SAC: Halt endorsement

Mustang Daily is ordered not to back any candidates

by Mark Looker

The Student Affairs Council Wednesday night voted 22-1 to direct the Mustang Daily to halt all "editorials, staff comments and feature articles which endorse any candidate for public office in a partisan or non-partisan election."

The motion by John Ronca, Business and Social Science representative, directed the editor of Mustang Daily, Mary Nieuwma, to issue a memo to the staff of the paper calling for an immediate halt to writing which endorses candidates. Ms. Nieuwma said today she had written an official letter, through university channels, requesting a legal interpretation of the Ronca demand from the Chancellor's office.

She said the order "clearly violates the First Amendment to the U.S. Constitution establishing freedom of the press."

The editor also said the paper would respond to SAC's demand "only when we have legal opinion based on fact."

Ronca asked that the Mustang Daily editorial staff explain by next Tuesday why the paper had acted in violation of Title 5, of the California Administrative Code, section 42403, part 1.

This code prohibits the use of any auxiliary organization to "support or oppose any candidate for public office".

Ronca said he had been informed by a lawyer of a candidate who is running against incumbent City Councilman Keith Gurnee in the city election March 4, that his candidate was "concerned" that Mustang Daily was acting in violation of Title 5. The endorsement of Gurnee in a column by Alison Harvey in its Feb. 5 issue was cited.

In her column, Harvey had written: "Cal Poly students have an opportunity to show that they want a voice in the decisions—a voice with some power—by voting for Keith Gurnee."

This endorsement was a violation of Title 5, Ronca said, since the Mustang Daily does receive a loan, on a break even budget, from the ASI. Since SAC does act as the board of directors of a corporation (ASI), SAC was left open to legal action from the paper's legal counsel when it copyrighted the order from SAC.

The editor also said the paper would respond to SAC's demand "only when we have legal opinion.

Poly Royal Queen chosen

Gail Perry has been selected as 1975 Poly Royal Queen at Cal Poly. Miss Perry was selected from a field of 14 contestants during a pageant held on Wednesday evening in the University Union.

As Poly Royal Queen, Miss Perry and her court will be traveling before the annual prom through the area between Santa Barbara and Salinas.

ASI Pres. Scott Potkin, SAC rep Mike Murdy, ASI StudentBody Pres. Mike Hurtado, ASI vice-pres., all met in Nieuwma's office yesterday to discuss SAC action of Wednesday night.

Atoms mixed the right way create people; speaker says

Behaviorism is the complete reduction of human actions to physics, namely, the reduction of psychology to physiology and physiology to physics.

This is the belief of Dr. James T. Culbertson, who, in a lecture here Thursday, said that psychologists, scientific researchers, chemists, neurologists and biologists agree that in theory, behavior can be analyzed down to the motion of physical particles, electrons and protons, acted upon by physical forces.

Culbertson, who is head of the Cal Poly Philosophy Dept., said, "I am strongly in favor of this behaviorism and physicalism. I just want to show certain ways in which it is incomplete and needs to be supplemented before it can be a fundamental, scientific, science of human life."

Physicalism, or materialism, is a very unpopular view among humanists and the general public because most people do not like the idea that "we are just little machines run by the laws of physics," Culbertson said.

"Biologists understand that there is not anything special about organisms. It is the way they are arranged. In theory if all the elements, atoms and molecules are put together in just the right way you have a live man," Culbertson said.

Culbertson added that the "point of view of modern biology is that organisms are essentially constructable. In principle, you could make a mouse or a man if you put the right kind of stuff together in the right way."

The idea of physicalism is that the arrangement of "stuff" makes a creature alive and capable of having a memory and conscious experience, Culbertson said.

Behaviorists merely analyze the overt behavior or actions of an organism, Culbertson said. "The other view of organisms we understand better, but the accompanying consciousness is more difficult." This is the problem with behaviorism, he said.

Culbertson said that, in theory, machines can be constructed to react as organisms react. "Electronic engineers can make machines that perceive," but they have no feelings or conscious experience, he said.

An example of such a machine is the dog 4, that the scientist was described by Culbertson as "a remarkable mental machine." It would be constructed and programmed to stimulate canine behavior and
Music comes in third

It would take a Sherlock Holmes to discover why concerts on this campus are so rarely heard. Minor reasons for the lack of big-name concerts seem to hold the main reason: the administration has set up a policy of priorities that puts concerts on the bottom of the list. Concerts can be held in three places on campus: the men’s gymnasium, Chumash auditorium or the football stadium. There is enough red tape involved in trying to hold a concert in two of those places to make the task almost impossible.

The men’s gym is the favorite location for a concert because it has the largest seating capacity (2,000). For the ASI to break even on a concert, a large crowd must attend because ASI charges the lowest ticket price possible.

Each year guidelines are set up for use of the gym by the P.E. Department. Classes and sports played against other schools are first on the list. These activities take up the gym almost every night and on weekends. Second on the list is intramural sports which take up almost every other night that other activities aren’t taking place. Students are receiving some credit for these activities.

And finally, No. 3 on the list is concerts. The Men’s P.E. Dept. gives the concert committee a total of two nights a quarter for possible use of the gym; however, the two nights can be subject to change if there are too many other activities taking place to spare the gym for concerts. But even athletic practice gets an unofficial priority above concerts—so a concert must take place on a day or night where there is nothing at all happening.

To get a concert held in the gym, the concert committee must get the approval from the head of the P.E. Dept., the director of athletics, the coach of the sport of the season and the intramural coach.

All concerts make more money than any other event on campus, and instead of the profits fund other activities, such as intramurals, held at Poly.

To hold a concert at the football stadium, the ASI Committee must meet, and the guidelines of a sub-committee headed by members of the administration. The proposed concert must qualify as a “mellow” concert before it can take place at the stadium.

It isn’t too hard to hold a concert at Chumash auditorium, but no one really wants to. It only seats 1,000 people, and the acoustics aren’t very good.

In a rural town like San Luis Obispo where most of the students’ lives revolve around the activities on campus, it would seem that the administration could be more helpful about providing entertainment for students.

But what can be done to solve the problem? Randy Donati, advisor for the Programming Board, dreams of a multi-purpose stadium that could be used for athletics and other events such as concerts, on campus. Such a building is included in the Master Plan for Poly. However, with the current limit on new facilities for state colleges and universities, this doesn’t seem likely in the near future.

What seems more feasible is the possibility of a civic and fine arts center to be built in the county. Hopefully, Poly would be able to use the center.

There are concerts planned for the rest of this year, but the dates are still tentative. Possible dates include, a Chumash concert March 8, a gym concert March 30 and April 1 (with possible a stadium concert May 31, no doubt a “mellow one”).

Halt endorsements

(continued from page 1)

the paper. Those opposed to the campus paper would use to stop ASI funds from being used to endorse a candidate.

Near the end of the meeting, ASI Pres. Scott Plotkin made a motion that Ronca’s motion be rescinded and asked that SAC make a decision based upon hard evidence.

Plotkin’s motion to rescind Ronca’s motion failed, with seven SAC members in favor and it opposed.

Plotkin made the motion because “the three-day weekend makes it difficult to prepare a cogent policy statement by the editor with minimum time for consultation, and when SAC makes a decision of this sort, they should have the material (copies, etc.) before them.”

Ronca responded, “It seems the credibility of this body was being questioned. They know what they’re doing.”

Plotkin said he “didn’t intend to attack the integrity of SAC,” but that there was “considerable confusion” involved in the case.

In earlier debate on Ronca’s motion, Dean of Students Everett Chandler and he regards to Title I: “There’s no doubt about the policy. The Chancellor’s legal staff has dealt with the question before.”

Chandler said Mustang Daily’s action was clearly illegal.

Questioned about whether he had given Mustang Daily adequate time to be informed that they were in violation, Ronca said he had attempted to get hold of the editor, Nieuwama, but was unable to do so.

When asked if freedom of the press were involved, Ronca said, “My philosophical beliefs don’t matter. I’m going by the law. What matters is that Mustang Daily is in violation of the law.”

Matt Louden, Agriculture and Natural Resources representative, said, “The intent of the motion is not to restrict anyone, but to change illegal activities.”

Mike Murdy, Communication Arts and Humanities representative, was the only SAC member to vote against Ronca’s motion.
SAC member critical of Ronca maneuvers

Editor:

I feel strongly compelled to report the irregularity which took place during the Student Affairs Council meeting on Wednesday, Feb. 13, 1975. During his report to SAC, ASI President Scott Pilley introduced the floor to Business and Social Science Representative John Ronca in order for Ronca to give his report on Senior Week Activities. Ronca then became chairman of the meeting.

After giving a short report on senior week activities, Ronca began an oratory on Title Five of the administrative code. He explained that Title Five prohibits student publications from endorsing candidates for public office. Ronca then proceeded to read a list of names of candidates for the upcoming general election and then stated, "I didn't think it was necessary."

Ronca's defense of the absence of a copy of Title Five was that he had brought this up earlier in the year (October) and SAC representatives should have checked into it then. Ronca then proceeded to make a motion which would have no feelings. Ronca said, "I strongly feel that in the future SAC representatives should think twice about voting on a key issue when they do not have the relevant information in front of them, or when they are confronted with unusual parliamentary maneuvers.

School of Communicative Arts and Humanities

Drivers urged to take care

Editor:

When I read the article on the death of Kenneth Goldberg (Feb. 7), I felt sadness and dismay to see a small degree of carelessness cost the life of a young man.

Just a few months ago in Templeton a 17-year-old died in his arms, after a gunwheels number of frantic attempts to save his life. He had just bought a new car and was a little careless around a turn.

Though his little brother, who was riding with him, was not hurt seriously, he had to endure the pain of watching his own brother die before his eyes. He died at the wheel of a machine which will tragically nick a mistake to the point of destruction.

Now as I look at the disfigured body of Ken being lowered on the stretcher, I think of such a tragic coincidence which led to his death. Life and death should not mingle on mere coincidence. It should depend on care, thoughtfulness and love.

Next time you go outside stop and look at the potential harm of what you drive.

Then stop and think of all the people who love and care for you, who love and care for your neighbors who loved and cared for Ken Goldberg.

E. Clark Heaton III

Speaker (reproduced from page 1) would look like a real dog, but it would have no feelings. Since the dog would be programmed to act like a dog and since it looks only at "that which is politically servile," behavior would be unstable and could not be trusted to indicate feelings or not. Cultenstan concluded.

You told your new roommate you dig B.B. King and he thinks she's great too.

You owe yourself an Oly.

Chancellor Dumke to meet here with statewide officer

Chancellor Glenn Dumke of the California State University and Colleges (CSUC) and Dr. David Kagan, Statewide Dean of Student Affairs, will meet with the Cal Poly faculty and a cross-section of students on Feb. 18. Dumke and Kagan will listen to students' concerns and questions about the California State University system in Room 280 University Union, from 10:30 a.m. to 11:30 a.m.

Chancellor Dumke and Dr. Kagan's visit to Cal Poly is one in a series of visits to campuses in California, says Pres. Robert E. Kennedy. Dumke will see to the special needs, successes and current issues of Cal Poly. Dumke, chancellor of the CSUC system for 13 years, provides leadership for 19 campuses, 269,000 students and 18,000 faculty members.

Dumke began teaching at Occidental College before becoming president of San Francisco State College. In Nov. 1961, he was appointed vice-chancellor of Academic Affairs for CSUC. He was selected chancellor in 1963.

Ecology film Tuesday

A motion picture dealing with the proposed Disney Corporation recreation resort at Mineral King will be shown in Chumasn Auditorium Tuesday night at 7:30.

Mineral King is a federally established game refuge which is surrounded by Sequoia National Park.

Along with the film, slides and a panel discussion will also take place Tuesday night.

According to John Forester, the release of the Forest Service's draft of the Environmental Impact on Mineral King has brought the Disney project closer to approval than at any time during its controversial 15-year history.

Forester is student chairman of the Poly Ecology Action Club—sponsors of the program.

"We expect the panel discussion on Tuesday night to explain methods of public input in the Disney proposal for Mineral King," Forester said.

The controversy surrounding Mineral King centers on Disney's right to build a recreation resort for year-round use. Ecologists have fought a legal battle to keep the area in its natural state.

With the recent decision to release the EIR, the chances of those wishing to stop the corporation from starting construction seemingly have grown dimmer.

Tuesday night's program will offer a chance for those interested to see where the Mineral King situation stands.

Law gives right to privacy

by ROLAND HILL

Has this ever happened to you? You arrive home after fighting
nights of schoolwork and find your landlord entered your apartment
while you were away. The landlord's purpose was to innocently "inspect.
To substantiate his visit, he left a little note taped to your bathroom
mirror instructing you to clean your toilet.

You understandably become upset and after talking with your
neighbor, who has lived in the place for quite some time, you find
the landlord entered other apartments during a tenant's
absence. The landlord has even been known to inspect when he
thought the tenant was away, only to find the tenant staking in the
hub.

So, you sit and brood wondering what to do. Finally you work up
your nerve and call the landlord. He then coldly informs you that the
neighbor, who has lived in the place for quite some time, you fi
and the landlord and I can go in and inspect anytime I want to."

Well, if you take the word "landLORD" literally, then I guess what
he said could have two meanings. However, if you accepted that bull from your
landlord, you were a fool.

The right to privacy is understandably one of great importance
more to tenants. An important fact unknown to many tenants, is that
no one has the right to enter a tenant's property without the
permission of the tenant (This is a very important fact, don't forget).

The tenant is legally granted possession of the property he rents,
rents being paid to the owner who is not an lessee but indeed a landlord. In fact, as long ago as 1918, the California State Supreme Court ruled
that a tenant with a month-to-month contract is as much entitled to
enter a tenant's property as he is to enter a landlord's property.

It has been held in California Appellate Court action that an
unjustified entry by an owner into a tenant's dwelling by means of
unlocking locked doors constitutes a forcible entry. Actual
force and violence are not necessary elements in forcible
entry. Entering a tenant's apartment in his absence and
without his consent by unlocking the door comes under these
circumstances.

This right to privacy, however, does not allow the owner to
refuse a landlord entry to inspect for lease compliance. It applies
only to lease or rental agreements containing specific provisions for reasonable
entry and inspection to determine whether or not the tenant is complying with terms in the
contract. But the reasonableness of the inspection should be
necessary elements in forcible
entry. Entering a tenant's apartment in his absence and
without his consent by unlocking the door comes under these
circumstances.

On spring

Mustangs get the jump

Forget that it seems only yesterday baseball hung up its spikes and the last third strike was called to end the marathon season, because it has once again returned signaling that spring is just around the corner.

Coach Berdy Harr begins his third season at the helm of the Mustang baseball team with high hopes of improving on his 15-25 record of a year ago. Harr will field a young team when the Mustangs open their season schedule this weekend against St. Mary's College. Harr has named three sophomores and two juniors to the starting lineup that defeated the Mustang alumni in a tuneup last weekend. 6-3.

The core of the Mustang defense will be built around senior Harold Simons at second base and returning shortstop Osburn Smith.

Coach Harr expressed confidence in the two: "We feel that we have an adequate double play combination in Simons and Smith and that pair will make continued improvement.

Center fielder Mike Ongarato is the other starting sophomore and will be looked upon to give the Mustangs some sock. He led the team during the fall with eight home runs and is the squad fastest player. Defensively he has the best throwing arm among the outfielders.

Ongarato will be flanked in the outfield by junior Dave Fowler in left and senior Terry Ruggles, who was second on the last years squad in home runs with nine, in right.

Junior Ted Bailey, who red-shirted last year due to an injury will start at first base and senior Mitch Viera will anchor the young Mustang infield at third.

Behind the plate the Mustangs have an excellent defensive receiver returning in senior Jim Fisher and senior Scott Wilson will handle the designated hitter duties.

For the first time in four years the Mustang pitching will not have a returning ace to anchor the staff, but will have a blend of young and old that Harr feels will be the most balanced staff in several years.

Three Poly cindermen in San Diego

Dave Hamer, Clancy Edwards, and Curtis Dieringer compete in the San Diego Sports Arena Saturday night in the 9th annual San Diego Indoor Games.

Hamer will be competing in the invitational-open pole vault against Kjell Jessen, Vic Diaz, Casey Carrigan and Bob Richards.

Edwards in the open 6-0 yd. dash, will face Steve Williams for the fourth time, and Don Quarry, the man who chased Williams to a record equaling 6-6 in the AAU 700 meters this past summer.

Byrd will be running the open 300 yd. dash against Jim Bonding, Maurice Parks, Albert Harris and others.

Another competitor, Tony Waldrop, who last year set a world indoor mile record of 3:56 at San Diego, will be facing Tanzanian Filbert Bayt, and New Zealand runner John Walker.

Bayi, in the Commonwealth Games last winter, shattered Jim Ryun’s seven-year-old world record in the 1,500 meters with a clocking of 3:38.8. Right behind him was Walker, who also broke Ryun's record.

At Feuerbach, world outdoor record holder and George Woods, world indoor record holder will match up in the shot put.

The long jump lineup will contain Olympic Champion Randy Williams, Arnie Robinson, and Bouncy Moore.

Steve Prestfontaine has also been invited back to defend his two-mile championships against a standout field.

Byrd will be running the open 300 yd. dash against Jim Bonding, Maurice Parks, Albert Harris and others.

Another competitor, Tony Waldrop, who last year set a world indoor mile record of 3:56 at San Diego, will be facing Tanzanian Filbert Bayt, and New Zealand runner John Walker.

Bayi, in the Commonwealth Games last winter, shattered Jim Ryun’s seven-year-old world record in the 1,500 meters with a clocking of 3:38.8. Right behind him was Walker, who also broke Ryun’s record.

At Feuerbach, world outdoor record holder and George Woods, world indoor record holder will match up in the shot put.

The long jump lineup will contain Olympic Champion Randy Williams, Arnie Robinson, and Bouncy Moore.

Steve Prestfontaine has also been invited back to defend his two-mile championships against a standout field.

Three Poly cindermen in San Diego

Dave Hamer, Clancy Edwards, and Curtis Dieringer compete in the San Diego Sports Arena Saturday night in the 9th annual San Diego Indoor Games.

Hamer will be competing in the invitational-open pole vault against Kjell Jessen, Vic Diaz, Casey Carrigan and Bob Richards.

Edwards in the open 6-0 yd. dash, will face Steve Williams for the fourth time, and Don Quarry, the man who chased Williams to a record equaling 6-6 in the AAU 700 meters this past summer.

Byrd will be running the open 300 yd. dash against Jim Bonding, Maurice Parks, Albert Harris and others.

Another competitor, Tony Waldrop, who last year set a world indoor mile record of 3:56 at San Diego, will be facing Tanzanian Filbert Bayt, and New Zealand runner John Walker.

Bayi, in the Commonwealth Games last winter, shattered Jim Ryun’s seven-year-old world record in the 1,500 meters with a clocking of 3:38.8. Right behind him was Walker, who also broke Ryun’s record.

All wrestlers have their own style.
Bruce Lyon likes to finish off his opponent quickly, diving for the pin from the outset. Rodger Warner is a showboater who likes the crowd to know he's ahead. Sybil Thompson, might not be quite as dynamic as his teammates, but he gets the job done. You'll rarely see a Thompson match where you want to go home and tell your roommates, "What a fantastic match! What style! What moves!"

It's not the kind of match that sticks out in your mind. As a matter of fact you probably wouldn't notice if it weren't for his record, 19-3-1. Only Warner has won more on the Mustang squad.

Thompson's out to give a show, he's out to win. Most of his scores 13-1, 5-2 reflect this.

Coach Vaughan Hitchcock calls Thompson's style "conservative," but adds that perhaps this is his strong point because he doesn't make mistakes.

Hailing from Selma, Thompson came to Poly on a football scholarship. He lettered as a freshman, but was anxious for more. As a sophomore, he wasn't pleased with his record. "Not limiting myself to that," he feels too much emphasis is placed on the individual wrestler and not enough on the team. He'd like to finish in the top six at the NCAA nationals this year.

"It's not the kind of match that you can finish off. I've been trained to go the full season, finishing with a 12-12-4 record.

Thompson doesn't consider himself aggressive, he'd like to win, but he doesn't feel he has to. He wasn't pleased with his sophomore season, with dislocated shots, call S44 7104 at 507 Foothill.

He feels too much emphasis is put on winning.

"The idea is to compete with the guy, not to beat the guy," said Thompson.

The fourth in a line of 11 children, he doesn't feel he's been pressured from within the family to excel.

As far as wrestling techniques, he says simply, "I try not to overextend myself or put myself in a bad position."

"He says he's not a natural. I'm not sure I'm not a natural."

Hailing from Selma, Thompson's not out to give a show, the guy, not to beat the guy," said Thompson.

"He says he's not a natural. I'm not sure I'm not a natural."

RANKED second in California, Thompson was twice San Joaquin Valley champion in high school. He was twice San Joaquin Valley champion at Cal Poly.

"It's not the kind of match that you can finish off. I've been trained to go the full season, finishing with a 12-12-4 record."

"The idea is to compete with the guy, not to beat the guy," said Thompson.

"I try not to overextend myself or put myself in a bad position."

Thompson's not out to give a show, the guy, not to beat the guy," said Thompson.

"I try not to overextend myself or put myself in a bad position."
