What do they have in common?

Early registration

The dean’s office approves the 200 members of the band, Collegians and Mens Glee to pre-register every spring because they are away on their annual tour. Some 500 registration monitors and cashiers as well as residents advisors (who help set up the registration areas) also pre-register, in addition to 150 faculty and staff members.

The provision to allow early registration for athletes is in the Campus Administrative Manual. It allows 90 athletes from the football, baseball, track, golf and tennis teams to register early in order to plan their schedules around practice periods.

Starting last spring, women athletes were also granted the privilege, adding another 94 names to the list.

All early registrants are added alphabetically to the first four blocks of senior and graduate students. Almost 100 members of student government will register early with the athletes. They include members of the Student Affairs Council, Student Executive Cabinet, ASI Program Board, Ethnic Programming Board, University Union Board of Governors, school council chairmen, Finance Committee chairman, Student Personnel Committee chairman, Academic Senate representatives and the editor of the Mustang Daily.

ASI President Scott Plotkin justified early registration for SAC members “because they must attend the SAC workshop Tuesday morning at 10.” Members of the Student Executive Cabinet used to register early because of a weekly meeting, said Plotkin, so members of the University Union Board of Governors.

The rest of the student government groups and the editor of the Mustang Daily used the privilege because of the large amount of time they spend on student business, said Plotkin.

Plotkin: Brown may renew AB 3116 money

If a conversation that Scott Plotkin, ASI President, had with Gov. Edmund Brown, Jr., during a 15-minute stroll through downtown Sacramento is any indication, there is still hope AB 3116 money will be kept in the state budget.

Plotkin was in Sacramento last week attending a meeting of the California State Universities and Colleges Student Presidents Association (CSCSPA) and which he is the chairman, when he and for Her, the Legislative Advisor, had a chance meeting with Gov. Brown. “We ran into Brown in the state capitol after a meeting and walked with him through downtown Sacramento for the next 20 minutes,” said Plotkin.

“He was very receptive and made some very reassuring comments regarding the AB 3116 money,” commented Plotkin. “It is obvious that he has not made up his mind on whether or not to cut money out of the budget and we feel we can get some things from the governor.”

Brown informed him, said Plotkin, that “you can rest assured that I’m not going to give you any new money. If you can show me some alternatives for funding then I’ll buy them.”

Right now, the student body presidents are “combing through the budget” to find possible alternative ways of funding, according to Plotkin. One area may be in salary savings.

Making a personal observation, Plotkin said he found Brown “extremely personable, very unpretentious. He is a very wise man and you almost feel that he’s thinking of something wispy to say all the time.”

At the CSCSPA meeting, the members voted to make the reinstatement of the AB money in the budget their number one priority. said Plotkin.

The group’s second priority is to make sure that any collective (continued on page 3)
Consistency

One thing we can always count on from Mustang Daily is consistency. Almost every day it gives us an excellent example of upstanding.

The most current is Mark Looker's "Comment" article of Monday, March 16, discussing SAC's loss of credibility.

If Mr. Looker had been able to view the issue from an objective point of view, his ability lacking in most of the Mustang staff, he would have realized SAC was in no position to make the all-encompassing policy statement proposed by Fred Heaton.

As Greg Fowler so aptly explained, any policy statement would pre-suppose the purpose of the ad hoc committee SAC had set up.

Typically, Mr. Looker failed to mention several key facts about that committee. For example, the reason for its formation was to gather enough information and background on the HEAP issue so SAC could make an intelligent, well-documented policy statement.

While it is true committees are sometimes used to let an issue die, it is also true that the committee is a valid, important part of an organization's information-gathering operation.

In addition, Mr. Looker failed to mention the HEAP committee is required to issue its findings by the third week of next quarter. Does this look like a shirking of responsibility? I think not.

It looks to me like a responsible body deciding to obtain a complete understanding of an issue before making a policy statement.

It seems to me he is much more credible to postpone a decision until a problem is fully understood than to make a hasty, emotional, poorly thought-out statement of policy as Mr. Looker seems to advocate.

I would hope that in the future more students would attend SAC meetings so they may compare their understandings with what they read in the Mustang Daily. They might find the contrast interesting.

Dana W. Warren

Sad SAC

After reading Mark Looker's comment on SAC two things become immediately obvious:

1. Mark Looker is a skilled journalist.
2. Mark Looker is a political novice.

I feel most people who have read Mark's success this year can recognize his journalistic talent. Two examples are: The Bradford Smith Affair, and Mark's coverage of SAC this quarter.

Anyone with average perception abilities can see SAC is a slow-moving body made up of people from a wide variety of backgrounds, beliefs and ideas. Because of this it usually takes a while to get any legislation through SAC.

Whether this is good or bad is open to endless debate. However, the facts are that SAC is a slow-moving, conservative body.

Anyone with average perception abilities who attended the SAC meeting of March 1 could determine quite easily that SAC was not going to pass any motion which would put SAC in opposition to the elimination of the High School Equivalency Program (HEP). This became glaringly evident after Fred Heaton, representative from Architecture and Environmental Design, attempted to get SAC to pass his motion. Any 

The May campus to pass a similar motion were obviously futile. Buckskin has put Jones off by telling him that the contract require considerable time to move in, not the resident. The language is not completely clear, but to Plotkin that line of reasoning is very amusing.

Jones has since written to Bostrom suggesting that Jones be paid either by the hall or by the university. Being for HEP, Jones now wants a reimbursement for the unused time to remove valuables from the University. She received for DDHO. The sink Bostrom has put Jones off by telling him that the contract required notification of the person moving in, not the resident. The

Students and Bostrom's direct superior, and if necessary farther, to Everett Chandler. Dean of Students and Bostrom's direct superior, and if necessary further up.

If I don't receive satisfaction, I'll take it to the President. I'm certain we can get this resolved.

When asked if "resolved" means his way, Plotkin said, "Yes."

Tenaya Hall will house students again next year

For three years, Tenaya residence hall provided off-campus student housing, for approximately 188 faculty and staff members. Next fall, however, Tenaya will again be used for student housing, so the faculty and staff must relocate.

Executive Dean E. Douglas Gerard said the revised master plan for the campus, approved by trustees on Feb. 26, called for nine sites to be used for relocatable office units. Gerard said 13 of these nine sites, all former home trailer locations, are available at Cal State Hayward, and already are owned or leased by the system.

The nine sites, widely separated throughout the campus, can accommodate up to 18 of the units. The initial units will provide office space for some 90 faculty and support staff.

Gerard said other temporary office locations will include the former Air Conditioning Auditorium, which is being vacated by the High School Equivalency Program, and some office space for 56 faculty and staff; three cottages, now occupied by the International Students Office, will accommodate 18 faculty; and Oakes Hall, now scholarship housing, will again be used for some 90 faculty and staff.

Merrill McCarty
Poison oak: curse of the countryside

Students aren’t helping cramped parking conditions when they park their automobiles illegally.

As much as 7.1 percent of the student population parked on campus during peak hours are illegally parked as many as 14 percent during non-peak hours, according to a recent parking survey by the Parking Management Committee of Cal Poly.

Joe Toole, student representative to the parking committee, says that illegal parked cars are the problem of enforcement of Cal Poly parking regulations in the No. 1 concern of the Parking Management Committee at this time.

Toole said illegally parked cars take up spaces that should be available to the student who pays for the service, and he believes that the student who abuse the parking service are hurting their fellow students.

Enforcement of the rules in the near future is said to be now being improved somewhat.

Under the present system, says Toole, a ticket is issued by the campus and collection of the fine is handled by the police, which is presently reorganizing the judicial system and can handle the thousands of tickets issued each week.

If an officer was to devote his whole day to nothing but towing away illegally parked cars he could only get to approximately 25 cars in a day. Therefore, according to Toole, it would take the officers away from the duties which have been deemed more important by the administration.

With the inception of the one-day parking permit, Toole sees no reason for non-permits in lots and those cars without permits, he said, are subject to the tow-away rule.

In the future the committee plans to build entrance gates to the campus where permits, such as a vehicle permit, must be presented. If a car is unlicensed and permitted, cars could be screened out. This solution is leaving trouble getting off the ground, however, because of the recent beach building and stucco and a downloader for the building of the gates has not been set.

As a result, the gates have been planned for construction possibly next year.

California state Sen. John Vasconcellos (D-Santa Clara), has introduced a bill that provides for the development of a collective bargaining committee campus happenings.

As a result, the gates have been planned for construction possibly next year.

Health Center Spiffy

In order to allow students an avenue for appealing or disproving Cal Poly’s disciplinary procedures, the new committee will be comprised of various representatives from both student government, and the administration. In addition, five members will be chosen at-large from among student volunteers.

It is hoped this group will be utilized by students who are accused of committing a crime and who feel their cases deserve further investigation and review.

In the recent past the accused individual has had little recourse but to accept the decisions of Dave Giancino, the Coordinator of Student Discipline, and administration Review Council, and President Kennedy.

Now, however, the accused student would be entitled to the services of the Student Disciplinary Review Committee.

All Vice President Mike Hur- tado said over 90 percent of all cases that come before the Coordinator of Student Discipline, are concluded by the student taking what amounts to an admission of guilt. Following the Giancino’s recommendations, Hurtado then recommends to Kennedy that the type of punishments that he feels the case warrants.

Advise: Give the student wide berth, if you can recognize it. Its foliage varies in appearance in different areas and at different times of the year, but learn to identify it if outdoorsmanship is your dish. The vine stems and bare branches are particularly difficult to identify, and you may wish to consult your local botanist.

If contact is suspected, wash promptly if means are available. Remove contaminated clothing as soon as possible and wash. Leave saints alone if they’ve been brushing the countryside. The resin remains in the soil for years.

Do-yourself therapy consists of Calamine Lotion, cool water and strong soap and water. It can do wonders.

Dexter, 316 Money

In order to support the bill, students must not only: ask their representatives to vote for the bill, but also to come to the Assemblymore to express support for the bill.

Students aren’t helping cramped parking conditions when they park their automobiles illegally.

Counterfeit artists make easy cash, risk imprisonment

The sound of choral music will echo through six Central California Singer* of Cal Poly make their compact disc of member* of Cal Poly's vocal faculty. The choir will be accompanied by the intrumental ensemble, laid off from ASI Program Board WHAT'S HAPPENING

WITH PRE STERILIZED STUDS & CUSPS LARGE LUGGAGE SYSTEM

EAR-PIERCING SYSTEM WITH PRE-STERILIZED STUDS & CLASP BY APPOINTMENT $8.50

The Pioneer Players, a San Luis Obispo County theater group, will open at Paso Robles High school with the Rogers and Hammerstein play, " Oklahoma!"

"Oklahoma!" has 8 p.m. performances March 21, 22, 27, 28, and 29. A special matinee performance is scheduled 2 p.m. Sunday, March 25.

For information concerning tickets phone 238-0530.

Sun Luis (Shipra area alumni are having Nostalgia Night Friday, March 14, 7:30 p.m. Nostalgia Night is an ice cream social, a chance to show and lens of conversation.

The University and Cal Poly Alumni Association is sponsoring the program in Chumash Auditorium, for former students and their family and staff friends. A $2.50 donation will be asked to attend the program. Tickets are available from Cal Poly Alumni office, 540-1381.

A multi-media project in Christian music, "TWENTYONEHUNRED," will be presented in Chumash Auditorium on Wednesday, March 25, and Thursday, March 26 and 27, at 8:00 p.m. and 2:00 p.m.

The program, sponsored by the Inter Varsity Christian Fellowship, will combine slide and movie projection, flash-on graphic effects and a quadrophonic sound track of contemporary Christian music, all coordinated by a master composer.

TWENTYONEHUNRED was developed by a group of students, and is presented on many college campuses throughout the United States.

The famous "Swing Era" jam band of the '40's will fill the Curran College Auditorium Tuesday, March 18, 8 p.m., when Beauregard Herman and his band are in concert.

Counterfeit artists
by DAVID RICH

Most people don't realize that it is easier to make money than to earn it. Unfortunately, the penalties for doing so, if caught, are not worth the risk.

The United States Secret Service, when not guarding government officials, is tracking down counterfeiters. These counterfeiters have money, bonds and securities, driver's licenses and other forms of identification, as well as anything worth money illegally printed on paper, is one of the most popular illegal forms of business in the United States today.

Emmons Blake, owner of Blake Printing and News, says here that there is an estimated $40 million worth of counterfeit money presently in circulation in the United States. Not all of the counterfeit money now in circulation has been printed in the United States. Foreign countries, primarily South American countries, help contribute to the supply of counterfeit money in the United States economy. Blake says that the increased use of sophisticated printing processes is primarily responsible for the increased production of illegal money.

Blake has been approached many times to do unauthorized reproductions since the establishment of his San Luis Obispo printing plant in 1949. His interest, in the history of counterfeiting concerning led to his writing The Secret Service for information concerning counterfeiting. Much so Blake's surprise, a Secret Service agent paid him a visit almost immediately.

Blake has traveled to prison to talk with many of the unsuccessful counterfeiters. Blake says he has never had such conversations as to talk with a successful counterfeiter as the only counterfeiters available to him with whom he is familiar do not give regular parole which is to be expected with the failures. Blake added that most counterfeiters have a firmer pride in their illegal reproductions and tend to leave their back. For this reason, most counterfeiters find themselves looking at the world through steel bars.

Blake explains that the use of computerized payroll checks in small and large businesses has also helped to lower counterfeiting in this country. The creation of the United States. Blake has approached many people to discontinuance the circulation of "funny money" into the United States. Not all of the counterfeiters look for selling; it is their pride in their illegal reproduction that is their salvation. For this reason, the counterfeiters find themselves looking at the world through steel bars.
A closely packed sit-down crowd of 1,300 witnessed the Tim Weisburg experience last Saturday night.

The three-member group of Batdorf and Rodney started the three and a half hour act.

In the top picture John Batdorf belles out his lead guitar while the faces of Tim Weisburg are caught during and after the Chumash auditorium performance.

Unpollute your mind

How to Be Your Own Best Friend
Mildred Newman and Bernard Berkowitz
Paperback $1.95
(available at El Cerrito)

The advertising slogan "good things come in small packages" may be an overused cliché, but when reading How to Be Your Own Best Friend, I believe it is an apt description of the book.

It is a small book, comes in various colors and has a $1.95 price tag, which might keep the average penniless college student from investing his or her hard earned money. But I think it's an investment you won't regret.

The book, co-authored by a husband and wife team of practicing psycho-analysts, has an unusual question-answer format that first may seem distracting, but soon becomes natural. The reading goes quickly and the ninety-one pages may be read in about an hour. But if you're like me, you'll read through it again and again, to derive all the benefits of the book.

The Los Angeles Times says of the book, "This companionpiece book is a wonderful prescription for the Bahno an antidote to weariness, discouragement of loneliness." For many a college student who faces finals, roommate hassles and financial problems, it's a ray of sunlight among the dark storm clouds that seem to hang above them.

More specifically, the book deals with how people can improve their lives by learning to like themselves. To one of the opening questions concerning the art of living, the authors say, "We are not born with the secret of how to love, and too many of us are immobilized by an age of student banking services.

The authors, Mildred Newman and Bernard Berkowitz, the authors, describe how people can begin to feel this way about themselves and take control of their lives.

The authors are the first to admit that there are no magic answers to learning how to live a full, happy life. They do, however, offer practical ideas which may be applied to everyday life. They consistently accent the positive views of life, and how people may begin to feel this way themselves.

My only criticism of the book is that in some instances the reader may have to wade through words to discover the exact meaning that the authors are trying to convey. Generally, though, the book is easy to read and has no technical words that require constant use of a dictionary.

To sum up my feeling concerning the book, I'd like to point out a comment by the authors concerning the inner noise that people constantly subject themselves to. Newman and Berkowitz say, "People worry about pollution. But the harm we do to ourselves is a lot more dangerous than the damage we do to our environment. We don't need television or comic strips to pollute our minds; we do a much more efficient job of it ourselves."

I'm inclined to think that the first step in un-polluting our minds is to begin by reading the book How To Be Your Own Best Friend.

by SUI STEVENSON

Concert tour is planned for men's glee and band

Nineteen performances in 12 different San Joaquin and Sacramento Valley cities are included on the schedule for the 1975 concert tour of the Men's Glee Club and University Jazz Band (Collegians) of California Polytechnic State University. The tour, which will open in Sacramento on Monday, March 10, at 8 p.m., will include both public concerts and performances before high school assembly audiences.

Public concerts will be at Nevada Union High School in Grass Valley on Tuesday, March 18, at 8 p.m., and Ceres High School in Ceres on Thursday, March 20, also at 8 p.m.

Assembly performances are planned as high schools in Orangevale, Fair Oaks, Rio Linda, Palma, Sacramento, Elk Grove, Oakdale, Cal and Tracy. Joining the 45 voice male ensemble and the 18 piece band for the tour will be the famous "Majors and Minors," a 18 member men's vocal ensemble which specializes in barbershop melodies, and the "Collegiate Quartet," who are best known for its vocal renditions of popular songs.

The Cal Poly student musicians have been praised for their performances in recent years. One reviewer wrote "The Cal Poly Men's Glee Club and the Collegians, a first-rate band, present a racing concert..."

The Men's Glee Club is directed by Stanley Malinowski, who joined Cal Poly's Music Department faculty in the fall of 1975 after completing study for his doctor's degree at Cornell University in New York.

Sethon Williams, a member of the university's music faculty since 1970, directs the band, which features big-band renditions of many original and popular jazz-rock compositions.

In what has become one of the best study breaks you've ever had.

There are things to do and see in Atascadero

by C. A. HENGEN

When the strain of cramming for finals is too much, when the pressures of life make it hard to cope, it's time to head for Atascadero Lake Park.

Best known for its lake and zoo, the park was established by E. G. Lewis in 1912. San Luis Obispo County purchased the park in 1956 and has been expanding it ever since.

The lake offers a peaceful environment to observe various species of plants and waterfowl. More active participants include swimming, fishing, boating.

Chuck Paddock, Park Supervisor, reports recent catches of catfish, bluegill, largemouth bass and trout.

Boating enthusiasts will appreciate the fact that only non-motorized craft are permitted on the lake. If you did not bring your own boat, you may want to rent a paddleboat or kayak.

For those who are not aquaphilic, other options are available. Riding trails greet ravenous equestrians, and a good old-fashioned baseball field awaits that hard-hit mitt that has been gathering cobwebs in your basement since Little League days.

After some invigorating exercise you'll be ready for a leisurely picnic. Picnic tables are scattered throughout the park. If you are part of a large group, you may want to reserve one of the barbeque areas ahead of time.

Following a delicious meal, you will be all set for the biggest treat of all—the zoo. With over one hundred birds and fifty some beasts, the zoo is a wonderful place to spend a half hour. During 20 years of growth it has remained comfortably compact, immaculately clean and conveniently priced for student pocketbooks— it's free.

After your initial visit, you may find yourself wanting to return again and again. Bird watchers enjoy the walk-through aviary, as well as other separate exhibits featuring such fine-feathered friends as an American eagle, a penguin, and a colorful menagerie of exotic jungle birds.

So, when the end-of-semester rush hits you, take time around, remember the country park at Atascadero. Pack a picnic basket full of goodies, bring your books along, and treat yourself to some of the best study breaks you've ever had.
Congress allows oil tariff veto to stand

WASHINGTON (UPI) - Congress decided Tuesday to let President Ford's veto of the oil tariff delay bill stand for the time being while the House pushed toward a compromise with Ford on an overall energy program before March 28.

The House voted 566 to 57 to refer the veto bill to the Ways and Means Committee, which drafted the measure, and Chairman Al Ullman of Oregon said it would be held in abeyance as long as Ford's voluntary suspension of oil tariff fees remains in effect.

The Senate said earlier it would not act on the veto in view of Ford's 60-day suspension of the second and third dollar fees that were to bring the tariff on imported oil to $5 a barrel by April 1.

The House vote came amid new talks of compromise with Ford on an overall energy program.

In other energy-related developments:

James S. Cross, an economist and vice-president of the American Petroleum Institute, told a House energy subcommittee that threats of another Mideast oil embargo could be minimized by storing crude oil in ancient salt domes that lie undergound along the Gulf Coast.

**4 Poly grapplers in nationals**

The NCAA Division I wrestling finals will begin Thursday in Boston, Mass., and for some it will be the end of their season. For others, it will be the end of their career as a college athlete, perhaps even their last major athletic endeavor.

The senior wrestlers who have spent their four years of eligibility will be turning their thoughts towards graduation and a different form of competition.

Of the seven Mustang qualifiers going to the nationals, three fall into this category, Cliff Hatch, Bruce Lynn, and Rodger Warner.

Each has had an excellent season. Lynn set a Cal Poly record by pinning Oregon's Mark Evenson in eight seconds. Rodger Warner had a team high 23 wins and was chosen outstanding wrestler at the western regionals in Utah.

Hatch, although injured for part of the year, bounced back to win the regional championship at 167 pounds.

Now they must look ahead, to the nationals and then to graduation.

Of the three, only Hatch is willing to take a definite stand on the prospects of the upcoming nationals.

"I expect to win. I'd like to do my best, but I expect to win the championship," he said.

Coach Vaughan Hitchcock is also optimistic about Hatch's chances, citing the wrestler's outstanding technique as an aid to his winning national honors.

Until recently Hatch had been disillusioned with his ability to ride, or maintain control of his opponent. But when a shoulder injury forced him to take a rest midway through the season, he had time to sit back and think of how to improve his style.

"He feels if he wins the nationals, it will be on riding ability. He's making a mid-season injury a blessing in disguise. Most wrestlers must work hard all season and often reach their peak too soon. Missing part of the season simply delayed Hatch's peak. He feels it will be just in time for the finals." Warner and Lynn, although not saying anything definite about their chances, are going into the nationals confidently.

Lynn thinks his prospects are pretty good for placing, and when asked about fifth or sixth place said, "I expect to place better than that."

Warner, if he is aggressive in the finals the way he has been throughout the season, he stands an excellent chance of coming away with a high placing.

STENNER GLEN
1050 Foothill Blvd.
544-4840

Head Coach Steve Simmons says "the track team is on their way to one of the best seasons ever for Cal Poly."

Last year the track men under the direction of Simmons placed third at the NCAA college division behind first place North Dakota State and Eastern Illinois Universities.

According to Simmons, of the 12 men who competed in the NCAA meet last year only four were there. Jimmy Davis, Melville; Joe Prince, 440 relay; Dave Johnson, mile relay; and Dave Hunter, 17 feet one-fourth inch pole vault.

These men have been replaced about three to four times over, because we have three to four men competing for each event this year, last year we didn't have this kind of depth," said Simmons.

This year the trackmen have taken on the slogan SLO Town track men, simply clarifying that the trackmen are from California Polytechnic State University.

Personally I think it adds a touch of class. The bright gold letters on the face of the green t-shirt stick out big and bold, besides they’re going to be in a big surprise when we get out on the track and we’re not SLO," said Simmons.

There are several new faces competing for the first positions on the SLO Town track team. Coach Simmons had this to say about the new personnel.

JIM PICKARD—a junior sprinter transfer from Cuesta College. "Jim is doing well in the 100 yd dash and is presently leading off the 440 relay team."

MIKE BARTLETT—a freshman running the 440 yd. dash, and the 440 intermediate hurdles. Simmons said, "Bartlet has presently shown outstanding potential, and was the leader on the record setting indoor mile team." In his first year of running the 440 intermediate hurdles Bartlet is so far undefeated.

GILBERT PROCTOR—a freshman 440 yd. dash man who ran the second leg on the indoor mile relay team. Practice continues to run outdoors very well, according to Simmons.

STEVE RUM—a junior shot and discuss thrower transfer from Football Junior College. "Steve is the top discuss man on the team, and has the potential to be a national place winner this year."

DAV UNDOULT—a freshman mile, "Who has been a very pleasant surprise so far this season. Dan was a 4:27.0 miler in high school and so far this season he has surprised that by running the mile in 4:22.2," said Simmons.

RANDY MYLIVIEC—a sophomore mile. Randy was inducted his entire freshman season at Poly. This season Randy has worked out very hard and looks to be in top condition. Randy should be expected by the coaching staff to run under 4:10.6 in the mile," said Simmons.

KEVIN EATON—a freshman 440 runner. "Kevin has the ability to compete very well under 4:14 in the 440. He should be a consistent point winner." said Simmons.

BARRY BRYANT—a junior sprinter transfer from Cuesta College. "Bartlet has presently shown outstanding potential, and was the leader on the record setting indoor mile team." In his first year of running the 440 intermediate hurdles Bartlet is so far undefeated.

CHAR TAYLOR—a junior 440 yd. dash man who ran the second leg on the indoor mile relay team. Practice continues to run outdoors very well, according to Simmons.

BARRY BRYANT—a junior sprinter transfer from Cuesta College. "Bartlet has presently shown outstanding potential, and was the leader on the record setting indoor mile team." In his first year of running the 440 intermediate hurdles Bartlet is so far undefeated.

Folk group

The Christian folk rock group Phoenix Sunshine and singer Chuck Gurnell will give a free concert in Chumash Auditorium on Thursday, March 15. The concert will be held from 7:30 to 10:30 p.m.

The group is from Calvary Chapel in Costa Mesa and has toured throughout the United States.
