The Downs...

...And Ups Of Stunt Flying
Women are progressing in at least one area that made Cal Poly famous—a beaver family comfortable for the women. A beaver dam near a workpad of the pipeline was left with a puddle of water after a channel was built to remove excess runoff from a portion of the subdivision. Contractors figured the beavers could find a new place to live, but state and federal wildlife officials said it was too low in the year. As a result a special $30,000 dike system was constructed to stop water from flowing away from the low lying area near Fox, Alaska where the beavers made their dam.

The beavers will have to move again when the pipeline is built, but that will be easier than before. All's well that ends well.

--Helen Haslein

Editor,

In the Oct. 29, 1973 letter to the editor, Mr. Dennis Harper was critical of me for an analogy between the Gay Student Union (GSU) and an appointee of Gov. Edmund G. Brown to the trustees, was Haulein attributes the lack of women in "the lowest paying, least challenging jobs"—when they are hired at all. She accused the system of "fostering a massive program of discrimination against women."

Pew pointed out the state universities' 1974 employment statistics show less than 10 per cent of their full time teachers are women.

She said women make up 76.5 per cent of employees earning between $3,500 and $8,000 a year, but only 21 per cent of employees earning more than $10,000 a year. At Cal Poly the only woman administrator in a highly paid position is academic affairs vice-president Hazel Jones, who came here only last year. Her salary is approximately $35,000.

Pew added male instructors were paid an average of $18,000 a year as compared to females in 1974, up from $77 in 1973.

While women students are overcoming academic obstacles those who hope to make a career in the academic world will still have their work out for them after they graduate. The figures indicate the system is in need of a strong affirmative action program.

--Dr. Mary Jean Pew, Academic Dean of the University of Southern California

Women have been considered a man's world. It's there say it's tough because architecture is one of those jobs. The women who are almost doubled in the last two years.

The women who are toward architecture. The women who will come later—in greater numbers.

A Reply

I told her that LA was 200 miles away, it didn't help. She told me to write them, it didn't help. I told her that I wanted to talk with someone face to face, it didn't help. Someone must've pushed the rewind button because her pre-recorded message started up again and she handed me some more papers, it didn't help.

I left the office with a handful of papers and no appointment, it didn't help. I still haven't talked with a financial aid counselor or a person face to face and I need some help.

**The Great Pumpkin Patch Of Paso Robles**

Great pumpkins are growing in Paso Robles. The Pumpkin Farm and Gourd Place in Paso Robles has so many pumpkins in all shapes and sizes that it takes at least an hour to explore the old weeds and farm buildings full of Halloween goodies.

The farm got its start unintentionally about six years ago, according to the owners, Al and Edna Meer. Mrs. Meer explained that her husband planted pumpkin vines over the barn in front of the house. Their daughter Marty, then 8, would sit in the front yard and people would stop by to buy the pumpkins.

Here interrupted his wife and said with a smile, "Marty sold them all. She made quite a bit of money for a kid that age. The next year we planted more pumpkins and it's grown from there."

And grown it has. The Pumpkin Farm creates quite a scene from the road. The barn and sheds are decorated with old wagons pulled by life-sized model horses and driven by "pumpkin people." The "pumpkin people" resemble scarecrows with pumpkins as heads. "I set up the figures and my wife paints the faces," said Heer.

"People come from all over to buy pumpkins," said Heer. "It's not really the quality of the pumpkins. It's more fun than a grocery store. I set up all kinds of little gimmicks and the kids love it!"

The yard is full of all kinds of animals. There are cas and puppiets playing in and out of the rows of pumpkins. A goat and lamb make up the rest of the menagerie.

The Pumpkin Farm is a hobby for the Heer family. Heer is in real estate and has a ranch six miles away from the house. He raises out hay and alfalas and plants the pumpkins after the hay has come out of the barns. This year he will be open three years ago.

Mrs. Heer opened the Gourd Place about three years ago. The items she has created from gourds are sold in a little shop connected to the house. The gourd painters, vases, salt and pepper shakers and other items show the craftsmanship she has developed.

The Heer's have joined the National Gourd Society. This enables them to receive seeds from all over the world. The gourds are grown with the pumpkins but have to be grown a year in advance to allow time to dry, explained Heer.

The Pumpkin Farm is located on Cresson Road in Paso Robles and may be found by taking the Paso Robles offramp to 15th St. and turning right.

**Student Loans, You Can Bank On Them, But...**

**BY STEPHAN WARNHOF**

Daily Staff Writer

Federally assured loans for some students may be existing on borrowed time. However, Cal Poly students who obtain loans from San Luis Obispo banks shouldn't be too alarmed.

Growing frustration with the federal Guaranteed Student Loan (GSL) program is prompting several Californian banks to curtail or review their participation in the financial aid program.

Two of the state's six major lenders—United California Bank and Bank of California—have temporarily discontinued granting federally assured loans to new applicants. However, they will continue to make loans to current student borrowers.

The 1,447 Cal Poly students who received federally assured loans during the 1974-75 school year will be able to continue borrowing from the banks. New applicants will have a more difficult time in securing a loan.

Most of the city banks, except United California Bank, will continue service to new applicants. The banks who have stopped the loans to new applicants are frustrated by what they say are unreasonable delays.

Bankers say the Office of Education is too slow in repaying loan claims, making banks wait as long as two years for a settlement. More bankers claim the program has never been profitable. They participated in the program for the sake of public interest.

Cal Poly students have a better chance to receive a GSL compared with other state universities.

**SLO Youths Are Given Trick-Or-Treat Guide**

Various tricks on Halloween are no treat for youngsters who venture out searching for sweats but return home with broken noses or poisoned candy.

Evading candy and marring high school hallways have ruining Halloween for many a youngster recently—especially for those who live in larger cities. But in this county, the Sheriff's Department is trying to turn the emphasis of Halloween back to treats and away from tricks.

The department sent a safety guide to county children in the kindergarten to third grade age level.

The department received a rash of children looking for candy. They hardly ever go into the kindergarten to third grade area. They hardly ever go into the kindergarten to third grade area. They hardly ever go into the kindergarten to third grade area. They hardly ever go into the kindergarten to third grade area.

They hardly ever go into the kindergarten to third grade area. They hardly ever go into the kindergarten to third grade area.

Taking off on another stunt flight

This Spinning, Grinning Pilot
Hardly Ever Plays It Straight

The pilot clutched the controls with all his might as the plane strained through the sky 3,000 feet above the ground, upside down.

Then, with a snap of his wrists, he righted the plane, an aerobatic trainer, and glanced back with a smile that said it all.

Dave Beatrice, a 21-year-old pilot and Cal Poly senior, had just completed another stunt on one of the 18 flights he flew at the San Luis Obispo County Airport last weekend.

"I love it," said Beatrice of the Bellanca Citabria hi wing aerobatic trainer. "I get the biggest charge out of flying this."

Beatrice, who is vice president of the Mustang Flying Club, went on to say the event was put on to attract attention to the Poly-based club that has 40 members.

The Citabria, which flies at an average speed of 120 miles per hour, flew from 10 a.m. to 5 p.m. and was so successful that the club plans to rent it again.

"The turnout was fantastic," said Beatrice. "We had so turn down people all day."

The people who flew, most of whom were Poly students, paid $4 for a half hour in the two seater that performed stunts like loops, snap and slow rolls, hammerhead, stalls, spins, Immelmanns and Cuban right under the control of Beatrice who has been flying for three years.

But this was just an ordinary day for Dave Beatrice, who literally lives at the airport flying every chance he can. In the three short years he has been flying, he has accumulated over 1,200 hours in the air himself and also teaches Poly students how to fly as well.

The Mustang Flying Club's next meeting will be Nov. 5. For more information contact Beatrice at Swift Airlines office at the San Luis Obispo County Airport.

Two plans have been developed offering discounted bus fares to Cal Poly faculty, staff and students. The discounts, one sponsored by the ASI and the other by Cal Poly are intended to lessen the congestion in campus parking lots.

The ASI discount offers bus tokens worth a 25 cents ride for 15 cents. The University sells 10 monthly bus passes for $5. Both are on sale at the University Information Desk.

The ASI is subsidizing the tokens for 5 cents a piece. The bus company has a bulk rate of 20 cents a piece. Funds for the subsidy were appropriated by the Summer Interim Committee, SACS summer-replacement.

Steve Adams, ASI Program Manager, said the SIC voted the money "as a means of encouraging bus transportation, to serve the students and because of the parking problem."

UNTIL TAX REFUNDS
NOTICE IS HEREBY GIVEN THAT the City of San Luis Obispo is accepting applications for refunds up to $10.00 on all utility taxes paid to the City for the period July 1, 1974 through June 30, 1975 from households in which the claimant lives where the annual gross income is less than $8,000.

CLAIM FORMS are available in the City Clerk's Office, 890 Palm Street, San Luis Obispo, beginning October 1, 1975, and must be filed in the City Clerk's Office or postmarked no later than the 31st day of October, 1975.

Seven women hockey teams from throughout California will be participating in the annual tournament of the Southwest Section of the U.S. Field Hockey Association Saturday and Sunday in Mustang Stadium. Competition for the number one team and the reserve team representing the Pacific Southwest in the national tournament will be held Sundays from 1:30 to 8 p.m., and 2 to 4 p.m. Game play will be from 8 a.m. to 3 p.m. on Saturday and 9 a.m. to 2 p.m. on Sunday.

The tournament is being sponsored by the Cal Poly Physical Education Majors Organization for Women. Admission is free and the concession stand will be open.

The Merriadel Students Club (Cal Poly Student Wives Club) is kicking off a membership drive with a Halloween social on Nov. 1 at 8 p.m. For more information call 544-1320 or 774-1416.

The Childbirth Education League, a volunteer organization which covers the area San Luis Obispo, Atascadero and the Five Cities districts, are sponsoring two infant care classes for young mothers.

Today, Dr. Robert Broomall, a pediatrician from Sierra Vista Hospital, will be the guest speaker addressing the development of children, and when and how to take a child to a doctor.

Physical therapist, Katherine Cooper is scheduled to speak on Thursday, Nov. 6 on how to stimulate a child.

All young mothers are invited to gain knowledge from the professional speakers as well as from informal discussions among them.

The classes will begin at 1 p.m., at the First Baptist Church, located at 2070 Johnson Ave. A donation of $15 per class is asked for but not mandatory to attend the class. Babysitting will be provided.

For more information contact Mrs. Mary Illingworth, 346-9857 or Mrs. Freddie Maehall, 773-1894.

* An organizational meeting of PALS will be held tonight at 7 p.m. in UU 116. All PAL volunteers and interested people are invited to attend.

* The PAL volunteer organization for students who have a little extra time to become a big brother or sitter to an unfortunate child in the community.

* The Journalism Department, Cal Photo, Cal West Photography Warehouse and Jim’s Campus Cameras are sponsoring a free Honeywell Photo Seminar Friday, 7 to 10 p.m. and Saturday, 10 a.m. to 3 p.m. at the Cal Poly Little Theater. Topics discussed will include lighting, portrait, macro, composition, lenses, film types, candid shooting, special effects, filters, and focusing.

Final touches are put on new greenhouse. (Daily photo by Mark MacKinnon).

OH Students Build Giant Greenhouse

Ornamental Horticulture students have constructed the largest greenhouse ever built on campus.

The design, by Turner Construction Company, is unique in that it uses lightweight 16 and 18-gage metal. Old-fashioned greenhouses, covered with heavy metals, are more expensive and harder to construct.

The 10-foot by 140-foot greenhouse, complete except for heating, was built by OH majors enrolled in landscape construction classes and spatial problems classes.

Trusses were built by the students, raised onto supports, completed and put together.

At present, the greenhouse is used as a transition for moving plants from a hothouse to the outdoors.

When heating is installed, strawberries and indoor plants will be raised on one side of the house, with nursery stock, potted plants, and house projects in the other half.

A 40-foot by 72-gage metal building also was constructed at the same time, as a production facility for storage and student use.

The California Association of Nurserymen and the state of California each donated $10,000 to finance the two projects. These funds were enlarged with a contribution from the Foundation State Reserve.

Other greenhouses at the unit have been built by commercial greenhouse companies. Small quonset-shaped greenhouses, made with plastic stretched over pipes, had previously been constructed by OH students.

Loans: Okay (continued from page 5)

A worker said, "I really don't think the decision will affect Cal Poly students, because most students get their loans from banks other than the one's discontinuing the program. Most students receive their loans from local banks.

Bank of America, which supplies 55 per cent of the OH loans in California, reports to be maintaining its student loan program as a

Crocker National Bank, 751 March St. will continue to grant federally assured loans to the applicants. However, new applicants must have both a savings and checking accounts at the bank. In the past only a checking account was needed.
Swinging Business: Rent An Ape

by Dennis Hairday

Daily Bell Writer

So you think you had a hairy experience at that party Saturday night, huh? Well wait until Poly student Scott Potter gets his part-time business rolling.

His very formal card reads:

GORILLA AT LARGE, RENT YOUR OWN BEAST.

Proprietor, Cal Poly University—341 Sierra Madre Hall

That's right, he rents himself and his homemade gorilla suit out to people giving parties, scores having sales promotions, weddings, whatever.

After seeing "Rent-A-Breaker" agencies pop up during the recent fad, Potter hoped to create his own local craze and reap an economic harvest.

"I wanted to work, but I didn't want to work regular hours," he said in explaining his unusual choice of jobs. The first week of September saw an article in the Moro Flex paper about a guy that made all kinds of masks and שה gorilla costume.

"I figured it would be a pretty good deal if I had a job dressing as a gorilla. I decided to make my own costume because it would cost about $60, instead of $180 or more to buy one."

"I went down to Beverly Fabrics and bought a bunch of imitation gorilla fur, then my cousin and I took about four hours to put it together."

One of the biggest disadvantages is being hit by people on skateboards. Every job has its good and bad points, and so does Potter's. Though he wouldn't specify which it was, he said that "Every so often a girl will get a Parent complex (remember King Kong) and will want me to carry her to the top of the nearest tall building."

"One of the biggest disadvantages is being hit by people on skateboards and people in the downtown getting funny and trying to hit me. They forget that there is a person inside the suit and it's not just an animal."

"It gets damn hot inside the suit too. I haven't been outside during the day yet, but inside buildings at night it gets up to about 100 degrees inside the costume."

"I was a diesel mechanic for a year and a half, but I got tired of getting my hands dirty and not being able to meet people, which I really enjoy."

"Being a gorilla lets me meet people and get to know them, but only to a point. It's not natural for gorillas to get horny with chicks."

"I know the market is out there, all I need is publicity, that's why I got dressed up and went down to the University Union last week, to let people know that my service is available."

"I'm going to wait a while before going into San Luis. Though I'm curious to see if the market exists before going into the real world."

Though his parents are skeptical, he's sure his costume will catch on campus before going into the real world.

"I want it to happen here on campus."

(continued from page 4)

-End-
When the old woman looked in her shoe, she saw too many children and not enough spaces. When Cal Poly basketball coach Ernie Wheeler, looks into his team but this winter, he is going to see too many empty spaces and not enough players.

Last August, the delegates of the NCAA Board of Control voted to limit the travel squad of all intercollegiate sports. Along with basketball, the travel limitations are aimed at cutting the cost of intercollegiate sports. Some big name coaches, such as Alabama's Bear Bryant and UCLA's John McKay, have openly expressed their disapproval of the NCAA's decision.

Bryant has taken the NCAA to court once and won. But all Appalachian Conference schools, other than the NCAA's original ruling, Bryant, who feels the NCAA's original basketball limitations are absurd, plans to take the issue to the Supreme Court at the close of the 1973 season. While the big money schools enthusiastically support travel limitations, how will the sports at Cal Poly be affected?

The limits in question is for 1974. Joe Harper, the Cal Poly basketball coach, said the limitations will have no impact on his team. "We only took 98 players to Boise (under the limit by two) and the usual amount" will be taken next year.

Although Harper is not opposed to travel limitations, he is not sure all the coaches see eye to eye. "There is one stretch in our season when we do not play a home game for a month" said Wheeler. The basketball team will be allowed to draw out 18 players at all home contests. Basketball is not the only sport that will be substantially affected. Baseball will be cut down to 18 road players. Baseball coach, Randy Harr, said the rule takes on an interesting twist in the CCAA conference.

"We are the only school located outside the LA area," said Harr. "Consequently, we are the only school that will always be involved in three day conference road trips," said Harr.

Harr said when a Poly travels to a school down south they will have to make due with 18 players for the entire weekend. But when a LA located school like Riverside plays Northridge or another LA school, they will alternate playing sites.

It appears that baseball and basketball will be affected the most at Cal Poly, but all sports will have their traveling squads reduced. Wrestling will be limited to 18, soccer 18, track 18, volleyball 10, water polo 12, swimming 18, cross-country nine and tennis seven.

The NCAA's decision to limit the amount of players travelling squads is one that was made in haste.

Although cost-cutting in college sports should be a major concern, there could have been a much more feasible alternative. For instance, a limitation on out-of-state travel only. This would have been much more reasonable and would have accomplished the NCAA's goal of cutting costs.

Rodeo Team To Open Season

The rodeo team from Cal Poly will open its new season at the Western Region meet of the National Intercollegiate Rodeo Association, which will be hosted by Central Arizona College.

Last year, captain John McDonald of Red Bluff, a member of three seasons of NIRA competition, the men's team will include Tom Booser of Phoenix, Ariz., who saw service on the team last year; Jim Prat of Alhambra, who joined the team in midseason last year; Lou Bugenig of Fruedale, who joined the team for the spring season; and Pat Jones of Madera and Steve Brunce of Chowchilla, newcomers to the team this year.

Women's team members will include Vickie Scott of Battle Mountain, Nev., Cynthia Van Horn of San Miguel and Elaine Cousins of Paso Robles.

The Cal Poly team goes into the new season of competition with a tradition of national championship teams to uphold. Cal Poly rodeo participants garnered national championships in 1960, 1970, 1971 and 1973, more titles than any other team.

This is an obvious advantage for the LA schools. Coaches will be able to juggle their roster around day to day. This is a luxury Harr will not have when his team hits the road.

Harr, who will be able to suit up 83 players at home, said he will be forced to carry only six pitchers when he travels. There were many occasions last year when Harr used more than six pitchers in a weekend series.

It appears that baseball and basketball will be affected the most as Cal Poly, but all sports will have their traveling squads reduced. Wrestling will be limited to 18, soccer 18, track 18, volleyball 10, water polo 12, swimming 18, cross-country nine and tennis seven.

The NCAA's decision to limit the amount of players travelling squads is one that was made in haste.

Although cost-cutting in college sports should be a major concern, there could have been a much more feasible alternative. For instance, a limitation on out-of-state travel only. This would have been much more reasonable and still would have accomplished the NCAA's goal of cutting costs.

**For CCAA Lead**

**Poly To Play UC Riverside**

**By JON HASTINGS**

Daily Sports Editor

Every year Ohio State plays Michigan for the Big Ten title and UCLA plays USC for the Pacific Eight Crown. Well, Cal Poly and UC Riverside have a similar act going on in the CCAA.

In the past four years Riverside and Pol have dominated CCAA football play and this year is no different.

This Saturday at UC Riverside Stadium, where a capacity crowd of 5,000 is expected, it will be time to put all the numbers on the table and see who comes away with the most.

Both teams entered with 2-0 conference records and as expected, Saturday's game will more than likely decide the conference title. UC is 4-3 overall and has won three straight. The Highlanders have won 12 of its last 13 CCAA contests.

Last year they defeated Pol in Mountain Stadium en route to the CCAA title.

The Highlanders are led by quarterback, Dan Hayes. The Highlanders are led by quarterback, Dan Hayes, who is the passing and total offense leader in the conference. Hayes has passed for an average of 335 yards per game.

Beth Johnson is the man. Hayes has thrown to the most. Johnson is the leading receiver in the CCAA and he is averaging eight catches a game. He has grabbed eight touchdown passes on the year and he could give the Poly defensive backfield of Pat Manns, Mark Davis, Rick Haycock and Bill MacCudden, plenty of headaches come Saturday night.

"Dan Hayes and Johnson are responsible for Riverside having the top total offense team in the conference. They are averaging a very impressive 428 yards per game. Poly is coming of their finest defensive performance of the year."

In the second half against Northridge last week, the Mustangs held played 12 plays from scrimmage. Of those 18, the Mustangs held Northridge to minus or no yardage on 10 of those.

"Poly was playing improving football, apparently getting ready for this week's game against Riverside. While the defense was playing well last week, the Mustang offense was playing even better."
