Plotkin says law restricts quality of ASI activities

Because San Luis Obispo cannot provide the activities Poly students desire, the ASI must take the responsibility for providing programs. ASI Pres. Scott Plotkin told an audience gathered in Chumash Auditorium Tuesday.

Plotkin spoke at a campus-wide meeting he called to explain and answer questions regarding AB 818 and the advisory referendum on student body fees.

The programs ASI provides will "continue to operate at a low, sub-quality level if students vote to reduce the student body fee in the upcoming election," Plotkin warned.

Poly students have a choice on the referendum, to be held on Feb. 18 and 18, to either maintain or reduce the student body fee. ASI, passed by the state legislature and effective Jan. 1, provides $8,000,000 for the campuses of the California State University and Colleges for support of instructional related activities (IRIA). Along with the bill, a mandatory advisory referendum to allow students to determine the level of the current $80 student body fee was set.

However, the student decision still stands. The court's only recommendation is to Trustees along with Pres. Robert Kennedy's own recommendation.

In making the final decision, the Trustees will take into account any existing contractual obligations Poly is involved with, such as the football team's contract.

"Poly faces a unique situation in that 28 per cent of the ASI monies are devoted to our student housing," said Plotkin. "The funds are distributed on a per capita basis.

Lampoon magazine editor tells his vulgar trade tales

by Roger Vincent

"The National Lampoon has been known to be a little bit vulgar at times," said Doug Kenney, master of the underatement.

National Lampoon editor Kenney Monday night went on to talk about masturbation, penis, throwing up for distance, double bags, Julie Harris's new life and all the other obscene insanities Lampoon fans seem to be able to bear about.

They were not disappointed. The summer sun leads Harvard graduate into a steady gnash of her home for the holy-bunch bunch. A child of the 80's herself, Kenney remembers that as "warm puddles of old panties batter; kind of soft and mushy with no substance."

Much of his irreverence and comedy outlook Kenney attributes to a strict Catholic upbringing, particularly the prep school he attended. It was at this school that he was "hit by an awful lot of teachers."

"In fact we have a lot of macho members on the staff," Kenney said. "We do spend about a hundred grand a year on legal fees alone."

Another suit involved Walt Disney Productions who sued for a caricature of Minnie Mouse baring her breasts with "black nipples and all." Courtroom Charles Schulz also sued for Lampoon's parody of his "Peanuts" strip, "Happiness is a Warm Puppy." The Lampoon version was entitled "Happiness is a Live Adopted Baby,

(Continued on page 6)

ASI Rep. Scott Plotkin told students Tuesday programs would continue at a low sub-quality level if the student body fee was reduced.

ASI rep raps city council's housing work

An Associated Students, Inc. (ASI) representative spoke before the San Luis Obispo City Council Monday night and urged the council members to begin taking steps to solve the housing problems of town.

Kevin O'Connor, who originally came to the meeting to inform the council that ASI had endorsed the concept of a proposed Housing and Community Development Task Force, was set to be up in town to study housing and make recommendations, instead urging the council lack of concern.

When the city council postponed any actions on clarifying the group or deciding who would be the representatives, O'Connor told the council that housing for students was getting worse at an alarming rate.

"Next fall there will be no more students at Poly," he said. "At this time there is a vacancy factor of less than 1 per cent. By fall this will be either at the same level or lower." He told the council that they must consider local housing at the critical phase.

O'Connor said that the city was not doing enough in forming a citizens group to study housing. "The longer it takes to get the group up and running the longer it will take the members to do anything," he said.

He told the council that many students were living in substandard dwellings that could be condemned by the city. But if they were condemned, that would create another housing strain on students," he said.

LOS ANGELES (UPI) - A 44-year-old transient who claimed to be the "blind eye slasher" was booked on murder charges Tuesday but officers said there was doubt whether he was the man who cut the throat of nine victims.

The transient, Theodore Laseo, was the first person actually booked in connection with the slasher slayings although a dozen or so young men have been picked up for questioning and then released.

Lt. David Boley, head of the Police Department's slasher investigation, said Laseo had a knife when he was arrested at a Hollywood hotel but it did not appear to be the kind used in the murders.

Boley said Laseo told an acquaintance he was the slasher and the acquaintance notified police.

Investigators questioned the credibility of a tape recording purportedly from the slasher.

Police spokesman Pete Hagan said the tape "appears to be the work of a clairvoyant." It was found in a telephone booth Monday night after a man called the Herald Examiner and told reporters where it was located.

WASHINGTON (UPI) - The House Ways and Means Committee refused on a 25-14 vote Tuesday to include an end to the oil depletion allowance in a pending multimillion dollar tax reduction bill.

Proponents of the oil depletion repeal, led by Reps. Sam Gibbons, D-Fla., and William J. Green, D-Fla., promised to take the measure to the House floor.

Committee chairman Al Ullman, D-Ore., swayed the committee against the depletion repeal. He considered it within the next 90 days as part of the "upward energy tax proposal."

Ullman warned that the Department of the Interior would deny the tax cut, which he said is gravely needed to stimulate the economy.

"To amend this bill in this way at this time would be a very grave error," although I have publicly stated many times that I would support an end to the depletion allowance," Ullman said.

Voting against repeal were 14 Republicans and 19 Democrats. Democrats, but no Republicans, voted for repeal.

Although no one mentioned it, the depletion issue also could upset Ford's apparent willingness to accept the committee's bill.

WASHINGTON (UPI) - Congressional Democrats expressed dismay Tuesday over the rejection of President Ford's proposed budget deficit and the size of his proposed middle-class programs that benefit the elderly, the disadvantaged.

They said the defense budget was the only showing real growth in Ford's proposals—and even conservative Democrats predicted the increase in defense spending would be substantially.

Rep. Morris K. Udall, D-Ariz., a candidate for the 1976 Democratic presidential nomination, said the budget was "a bloated, saddening document regrettable because of its impossibly misplaced priorities reflecting a sorry insensitivity to the needy, elderly, the disadvantaged."

Reps. Al Ullman, D-Ore., and Herman R. Walsh, R-Pa., the senior members of the House Ways and Means Committee, predicted the legislation ultimately would be cut from the Pentagon's proposed budget.

Catapult part of engineers' week at Poly

An annual catapult contest and a solar-wind energy conversion contest will be sponsored by the Engineering and Technology Student Council in celebration of National Engineer's Week, Feb. 18 to Feb. 28.

The object of the catapult competition, which is open to students from local high schools, community colleges and Cal Poly, is to design and construct a catapult that will propel a regulation tennis ball over long distances.

A lassInv from Griffith Park Observatory in Los Angeles will be set up in Chamin Auditorium to entertain viewers with the latest and, reportedly, the most exotic experience in light shows, involving the use of lasers.

The solar-wind energy conversion contest reflects this year's Engineers' Week theme: "Exploring New Energy Frontiers."

Also planned are a visitation day for Central Coast area high school students and traditional Engineers' Week banquet.

MECHA SPECIAL MEETING WED. FEB. 5 5 P.M.

WASHINGTON (UPI) - Secretary of State Henry A. Kissinger Tuesday called Congress's abrupt cutoff of military aid to Turkey "a tragic and unnecessary event." But he said he was hopeful Congress will provide $300 million in emergency assistance President Ford has requested for South Vietnam.

Talking with reporters after giving the House Foreign Affairs Committee a two-hour, start-of-the-year briefing on the Administration's foreign policy, Kissinger said of the denial of aid to Turkey:

"It is a tragedy and will not help the Cyprus negotiations." Congress voted two months ago to order cutoff effective at midnight Tuesday unless the administration gave assurances that U.S. military equipment would not be used by the Turks in Cyprus. Kissinger said Saturday that the United Nations has been unable to provide such assurances.

Keith Gurnee—students’ voice

Cal Poly students have an important issue at state in the approach of San Luis Obispo City Council election. Keith Gurnee, a student of right students, is up for re-election.

It is a little disguised fact that the students are subjects in a not-so-healthy political battle for control of the student body of San Luis Obispo City. The two involved in this battle are Keith Gurnee, a student of student unions, and a number of Chicano students.

One issue that is not being discussed is the possibility of alcohol in campus and a limitation on Cal Poly’s speed growth. Gurnee was elected four years ago to represent the students. They have an interest in city government, it is the only government in which students can have a voice in that has any power. Student government can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

But Cal Poly students have an opportunity to show they want a voice in city government; it is the only government that has any power, government that can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

But Kennedy's unlimited power has been challenged by the City Council, at the instigation of Gurnee, on two fronts — the possibility of alcohol in campus and a limitation on Cal Poly's speed growth. Gurnee was elected four years ago to represent the students. They have an interest in city government, it is the only government in which students can have a voice in that has any power. Student government can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

But Cal Poly students have an opportunity to show they want a voice in city government; it is the only government that has any power, government that can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

Keith Gumee was elected four years ago to represent the students. They have an interest in city government, it is the only government in which students can have a voice in that has any power. Student government can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

But Cal Poly students have an opportunity to show they want a voice in city government; it is the only government that has any power, government that can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

Keith Gurnee's favorite pastimes is to impose the royal prerogative on the subjects. The students shall not be allowed to imbibe alcohol on campus and a limitation on Cal Poly's speed growth. Gurnee was elected four years ago to represent the students. They have an interest in city government, it is the only government in which students can have a voice in that has any power. Student government can be affected by the city’s action, but is not elected by the people. They are not elected by the people. They are elected by the students.

Student body fee

According to Frost, the state funds will cover basic costs only and will "necessitate reductions in programs currently provided which are not part of IRA." Among these are Craft Center, Coffee House, Legal Aid, Ethnic Programming, Speech of Welcome, Ifficiency Meeting, Films and Outings. "Isolated Cal Poly requires that All assume a large role since student life revolves around the campus even after study," he told his audience.

The All, Frost said, provides three essential activities: services and representation before the Chancellor, Trustees, the governor and "every state entity in the state."

Students must realize the overall importance of the All's future if it is to continue providing the necessary programs for student services and representation before the Chancellor, Trustees, the governor and "every state entity in the state."

Meditating minister

A travelling minister who uses meditation to increase spiritual awareness will explain the philosophy of the Movement of Spiritual Inner Awareness on Friday, 11, at 8 p.m. in Room 232 of the University Union. Richard Varner, who travels between San Diego and Shasta County in his ministrations, will talk about using meditation as a personal avenue to search for God or the spirit. Students are requested to come to each talk before it is over and hear the talk, which is sponsored by Cal Poly's Yoga Co-op.

San Luis graffiti

by John Gordon

As a transplant from Los Angeles, Ontario Bertola, like so many other students, has slowly discovered some of the things that make San Luis Obispo a nice place to live.

Of course, discovering San Luis Obispo graffiti is by far better than reading about it in a newspaper. But some things, like the wall to the right, pass by us before we can really enjoy them, except in print.

Don’t ever say that there is nothing to do in San Luis Obispo again... enjoy the graffiti.

Causes of drug misuse are a continuing concern

This spin-off from the Health Center marks the beginning of another series of informational features about health matters. Questionnaires sampling of students has helped to direct our attention to students "need to know." We'll do our best to oblige.

The use and misuse of antibiotic drugs is of continuing, ever-mounting concern among both the medical profession and those it serves. Penicillin, when it was accidentally discovered in 1928 and developed for treatment of certain diseases in 1940, was to be known in the press as a "wonder" drug—meaning that it could do "wonders" in bringing about cure. Many of us still consider it a "wonder" drug. We "wonder" if it isn't doing more harm than good when used unwisely, as it often is.

Since penicillin, derived from a common mold was developed, literally hundreds of different antibiotics have been introduced, many of them synthesized from scratch or modified by "mutations baking." Some actually kill certain bacteria by blocking life processes of the germ; others inhibit multiplication and give the natural resistance of the host a chance to overcome the infection.

Each antibiotic has its specific targets—some, such as penicillin, are rife-like, while others, like tetracyclines, are better equipped to kill a strain. Some bacteria exposed to the right antibiotic in the right concentration, long enough, behave as the wonder drug enthusiasts hope for. The streptomycin that can lead to rheumatic fever and ajetting arthritis.

But many others don't give up the battle so easily. They reinvigorate, regroup, and counterattack, and contemporary antibiotic is one.

Artist proves versatile with brush, chisel

by COLLEEN COMBES

Through adventures exploring with a brush, a chisel, an idea, James Proctor has proved himself a versatile artist of the abstract in his exhibit at the Art Center in San Luis Obispo. Proctor wanted the first comprehensive showing of the various facets of his works shown in the community where he started out, said Phil Pareddes, another artist. The exhibition committee of the San Luis Obispo Art Association agreed and the James Proctor Show has been running from Jan. 11 to Feb. 9, 1979, admission free.

He first began his work 17 years ago in a summer workshop where he met or worked along with well-known artists such as Gladys and Ranson Gray, Margaret Jorgenson, Kaye Ryan, Mary Cole and Jane Rider.

After two years at Long Beach State University he was granted a full (working) scholarship at the Cita Art Institute in Los Angeles. He completed his Bachelor's degree and was graduated with honors for his Master's of Fine Arts degree. He spent the next two years traveling and studying throughout Europe while an aide-de-camp to a command general of the Army.

When not spending long days right in his studio, Proctor takes in a symphony, an opera or a symposium. He also has strong interest in anthropology and archaeology. When on a field trip last year, he studied the Mayan culture in Yucatan.

Art enthusiasts or any casual passerby will enjoy the collection of colorful oils of celestial scenes; stylized drawings of stylized animals; sculptures of man-water, man-monster, grasses and metal; as well as graphics, enamels and compositions mixed media. After the James Proctor show, starting Feb. 13 through March 11, it will be "Interlacing" a fibre show.

Located near the Mission on Broad St., the Art Center is open every day except Mondays, from 11 am to 5:30 p.m.
Paralyzed making tackle

Prep player walks again

SAN BRUNO, Calif (UPI) — Ken Glaon is doing some pegging and hopes to march again this summer.

It has been a long road back for the 14-year-old high school student. On Oct. 13, 1969, Ken was playing linebacker for Crestmoor High's sophomore football team. In the first quarter he moved in for a tackle.

"I was aiming between his knees and hips," Ken said. "Once I made contact, I tried to bring my arms up around him, but they wouldn't move."

Ken fell to the ground, but started to "feel a numbness spreading all over."

A disc in his spinal column, in the lower part of his neck, had been crushed. He had no feeling from there down.

The next day, Ken was in surgery. They took a bone from his hip to try to fuse together the part of his spine that had been crushed.

"The doctors said at the time there was a 10 in 100 chance he would ever walk again," said Ken's mother. "Another doctor told me later the chances were really 1 in 100."

But Ken started to regain some feeling in a few weeks, and he decided he would not be paralyzed if there was any possibility of getting up on his feet again.

He put his whole heart into the exercises his therapist gave him, and was able to get up on crutches about a year ago.

"The doctors were absolutely amazed," said Mrs. Glaon. "Ken is now back in school. He walks without the crutches, but in prosthesis."

A few weeks ago he got out his brown hair and began to show up for practice with the Conquistadors Drum and Bugle Corps. He was a sharp marching member before the accident.

Ken can't quite keep the precision step yet, but he told the corps instructors to save a place for him in the summer field show.

"I'm just glad to be back on the murals," he said. "Maybe I won't make it but don't bet on it."

Eon oil man will talk here

The chief executive of Eon Oil Company, J.C. Cotter, will speak on the topic, "Synthetic Oil: An Energy Substitude," 11 a.m. Thursday Feb. 6 in Chumash Auditorium in the University Union.

The speech will concern Eon E-11, a mixture of ethers and alcohol, that contains no hydrocarbons and produces cleaner exhaust.

Admission is free and all are invited.

Prof lecture: women, jobs

Dr. Sara Rezman, associate dean, School of Business and Social Sciences, will lead a discussion on women's opportunities in the labor market on Feb. 4 at 3 p.m. in Erhart Agriculture Room.

Plotkin will address WRA

The Women's Recreation Association will hold its general meeting Thursday at 11 a.m. in Crandall Gym.

Scott Plotkin, AFS President, will discuss the effects of AB 3114 on women's athletics.
Clancy sprinter: quick and quiet

by CURTIS BYRD

All-American Clancy Edwards is 5'10 and 165 pounds of pure speed.

Clancy, a product of Santa Ana, was the state high school 200-yard dash champion before coming to Cal Poly in 1973.

He is known by his teammates as "Quick Clancy" on the track, and "Quiet Clancy" off of it, except for an occasional brag.

Last year Clancy set three school and one NCAA College Division record.

Edwards anchored the Mustang 880 relay team, which ran a record 1:46.1 in the Santa Barbara Easter Relays in April. In May he anchored the 440 relay team at the San Jose Invitational, where he received honors as "Most Outstanding Single Meet Performer". He set school records in the 440 relay, the 880 and won the 100 yard dash.

He was chosen by coach Steve Simmons as the "Most Valuable Athlete" for the Cal Poly track team in 1974.

Clancy, who was rated third worldwide in the 200 by the January Track and Field News, an event he was undefeated in the last season.

Edwards is enjoying the fame that comes with being a top notch sprinter.

"It's a great being world class," said the Cal Poly star. "I've run very well this year. The pressure has been tremendous. Last year it was fun meeting the national teams, but now it's the national television in the US vs. UNR dual meet."

However, all is not fun in gasoline. Edwards is near the top of the world.

"It's a thrill sometimes. The fun I have is when I can win," said Edwards.

"It's a thrill sometimes. The fun I have is when I can win," said Edwards.

"I think I've really improved my start and running form in the last year. I've worked hard on my technique and I think it's paying off."

Said Edwards: "I really think I can run 200 yards in under 22 seconds this year."

The thing that keeps me from winning is my start. If and when I improve my start to the best of my ability and iron out the other wrinkles, I think then and only then will I be the best. I think I've got a long way to go," said Edwards.

Coach Simmons feels Clancy has about as much natural ability as a sprinter could possibly have.

Simmons said, "Clancy has a few problems right now, but when they get smoothed out, look out."

The defending CCAA champs Northridge will be the team to beat again this year, according to Anderson.

"We finished ahead of two conference rivals, Cal Poly Pomona and Cal State L.A., which is a good indication of what to expect in next month's league championships."

The Mustangs were strongest in the relays, placing fourth in the 880 and 440 medley relays.

Joe Davis, Mike Coffman, Prior and Reynolds recorded a time of 1:46.7 in the 880, while Jay Kimball, Greg Rockenbach, combined with Prior and Reynolds to win the 440 in a time of 1:50.7.

In the individual events sophomore Rick Prior of San Luis Obispo won the 880 freestyle with a time 2:28.8 just edging out Greg Worthorne of Occidental.

Junior John Reynolds, who is rated 1 in the 100-yard butterfly and no. 1 in the 200-yard butterfly, finished third in the 880 freestyle with a time of 2:09.5.

Laurie Morgan and Eric Nicholas bettered their own lifetime bests in the 1,600 freestyle.

The defending CCAA champs Northridge will be the team to beat again this year, according to Anderson.

"We are going to have to work very hard to beat them again."

"New record All-American sprinter yard relay"}

The Cal Poly Mustangs set one school record while finishing fifth in the annual California Collegiate Athletic Association Swim Relays in Pomona Friday and Saturday.

The 880 yard relay team of Rick Prior, Eric Nicholas, Jane Frasier, and John Reynolds set a new school record of 7:38.9 eclipsing the old mark of 7:40.9.

The time qualified the four for the NCAA Division II championships to be held this spring in Cleveland Ohio.

The fourth place finish of the relay team helped Coach Dick Anderson's Mustangs score 303 points, behind Cal State Northridge's 321, San Diego University 389.3, University of Irvine 311.9 and Claremont 306.7.

Despite finishing fifth among the 11 entries, Anderson was pleased with his teams overall performance, pointing out:

"Our team finished fifth in the 880 freestyle relay, but we had some good performances in the individual events."

"I'm particularly pleased with the performances of Clancy Edwards in the 200 freestyle and Eric Nicholas in the 100 backstroke."

"Both of them showed great improvement in their swimming techniques and I think they will be able to compete with some of the best swimmers in the country."

"We also had some strong performances by Rick Prior in the 200 backstroke and John Reynolds in the 100 butterfly."

"I think we have a good chance to qualify for the NCAA Division II championships if we continue to work hard and improve our swimming techniques."
