SAC will vote on discounts

The placement of a student representative on the Academic Senate and a joint discount card venture with Coramae Grange will be the main items of business when the Student Affairs Council meets tonight at 7:30 p.m. in Room 201 of the University Union.

According to SAC chairman Mike Kurtz, the council will vote on whether to endorse the placement of a student representative on the Academic Senate. There had been little student rep for this group until 1971, when the senate decided that representation was not needed.

The Academic Senate is made up of faculty representative from the various schools here. They rule on items such as tenure, recruitment and promotions for faculty members here.

The discount card business item deals with the renewal of a joint project that was started a year ago but called after Cal Poly decided not to offer the card. It was unclear because Coramae students were getting the card for free and getting it before Poly students. Cal Poly students were paying 41 cents for the card which gives 10 discounts at several San Luis Obispo merchants.

According to Kurtz, a compromise has been worked out with Jim Martinez, Coramae's body president. Martinez stated Coramae students will get the card free but not until after they have registered. This will prevent them from getting a "junk" on Cal Poly discount seekers.

Job lists, placement available

by ARMANDO CORDELLA

With unemployment reaching here, here and there, there are 100,000 jobs in usable form. And 25% is available for 10 people. Can you place any of these in your area? They will be advertised in the next couple of weeks.

WASHINGTON (UPI)—President Ford said Tuesday America will emerge from its In- dianapolis ordered stronger and wiser. "We should not fall into the trap of blind nostalgia—of per- sustaining ourselves that America's best years are behind us. There is a lot of negative talk like that going around," Ford said. Ford sold some 3,600 delegates to the 60th Convention of the Daughters of the American Revolution. "It can be answered in one word: nonsense." The delegates adopted Ford's eight points on energy and the economy and the defense of the Administration Building. Director Gene Rivenbourn emphasized that the prime time for the renewal of the flow of the Administration Building. It is not clear yet if the court has decided to refer the issue to the House of Representatives. Would this be the case? It is not clear if the House of Representatives would be interested in this case.

The very first time they get in here, they are asked to give us an over- due with resumes and data sheets. And preparing them for interviews with recruiters, said Rivenbourn. "But here is the April answer: We will not have the next month's resumes.

The recruiters are not satisfied with the way the first time they get in here, they are asked to give us an overdue with resumes and data sheets. And preparing them for interviews with recruiters, said Rivenbourn. "But here is the April answer: We will not have the next month's resumes.

As Associate Director Richard Karpinsky comments, it is "We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone. We don't place anyone.

Mud 'n honey flow

Even though ASI candidates for the upcoming elections are not officially allowed to begin campaigning until the Monday after Poly Royal (April 28), honey and mud are already flowing through the halls and right back out; the honey just comes in and sticks, rather discouragingly, to everything.

You see, it's been a rarity for the editor to endorse a presidential candidate immediately preceding the election. And this year's hopes have no trouble remembering that the candidate Mustang endorses is usually the next ASI president. So honey has flowed in my direction in the form of special letters and all sorts of conclusory actions toward Mustang Daily. Evidently too much honey, like too much peanut butter, sticks to the roof of your mouth and gums you, unless you're accompanied by something more substantial to wash it down with.

And while the honey sticks and stays, the mud seems to be picking up speed.

I suppose lashing out against other candidates should be expected in the lusty political tradition. But I don't think it will ever fail in my direction, nevertheless.

The number of 'horrible' rumors that waltz through the Graphic Arts building becomes more and more monstrous as election time draws near. I'd like to see how many of those rumors come from one or another of the campaigning parties.

Any candidate who operates his campaign from the general area of the pig pen deserves whatever mud may splash on him during the mud-slinging.

The surest way for him to lose votes, and probably the election, is to undermine his opposition as much as possible. Base his campaign on the faults of the other contenders, and keep pushing to find out whether or not he has my editorial endorsement.

The surest way for a candidate to win is to worry about his own position and his own campaign, not to waste time trying to find out how the opposition does not know Mustang rules.

In the past, this campus has been subjected to a series of infamous campaigns, many of which reached professional heights—and depths.

I hope that the candidates remember that they are students who want to work for students, and that expensive, elaborate campaigns have no place on a university campus.

Student turnout in previous elections has been pitifully small, and the candidates who had the strongest private-interest groups, i.e. fraternities, student government, minorities, campus organizations, took the election.

Whether you want or not, the ASI presidency is an important position on this campus, and could even be more so if it was represented a balanced segment of the student population.

I will try to acquaint you with each presidential candidate as thoroughly and objectively as I can, publishing written question-and-answer interviews with each of them.

I will not endorse the beauteous people of the 'who-nicest-to-Mustang' syndrome.

But at least I think I can stop worrying about a fire-breathing for a while.

MARIJ NIEUWMA

Possible effects of the three-year enrollment plateau upon Cal Poly and the community were outlined Monday in a series of staff reports discussed at the President's Council.

Enrollment at Cal Poly will be held to 15,800 annual full-time equivalents (FTE) students for the following three years starting from the academic year of 1971, according to an announcement last month from Pres. Robert E. Kennedy.

Comparing pre-planned enrollment targets with the 15,800 level, the staff reports deal with expected effects upon admissions, housing, facilities planning, hiring and economic impact on the community.

Dean of Students Everett M. Chandler said procedures are under consideration to assure fair admissions. He is basing this on Cal Poly's experience of 1971 when enrollment was held at 12,000 FTE.

Other reports included those concerning predicted losses in funds which otherwise would have been spent on the community and the levelling off of personnel on the Cal Poly staff.

"It is truly unfortunate that these effects will be felt at a time when we have literally thousands of students more than we can accommodate, who would like to enter Cal Poly at a time when jobs are becoming increasingly scarce," Kennedy said.

The colonial roots of America as personified in the personality and career of Benjamin Franklin will be presented as a lecture by Dr. Tim Barnet tonight at 6:30 in Room 123 of the Agricultural Engineering Building.

The lecture is a part of "Revolutionary America," a class offered this quarter in observance of the Bicentennial. The public is invited to attend.

There will be an open discussion entitled "What is a Catholic?" following the 7 p.m. business meeting of the Newman Club tonight in the Agricultural Education Building, Room 221. Refreshments will be served.

For more information call June at 541-0418.

The student chapter of the American Society of Mechanical Engineers will feature a lecture about reactor safety precautions and fuel rod burnout in boiling water reactors at the Thursday, April 17, meeting.

The lecture by Jim Easter, a Westinghouse representative, will follow the group's 7:30 p.m. business meeting in Engineering West, Room 126. All interested persons are invited to attend the meeting and the discussion following.

For further information, contact Ben Taylor at 545-2253.

The San Luis Obispo County Band will present its spring concert on April 19 at 8 p.m. in the Cuesta College Auditorium.

The band, under the direction of Coleman Binyon, consists of members from San Luis Obispo County, Santa Maria, and Guadalupe.

Binyon, a retired Army Band Master, is an instructor on Cuesta College's adult staff and band members are former professional, semi-professional and amateur musicians.

Financially supported by San Luis Obispo County and sponsored by Cuesta College, the band meets Thursdays at 7:30 p.m. in the music room of the Laguna Junior High School on Los Osos Valley Road.

A slide show dealing with the proposed Estero Bay supertanker port will be presented by a Standard Oil of California representative during a meeting of the Cal Poly University Club on Thursday, April 17, at 11 p.m. in the faculty dining room.

Steve Knox, who will present the slide show, will answer questions about the commercial project following his presentation.

The president of Morro Bay Tomorrow, William McDonagh, will discuss the proposed Estero Bay supertanker port at an 11 a.m. meeting of the Public Interest Group on Thursday, April 17, in Dexter Library, Room 126.

Interested persons are invited to attend the meeting.

Another Continental Discount Fare: STAND BY TO SAVE $42 TO CHICAGO

 Believe it or not, our Chicago Standby Discount Fare on selected flights is only $104. And we have Standby Discount service to other cities, too.

The Avila Formula: Life Among Friends

Photos by Gil Rocha

Cathy Rodgers is one of 85 students at the Avila School for handicapped adults. For Cathy, each day is filled with laughter, friends and new discoveries. The future indeed looks promising. Cathy begins her exercises each day at 11 a.m. (ABOVE) followed by a quick refreshment period at the snack bar (RIGHT). In between instruction periods Cathy enjoys a friendly chat with her good friend Margaret Bebe (BELOW).
Job lists, placement available

The first step is to formulate a self-evaluation. The placement center helps the student to assess himself, then to get it down on paper. This is called a resume. The resume is used by recruiters and prospective employers to better understand what the student has to offer.

A letter with the objective of getting an interview must then be written, and again the placement center assists the student. Often times a recruiter will be visiting the college in the near future which would supervise as “interview later.”

The next step then would be to prepare the student for the interview. What kind of questions to expect; what kind of answers to give... The key factor however, is appearance.

A recruiter invariably looks for his company’s image in the student and asks, “Could this person work for us?” If the student does not portray the desired image, his best hope is to impress the recruiter with an outstanding feature or ability. For this reason, the placement center suggests a conservative approach when it comes to appearance.

“Appreciation is a tremendous factor,” said Equation, “we inform the student of its importance but the decision is his.”

Upon completion of an interview, a letter of appreciation is sent to the student with assistance from the placement center if necessary. The end of this process involves decision making about job offers. The centers also assure the student that the best job offer is probably not that familiar with part time employment help from the center. Part time jobs are usually called by the employer but occasionally full time openings arise. Jobs are filled out in the first come first serve basis. However, a registration card should be filled out and filed at the center which may be used to contact a student about a job.

Getting food together

Peyote, ice cream and muscle activity

Editor’s Note: This is the second in a series of articles dealing with nutrition, written by Susan Ware and Susan Chalk, dietetics students at Cal Poly.

There is a rule that runs completely through our body that never really enters the body tissue. The digestive tract from mouth to anus is a continuous space that doesn’t enter our body.

It’s the exchanger channel where outside environmental factors can enter into our body through the process of digestion. If you were to treat a head of lettuce only 1 per cent of that head would enter into our body, the other 99 per cent would pass through.

Various sections in the body thus the color and mechanical processes will change in shape, but it’s essentially the same head of lettuce. Lettuce has its dietary use, but cellulose is hard for the body to digest.

Different foods yield different results to the body. The chemical combinations of the food affects you in different ways. An example is to eat some peanut butter (a plant) or eat some carrots. Each have their own filters for sugar, spices, ice cream, or soda pop does.

Certain foods are good for you and help you develop in many ways. When I talked about respecting the temple of your body (in last week’s article), I meant you should enjoy foods that would be beneficial to the body and not ones that could be harmful. Many people don’t really understand what is good or what is bad so we’ll run through some information on some items that are needed, carbohydrates, fats, and proteins and we’ll see what the body needs of these.

Carbohydrates are sugars and alcohols. Almost every fruit contains sugar, vegetables contain sugar, and grains contain much starch. There are many foodstuffs which contains high amounts of carbohydrates. Sweets and sugars breakdown through digestion into smaller sugars called dextrose and are used as energy in every activity of the cell.

Every muscular action, every glandular function, every function of the nervous system depends upon the metabolism of dextrose. An important factor to consider with carbohydrates is taking the correct amount to avoid any deficiency or excessive supply which may lead to numerous diseases of form.

Yet, the body does need some carbohydrate for all the functioning of the body. The best sources are not in the intake of sugars like table sugar, honey, or syrups, (although this can lead to additional calories for an undernourished person) but in fruits, vegetable, and grains which are easier for the body to digest and contain vitamins and minerals.

A rule on the amounts of starch to be eaten is the following: When you feel heavy, sleepy or fatigued after a meal containing starch, you should reduce the amount of starch in future feedings. This rule will be workable only with people who do not take stimulating beverages, such as coffee and tea with their meals. These drugs, like any other drug, mask the real sense of the body’s condition when energy is quickly needed by the body; a glass of fruit juice yields loss of energy.

Godspell’s ‘Conversation’ seems incomplete at end

by LIE CURRIE

A good writing job by Gene Hackman is the major high point of conversation, as The Conversation, a film written, produced and directed by the Academy Award winner to Ford Coppola (The Godfather I and II). The movie, now showing at the Bingham Theatre, starts out at a slow, confusing rate but picks up speed and has some very surprising moments. It ends on a note that leaves the audience wanting more, mainly because the film seems to end in confusion. "The Conversation" is just a film with many questions without any answers. What is the point of the conversation?

Hackman plays Harry Caul, a surveillance expert hired by the director to tape a young couple’s conversation, a scene that is taped through Union Square in San Francisco. The Award winner has set an exciting scene of the taping which are also shown as flashbacks throughout the movie.

Caul, famous for his surveillance skills, begins to doubt the ethics of the job he has dedicated his life to. A few years previously, tapes he had made for the Attorney General were used in a murder trial to help the innocent man. "The Conversation" is just a film with many questions without any answers. What is the point of the conversation?

The conclusion of the film is truly a letdown. I left the theatre with a feeling of emptiness. I felt disappointed by it and by the film. Although it does not have some good scenes, it does have some bad scenes. I don’t think it’s worth it to sit through the dull scenes at the end, even Hackman’s performance could not save the film.
UNO—NO HASSLES

Volleyball at home in San Luis Obispo

by STEVE CHURM

What's the first thing that comes to mind when someone says "Cal Poly sports!"? It is the tradition of Mustang football, memories of countless winning championships, or maybe it's the bruising success of the success that strikes a nerve.

Whatever comes to mind, one thing you may have overlooked is volleyball. Interest in the sport is not only thriving on campus, but growing. It's a sport that is slowly developing into a wrestling champion, or maybe lamput. And as a spectator sport, volleyball has attracted an audience following that rival volleyball has. Intercity in the sport is an integral part of a winning volleyball team on the West Coast with a 27-5 mark.

This is in contrast to last year, when the team experienced many of the red tape problems that accompany growing programs. The team didn't begin to practice together until just before the season opener and never meshed into the finely tuned unit hoped for. But this year has been different.

With the return of six players and the assurance of the head coach, Jack Preston, the team and started regular practice sessions the first week of fall.

Long hours of practice have helped the team mature and develop a strong understanding of their opponent, but a volleyballer must combine strength with speed in order to be in the right position to return a spike moving at 75 m.p.h.

Preston's strong emphasis of drills to master the necessary skills has paid off this year. In their second year of intercollegiate competition, the Mustangs are atop the tough California Collegiate Volleyball Association standings and should finish with a 15-1 league mark. They also own one of the best overall records for a small college on the West Coast with a 27-5 mark.

"Dedication" and "perfection," has been the theme of this year's squad and the long hours of input are finally bearing fruit. The Mustangs have qualified for the California Collegiate Volleyball Championships at UCSB and the Far Western Volleyball Championships at Berkeley this weekend.

Looking ahead to next year, Preston loses five players to graduation and foresees a year of rebuilding.

Four of the five playing in their final season are veterans. Captain Jeff Blanchard, setter Steve Bartlett and Worth and Max Boveri defensive specialists used primarily as sub-

Fresno is PolyRoyal rodeo foe

Rodeo teams from Cal Poly and Cal State Fresno will continue their tug and tuck battle for dominance of the Western Region of the National Intercollegiate Rodeo Association during the Poly Royal Rodeo on Friday and Saturday, April 8-9.

More than 150 collegiate rodeo performers will compete in the two-day show, which is scheduled as part of the third annual Poly Rodeo celebration at Cal Poly.

Poly Royal is an open house of all instructional departments surrounded by a host of special attractions, including band concerts, Poly 500 soap operas, film analysis as well as arts and crafts for the field coaching.

At 62, Simmons was instrumental in the sweep by Mustangs winning Saturday's match against Marshall Mannon of Northridge, 6-4, 6-2.

Jorgensen's squad now stands 11-5 overall for the season (4-0 in conference play). The trackmen competed in league opener Saturday with a good suit by Mustangs after they swept all four matches in the opening round of conference play.

Mustangs finished the 1976 Olympics. In 1971 Simmons was the triple jump winner with a long jump and triple jumps will be held in the University of Washington atSeattle from June 13-18.

The long jump coaching will be handled by ex-Olympians and present administrator at the University of Tennessee, Ralph Brown, along with Hays and Garvie Hopkins, coach at San Francisco State and a 1964 Olympian team member.

The camp coordinator will be Oregon State track coach Bernie Wagner. Wagner will coach the Poly Royal Rodeo is one of the National Invitation team members.

Netters win opening round of CCAA play

There was some association by Coach Ed Jongerius as to how his tennis team would fare this year in conference play after losing such a tennis star as Dan Lambers. Jongerius would seem now to have little doubt about his Mustangs after they swept all four matches at the two past weekend in the opening round of conference play.

Coach Simmons and his Mustangs took turns regarding the meet as a "check point along the season to weed out the final few" and hopes the meet will grow into a major relay meet sometime in the future.

The trackmen competed in "The Meet" Saturday at Poly Track in Santa Barbara.

"The Meet" track team statistics

U.C. Santa Barbara hosted the meet and the meet will grow and hopes the meat will grow into a major relay meet sometime in the future.

THE NAVY

The Nuclear Age is here, but finding qualified men to master its advanced technology isn't easy. The Navy needs these men because it operates 70 percent of all U.S. nuclear plants. As a senior or senior in engineering, math, physics, or chemistry, you may be eligible to apply for a $6,000/month scholarship during your senior year and upon graduation as part of the world's most experienced nuclear employer, the U.S. Navy.

Aviation oriented sophomores or juniors can receive a Certificate for themselves in Naval Aviation. As an undergraduate in the Aviation Reserve Officer Program (AVRO), you're guaranteed flight training upon graduation and you accumulate pay longevity while in school.

Aviation officers in the Navy receive a $5,000 start upon graduation and can choose any job in the world. With college paid for, this is a most attractive risk-free proposition.

Railroad safety jobs are available in the Navy too. As a railroad signalmen you can work on the Atlantic or Pacific coasts. Another possibility is as a seaman on a cargo ship. Training is extensive and the program is well rounded.

Computer professionals will also be in demand. Training and a job are available in the Navy computer field. You can be paid up to $24,000 in your first year. Promotion is rapid. You can become a team leader in as little as 1 1/2 years.

Housing

Navy Officers may live in family housing units. If available, officers may live in apartments in the community or may rent a house for the length of their tour.

Housing is provided within the community for officers and their families when available. Rent is generally low and families are often assisted in securing adequate housing. The Navy also provides an extensive moving and storage program.

Cali Poly launched its women's intercollegiate softball program Saturday with a good suit by Mustangs after they swept all four matches in the opening round of conference play.

The learn will travel to UC Riverside on April 17 to play in the league opener. The two schools were originally scheduled to play a

The Mustang track coach Steve Simmons has been selected to serve as a Long Jump and Triple Jump coach for prospective 1978 U.S. Olympic team members.

The specialized camp is to be held at the University of Washington at Seattle from June 13-18.

The top 10 men in the country, based on their marks in both the long and triple jumps will be invited to the camp.

Netters win opening round of CCAA play

There was some association by Coach Ed Jongerius as to how his tennis team would fare this year in conference play after losing such a tennis star as Dan Lambers. Jongerius would seem now to have little doubt about his Mustangs after they swept all four matches at the two past weekend in the opening round of conference play.

Mustangs finished the 1976 Olympics. In 1971 Simmons was the triple jump winner with a long jump and triple jumps will be held in the University of Washington at Seattle from June 13-18.

The long jump coaching will be handled by ex-Olympians and present administrator at the University of Tennessee, Ralph Brown, along with Hays and Garvie Hopkins, coach at San Francisco State and a 1964 Olympian team member.

The camp coordinator will be Oregon State track coach Bernie Wagner. Wagner will coach the team.

Counter Instructions are not expected to be given the at the Poly Royal Rodeo. The Poly Royal Rodeo is one of the National Invitation team members.
