Big week anticipated for grads.

Though it will be seen over, graduating seniors, other than cramming for finals, will have to hustle if they haven’t yet in preparation for their Senior Activities Week.

The start of the events will be this Sunday, June 8 when wives of graduates will be honored. The Pushing Hubby Through College ceremony will start at 2:30 p.m. and end at 4:40 p.m. in the Chumash Auditorium.

Next on the list is the Senior Barbecue which is scheduled for Friday, June 13, from 6 p.m. to 8 p.m. at Corona Park.

On the morning of graduation, June 14, ROTC Commissioning will begin at 8:30 a.m. Afterwards, the Senior Branch will follow from 10 a.m. to 11 a.m. in the Chumash Auditorium. Immediately following will be the long standing, traditional Tree Planting ceremony.

Graduating seniors with a cumulative grade point average of 3.5 or better and in the upper 8 percent of their graduating class will be honored by Phi Kappa Phi Saturday at 1 p.m.

Then after a long look at their hard fought diplomas, seniors will end their week of activities with the Senior Ball to take place in the Madonna Inn Wine Galler Saturday at 11 p.m.

Petition seeks study of campus security

More than 500 students have signed a petition being circulated by a Cal Poly student calling for an investigation of campus police officers.

Gary Clodfelter, author of the petition, hopes the petition will result in some changes in police policies concerning campus security officers. He would like to see an investigation "for higher ups, but I'm not sure who yet," he said.

The fourth year bio-chemistry student added that several students have contacted him about the petitions, including "some people on BAC, Mike Hurstado and others," who have asked him for petitions.

Clodfelter originated the petition because, to his knowledge, a formal complaint he lodged against a campus officer wasn't acted upon. He filed the complaint on January 5, 1976, charging an officer with alleged misconduct.

Clodfelter felt that the officer had been abusive and threatening in his dealings with him.

The accused officer has denied the charges.

Discussing the matter, James Landreth, director of business affairs, said that there is no campus-wide policy or procedure for handling complaints against staff and faculty. He said that he could not even form a three-man group to investigate the charges, but (continued on page 4).

Retention or dismissal?

Dennis Salas in a unique position

An assistant professor here, Salas may be spending his last week on the Poly campus—for he may be the nucleus of a new major program to be started in the fall.

At the beginning of May it looked like Salas' days on this campus would be limited to the end of the Spring Quarter. In fact, when M.E.C.H.A., a Chicano student group on campus, celebrated Cinco de Mayo, the program was dedicated to Salas.

The dedication read: "Dedicated to those Chicano faculty who have become victims of the educational system and to one who constitutes the struggle here at Cal Poly, Dennis Salas."

As it stands now, Salas is the only Chicano faculty member who has post-Masters degrees. The "victims" program referred to were four Chicano professors who had either quit outright or had not had their contracts renewed—all in the last two years.

Dance to help band to Europe

A dance featuring "Pachyderm," will take place in Chumash Auditorium Saturday night from 8 p.m. to midnight. Tickets will be on sale at 7 p.m. Admission is $1 for singles and $1.50 for couples. Proceeds will help send the Symphonic Band to Europe this summer.

Looking back

Poly not 'Reagan-perfect'

If someone had told me nine months ago that John Romo and Greg Fowler would approach the Publisher's Board "for their own personal satisfaction," and ask that I be fired, I wouldn't have believed them.

If someone had told me nine months ago that another high-ranking member of the administration would give legal opinions so haphazardly that he consciously lied to the governing student body treasury, I wouldn't have believed them.

And if someone had told me nine months ago that SAC members couldn't be led by the nose by a fast talking "representative" who admittedly votes his own 'conscience,' I wouldn't have believed them.

And if someone had told me nine months ago that a high-ranking member of the administration would make the change from "hard times edition" to help KCPR for a long-term investment, I wouldn't have believed it.

The list could go on and on.

And the most frightening things on that list would be the behind-the-scenes details that the Mustang Daily editor has the "privilege" of knowing. But not, for fear of strong personal reprisals, the privilege of printing.

The disagreement that most outspoken people on this campus seem to have with me is that I also believe in TRUTH, FREEDOM and FAIRNESS.

And with ill completion, my wish that every student on this campus could be in my position for one day, and see the kinds of things that are happening here, even as you read this editorial.

And the list goes on and on. And someday, maybe we'll find out who's REALLY kicking who.

**Letters**

**Climbing**

Editor: This letter is directed basically toward the rock climbers of the San Luis Obispo area, who enjoy the climbing that is offered in the surrounding peaks.

Friday afternoon, May 30, after a few weeks absence from climbing in the area we headed up Bishop Peak to climb what is known as Shadow Rock, expect ing to find a 5.7 face clim b. This climb gets a little hair y, because the bolt protection is few and far between. Thus it is tends to build up your physical technique and your mental stability which is what you need to advance in any sport.

When we got to the rock we found that during our absence someone had made a bolt ladder out of our clim b. At first we cried and wondered how anyone could do this. Then we proceeded to do the clim b. On the way down we chopped out all the bolts that weren't previously there.

We thought by now, two or three years into the clean clim bing era, that people would stop defacing the rock.

Every clim b is not for every clim ber. The ultimate climbs are the ones that can't be protected or allows you to place a little protec tion. Using pins or bolts when the needed is degrading to the clim b. Royal Robbins must have thought along these lines when he wrote, "Better that we raise our game, he wrote, "Better that we raise our game, than to see this year through, but what we can do for the future generations of students who will continue to inherit the bureaucratic legacy. It is incre asingly evident that unless students assume an active part in solving their own problems, the present conditions will persist. It is time to extend participation in resolving their own concerns. We can no longer allow personal values.

**Warning**

Editor: There I was...-driving along California Street and turning onto Foothill Blvd when I heard a familiar whistle and annou ncing "Ding" announcing the arrival of a San Luis Special, a train. As I came to a quick stop just in front of the tracks, I found myself wondering why I had to go through this so often and wondering if anyone else was wondering this when Wham! I was blasted.

**Applause**

Editor: I feel it only right to respond to Mike Murdy's letter of June 3 concerning the "vindictive" attitude of two of our representatives.

In his letter, Mr. Murdy suggests that we students should contact our representatives and let them know what we think. He implies that we should specifically tell John Romca and Greg Fowler to stop harassing the Mustang Daily.

Mr. Murdy seems to feel that the actions that these two people are taking are based on personal feelings rather than responsible representation.

Well, Mike, I don't know exactly how to break this to you, but there are a large number of people who agree with Mr. Fowler and Mr. Romca in their attacks on our paper. A lot of people quietly applaud their actions but are afraid to speak out and risk the paper's wrath.

Not many people relish the idea of being caricatured as monkeys or otherwise publically stung. I congratulate Greg Fowler and John Romca for having the courage to stand up and let their feelings be known.

In addition, I want Mike Murdy to know there are more than two people who are upset about the cheap shots, public defama tion, and personal inconveniences perpetrated by the Mustang Daily this year.

Dana Warren

**Thank-you**

Editor: I would like to sincerely thank those individuals who voted to give me the opportunity to serve the ASI Student Body. I would like also to thank all the students who actively participated in the recent ASI elections. It was an enlightening and valuable experience for both faculty. But the real challenges are still ahead of us. This coming year, we as concerned Cal Poly students, will have the opportunity to work and express ourselves to the many pending problems that confront us. There is increasing validity to the issues at stake at we continue to inherit the bureaucratic legacy. It is time to extend participation in resolving their own concerns. We can no longer allow personal values.

should not end at the ballot box. Your obligation as students is to know that there are more than a few people who agree with Mr. Fowler and Mr. Romca.

Poly enters Baja 500

Clean air car

The last thing anyone would expect a Cal Poly to receive recognition for is auto racing, but as Baja 500 draws closer, the possibility seems ever greater.

A team of 21 members of the Society of Automotive Engineers has been hard at work and is ready to race a modified Toyota in the mini-truck division of the Baja 500.

According to SAE President Dave Nordeen, the clean air (race) car will compete with Dana Masada and a variety of other small cars. In preparation for the June 13 race, the engine has been modified from a stock 80-horsepower machine to a whopping 131 horsepower. Nordeen said that over 500 man hours of work have gone into the car and it is worth $20,000.

"What is significant about this race car is that it is the only competitive, clean, air off-road racing vehicle in the United States," said Nordeen.

If the car merely finishes the race, a milestone will have been reached at Baja. No college entry has ever completed the grueling 500 mile course.

Cal Poly's clean air car has stimulated national interest. As a result of their excellence in automotive engineering, the local chapter of SAE has been selected by SAE representatives of several universities to assist several schools in starting their own programs in clean air off-road racing. According to Nordeen, the trip through the New England States is still tentative.

"We are going to Baja with intentions of finishing the race," Nordeen said firmly. "We won't pull out unless the car stops running." Finishing the race would be a feat in itself, but judging from pre-race tests runs, Nordeen rates the chance of winning as "excellent."

"Our car will be one of the finest down there," Nordeen said. For the past two weeks, the 21 man crew has worked until 2 a.m. or better making last minute refinements. Nordeen emphasized that the car was not built by one person, calling it a total club effort.

"This project is providing us with good practical engineering experience, plus enabling us to compete at a professional level," he added.

"The SAE club will pay for the trip to and from Mexico for the driver and pit crew. Nordeen stated, "We have received $11,015 in donated parts for which we are most grateful."

Along with Jeff Hendrick, an SAE club member, Nordeen will drive the car, alternating at each of the seven pit stops. The pit crews will change tires, pump gas, and give quick overall inspections faster than you can say "Mario Andretti."

"The SAE club will pay for gas expenses and 20 dollars for food. Nordeen added to chuckle. "If we don't win with numbers like that, then we just can't win."

Norden expects stiff competition but is optimistic about his team chances. "We drew 7-11 for our race numbers," Nordeen said, "and three other merchants said, 'We ha...

Twenty-six entries are expected to compete for the $5,000 first prize in the mini-truck division. This year, the Baja 500 is being conducted by Score International under the sponsorship of A.C. Delco.

Female officer joins Cal Poly campus police

The first female security officer has joined the Cal Poly force. Pauline Hardy, 35, will have the same duties as any other officer "as soon as I can learn the ropes."

The Sacramento native believes she will have a good effect on the department. "Women don't feel like talking to men after they have been the victim of some crimes. At least men know that there is somebody to talk to here someone who can understand their problems," Ms. Hardy said.

"There is a need for greater rapport with people. People should be more than just facts," she said. "I want to help people rather than bust heads."

Officer Hardy is no stranger to student problems. She attended Cuesta College for two years, went to Cal Poly briefly and then transferred to Fresno State. She graduated from Fresno with a B.S. in criminology.

"I've spent just about all my working life in some kind of police work," Ms. Hardy said. She has served as dispatcher for the California Highway Patrol for seven years and has been a police clerk and a parking enforcement officer. ("We know how much they are liked," she said.)

"I'm not much of a woman's-libber," the said. "I think if they have the ability then women should be able to get the jobs they want," the said.

Ms. Hardy is joined on the force with another new officer, Larry Batesen. They completed an 18-week course at the Regional Criminal Justice Training Center in Modesto together. They must now serve a two-year probation period before they become full-fledged officers.

Book Review

Will to survive

The book does not waste any words; those looking for Zane Grey excitement won't find it here. What they WILL find is a story of emotion, humor, death, love and finally, life.

Long-winded, descriptive writing has never appealed to me, and I was afraid that "Alive" would be overrun by masses of words about mountains, gaunt survivors and the first sign of civilization.

But the story is told simply. Most descriptions are vital to the mood and setting, and the few that get carried away with themselves can be easily ignored.

I found the most excitement in putting myself in the survivors' places—wondering what I would have done if I found myself in the same situation.

Hunger so overpowering that cannibalism becomes a necessity. The few who live are in a hell of their own making. The one closest to fact. The most impressive tale told it to me.

"Alive" by Plano P. Rand paperbound - $3.95 available at El Conrail

The most impressive tale told it to one closest to fact. Knowing that something similar could happen in your own life adds an extra bior of excitement to the reading experience.

Such was the case with "Alive".

What would YOU have done if you survived a plane crash in the high Andes of Chile, with little or nothing to eat but the bodies of your dead friends? Would you REALLY have let yourself die?

My first reaction was revulsion, but as I read through this young athlete's ordeal I began to feel the intensity of man's will to survive. What they WILL find is a story of emotion, humor, death, love and finally, life.

Mustangs third in Division II
Provo next stop for Mustangs

Sophomore Clancy Edwards, the Santa Ana flash who already owns three NCAA Division II sprint titles, heads the six-man entry of Mustangs in this week's Division I championships at Brigham Young University.

Trials begin on Thursday with final events on Friday and Saturday.

Edwards successfully defended his 220 title at Sacramento State last week winning by eight yards over Adrian Rogers of host Sacramento, and added the 100 sprint title too.

As a freshman Edwards had finished second in the 100 sprint with a wind-aided 9.8 clocking, the same as the winner, Norfolk State's Steve Riddick. Edwards beat Riddick for the 220 crown with a wind-aided 20.4 time.

In the 100 Edwards was credited with a 9.3 time on the stop watches but the Accutrack electronic timing equipment caught him in 9.54. His 220 time was 21.99 in the finals and 21.9 in the semifinals.

While Edwards is entered in both sprints, coach Steve Sim­mons said that Clancy might just run in the 220. Trials in both the 100 and 220 are scheduled for Thursday evening. The 100 semifinals and finals will be on Friday while the sprints and finals of the Silver State for Saturday.

Sophomore 440 man Currie Biddle finished fourth in the finals with a season's best time of 47.84. Later he came back to run a 46-flat anchor leg as Poly's mile relay team finished second in 3:50.55, a school record breaking the 3:50.6 mark set in placing second in the 1974 NCAA Division II event at Charleston, Ill.

Fresh Mike Barstow from Pied­mont; Gold, senior from Woodland Hills with a 47.6 leg in semis and 47.7 in finals. Junior Kevin McNamara with 48.4 and 48.6 chases Byrd with a 47.2 semi anchor then that dazzling 46 flat performance in finals will carry Mustang mile relay hopes at Provo.

Poly's only other entrant is junior pole vaulter Ken Haagen from Santa Barbara. He managed only 13-6 at Sacramento for a fourth place finish after entering the meet as the favorite with a season's best of 16-8. Trials are Thursday and finals Saturday.

Ex-Poly golfer in U.S. Open

A former Cal Poly golfer and five other Californians are headed for the U.S. Open in Chicago, Illinois.

Greg Edwards, who golfed for the Mustangs in 1970 and 71, shot even par 144 to tie with Edwards for third out of 60 golfers at San Luis Obispo Country Club Thursday and finals Saturday. Edwards finished in a tie for third place after entering the meet as the favorite with a season's best of 16-8. Trials are Thursday and finals Saturday.

The tickets hold numerous ad­vantages for students. With all five home tilts after school starts in September, students will save money while avoiding the long general-student lines.

Mustangs will host an attractive schedule opening at home on September 27 against Fullerton. On October 4, arch rival Fresno State will tangle with Head Coach Joe Harper's squad, followed by Cal State Los Angeles on October 18. Idaho State will be the homecoming foe on November 22 before the Mustangs close out their home slate against sister school Cal Poly Pomona. All games are scheduled for a 7:30 kickoff time.

1975 season football tickets now on sale

Season football tickets for the 1975 home season have gone on sale at the All business office in the University Union.

Priced at $21 for the general public and $10 for students, the tickets guarantee the holder a reserved seat of his choice which may be selected at time of purchase.

Sunburn season

Avoid the pain

A typical physical agent is an opaque substance like zinc oxide which blocks sun rays. Most of the chemical sunscreens on the market absorb ultraviolet light and are not as widely accepted.

Each chemical has a fairly specific range of ultraviolet absorption so there is no certainty that one particular product will work best under all conditions at all locations for all people. Dr. Collins says they do have and should be used literally according to the directions on the label particularly at the beginning of the sun season when a protective sun tan has not been developed.

For those who tan with difficulty, there is a custom preparation available which may prevent some damage or protect against skin injury by other mechanisms in some persons. Dr. Collins suggests you do not depend too much on these. They don't always work.

For those who burn easily but want to be outdoors in summer it is recommended that you wear light-colored clothes to block the sunlight and wear sun blocking garments on exposed parts of the body. A few persons possess a special kind of photo-sensitivity, which can not be acquired or attained through exposure to sunlight or certain conditions on exposure. For them, they should stay indoors.

Some ultraviolet wavelengths can burn on very short exposure.
