Political Foe, Keith Gurnee

Old Friend, Emmons Blake
The Nuclear Forum: An Analysis

By MIKE LAFFERTY Special To The Daily

The follie has settled. The bleachers are being taken down. Scores who hoped for definite answers, whether or not they were for or against nuclear energy, have been disappointed. Many who came with their minds made up went away with even greater resolve.

Yet, the meeting of the Nuclear Forum held here this last weekend was that it is only under great confusion that underlies the nuclear question.

There simply exists a more definite, more clear-cut understanding of the arguments presented by both sides.

HEALTH CONSIDERATIONS: Dr. L. Douglas DeNike, opponent, led off his speech with an urgent call for America's future to be shaped in making nuclear energy the prime mover. He cited the potential for world-wide energy saving and other benefits that nuclear energy would provide.

Dr. L. Douglas DeNike, opponent, began his speech with a discussion of how prevention is better than cure. He cited the example of cancer related causes due to weapons testing. He stated that under reading the nuclear question.

WASTE DISPOSAL: Dr. Leslie Grimm, opponent, began by discussing his view that radiation was not, and thus the effects of low level radiation have not been determined. Wolfe said that waste disposal could be done practically. He cited the European methods of storing wastes in deep salt domes.

DeNike went on to state that by comparing the probabilities of nuclear accidents with probabilities of other human risks, nuclear power came out very low on the list.

SAFETY ASPECTS: Dr. L. Douglas DeNike, opponent, considered the safety of nuclear power plants as a behavioral problem that the safety depends on people.

DeNike went on to state that if two together in this area could bring disastrous results.

Dr. Leslie Grimm, opponent, began by stating his view that radiation was not, and thus the effects of low level radiation have not been determined. Wolfe said that waste disposal could be done practically. He cited the European methods of storing wastes in deep salt domes.

DeNike went on to state that by comparing the probabilities of nuclear accidents with probabilities of other human risks, nuclear power came out very low on the list.

SAFETY ASPECTS: Dr. L. Douglas DeNike, opponent, considered the safety of nuclear power plants as a behavioral problem that the safety depends on people.
Kennedy: do not have the final say in many instances.

What is your attitude toward collective bargaining between you, the faculty, and students?

The collective bargaining legislation which was introduced this year failed, but will be revived in the next session. There were several reasons it failed, but one is that it lost the support of organized labor after it was decided not to include students at the bargaining table. I understand that organized labor is concerned that such a provision in a collective bargaining bill for public higher education in California might set a precedent that would encourage the inclusion of consumer representation into other bargaining agreements. You guess, that if a collective bargaining bill is passed as it was originally proposed, the union elected by the faculty of the 19 campuses in our system would negotiate with the Governor on salary and fringe benefits. The Trustees were amended into the bill via the recommendation of the Governor to the management representative. But we understand that a new bill may attempt to return to the original concept of having the Governor as the only management representative. It is not clear what does not have the Trustees as the management representatives and does not limit the bargaining issues to salary and fringe benefits, much of what we have known in higher education is "collective governance" which involves consultation with faculty, staff, and students on all issues that will be lost. In its place will be a systemwide approach with educational decisions made by politicians, not educators.

Turning now to the final issue—grievance! How do you believe this university should be, enrollment-wise?

No one really knows what the optimum size of a university is in terms of enrollment.

The rains of the student housing crunch in the San Luis Obispo area, and the possible solutions to it will be discussed tonight at 7 p.m., in Agriculture Building room 316 by the Public Interest Research Group (PIRG).

The meeting is free to all Cal Poly students and faculty. Further information is available by calling Carl Lustbin at 566-9812.

The Dietetics Club and Industrial Technology Society will host a chicken barbecue Friday afternoon at Cuesta Park, from 4-6 p.m. For $1.50 per person, participants can munch one-half chicken, garlic bread, a ninety minute film of hot fudge ice cream crunch in the San Luis Obispo area. Tickets are available at the University Union Information Desk, Expocused Sports and Mountain Air formally Mountain Spas. Tickets are priced at $1.50 for students, $2 for non-students and $1 for six club members.

John Kerr, Cal Poly English professor will read selected original poems in the second Communicative Arts & Humanities Lecture Series Thursday at 7 p.m. In the lecture, "American Voices," Kerr will capture the music of regional speech patterns in the U.S. An ability which has built his reputation as a poet. Kerr's unconventional poetry can be housed in Room 220 of the University Union.

Applications for two vacancies on the Student Affairs Council are now being accepted. The vacancies in the schools of Business and Social Science and Mathematics are to be filled as soon as possible.

For further information concerning the Business and Social Science and Mathematics areas, contact Monica Agulz at 541-4016. Bob Walters must be contacted at the Activities Planning Center for information about the Science and Mathematics positions.

Poly was honored yesterday with the presentation of the Bicentennial Certificate of Citizenship and Flag. The award was given to the university by the Committee for the U.S. Bicentennial.

To become eligible for the award, Cal Poly had to submit a program of Bicentennial activities to the committee. Only one out of every five colleges who submitted a program received an award.

President Kennedy accepted the award for the university. He said he had become interested in the Bicentennial activities when Mrs. Kennedy worked on the city's program.

"This campus is doing considerably more than other campuses involved in the program. Because of the hard work by the faculty and students the university will be placed in the University Union," said Kennedy.

The main event of the ceremony was the raising of the Bicentennial flag. The color guard raised the flag in formal military procedure. It will only be flown on days when Bicentennial activities are held on campus.

Dr. Donald Henrei, Chairman of the Bicentennial Committee of the School of Communicative Arts and Humanities, said, "The flag raising ceremony doesn't signify the beginning of the Bicentennial activities. The campus program began in April and will continue until July 1976."

In November, a campus Bicentennial program will be coordinated by the Music department.

Student Housing III's
Topic Of SAC Meeting

Some of the consequences of the student housing problem will be explored tonight during a presentation by San Luis Obispo City Planning Director, Dennis Bentz.

Tonight will speak on the issue of housing during the Student Affairs Council meeting scheduled to begin at 7:15 p.m. in Room 226 of the University Union.

Other issues on the agenda for the SAC meeting tonight include a discussion of two university policies which could have considerable impact on the students, according to an ASI spokesman.

The other university policy to be discussed is a proposed addition to the Campus Administrative Manual which prohibits the purchase of off-campus media advertising by any programming body of the university.

We want to get you off the ground.

Flying is exciting...especially if you're at the controls. Why fly Navy? Because you're involved with the sea as well.

Our Navy Aviation Program starts with the real down-to-earth basics of flight.

The Navy's training for multi-engine aircraft, jets or helicopters. As a Naval Aviator Pilot, you'll train in jets and prop aircraft. You'll solo and land on an aircraft carrier. As a Naval Aviator Pilot Officer (NPO), you'll learn aviation electronics, nuclear weapons, navigation, etc. You and the old aviators at the base. It's tough when you're getting your wings. If you think it's worth it...because then, you're someone special.

The opportunity is for real...and so are we NAVY.

The two views on the president

Blake: A Personal Friend

by Pete King

Daily Co-Editor

Many know Dr. Robert Kennedy, president of this institution, as a political foe. But many recall the time they met Kennedy personally.

Blake, a professor of English and Communications, has known Kennedy since his days as a student at Cal Poly. "He was one of the students I knew best," Blake said. "We knew him from the very beginning, when he was a freshman." Blake first met Kennedy in 1949, when he was a student at Cal Poly. "He was a really nice person," Blake said. "He always had time to talk and get to know people." Blake believes Kennedy is a great leader and that he has a unique ability to relate to people on a personal level. "He always has time to talk and get to know people," Blake said. "He always has time to talk and get to know people."}

Gurnee: A Personal Enemy

by Fred Vulin

Daily Co-Editor

Keith Gurnee says he would be a disaster if he were to be elected president of Cal Poly. "He doesn't have the moral values on this university," Gurnee said. "He doesn't have the moral values on this university."}

"Gurnee believes parents send their children here because they want a safe, quiet atmosphere—and Kennedy is the surrogate father. "He is their self-appointed father," says Gurnee. About the possibility of Kennedy accepting the position of chancellor, Gurnee said, "It's a great possibility for this institution."
Kennedy: Most of the sacrifices in order to reach the planned enrollment ceiling of 15,000 have already been made.
Automotive
...blow me down mate, grinned Cieoff tailing hit boat in the later division. And one ol Saturday, ttrong gum did jutl that. Without even the advantage of a plank to walk, he tip a into the drink and hit timbers thivered, adding a new connotation to those "I'd Rather Be Sailing" tickert.

Cal Poly placed third out of five schools participating in the later division. UC Santa Cruz captured the event. In the two-star "Slippery Sloop Sinks Sailor"

Cal Poly's Clancy Edwards, last year's CCAA athlete of the year, led the United States gold-medal-winning 400 meter-relay team in the Pan American Games earlier this week.

Edwards, Larry Brown, Don Merrick, and Bill Collins set a Games record of 3:3.31, barely short of the world record of 3:3.2. The U.S. just nipped Cuba.

Led by fine performances from their top three runners, Cal Poly's cross-country team raced to a fourth place finish at the prestigous Stanford Invitational last Saturday.

The hilly six-mile run held on the Stanford Golf Course in Palo Alto was dominated by a group of seven foreign runners attending the University of Texas at El Paso who easily claimed the team title. Texas-El Paso was followed in the team standings by Stanford, the University of Nevada at Reno, Cal Poly-S.L.O., Fresno State, and U.C. Berkeley.
