The Nuclear Risk

A Pacific Gas and Electric poll on the Diablo Canyon nuclear power plant has revealed a disturbing phenomenon.

If one accepts the validity of the poll, it claims 75 per cent of San Luis Obispo County residents favor the operation of the plant. Yet, strangely enough, only 39 per cent of those who favor the plant are concerned about the safety factors. There seem to be a lot of people willing to take huge risks for the sake of providing more energy. These people, claim the poll, do not believe the risks are high enough to delay operation of the plant.

Maybe they don't, but we do. It seems PG&E is willing to derive justification (or its lack thereof) for its plant by showing enough people are willing to march into oblivion.

There seem to be a lot of people willing to accept the validity of the poll, claim the poll, do not believe the risks are high enough to delay operation of the plant.

But frankly, we prefer bureaucrats who do something. With or without style.

Author's Note: An excerpt of a speech he gave before the Idaho Hospital Convention.

Right In Style

Another Viewpoint

It's not often that bureaucrats go public with their trade secrets. It was refreshing to learn that James H. Boren, President of the National Assn. of Professional Bureaucrats, did just that.

"When in doubt, Mumble." was the title of a speech he gave before the Idaho Hospital Convention. And Boren wasn't all bureaucratic in making his point. "Do nothing, with style," he said. Such cantad. But frankly, we prefer bureaucrats who do something. With or without style.

Review of the Diary

The Army Way

Editor:
I couldn't help but notice the full page advertisement for the army on the Oct. 3 Mustang.

Anyone who reads this will see the contradiction between the destruction and restoration which characterize the military. Perhaps the army sees $8,000.00 as a sum large enough for one to lay one's conscience aside.

While our military is not actively involved in a war at the moment, its very presence is a powerful and coercive force in global politics. In the situation in which we find our government, our military has assisted in the overthrow of certain governments, and in maintaining the status quo in oppressive but semi-autonomous countries.

El Corral

Editor:
I, Rosa Fernandez, a disabled student returning to Cal Poly after having major surgery in both my legs, have been forced to feel the emotional stress, discrimination and embarrassment due to the unequal treatment and procedures of the El Corral Bookstore here on campus.

On September 30, I made an attempt to purchase my textbooks and found it totally impossible to get around with crutches. It was so crowded I was being pushed around and was almost falling.

I went to the front desk for help and requested for someone to please help me get my materials and supplies. They immediately replied: "can't do it, we are too busy." I was struggling back to get a hold of a backpack, carried in on the first desk and again asked if it was possible to put it on so that I may get my own materials. Even this was a disturbance to them.

I explained to them that there was no way I would be able to carry my textbooks and crutches at the same time. They told me to have someone get my materials for me. In turn, I left the backpack with them and stepped out frustrated as ever.

Later, telephone calls were made, directly to the manager, Mrs. Green, by the EOP office, making them aware of my disability and further requested that they pull out my materials for me. They said that it was impossible; they don't do this now, or it would have to wait until the crowds died down.

Finally, I found someone that would purchase my books. Only to come back to inform me that my textbooks had run out. I would have to confine to wait for a week; meanwhile, I am failing my classes as of now.

I am having physical problems, as is. Why increase the emotional problems of a disabled person? Where is all the human concern for the needs? I made it a point to classes on time. I paid my tuition fees, and I truly want to read and do well in school, but, for God's sake, where are my textbooks? I'm certain that I am not the only person who has been discriminated against. So, I am speaking for others, just as well. We want a direct change seen, and soon, for future purposes.

Rosa Fernandez

Study Program

Editor:
Thank you very much for the notice you put in the October 1 issue of the Daily concerning the program I am interested in responding to the National Science Foundation Students-Originated Studies program. The notice was concise, accurate in all details and helped to fill the room with students who were interested in pursuing the program.

If we get a few student-run projects supported out of this program, part of the credit will go to you.

Robert A. Lucas

**PG&E Poll Result Analysis Draws Fire**

The results of a Pacific Gas and Electric Co. survey which apparently indicated a majority of county residents favored the nuclear power plant at Diablo Canyon came under fire Wednesday.

The survey, which showed that 35 per cent of the county's residents favored the nuclear plant, while 18 per cent opposed, was attacked by the Mothers For Peace. A declared opponent of the Diablo plant, the group issued a statement Wednesday which questioned the authenticity of the survey. According to chairperson Faye Fleming, the Mothers For Peace:

"Was not surprised by the result of the PG&E survey. There are no questions in our minds that there could have been any other results." She added that her group encourages all citizens within the community to attend the Nuclear Forum which will be held at Cal Poly on the 17th and 18th of this month.

One interesting aspect of the survey, which no one contested, was how those who were interviewed identified themselves politically. Of those who favored the plant, 54 per cent were moderately conservative and another 9 per cent said they were "strongly conservative." Those calling themselves moderately liberal were 41 per cent and 5 per cent strongly liberal.

One question asked "How serious do you think the energy crisis is here?" While 37 per cent said there was somewhat serious, another 23 per cent believed it to be "not very serious." And as for what should be done about the energy crisis, 10 per cent of the individuals said that someone "should build and operate more nuclear power plants. Another 33 per cent wanted to see a conservation of electricity and cut down on the use of lights. A total of 30 per cent wanted to see solar energy.

**First Lecture Of Humanities Series Today**

"Most people go into a museum unable to understand, and the art they see, Charles Strong, a member of Cal Poly's English Department, will discuss aesthetic elitism and how it hinders the non-intellectuals understanding of art today at 12:30 p.m. in the University Union.

The lecture entitled, "All Governance Gone," kicks off the fourth year of the Committee of Arts and Humanities Lecture series. Dr. Donald Hensel, chairman of the series, said the lecture themes this quarter will deal with all facets of American life, not just Bicentennial topics.

A burial took place this summer in the school of Theatre and Natural Resources.

Side by side, the majors of agricultural business management, and farm management were permanently laid to rest. But as the last spade of dirt was tossed into the grave, new life is brought forth. Cal Poly is proud to announce the birth of the agricultural management major.

The decision to combine agricultural business management (ABM) and farm management (FM) was made because "there was conclusion as to the difference between the two," said Dr. Edgar Hyer, head of the new department. They decided this should be a central major with two options.

Hyer said that the term "agricultural management"... (continued on page 3)

**ARE YOU A — LIBERAL MAVERICK**

Have you ever wondered why we seldom hear about the religious beliefs of America's founding fathers? Were their religious beliefs as heretical as their theories of government?

Did you know that the principal framers of the Declaration of Independence were denounced for being:

DEIST -- BENJAMIN FRANKLIN, HERETIC - THOMAS JEFFERSON, UNITARIAN - JOHN ADAMS?

Did you know that such a revolutionary approach to religion continues even today?

If you would like to explore these and similar concerns with other students of like mind, then contact: Gene Fabrizi, Unitarian Universalist Fellowship of SLO Co., P.O. Box 1352, SLO, 93406.

For the time and location of the regular IU Fellowship meetings, call 544-4173 or 773-5513 or 544-3486, or consult the Saturday edition of the Telegram-Tribune.

There will be a meeting for all persons of college age wishing to learn more about IU's. Bring your ideas to the home of Dr. Fabricius, 575 Stanford Drive at noon, Saturday, October 11, 1975, and we will discuss the issues which concern you, over barbecued hamburgers and refreshments. RSVP if coming.

**Poe Reading Set For Tonight**

Georgesque and macabre tales of men of classical poet and short story writer, Edgar Allen Poe, willassume life onstage at Chumash Auditorium Thursday at 8 p.m.

Selections from such mystery-horror classics as "The Masque of the Red Death", "The Pit and the Pendulum", "The Black Cat" and "The Gold Bug" will be presented by Thomas Madison Vise. Vise is a veteran of Edgar Allen Poe's theatrical career and the winning play, "Our Town," and "The Cask of Amontillado" will be tossed into the grave, new life permanently laid to rest. But as the last spade of dirt was tossed into the grave, new life is brought forth. Cal Poly is proud to announce the birth of the agricultural management major.

INSURE YOUR FUTURE NOW WITH GUARANTEED TRAINING

You, the high school senior, man or woman, can take steps today to insure your future training RIGHT NOW in TODAY'S ARMY.

HOW?

It's called DEP, the Delayed Entry Program. You qualify to enlist now, choose the training you wish to receive and have it guaranteed in writing before you enlist. Not only training, but duty also is guaranteed before graduation.

Why should you consider DEP?

The job training you want, the place you want to serve is reserved for you, by name, before graduation.

For details about TODAY'S ARMY, see or call:

**The Student Bomb**

by LEA BROOKS

Daily News Writer

Summertime in San Luis Obispo is slow and easy going. The highlights of a week is Thursday night when the stores stay open until 9 p.m. and the cruisers take over.

Then every year, around the middle of September, a strange phenomenon takes place. It begins with a slight increase of cars on the streets and longer lines at the grocery stores.

Suddenly, a tidal wave of students descends upon the city in cars filled with boxes and suitcases, ready to be unpacked in apartments and dorm rooms.

How does this sudden population explosion affect business establishments in San Luis Obispo? One day, the city is a typical summer tourist trap and the next, it's a booming college town.

What actually happens when 10,000 people move in over a weekend?

Dale Brain, the Assistant Manager of Operations at the Bank of America in University Square, offered some helpful exercises for anyone summing up his opinion of registration week.

"It's a disaster," he said. "Truly unbelievable!"

During an average week, the Bank of America at University Square opens about 20 to 30 accounts. Brain said, "During that one week in September, 1,022 new accounts were opened - more than ever before," he said.

According to Brain, the last two years, four people have come from the Bank of America regional staff pool. But this year, six people came for five days.

And San Luis Obispo usually doesn't have anybody," he said. "It's been a string in staff," Brain said. "We have 10 Poly students who usually work part time but work full time during registration week.

This year, we tried something new. We didn't want lines going out the back door as in past years. Brain always "In previous years, students have waited in lines to open new accounts. But this year, groups of 12 new students at a time were taken into a conference room where new accounts were explained on a personal basis.

"We made a list of ways explaining things like BankAmericard qualifications and how to balance a bank statement," Brain said. "The lines never got more than 15 to 20 people deep." Yes, Cal Poly has a drastic effect on us," said Dale Brain.

At the end of the week, we're all worn out. But everybody looks forward to it. It's slow all summer and it's kind of fun, too.

Scolari's, Coast to Coast Hardware and Thrifty Drug Store in Foothill Plaza Shopping Center are tremendous-ly affected by returning Poly students.

Registration week was a record week in volume for Scolari's, explained grocery clerk Jim Long. Employees vacations are arranged during the summer months so they'll be full strength for the rush. A new cash register was installed at the end of last school year, he said.

Maps and brochures are the most popular items. Anything to do with setting up house.

Scolari's sells more fruit juices than any other two combined stores in town. They also carry a complete line of health foods. "We care to kids," Long said.

September is my Christmas," beamed Paul Becker, owner of Coast to Coast Hardware. "We held a special sale just for students on the things they need," Becker explained.

"Our workload almost doubles twice a year," said Dave Bailey, Los Padres District Customers Service Manager for Pacific Gas and Electric Company.

"June and September are our killer months."

"The normal service orders in this area for turn on and turn offs are from $22,000 to $25,000," he said. "During June and September, it runs about $30,000.

There is not much of an impact percentage wise on kilowatt hours. Most of the apartments are occupied over the summer months. There is just a great shuffling around. It's only like a one to two million kilowatt hour difference.

"Our workload almost doubles twice a year."

When The Student Explosion starts, The Big Macs Fly

(Daily Photo By Tom Kelsey)
The Cal Poly American Home Economics Association will sponsor a spaghettisupper tonight. The dinner, to benefit a Home Ec. Career Scholarship Fund, will be held in the Veterans Memorial building on Grand Ave. from 5 to 8 p.m.

The menu will be homemade spaghettis served salad, ice cream and tea or coffee. The entertainment will be for $25.00 for adults.

For further information contact Tammy Docken at 541-1413 or Jeff Sloan at 541-0706.

With only a week of practice, the Cal Poly Debate squad (Junior Division) took two honors at the first tournament of the season this past weekend.

The Cal Poly Sports Car Club, is sponsoring a practice Autocross, Sunday, Oct. 11 from 9 a.m. to 3 p.m.

The "Crosbybass III" is a non-stop fly event and will be held at the Baseball Diamond parking lot.

The cost to race all day is $2.00 per person.cash boxes and mufflers are required.

Lunch and refreshments are available and all participants will receive dash plaques.

Sponsored by the Southwest Collegiate Forensics Association, the tournament contestants debated the national question whether the federal government should adopt a comprehensive view to control land use in the U.S.

Poly debaters Mariel Vanderford and Carl Saveland were undefeated in five rounds of debate competition and won a superior certificate.

The pair defeated world champions Arizona State University and USC on its way to the undefeated record.

According to Jim Conway, advisor to the debate team, there are still openings for students who are interested in intercollegiate debate and public speaking for the rest of the quarter. Those interested should contact Conway at 546-2618.

Nominations are open for membership vacancies on the Student Health Services Council.

The council's purpose is to provide a communication link between the Student Health Services and the students in the university.

The members are made up of the director of Health Services, who serves as chairperson, the Dean of Students, the Foundation Executive Director, one student nominated by the Chairperson of the Student Senate, one faculty member nominated by the Chairperson of the Student Senate and representatives of the Academic Council, nominated by the Vice President for Academic Affairs.

Others are one student nominated by the ASI President, one student nominated by the School Council Chairperson of each school, one student nominated by the Chairperson of the Board of Athletic Control, one student nominated by the chairperson of the Women's Recreation Association, one student nominated by the Chairperson of the Residence Hall Council, one student nominated by the editor of the Mustang Daily, and one student nominated by the Student Manager of RECP.

The council is appointed by the University President and reports to the Dean of Students.

Nominations should be submitted to the president's office by October 15. With the nominee's name, mailing address and major.
WASHINGTON (UPI) — The White House, contending GOP attacks were "ridiculous," also told reporters they were congressional Democrats, continuing GOP attacks on federal tax run.

"The White House, Speaker of the House and the President have made their point," said WSJ. It estimates that 90% of the public is unaware of the "madman" tax cut.

President Nixon, stunned by Congress, laid prepared remarks for an address to the country, demanding a "peace now" in Vietnam, calling for "extraordinary efforts can avert a depression and jeopardize the economies of cities across the country.

"Chairman Arthur F. Burns said of 'Texas' newest and largest nudist camp': "It's not a sexual playground. It's a bunch of naked people doing quite normal things, just a camping trip in the nude.

"The 150 members don't even notice each other's voices, he said. They're just like the people you meet in a grocery store at any time of day.

"He said a permanent camp will be opened by May 1 in Navasota, north of Houston, and its exact location is secret.

"It's unbelievable. The atmosphere was unbelievable.

"They're just like the people you meet in a grocery store at any time of day.

"We'd rather nudity in our home for years without ever thinking about it than to have to worry about peepers. We'd rather nudity in our home for years without ever thinking about it than to have to worry about peepers.

The traffic on the road to Poly Canyon has been heavier these days. Students are seen trudging along the road carrying hammers, saws and other assorted tools.

"Believe it or not, these students are going to class," the class is Architecture 240-03 or Shell House Completion, taught by Nelson Greene.

"Poly Canyon is unique in the nation. It provides students with a chance to create architectural reality," said George Hasslein, dean of the School of Architecture and Design.

And creating architectural reality is exactly what the 28 students enrolled in Shell House Completion are doing. The purpose of the class is to complete the Shell House in Poly Canyon while combining learning theory with "hands-on" experience, according to Mr. Greene.

And it's not only "archies" who are getting involved with the project. Students majoring in everything from English to Computer Science are right beside them, painting, installing landscaping, and generally having a good time.

Those who have been to Poly Canyon will remember the Shell House. Made of concrete, it vaguely resembles an oversized shell.

The house was built in 1989 as a senior project, under the advisement of Wes Ward, an instructor in the school of Architecture.

Attempts to complete the house were abandoned four times due to the problems of trying to install windows in a concrete shell with varying angles.

The problem was finally solved last spring, after 15 years. Although the most complex problem was worked out, the rest of the construction has been far from easy.

Construction is not always performed in the correct order due to the lack of building materials, according to Greene.

The construction of the Shell House is made possible only by donations from merchants in the area. San Luis Glass Co., for example, donated the labor to install all the glass in the house.

Put less money where your mouth is

With a Stenner Glen meal plan that doesn't bite back. We have plans to fit any appetite - from 5 to 19 meals a week and a 40 punch for 30 bucks a meal card. Your per meal cost can be as low as $1.20! This is one case where better costs less. There's variety, quality, lots of tasty choices every day, and everyday is different. Good music, special surprise treats, nice people and going back for as much as you want.

We're right next to campus, so when hunger strikes you can pop in for a quick bite or a full-on feast.

Stop by soon and see how you can put less money where your tummy is this quarter. It's one of the few times it's polite to talk with your mouth full. See you soon.

Stenner Glen

The accomplishments of Dr. Morris Marden are impressive. He has lectured about mathematics on every continent except Africa, he has published 45 papers on various aspects of mathematics and one of the books he has written is hailed as the standard reference on the subject by his colleagues. Recently retired from the University of Wisconsin where he served as Chairman of the Mathematics Department, Marden was invited here to teach for a year. Tuesday, Marden gave the first lecture in the Math Dept. Colloquium series titled "Rolle's Theorem in the Complex Domain." Explaining his talk for laymen he said, "It has to do with locating the equilibrium position in certain fields of force, either mechanical or electrical."

"It turns out," Marden explained, "that in certain applications, stability for example, an engineer needs to know whether vibrations in say a turbine will die out or whether they will keep increasing and increasing."

Marden doesn't think that the abstractness of mathematics is one of its weaknesses, in fact he believes the opposite. "That's the whole strength of mathematics," he said. "We work with symbols and we find the relations between them. We don't worry about what they represent, that's up to the physicists or the chemists or the biologists to find out."

"It's the same in arithmetic. Two books and three books equal five books. Out in a field two cows and three cows equal five cows. It's up to you to decide what the numbers represent."

Marden said his book "The Geometry of Polynomials," is the standard handbook on the subject throughout the world. "Even the Russians use it," he said. It was because of the book, he said, that he has been invited to lecture in so many countries.

Marden is enjoying his stay as visiting distinguished professor. He said the area is quite a change from Milwaukee and Boston, his former residences. And he is enjoying the people. "The people here have been very nice to me," Marden said, "especially the students."

Dr. Morris Marden (left) explains his theorems to Dr. Bob Wolf of the math department.
"I don't even attempt to ask them how they justify a rent raise."

Daily co-editor

Ron Schimmelman daily feels the physical and psychological pressure of his own personal housing shortage.

He is short on living room space. He is short on kitchen space. He is short on bathroom space. And he is short on bedroom space.

The 32-year-old sometimes student of architecture here also claims every month to be getting a bit shorter on money after paying rent.

Schimmelman lives in a square stall of a home on 507 Perkins Lane in San Luis Obispo. The place measures 17 feet wide by 17 feet long. Total:

He has carved the cracker box into four rooms—a kitchen, a bath, a living room and a bedroom. But no matter how Schimmelman slices it, his Perkins Lane palace remains perennially cramped.

And living in it has taken some getting used to.

"I had a little taste of claustrophobia when I first started living here," the blond-haired man who, ironically, makes his living building houses said.

"I make it work though," he said. "You learn to think in three dimensions instead of two. I build up instead of throwing out on the floor. Schimmelman's furniture isn't the only thing going up though.

So is the rent. Indeed. He says it has gone up almost 100 per cent in five years—from $33 a month to the $63 a month he now forks over.

According to neighborhood scuttlebutt, a San Luis man bought the cottage and about six others like it years ago at Camp San Luis Obispo where the Army used them for bachelor officers' quarters.

The nameless fellow paid $50 a month for the hovels and then trucked them into town. He charged $50 a month rent until he died. However, when he died his wife sold them to a big-name San Luis real estate agency which has suddenly jacked up the rent.

The $10 hike last year raised it to $60 a month and befuddled Schimmelman.

"I don't even attempt to ask them how they justify a rent raise," he said with a sour chuckle.

But for all his mumbling, grumbling and stumbling into cramped walls, Schimmelman remains.

For five years he has been king of his tiny castle.

Schimmelman said he has looked for other spots but not with much gusto.

No, he has come to like the place, it seems.

"I'm the type of person who gets stuck," he said. "And if it is fully equipped. It's all just on a smaller scale.

The way things are in town, from what I hear, I guess I should be happy to have this place."

Schimmelman also enjoys the closeness between the residents of the six other closet cottages. He's been around long enough to hold the honor of being the "old man" of the block.

"I like it a party like," he said of the neighborhood, "and just the overall atmosphere around me so."

The parties are frequent, he said. And when one is thrown, it's a sure bet that all have been waiting for.

"They also think that they can have service the same day they call. Some parents come down to spend the first weekend with their kids and find out there won't be any power until at least Monday and they get pretty upset."

Lee Balatti, Manager of Pacific Telephone in San Luis Obispo said, "September is the busiest time of year. "We borrow employees from anywhere we can for the business office and installations.

During a normal week, about 500 telephones are moved, disconnected and connected. This process is referred to as "churning." The plan is to churn Balatti. Approximately 1,800 phones have gone through the churning process over the last two weeks.

"This year is quieter than other years," Balatti commented, somewhat alarmed. But we're not unique. Other universes, like Han Joe Farm, and Stanford ex-perience the same thing.

Kaboom: Students Hit

(continued from page 6)

"July and August are so quiet," he said. "There is very little long distance calls.

A test drive and see for yourself.

1975 1/2 HONDA CVCC WAGON

The Wagon that's big on the inside, not on the outside

It fits quickly into parking spots, while giving you that extra space you buy in a wagon. And it has five doors including a floor-to-ceiling rear door to make me sing away. But just all of it got the highest rating of any station wagon in the United States. For your High Speed Highway. Come in for a test drive and see for yourself.

AND THAT'S NOT BAD FOR A 39MPG WAGON

DIRECT DELIVERY
Food Services: Giving Students Their Fill

by MIKE CONWAY
Daily Staff Writer

Whether it's a quick cup of coffee between classes or a long lunch of lasagna between labs, if you eat on campus it is probably a Foundation Food Services meal.

Food Services, a part of the Cal Poly Foundation, is operated on a nonprofit basis for everyone's use. With nine locations it is possible to get something to eat from 8 a.m. until midnight on weekdays.

The heart of Food Services is the Campus Dining Hall. In that building there is the Student Dining Room, the Snack Bar, Elite's Donut Shop and the Sandwich Shop. But there is more in that building than merely the eye... or stomach.

To prepare food for thousands of hungry people a huge kitchen is necessary. The Dining Room kitchen (its description and size is more than adequate) does most of the equipment in it.

Griddles, the size of a large door are used daily for frying food. French fry machines, resembling small cement mixers, cook the uncountable number of fries consumed daily. And against one wall there is an oven that inside looks about the size of a dorm room.

On the floor below the kitchen and the testing area there is the bakery. In there you can watch as 6,000 peanut butter cookies are mixed and baked. The bakery also makes the 140 pies eaten on campus, along with cakes made from 50 pound mixes, the french bread and the rolls served on campus.

Near the bakery is the butchershop. There much of the meat served is cut and portioned, including all of the hamburger. Also nearby is the Salted Room, where besides making all of the salads, they make their own mayonnaise.

To store all of the food, Food Services has its own warehouse. Stored in the area are 1,500 to 1,800 items ready for immediate use. Computer printouts are used to keep track of the inventory.

An often asked question, especially among dorm residents, is "Where did you get this food?" Externe Dorrough, director of Food Services, said, "We buy much food locally as possible. But we can't supply all of our needs locally so we buy from all over.

Dorrough said that all of the milk and eggs are bought from students projects. He also said that all of the bread is bought and as much of the fresh produce available from student projects is also bought.

"We try to give the campus community the best food for its money," Dorrrough said, "We offer good eating for every meal.

The dining halls work on a five-week cycle of meals, with a week dinner every ten days to

Kaboom: The Fall Boom Hits Town

(continued from page 9)

"The students are wonderful."

Of the eight available telephone colors, the most frequently asked for are white, green, beige and yellow, in that order. The most popular is white, which takes about 35 per cent of all orders.

"We work 12 hours a day, Monday through Saturday, to get all the orders in," said Balatti.

"Telephone installers can put in from 90 to 130 phones a day, if they're installing in a place like Vernon Glen or Mustang Village. Otherwise from street to street, it's nine or ten."

Balatti wanted to caution all students, especially during this time in their career, to realize what a serious thing a blue box is. If a student is caught, it is felony and will go on his record.

"This is very damaging to a career," he stressed.

A blue box is a small electronic device connected to a telephone. It allows the user to make toll free telephone calls anywhere in the world.

"Since Cal Poly is an electronic college, this is one of the major blue box areas in the state."

When the Poly students return to town, the impact is immediate and obvious. The traffic jams and the long lines are only a few of the inconvenience caused by so many people coming in at once.

But the merchants really appreciate Cal Poly business and go out of their way to help. When we come back Cal Poly...
Hot Mustangs To Face Cold Pack

Cal Poly travels to Reno Saturday to take on the Wolf Pack in an afternoon contest. And even though they are in Nevada, putting your money on the Mustangs wouldn't be much of a gamble.

Nevada enters with a disappointing 3-1 record while Poly has won two of its last three games.

Joe Harper's Mustangs are in a two-game winning streak. Poly defeated the Pack last season 57-25 and this year Poly-Fresno game films.

"Anytime you play Gal Poly is by far the toughest opponent we've faced and raise eyebrows," said Vic Buccola, Poly Athletic Director. Dr. Brown scouted him admitted he liked Davis.

Poly tailback and keyl in the Mustangs" said Scattini. "We'll definitely have our work cut out for us."- Scattini is using his only offensive he is trying to hold the Mustangs' defense back against nationally ranked Boise State, a Cleveland Browns scout admitted he liked Davis.

"Davis is great now and getting better. He is overdue for a long touchdown run. All his yardage this year has been on short runs."

The 170, 195 pound Davis is described in press releases as "a fine second string runner—strong up the middle with exceptional balance and adept at breaking tackles."

All the praise and impressive numbers never give a complete picture.

Gary Davis has worked hard to become just the starter at Poly. If he should suddenly stop, Coach Harper still has Bob Trudual and Rocky Chapman two more tailbacks with impressive credentials.

Taking a cue from the Buffalo Orange Juice, Davis knows he is too alone on the field and quickly gives credit to the offensive line.

Cal Poly's Joe Harper and Reno's Vic Buccola can't wait for the game. Nevada, Reno...on paper. While running for 141 yards and three touchdowns against nationally ranked Boise State, a Cleveland Browns scout admitted he liked Davis.

As usual, the Mustangs are riding high and strong after sharing the slotback position. Jack Fisher had 203 yards and one touchdown. The Poly defense has been Steve Semini with nine catches, 163 yards and one touchdown.

But what the Mustangs are going to have to defend against most Saturday is complacency. Reno has looked poor this year and Poly could be overconfident. The game Saturday is Reno's homecoming, so anything can happen."

"Call Poly is by far the toughest opponent we've faced to date," said Scattini."

The defense will be facing a very inconsistent Nevada offense. The Wolf Pack's offense is led by freshman tailback Rob Young who gained 83 yards this season. Young will alternate with two other freshmen, Paul Williams and David Cobb. Williams came off the injured list a week ago to rush for 59 yards against San Jose State including a 54-yard TD run. Cobb has just recently been switched from the slotback position.

Jack Fisher has established himself as the No. 1 Nevada quarterback after sharing time with sophomore Jeff Tisdal. Fisher has thrown for 203 yards and one touchdown. The Poly defensive back has been Steve Semini with nine catches, 163 yards and one touchdown.

But what the Mustangs are going to have to defend against most Saturday is complacency. Reno has looked poor this year and Poly could be overconfident. The game Saturday is Reno's homecoming, so anything can happen.

"Call Poly is by far the toughest opponent we've faced to date," said Scattini."

Young will alternate with two other freshmen, Paul Williams and David Cobb. Williams came off the injured list a week ago to rush for 59 yards against San Jose State including a 54-yard TD run. Cobb has just recently been switched from the slotback position.

While Fresno State lost the game and their cool last Saturday night, they did keep Gary Davis out of the end zone. A big whoopee! Not really. Actually the holding of Gary Davis to 50 yards rushing and zero touchdowns was a comic accomplishment.

The senior tailback currently ranks third among all Cal Poly runners with 1,474 yards. Going into the Fresno game Davis had a string of five 100-yard plus games. He was also named Poly and CCAA Offensive Player of the week for the first two 1975 games.

Fresno took note of the Poly tailback and keyed its defense on Davis. Mustang coach Joe Harper simply used his other weapons. The starting defensive unit shut out Fresno and fullback John Hennon found running room for 79 yards and one touchdown.

Now that Poly has shown its other teeth, Davis will have more chances to run, score and raise eyebrows."

This is Poly's 5-10, 195 pound Davis described in press releases as "a fine second string runner—strong up the middle with exceptional balance and adept at breaking tackles."

All the praise and impressive numbers never give a complete picture.
