Come & Get 'Em

Story On Page 4
Bell: A Dead Ringer

The traditional exchange of the victory bell between Cal Poly and Fresno State marking football victories and defeats has been hitting some sour notes.

As a result, Poly's Rally Committee has voted to suspend the exchange. It believes the rivalry between the two universities has grown too intense. Fights have broken out during games the last two years because Fresno fans have tried to unchain the bell.

Fresno student leaders are unhappy about the decision, but since the bell was donated to Poly in 1952 it has the right to discontinue the exchange.

This was a sensible decision. The blame can't be placed entirely on Fresno fans. They had to have somebody to fight with. But the fact remains the center of contention is the victory bell. Since it now represents bad blood rather than a football win, the Rally Committee should find another adversary to trade with.

Rally Committee Chairman Mike Toscano has a good suggestion. He believes a more appropriate school to exchange with would be the southern Cal Poly in Pomona.
Going Up...
Milk Price Hike?

by JULIE DROWN

Daily Staff Writer

Milk prices will increase by 12 cents a gallon within six months, Harmon Toone, head of the Dairy Science Department at Cal Poly, explained, the need for a support price increase.

"Due to the high cost of feed, in combination with low prices received for milk and culler cows, price supports are vital otherwise dairymen would go out of business," he said.

Toone explained that support prices are part of an intricate system. In general, support prices can be seen as a direct rise in milk cost to the consumer. The government, in turn, "supports" the increase by selling dairy products no lower than a given price on the international market.

"Today there is no real shortage of milk, but there will be unless dairymen start getting a return on their investments," Toone said. "Any shortage would be due to economic reasons, consumption is up despite the prices."

Marketing is not localised, he said. San Luis Obispo would not face a shortage unless it was on a statewide basis.

"Supports keep the industry stable. In order for dairymen to currently stay in business, the 12 cent increase in price of manufacturing milk is necessary. Aid to the dairymen must come from an increase in the price of milk, as we cannot control feed or cull cow costs." But will consumers raise dairy supports immediately or wait till the beginning of the market year on April 1.

Toone's agreement with Dchant that the increase in support prices should take place as soon as possible. A different opinion of dairy price regulations was given, by the Dr. Timothy Kersten, professor of economics at Cal Poly. "I don't advocate the idea of price supports unless there are special compelling reasons," Kersten said, and went on to deny that the dairy industry had any such reasons. "When asked if Bud and his advisers were qualified to take action on the 12 cent increase, Kersten said, "I don't believe a government agency is the best place to make price decisions."
Food Stamps Ala Uncle Sam

A Recipe For Those Who Want To Let The Government Fill Their Cupboard

For one, a student doesn't need to be juggling his final dollar's worth of change in his pocket to qualify—poverty and the food stamp program don't always seem to go hand in hand. And for another, allowing Uncle Sam to buy your hamburger steak no longer carries a stigma—after all, Agriculture Department experts estimate that one person in 10 are on the food stamp roll and the number is on the rise.

Eligibility is based on a net income figure calculated by using a complex list of deductions for items including taxes and some medical, housing and other costs.

A single student with a net income figure of less than $115 a month and less than $1,500 in cash, property and other resources is eligible. And most of the things usually considered property are not counted.

A mortgaged house, clothing, furniture, jewelry, an automobile, television sets and many other comforts don't count when figuring eligibility because they are not thought of as "resources" for food stamp purposes.

Charmaine O'Dell, a welfare worker for San Luis Obispo County, told the Mustang Daily that students should bring their bank books, a letter from home selling the amount of support being sent by the student's parents and another letter from the Cal Poly Financial Aids Office which lists the amount of scholarship help received when they apply for food stamps.

According to their income, students who make the "food stamp team" will receive not more than $102 a month in stamps for which they must pay about 25 to 30 per cent of their net income.

The tremendous amount of traffic of students applying for food stamps congesting the Financial Aids Office and the welfare department seems to indicate students are learning how to go about getting government aid.

According to O'Dell, she has been processing applicants at the rate of one every 30 minutes from 10 a.m. to 5 p.m. daily. And most of them are students.

She said the majority of these students are either living off their summer job savings, receiving money from the family or are getting a scholarship, grant or loan in second school.

And representatives from the Financial Aids office here claim to be processing about 60 letters a day for students applying to receive food stamps.

Our College Plan. $1 a month buys all the bank you need.

Bank of America College Plan is a complete banking package just for students. It's simple, convenient, economical and includes everything you're likely to need. Here's what makes it so useful.

1. The College Plan Checking Account. Unlimited checkwriting for just $1 a month. With no minimum balance required. And no service charge at all for June, July, August or for any month a balance of $500 or more is maintained. You get a statement every month. And the account stays open through the summer even with a zero balance, saving you the trouble of having to close it in June and reopen it in the fall.

2. Personalized Checks. Yours innovatively. Scenic or other style checks for a little more.

3. BankAmericard. For students of sophomore standing or higher, who qualify, the College Plan can also include BankAmericard. It's good for tuition at most state schools, check-cashing identification and all types of purchases. Parental guarantee is not required. And conservative credit limits help you start building a good credit history.

4. Overdraft Protection. Our Instant Cash helps you avoid bounced checks. By covering all your checks up to the limit of your available BankAmericard credit.

5. Educational Loans. A Bank of America specialty. Complete details are available from any of our Student Loan Offices.

6. Savings Accounts. Lots of plans to choose from, all providing easy ways to save up for holidays and vacations.

7. Student Representatives. Usually students or recent graduates themselves, our Reps are located at all our major college offices and offer individual help with any student banking or financial problems.

Now that you know what's included, why not drop by one of our college offices, meet your Student Rep, and get in on our College Plan. $1 a month buys all the bank you need.

Depend on us. More California college students do.

Poly Courses Still Open

There are still openings in eleven of the fall quarter courses offered by the Cal Poly Poly Extension. 40.

Courses will open for enrollment that started last week include architecture, biology, education, home economics, military science and psychology.

Registration, which is taken care of as of the early class meetings, is open to any adult who meets the requirements or has the consent of the instructor.

For further information write "Extension, Cal Poly, San Luis Obispo, 93407," or call 546-2853.

Food Stamps: Take And Bake

Food stamps for the poor and hungry who are not always getting the publicity they deserve is the topic tonight of a panel discussion at the White House. The White House will hold its first meeting tonight at 7 p.m. in the Wharton Room of the Home Economics building.

The White House has received $197 million more than it needs to finance the Food Stamps program.

The White House says that the Food Stamps program is "out of control." It is trying to break the record of 414,000 people who remain on Food Stamps rolls.

"I'm out of control," said Scott Hobson, RAT chairman, "This is just enough to cover the increase in benefits to the program by $2 million price tag.

To the unfamiliar viewer, the outcome of Friday's water polo match between Cal Poly and San Francisco State could have produced a variety of misconceptions. It could easily have been mistaken for a hockey match or a one-sided football game.

Poly had little trouble with the Gators from the 'Windy City' amassing 20 goals in a humiliating shutout victory before a home crowd. Unaware fans may have wondered if the ice had melted out from under a hockey game when three Mustang winners, Ken Wolfe, Dave Farrant and Del Nevill, each notched 'hat tricks' of three goals.

Glancing at the scoreboard, last arrival probably were confused by Poly's touchdown total of seven goals in the second period. They were preceded by four goals in the initial period for the 11-0 halftime spread.

The Mustangs resume play here this Friday at 3:30 p.m. against Cal Poly Pomona.

Hewlett-Packard introduces a smaller uncompromising calculator: the HP-21 Scientific.

$125.00.

Now $125.00 buys:

- More power than our HP-15, 32 pre-programmed functions and operations vs. 22 for our HP-39. The HP-21 performs all by and trig functions; the latter in radians or degrees. It's our only calculator short of the HP-45 that lets you:
  - convert polar to rectangular coordinates, and back again (→P, →R);
  - do full square root arithmetic (M+, M-, MX, M-);
  - calculate a common antilog (10^x) with a single keystroke.

The HP-21 also performs all basic data manipulations (÷, x, y^x, Vx, x^-1) and executes all pre-programmed functions in one second or less. In sum, it's designed to solve tomorrow's problems as well as today's.

- Smaller size: 6 ounces vs. 9 ounces for our HP-35.
- Full display formatting: The display key (DSP) lets you choose between fixed decimal and scientific notation and lets you control the number of places displayed. (The HP-21 always uses all 10 digits internally.)
- If a number is too large or small for fixed decimal display, the HP-21 switches automatically to scientific. It never confuses a small number with zero.

Finally, if you give the HP-21 an impossible instruction, the Display spells ERROR.

RPN logic system: Here's what the unique logic system means for you:
- You can evaluate any expression without copying parentheses, worrying about hierarchies or re-structuring beforehand.
- You can solve all problems your way—the way you now use when you use a slide rule.
- You solve all problems—no matter how complex—once and for all. You never work with more than two numbers at once.
- You see all intermediate answers instantly.

The HP-21 executes each function immediately after you press the function key.

You can re-use numbers without re-entering them. The HP-21 becomes your scratch pad.

Hewlett-Packard quality craftsmanship. One reason Nobel Prize winners, astronauts, combatants of Everest, America's Cup navigators and over 500,000 other professionals own HP calculators.

Your bookseller will give you a demonstration today. Challenge our new HP-21 with your problems. See for yourself how much performance $125.00 can buy. If your bookseller doesn't have the HP-21 yet, call us at 800-554-7925 in Calif. 408-662-2002 for the name of a dealer who does.

While the night belonged to the defense, the offense had some moments too. Philpotts' kicker Mike Griggi opened up the scoring with a 49-yard field goal in the first quarter.

Rugged fullback John Henson scored the first touchdown of the game when he rolled over from the one-yard line through the third quarter. Quarterback Rich Robbins tumbled into the end zone with his own fumble to run the tally to 17-0.

If it rained all the time, electricity would be cheaper.

Diversity of Sources of Energy

Oil and natural gas have become more expensive in recent years, which has led to increased demand for alternative power sources. In recent years, there has been a significant shift away from fossil fuels towards renewable energy sources. These include solar, wind, hydro, geothermal, and biomass. Each of these sources has its own advantages and disadvantages.

Solar energy is a clean and renewable source of power that can be harnessed using photovoltaic (PV) panels. These panels convert sunlight into electricity, which can be used to power homes, businesses, and even entire cities.

Wind energy is another important renewable energy source. Wind turbines convert the kinetic energy of the wind into electricity, which can be transmitted to homes and businesses.

Hydroelectric power involves the use of water to generate electricity. The principle behind this is the conversion of the potential energy of water into electrical energy.

Biomass is the organic material that plants and animals once lived on. This material can be used to generate heat and electricity, as well as biofuels.

While renewable energy sources offer many benefits, there are still challenges to overcome. These include the need for larger storage capacities, improved energy efficiency, and the integration of variable energy sources into the grid. However, as technology advances, we can expect to see continued growth in the use of renewable energy.
