are your opinions on the frat-sorority system?

by MARY ANNE LAPONTE

Janet Malin, Business Administration, Sophomore:
"I don't know anything about it. I know some guys who joined a fraternity, but some girls who tried out for little sister. I really don't know much about it."  

Kurt Myers, Ornamental Horticulture, Sophomore:
"There's always something to do in a fraternity. There's always someone around to trust. You learn to live with people and to work with people."  

John Probeski, Business Administration, Sophomore:
"It's really a good idea. I like the idea of brotherhood, only thing I don't like is the lack of privacy. My sister was in a sorority in San Diego. She said she could never be alone when she wanted."  

Roy Haematab, Business Administration, Junior:
"Fraternity is a place to make friends, a place to stay and there's good parties there. I've got to get into one next year. I've heard people are having a good time."  

Dave Stupi, Engineering Technology, Sophomore:
"I wouldn't join one. They are not to my liking. They remind me too much of the barracks in the service and forms in college."  

Janice Dehliquist, Liberal Studies, Senior:
"What sorority? I think there is one honorary sorority on campus. There should be more sororities if there are so many fraternities on campus. They serve their purpose."  

EOP leader choice lauded

by CLAUDE SMITH

This is to be a weekly column dealing with the business and social activities of the Black student body of Cal Poly. We will have some constant communication at least once a week. This column will be written under the heading of "Umoia", which means "to strive for and maintain unity in the family, community, nation and race."  

I'd also like to extend a warm welcome to the freshmen and J.C. transfer members of our little society here at Cal Poly during, or prior to, any future deliberation concerning the program.  

We sincerely hope that this program proves consistent. We also thank the administration for recognizing the past experience, quality and the ability of Mr. Wallace in his decision. We sincerely hope that these qualifications are kept in mind for recognizing the need for leadership and extending a hand in helping the student body of Cal Poly. We don't want to mislead others and expect the administration in appointing Carl Wallace as director. We appreciate the honesty and unbiased decision made by the administration in appointing Carl Wallace and we hope that this decision proves consistent.  

Campus prof to head shop

Dr. John E. Harrigan, Cal Poly architecture professor, will lead a one-day workshop at the Colorado Society of Architects meeting at Colorado Springs on Nov. 19. Harrigan will discuss research methods and office information practices. He will also discuss other specialized subjects. Harrigan is a specialist of Poly's extensive behavioral science and human factors program. Harrigan has edited two publications concerning human factors and was a member of the Human Factors Society. He now works for the Human Factors Journal.
Intramural Basketball: Rocked And Rolled

This is no fluke, an unidentified player remains anonymous while his buddy, Kevin Diakman laughs.

As our cool thoughts are transposed from the grid iron onto the hardwood, a sudden wind creates a storm of controversy between a player and his opponent. This phenomenon occurs every Monday and Wednesday nights. The name of this storm is Intramural basketball.

The action is fast and the mood tense as each individual strives for the ultimate goal, putting the ball through the hoop.

This week marks the passing of the halfway mark for all teams. Only two more contests remain before each team can regroup and start all over again when the winter quarter starts up.

Intramural basketball, the rock and roll sport of the hardwoods.

SAC tactics observed

It's said great literature is timeless. That may be true even at Cal Poly—if the last two academic quarters are any indication. The Associated Student's Inc. present to last year's Affairs Council, and one section of psychology 361 the Human Relations Committee wish to emphasise that our criticise of the procedures of your organisation; there are many things you do well, but we know this doesn't have anything irrelevant questions with, "I know this doesn't have anything to do with what we're talking about, but..." Another point brought up by the three-member panel concerned the amount of work representatives did (or didn't do) in preparation for the Wednesday night meetings. To quote the report: "Responsibility for reports on current issues is not widely distributed, just a few people seem to be doing their homework, while the majority comes unprepared."

Last week I tried to show certain members were not doing the best possible job as representatives of the student body. In view of the signing Quarter report, and the actions of SAC in the Fall Quarter, I feel the situation regarding "doing their homework" has not changed.

The fourth and fifth points hit upon a subject long talked about by those who are frequent visitors to SAC: boring meetings. Not that the representatives should be another form of entertainment on Wednesday nights, but the format could be changed— as indicated in the report:

Meetings do not always move along at a challenging pace; members become disinterested and engage in private conversations. All meetings tended to be identical (regardless of the topic discussed); they lacked variety and could've benefited from some humor or novelty."

The first sentence is especially true—but Roland Yates carried it one step further. Last week, Yates, a representative from the School of Engineering and Technology, was barely able to keep his eyes open during the various reports during the meeting.

With his head resting on top of his folded arms on the table, he was a testimonial to the observation, "Members become disinterested."

As suggested, SAC could benefit from some "humor or novelty."

"And to his credit, ASI President Scott Plotkin did add a new dimension to the last SAC meeting. Plotkin was both humorous and novel when he explained both he and the late President Lyndon Johnson in the morning hoping they could do some good for their respective governments— even though popular opinion was to the contrary."

The most honest appraisal made by the observing team was the unity (or better yet, the lack of unity) demonstrated by the council. According to the May 30 report:

"There appears to be a lack of group unity. Members tend to fight amongst each other rather than to work with each other in discussion to attain the best quality decision possible."

Those words best describe SAC's behavior so far this quarter. The representatives who make up the council are supposed to be sitting as the board of directors (according to Article VI, sec. A, Bylaws) of an corporation—the ASI. Ideally, the board of directors of any corporation has the shareholders (in this case, all the students) as the beneficiary of its labor. Obviously, with all the fighting that goes on in SAC, the shareholders stand to lose on their investment.

Film explores childbirth

Termed the "miracle of life," childbirth and its many aspects will be explored through two Lamaie Prepared Childbirth films at 7:30 p.m. on the following days:

- Wed., Nov. 13, in room 406 at Allan Hancock College in Santa Maria. Dr. James Cusack will be the guest speaker for the question and answer period.
- Thursday, Nov. 14 at the Monterey Road School in Atascadero. Dr. Willard Osiban will be the guest speaker for the question and answer period.
- Friday, Nov. 15 in the Agricultural Engineering Building at Cal Poly. Dr. William O'Brien will be the guest speaker for the question and answer period.

The public is invited to all three of the showings where a $1 per person donation will be requested.

MBA careers and program

Job opportunities in connection with the MBA (Masters of Business Administration) program will be discussed. Guests will be the first two open houses on Nov. 14 at 11 a.m. in the Advisement Center in the Business Administration and Education building in Room 150.

All interested majors are welcome. Students as well as professors will be available to answer any questions about the masters program concerning schedules, prerequisites, and type of curriculum.

Tickets available for Idaho charter

Some seats are available to the general public on the charter flight to Pocatello, Idaho for the Cal Poly-Idaho State football game, according to Vic Broncele, director of athletics at Cal Poly. The Mustangs will play the Big Sky Conference opponent in ISU's domed stadium; the Minidome, on Nov. 16 at 1 p.m. Mountain Standard Time.

For a fee of $100 one can obtain tickets to the game also immediately following the game. Further information can be obtained by contacting the office of the athletic director at Cal Poly, phone 544-8882.

The Idaho game will give Cal Poly a chance to push its win-lose record over the 80 mark for the first time this year. The Mustangs currently are 6-4 but haven't lost a game in their last three contests.

Former Poly hoopsters vie in pro minors

Mike LaRoche, Cal Poly's all-time scoring leader, and another former Mustang cassette, Ike Fontaine, are playing with the new Sacramento Prospector, a new pro basketball minor league sanctioned by the National Basketball Association.

LaRoshe still holds the Cal Poly all-time scoring record for all games and is the record holder in the CCAA. The 6-4 guard earned all-CCAA honors three straight years in 70 games for the Mustangs. LaRoche scored 1,900 points, averaging 31.4 points and had .912 field goals, all Cal Poly school records. His 163 free throws made during the 1972-73 season Mike's senior season, is a Mustang single season record.

LaRoche scored 210 points in 24 CCAA games for one conference career record. His 88.9 average is another CCAA career mark. Fontaine, a 6-4 forward, played for the Mustangs in 1968-69 scoring 289 points and averaging 6.8 points per game. In 1969-70 he saw action in just nine games scoring 83 points and averaging 9.2.

Both LaRoche and Fontaine, the new Sacramento Prospector, are playing in a semipro Sacramento basketball league.

We asked the same question when we first found ourselves in a position to make the world a more livable place.

At Kodak, we started close to home. In Rochester, New York. We cut river pollution with one of the most efficient industrial waste water treatment plants in the country. We cut air pollution with scrubbers, adsorbers and electrostatic precipitators. We helped set up a black enterprise program in downtown Rochester.

Why? Helping to combat water pollution not only benefits society but us as well. We need clean water to make film. Our combustible waste disposal facility not only reduces air pollution but also helps pay for itself in heat and steam production and silver recovery. The black enterprise program not only helps people who aren't well off but also helps stabilize communities in which Kodak can work and grow.

In short, it's simply good business. And we're in business to make a profit. But in furthering our business interests, we also further society's interests.

After all, our business depends on society. So we care what happens to it.

Kodak

More than a business.
Poly kickers take the last spin today

For the third time this season, the now tottery top.

Things started out fast only to slowly wind down. Tomorrow. The Mustangs will face Fresno State at 1 p.m. here in the last turn of the two turns.

The Mustangs are reared by Mustang coach Carmen Beco as the toughest group of soccer players Cal Poly will face this year.

Fresno competes in Division I of the Western Intercollegiate Soccer Association while the Mustangs play in the B group of Division II.

Beco said that the Bulldogs play top teams like UCLA, Southern Cal and Bloia.

Beco would like to beat the Bulldogs to end the Mustangs 5-1 season on a high note.

"Anytime you beat Fresno," he said, "it is something. They have a really good team." Beco added that the Mustangs will be making a "desperate effort" in the game tomorrow.

He explained that after a tough 2-2 loss to Fresno Pacific, a game in which three Mustangs were kicked out and Beato put under protest, his team was able to practice fully on Thursday only.

There was a practice Friday, but most of the players had gone home for the weekend. Yesterday the Mustangs held a lieu practice game.

It was a lack of practice—something that their team isn't allowed to pre-register like most other athletic teams, as the main reason for his
despairing moment.

"You can't blame the team. It was actually the school that let us back. The guys just couldn't practice together. We are not a sport like soccer needs," Cal Poly lost to Santa Barbara, by a small goal. After that loss they failed to win in their last two outings.

Harriers place third in CCAA

Following the example of last year's team, the Cal State Northridge cross country team literally ran away with the CCAA championship for the second consecutive year last Saturday in Fresno.

Cal Poly, able to place only one runner in the top 10, was 15th. A team of 40 points behind the champions and over 40 points behind the runner-up LA State.

"I thought we would make things a lot tougher for Northridge," Mustang coach Steve Bremem said.

The Matador's top five runners all finished ahead of Cal Poly's second man, Jim Clark, who wound up 11th. Conference championship Edward Chaldea of Northridge completed the five-mile course in 34:10.1.

Simmons said. "There was a practice Friday, but most of the players had gone home for the weekend. Yesterday the Mustangs held a lieu practice game."
