Why Choose Booze?

It wasn't even the end of the first half of Cal Poly's first home football game before the four guys had downed three bottles of vodka.

One suggested that for the next game they should bring a bottle for every quarter. When one of them complained he wasn't feeling anything yet, another one suggested taking codeine to bring on a numb feeling.

Two rows in front of them a boy who must have been a freshman was sitting alone with a pint of whiskey to keep him company.

In an attempt to deal with the misuse of alcohol and drugs, the Psychology Department has initiated an experimental course called Psychology 101X, Behavioral Effects of Drugs and Alcohol. Dr. Peter Litchfield, an associate professor of psychology and the instructor of the course, said his class takes a critical rather than moralizing approach toward the problem of drugs and alcohol.

Dr. Litchfield said his class has been well received. However, the catch is to reach the students who really need help. For those who don't wish to commit themselves to a class but do recognize their problem, the Health Center offers counseling and other aid from 8 a.m. to 12 p.m. Monday through Friday.

Those persons who choose to take advantage of the assistance offered by the university out of their own free will might be saving themselves an involuntary trip to the Health Center.

Director of Health Services Dr. Billy Mounts says it's unusual for the Health Center to treat three or four alcohol connected injuries or accidents during a weekend.

Stunting Growth

Expecting the worst generally is a good way to invite your lowest expectations to be fulfilled.

This could be the trap the San Luis Obispo City Council falls into if it accepts the premise of City Development Director Rob Strong that San Luis Obispo should begin planning for a possible population of 60,000 by 1995.

Strong can't be faulted for doing what he's paid for, and that is giving his professional opinion. But, it is the City Council's function to agree or disagree. We hope it will disagree.

The city should stop and examine what it wants to become or whether it wishes to remain as it is rather than allow itself to be propelled by the momentum of growth. The city has reached the point where it must decide to be the master of its own fate.

This included telling Cal Poly as of what point the city will no longer willing to cope with the university's expansion.

Another Viewpoint

Handguns: Instruments Of Death

Reprinted from the Los Angeles Times

Legislation to ban the private possession of handguns was introduced Tuesday in Congress. At the same time, a drive for enactment of a similar statute in the California Legislature was introduced.

Both moves should give the full support of all persons who regularly handle handguns for what they are—potential instruments of death.

The entrepreneur who sold two handguns to Sara Jane Moore, one of which was confiscated by San Francisco police and the other used on the day of sale in the attempted assassination of President Ford, says the transaction was legal because his principal business is the manufacture and sale of replicas of 19th-century weapons and the buying and selling of modern guns is simply his hobby.

Some legal experts think otherwise, but they admit that the present law is vague and in need of clarification. The Penal Code says no "person", corporation or dealer shall sell to certain classes of people and that "in no event shall any such firearm be delivered to the purchaser within five days of application ...." The statute adds that when neither, party, holds a dealer's license no person shall sell any such firearm to any person not personally known to the seller.

In the present case, the hobbyist sold the first gun to Moore a week after he received her proficiency on a firing range. The second gun was sold at 11 a.m. Monday, after Moore told him it was for another woman who was not immediately available.

The law should be changed to provide that private transactions shall be subject to the same restrictions now placed on licensed dealers. The waiting period—increased to 15 days under a law signed Monday by Gov. Brown—should be enforced on private transactions, and the sale of a weapon should be reported to proper authorities.

An even stronger case can be made for reporting the transaction of a dangerous, concealed weapon. The Legislature should consider this an emergency statute when it returns to Sacramento in January. It should follow up that action by adopting the handgun ban. If it fails in that responsibility, an initiative will be in order.

Letters will not be published without a signature and students I.D. number. We reserve the right to edit for libel and length. Sorry, but no copy accepted. Bring letters to Graphic Arts.
The Hewlett-Packard HP-21 Scientific $125.00

The Hewlett-Packard HP-25 Scientific Programmable $195.00

The calculations you face require no less.

Today, even so-called "non-technical" courses (psych, sec, bus ad, or name D) require a variety of technical calculations. Complexized calculations that become a whole lot easier when you have a powerful pocket calculator. Not surprisingly, there are quite a few such calculators on the market today. In front of us, the HP-21 and 25. We started it all when we introduced the world's first scientific pocket calculator back in 1967. Now we're back with the HP-25.

The calculators you see here are our newest, the first of our second generation. Both offer you technology you probably won't find in competitive calculators for some time to come, if ever.

Our HP-21 performs all the usual four function calculations. We've added logarithms, trigonometric functions, and common angle evaluations.

It's display is fully formatted, so you can choose between fixed decimal and scientific notation. Our HP-25 does all that—and much, much more. It's programmable, which means it can solve automatically the countless repetitive problems every science and engineering student faces.

With an HP-25, you enter the keystrokes necessary to solve the problem only once. Then, after you just enter the variables and press the Run/Stop key, an almost instant answer accrues to 10 digits.

Before you invest in a larger machine, by all means do two things: ask your instructors about the calculations their courses require, and see for yourself how effortlessly our calculators handle them.

A legal battle over Kennedy's first rejection delayed any other action by SAC. In June 1974 Superior Court of San Luis Obispo County upheld the university president's rejection.

The ASI appealed to the second district court of appeals in Los Angeles. However, attorney Rich Carmel had only 10 days to file the appeal rather than the normal 30-day period. He failed to do so, and the case was thrown out of court.

SAC eventually approved a set of rewritten bylaws in December 1975. The organisation presently is being accorded privilege given student groups in the process of organizing.
...The Great Map Flap

Hurtado's Plan To Put Poly On Map: A Crazy Chronicle Of Contradictions

by FRED FULIN
Daily Co-Editor

Follow a map and you'll be bound to get where you're going.
Follow the events surrounding the Cal Poly map and you're bound to be confused.

What started out as a "service" to the students was resurrected this past summer. And that's where the conflict lies.

The journey of the Cal Poly map began last year when American Publishing, Inc. contracted with ASI chief Hurtado to publish a map of the university.

The project was delayed for a variety of reasons but was resurrected this past summer. And that's where the conflict lies.

The subject came up again this summer and was scheduled for an OK by the Summer Interim Committee when a letter by ASI chief Hurtado to local merchants changed the situation a bit. It explained that the university had already contracted with American Publishing for production of the map when, in fact, no such contract was signed by the university.

Hurtado had mistakenly signed a contract giving the university's OK of the map instead of the ASI. In his letter to the merchants, Hurtado wrote:

"This will introduce Warren Phillips of American Publishing, Inc. who has been contracted to publish the 1975-76 Campus Map. We will distribute 50,000 maps..."

Hurtado had mistakenly signed a contract giving the university's OK of the map instead of the ASI. In his letter to the merchants, Hurtado wrote:

"This will introduce Warren Phillips of American Publishing, Inc. who has been contracted to publish the 1975-76 Campus Map. We will distribute 50,000 maps..."

Not only had Hurtado signed the contract but no such approval was forthcoming from the university—at least not until RIC was to have been turned over to us. When followed was a barrage of statements from the Administration denying that any contracts had been made. Retailers, fearing that something was amiss, began to pull out of the deal.

According to Dave Garth, Manager of the San Luis Obispo Chamber of Commerce, some withdrew advertisements because they thought Poly was misrepresented by the maps. As Garth tells it, retailers became wary after Hurtado's announcement and the Administration's subsequent denial.

When a representative of the publishing company was asked where the map situation stands now, spokesman Fred Fortado said:

"We have pulled our people out—we have frozen the project."

And as for the map helping students on campus, it won't come about—if the map does indeed materialize. Due to the recent inaction, neither university nor the Chamber of Commerce will distribute the map of this university.

Yet another consideration revolving around the money is the potential threat there would be to the advertising potential to all campus publications, including Goliads—the program for the home football game.

So, for the time being, the Cal Poly map has found a dead-end in the road. The question that remains is whether it will stay there permanently.
No, it's not a trailer park— but Poly's new faculty offices. (Daily Photo by Tony Hertz.)

Poly, SLO News

Childbirth Education League child care classes for new mothers will begin Thursday, October 8, at 1 p.m. at the First Baptist Church, 3075 Johnson Avenue— with Pat Atwell, RN, presenting the first class on maintenance.

Topics for the series of six classes will also include: toys and clothing, a pediatrician, physical therapy on stimuli, nutrition and dangers around the home.

A donation of $6.00 per series is requested but not mandatory and babysitting will be provided. It will be possible to attend a particular class in the second series if missed in the first and those begin January 19, 1976.

If you have some time on your hands and like to do volunteer work the Legal Aids Office could use you. No experience is needed and two units of credit can be obtained. Volunteers will get training in legal research, assisting attorneys and handling landlord-tenant, em­­ployer-employee problems.

Anyone interested can contact co-directors Roland Hill and Don DeLaay at the Student Services Office U.S. Rm. 103 or at 894.

The El Corral Bookstores Mini Art Gallery will once again begin the new school year with its popular "Tag Your Hometown" exhibit.

The exhibit consists of large maps of California, America and the World to which all new students pin their name. Pen and paper clips are provided.

THIS IS HERB CHAMPION
A SENIOR AT CAL POLY

When he graduates, he is GUARANTEED a starting salary of over $10,000 a year
Free dental care
Free medical care for himself and his dependents
Food, gasoline, clothing and many other items at reduced prices
An opportunity for foreign travel
Eligibility for one of the most comprehensive retirement plans offered by any organization
Additional educational opportunities

HERB IS GOING TO BE A UNITED STATES ARMY OFFICER. AND HE WILL ATTAIN THAT GOAL THROUGH HIS COMPLETION OF THE MILITARY SCIENCE PROGRAM HERE AT CAL POLY.

We mentioned some of the material benefits that Herb will enjoy as an Army officer. Perhaps more important is the experience in leadership and management that Herb will gain as an officer plus the personal satisfaction that comes from doing challenging, meaningful work. Our Military Science program is designed to prepare all of our cadets, both men and women, to meet the challenge of life as an officer in the United States Army.

HERE IS HOW THE CAL POLY MILITARY SCIENCE PROGRAM SHAPES UP

FRESHMAN YEAR —
MBl 101-A one hour per week—one credit course in the evolution of warfare, concepts of international balance or power.
MBl 102-A one hour per week—one credit course in the U.S. defense establishment.
MBl 103-A one hour per week—one credit course in U.S. military history and the principles of war.

JUNIOR YEAR:
MBJ 201-A four hour per week-four credit course in advanced leadership, principles and methods of army instruction and countereserve techniques and tactics.
MBJ 202-A four hour per week-four credit course in small unit tactics and tactical communications.

TOTAL CREDIT HOURS-25

WE SPLIT THE FOUR COLLEGE YEARS IN HALF and call the freshman and sophomore years the BASIC COURSE; the junior and senior years the ADVANCED COURSE. All students are eligible to apply for full ROTC scholarships awarded on a competitive basis.

SOPHOMORE YEAR:
MBJ 301-A two hour per week-two credit course in land navigation using military maps and compass.
MBJ 302-A two hour per week-two credit course in the principles of personnel management.
MBJ 303-A two hour per week-two credit course in the principles of military tactics and operations.

ADVANCED CAMP:
Following completion of MBJ 301 and 303, a six-week intensive leadership training and development exercise held at Ft. Lewis, Washington. (salary & expenses)

SENIOR YEAR:
MBJ 401-A four hour per week-four credit course in advanced leadership, military justice, methods of coordination and planning among elements of military team.
MBJ 403-A four hour per week-four credit course, a continuation of MBJ 401.

WHAT IF YOU MISSED SOME OF THE BASIC COURSES?
You can take 100 and 200 level courses concurrently. Or, if you have sophomore standing, you can complete the basic course by attending the ROTC BASIC CAMP at Ft. Knox, Kentucky (salary & expenses) the summer between your sophomore and junior years and then enter the Advanced course your junior year.

All texts and materials necessary for Military Science courses are supplied free of charge.

WE DON’T THINK THE ARMY IS FOR EVERYONE—
But if you’re a cut above, and you want a challenging job when you graduate, stop by the Military Science Department in Dexter Library. We would be happy to discuss the ROTC program with you at length. Telephone 546-2371

Elliott Young, 70 independent Baptists in Shelby County, Tenn., have decided not to proceed with plans to open a Trailers: Faculty And Offices Hitched

WASHINGTON (UPI) - The recent completion of a new $1.3 million dollar science building at Cal Poly University in San llope, Calif., has led to the installation of lights on the south perimeter road that are to be used to control the hours of use.

The hours for swimming facilities are 6 a.m. to 10 p.m. Monday through Thursday; 6 a.m. to 6 p.m. on Friday; and 7 a.m. to 9 p.m. on Saturday and Sunday.

The cards are checked at the outdoor swimming pool, and if the card is not returned the card holder will be assessed a $6 late fee.

The weight room, located in the K. 185 of the PK building, will be open for use Monday through Friday 8 a.m. to 6 p.m., and weekends noon to 9 p.m.

No children are allowed in the weight room.

The weight room, located in the K. 185 of the PK building, will be open for use Monday through Friday 8 a.m. to 6 p.m., and weekends noon to 9 p.m.

TRAILERS: Faculty And Offices Hitched
