Survival Is His Project
Joe Giannetti listens to you and respects the views of those who are willing to speak up. He asks the time needed to communicate with anyone interested in talking with him concerning this entire country. Joe does as did and give Joe a call. He will be happy to discuss with you anything, at anytime, and at any place.

Joe plans to regulate growth in District 2 for the benefits of those people who already live there and for those who may yet come. Young people should either be held back or in this area because the cost of living. Joe is concerned about this issue which is among the many major issues he will be confronted with if he is elected as District 2 Supervisor with the help of your vote.

We have given Mr. Wilford a chance and it is a responsible supervisor for District 2. It takes so little effort on our part to go out and give our support to a man who will govern District 2 the way the majority wants.

Ami Helmkamp

Credit Is Due

Editor:

I feel Phil Bishop's taking credit for a "prominent Jew" regarding South Mountain halls to be unjustified. It was either the wish or wishes of the halls pushing a request through S.O.S. to the administration that caused any positive action.

Joe should take all of SAC's "positive action" but do not feel I'll feel Bishop's backing was not a student vote this spring he plans to ask for a reduction of 15 SAC reps.

This may help to create a group that works together more effectively and be more cohesive.

As Bishop points out, part of the problem seems to be that people don't know what they're getting into when they run for SAC. When by-laws revisions are submitted to a student vote this spring he plans to ask for a reduction of 15 SAC reps.

SAC Reps Copping Out

Joe Willeford needs a new county court judge and people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the district in the way that the people who are the most devoted to their work and to the people who are the most devoted to their work and to the district in the way that the people who are the most devot...
Lerner Tells Of His Optimism For America

by ELENA-MARIE KOSTER
Daily Staff Writer

If death is a sad thing to see, watching the dying is far sadder.

 Syndicated columnist Max Lerner spoke on "Is America A Dying Civilization, Where Do We Go From Here?" Thursday, in direct answer to the question, Lerner said he was not a pessimist or an optimist about America's future.

"I'm a pessimist. America can live. I can't say yes or no or maybe. I only know that there are many possibilities," he said.

Lerner outlined seven evidences of the death of America society.

1. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

2. "The movement for sexual freedom is mainly a movement for freedom and equality. Anything goes' suicide is dangerous, but anything in excess is dangerous," he said.

3. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

4. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

5. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

6. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

7. "The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

Lerner feels our nations greatest asset is our ability to grow.

"Looking over history, the civilizations that die are the ones that are rigid. America could not have lived through the depression of the 30's or the revolutions of the 60's, the most revolutionary times since the American revolution, if we had been rigid. If we were rigid we would have broken," he said.

Lerner feels America has learned from the experiences, he feels all people should learn that way.

"Things we know, you know, we think we know, don't come from books, but from life experience, and the inlayment between books and experience. This is the best education. I tell college students to get some life experience before they go on to a career. All education should be value education, ones that can be put into a life situation," he said.

"Before a career, it is important to know what other countries are about and what this country is about, to understand their values, and yourowm," he said.

The point of education is to develop the capability to make moral choices between alternative futures, he said.

As a possibility, Lerner feels that America can cope with whatever future we choose to deal with.

"In times of trouble it is important to understand the tragedy you are in. Tragedy is a learning experience. It can deepen you or it can destroy you," he said.

Poly Bunch Accused
In Banana Leaf Caper

First Cal Poly students may be in a bit of trouble.

Last Wednesday night the five allegedly were out on the Oso Street side of the County Courthouse in San Luis Obispo, gathering banana trees—bananas leaves. Before they could split the banana leaves, the San Luis Obispo police department arrived.

The five spent the night in the county jail charged with possession of stolen property—banana leaves. All five posted $1,000 bail and were released from custody.

Police stopped the five students who were in a pickup parked partially of the allegedly stolen leaves in the 1200 block of Murray Street at 11:15 p.m.

The purpose of the alleged pillaging—on a upcoming tour, Banana leaves are commonly used to wrap fish before cooking over an open fire in a pot.

Also found in possession of one of those leaves were two freshmen in San Luis Obispo where banana leaves could be found.

The suspects were reportedly spotted a man working in his office as they cut the stalks of banana leaves. He then notified the police.

Taken into custody were Bruce Welch, 20, Michael Riehle, 21 and Keith Cochrane, 20, all of 551 Ramboul Drive, No. 80, San Luis Obispo.

Also arrested were Steve Dillon, 19 and Neil Nakamura, 20, both of 142 North California Blvd., San Luis Obispo.

Nuclear Poll Results Released

Most Californians are finding out about the nuclear initiative to be held in June, but a large segment remains unacquainted with the field poll released Thursday shows.

Conducted by pollster Merce Field, the latest sur-

vey shows the percentage of Californians who are aware-

ly aware of Proposition 13 increasing from 55 per cent to 65 per cent since November.

The poll also showed that voters would be less likely to vote in favor of the proposition after they have read the meaning of the measure itself.

A total of 45 per cent of the people who said they had heard something about Prop. 15 said they would vote yes, while 59 per cent said they would vote against the initiative. Another 45 per cent said they would vote no and the remaining 1 per cent were undecided.

For those people who had their first exposure to the initiative, the latest poll says that 20 per cent of the people said they would vote yes, while 39 per cent said they would vote against the initiative. Another 39 per cent said they would vote no and the remaining 1 per cent were undecided.

Among those who were aware of the nuclear safeguards proposition, 45 per cent said they would vote yes, while 45 per cent said they would vote against the initiative. Another 45 per cent said they would vote no and the remaining 1 per cent were undecided.

The poll included the breakdown of the world power system, unstable economy, overuse of resources, cities that are unlivable, sexual decadance, a conflict between values and a loss of confidence.

He also offered alternate possibilities to these trends in our society.

"We are better off than most countries. Our food supply is enough to feed ourselves and other nations besides. The Chinese are starving for our help. Our nation has elements of strength," Lerner said.

"It is Lerner's opinion our nation is coming through its economic crisis by finding solutions to situations we have not before," he said.

He praised the youth for tuning and turning the fight to control the use of our natural resources.

"The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

"The ecological movement is the most exciting movement in our time. We're beginning to understand that it is a myth to think our resources are limitless," he said.

A Gentle Guerilla In A Nuclear Power War

We are our own worst enemy in the energy crisis.

by STEVEN CHURH
Daily Associate Editor
Weekends he works in the emergency ward at the French Hospital. The rest of the time he is a nuclear specialist on a radiation crusade. "One to preserve the quality of life in San Luis Obispo County," as he and his co-workers phrase it. It's quality of life that Dr. David Lenders strongly feels is threatened in this county by the presence of nuclear reactors at Diablo Canyon.

"I am totally committed in my work to the continuation and preservation of life in all forms and the more presence of the Diablo Canyon nuclear plant is absolutely a threat to the future of that quality," the 35-year-old Lenders says.

Lenders, who more closely resembles Richard the Lion Heart than a twentieth century nuclear expert with his long hair and Victorian manner is an increasingly vocal critic of nuclear energy. Recently appointed the chairman of the county chapter of an ecology action organization-Lenders questions the need for nuclear energy.

"We must carefully examine how we waste and misuse energy in this country. Studies show that if we correct our personal usage habits, such as turning unused lights off or turning our breakers down we can save as much as 75 per cent of the energy. We are wastefully consuming today. With that type of savings we wouldn't need nuclear energy," Lenders says.

Lenders says he is not advocating "radically changing" people's lifestyles, but "altering their consumption habits" to prevent costly waste.

"Sweden and France use two to three times less energy than we do as a nation, yet have a higher GNP (Gross National Product) per capita than we do. That just exposes our excessive waste and the fallacy that in order to be a great, powerful nation we need more fuel," Lenders said holding one of the many thick nuclear research documents and books that are scattered throughout his small Los Osos home.

But unlike so many modern-day consumer-protectors, Lenders does not accept nuclear power's blame for energy waste on big business or bureaucrats in Washington. Instead he places the blame on "middle-America."

"We are our own worst enemy in the energy crisis. That is why I can't point any fingers at any one except the masses, who leave their lights burning all night and use fuel inefficiently."

Shifting his large frame on the weekends his work is in the small wooden church, he continued. "We as a nation possess too much greed and apathy, failing to obtain government documents and thereby make government policies to prevent costly damages."

"We have not done enough research into nuclear power, yet we blindly accept it. Our acceptance reminds me of many of the panic I use for heart attacks and strokes. People drink, eat and smoke until they suffer permanent damage, instead of taking low expensive preventative steps to avoid costly damage and pain. There is no need to accept nuclear plants and then receive costly treatment for a disease. We need to educate the public to prevent such disasters."

Lenders crusade for reducing San Luis Obispos is not a new one. He was co-sponsor of a "concerned citizens" group of 95 out of 160 community doctors last spring-calling for further research into the dangerous implications of nuclear energy.

Lenders also co-sponsored the nationwide acclaimed nuclear ban here on campus last Fall. The forum brought together experts to debate the controversial aspects of nuclear energy.

A Gentle Guerilla In A Nuclear Power War

...And He Infiltrates Poly, Too

by JANET McBRIEN
Daily Associate Editor
Gaining the unique health hazards associated with nuclear power, Dr. Dave Lenders spoke out here yesterday in support of the Nuclear Safeguards Initiative, Proposition 13.

Lenders, one of the organizers of last Fall's nuclear forum here, spoke during college hour on the nuclear fuel cycle and safeguards and in favor of a "yes" vote on Proposition 13.

"The effect radiation has on the body is a primary concern for me," said the physician. "Because man is at the top of the food chain it is a relatively small amount that a person will get lung cancer."

Lenders was recently appointed the new chairman of Project Survival for San Luis Obispo County. Project Survival is a state-wide ecology organization concerned with ecological issues. The speech was sponsored by the Poly Ecology Action Club.

Lenders frequently and emotionally restated his belief in the nuclear safeguards initiative. The long term effects of nuclear energy are so far-reaching, so serious," he said.

"Before only half the genetic effects of exposure to radiation show up 50 to 60 generations - not to mention.

Speaking with Lenders was Jane Swanson, a fellow member of Project Survival.

"We're not an expert," she declared, "but I maintain you don't have to be to see a scientific genius to decide how to vote on something as vital as this."

According to Swanson the main issues Proposition 15 deals with are plant safety systems, waste storage facilities, insurance limitations and publication of evacuation plans.

"If the industry claims Proposition 15 would result in a moratorium on nuclear power, that's just not true," he said. "It was up to safety regulations that meet to which the industry claims it already has. If that's so then they shouldn't be afraid of proving it."
Old Friends Make Concert Possible

by KATIE KEELLY
Daily Staff Writer

If Clinton Swanson hadn't
met and become friends 12
years ago with a boy whose
cello-playing ability he ad­
mired, cellist Jeffrey Solow
might not be performing
with the Cal Poly Chamber
Orchestra Friday night.

Swanson, who conducts
the orchestra, met Solow in
1964, when they were both
attending the Music
Academy of the West in
Santa Barbara.

"The academy was set up
for very high level musicians
of college age," says Swans­
on. "They made an arrange­
ment for the 14-year-old boy
who played the cello like he
was 50 and had played all his
life."

The two men are good
friends now, which explains
Solow's appearance with the
orchestra Friday night in the
Cal Poly Theatre.

"He is a virtuoso. I'm sure he
will be one of the top cellists
in the world," says Swanson.

Solow has received critical
acclaim (or his ability
known to a wider audience:
"He is a very busy man. He
will be one of the top cellists
in the world,"

Solow grew up in Los
Angeles and began studying
cello at the age of six. His
father was a television
producer and his mother a
professional violinist.

Says Swanson, "He grew
up in the Hollywood
atmosphere, surrounded by
producers and musicians. He
is a supremely confident
young man today."

The cellist has been award­
ded many honors, according
to Swanson. Last week Time
Magazine reviewed an album
featuring Solow entitled
"French Masterpieces for
cello and Piano." The
reviewer praised the work of
Solow and pianist Irma
Valletico (who will be
appearing with the San Luis
Obispo County Symphony
Orchestra later this month.)

Solow appeared with the
County Symphony, which
Swanson also conducts, dur­
ing its 1974-75 season.

"He is a virtuoso. I'm sure he will be
one of the top cellists in the world."

Swanson feels fortunate
that Solow has found time
to perform with the orchestra.

"He is a very busy man. He
just returned from a month's
trip to Alaska and will leave
Saturday morning for a tour
of the East Coast."

The young musician will
join the orchestra in several
pieces Friday night. He will
end the first half of the con­
cert with a Bach suite, which
Swanson says is very dif­
ficult. "It's a piece most cellists
aspire to do for a long time. The
suite is very unique in
that there is no accompani­
ment and the cellist must
play both the melody and the
harmony."

In the second half of the
program, Solow will join the
orchestra in a piece which
features him as soloist, ac­
cording to Swanson. He will
play Hayden's Concert in D
Major for Violoncello and
Orchestra.

Other selections offered by
the orchestra are: 'Acadian
 Songs and Dances' from
"Louisiana Story" by Virgil
Thompson. "The Circus
Band" by Charles Ives and
"Chaconne" for Strings
Orchestra by Henry Purcell.

"This is a classical concert
for those who don't like
classical music," says Swan­
son. "It will be very intri­
guing, and Jeffrey Solow is
a lot of fun. He is engrossed
in his music, but he enjoys
it."

Tickets for the concert
Friday which begins at 8:15
p.m., are available at the Cal
Poly Theatre and in the Un­
iversity Union. Students will
be admitted for $1.50, and
Swanson says, "It's a real
bargain. You won't find that
price anywhere else."

Movie Review

Dramatic Quality Is Lost

by RICK GOULART
Daily Staff Writer

Dignified by a Best Actor nomi­
nation, "Give 'Em Hell, Harry!"
helps bring to an intimate cinema
level, but stays loosely
connected to the larger
historical (or personal) per­
sonalities, like Twain
deserves Academy recogni­
tion.

Ironically, his first and last Oscar
represent a supreme triumph in the
field of Will Kogcts, an effective and
loosely

The premise of the film, a word
used loosely here, was to bring to
audiences everywhere the Truman
playwright Sam Gally had so
hoped to realize in this "political
career." Instead it is what we get a little
more than another audio-animatoric

It is the film's technical problems
that are quickly noted. Unlike the
antecedent clicking gears of
Dana's Lincoln, we are made pain­
fully aware of Whittome's concealed
microphone sending out out-of-date
gases of air necessary to throw the
voices out to the audience where they are
then to give the film some theatrical
reality. From the most taxing of the
plagues is too much.

Unfortunately, Whittome plays to
that audience instead of relating the
tale of the nine cameras that were
used. The film's tender moments, like
when he discussed his reasons for
running the atomic bomb to the ghost of
F.D.R., are equally just as loudly as

Still, his nomination is a strange
case. Filmed before by no means
representations supreme triumph in the
motion picture "arts and sciences."

If Truman were a better actor, he
would have been nominated for the 1980
film "Kilobug".
Arbor Day Celebration
A Holly Oak tree will be planted by the Ornamental Horticultural Club on Saturday, March 6 in honor of Arbor Day. The tree will be planted behind the Business Building on a three acre lawn site at 9 a.m. The club is holding this event to honor trees and promote tree appreciation, tree knowledge and scientific tree care.

Murder On The Orient Express
"Murder on the Orient Express" will be shown Saturday night in Chumash Auditorium. The film, starring Albert Finney and Lauren Bacall will start at 7 and 9 p.m. Tickets can be purchased at University Union ticket counter for $1.

Poly Phase Book Exchange
The Poly Phase Book Exchange will be accepting used textbooks starting March 3 at 1 p.m. Sales will begin the following day and continue through the first week of classes.

After filling out a computerized form and receiving a receipt, the customer returns during the second week of classes to collect hit or her money. Customers are selling prices on their books themselves. Poly Phase deducts a 10 per cent service charge on the books they are able to sell. Unsold books are returned at no charge.

Poly Phase will accept books in any condition as long as they are currently being used. They will be located in Mustang Lounge from 9 a.m. to 4 p.m.

Panic Tips For Finals
Test-taking panic tips for finals will be offered to interested students at the Learning Assistance Center, U.U. Bid on Monday from 5 to 7 p.m.

The Center will tell how students can reduce tension, anxiety, panic or blackouts because of finals. The center will also discuss how to prepare for exams and present specific tips for taking exams.

10 Speed Bike Raffle
Members of Tau Beta Pi are asked to attend a meeting on March 9. At the meeting tickets will be distributed for members to sell for the raffle of an Audi 10 speed bike.

The meeting will be held in Science North. Room 201 at 7 p.m. Raffle tickets will be sold by Tau Beta Pi members for $1. The raffle will be held on April 15.

Chance To Air GripeS
Students are urged to attend the Board of Ideas and GripeS (BIG) meeting on March 10. BIG is a group of students who meet once a month with a member of the Cal Poly Foundation to discuss any questions, ideas or gripeS students have and find answers and solutions to those problems.

The meeting will be held in the Staff Dining Room at the west entrance of the Dining Hall at 6:30 p.m.

Florida: Primary Showdown
Reagan In 'Do or Die' Race
MIAMI (UPI) - Ronald Reagan returned to the campaign trail in Florida Thursday in a "do or die" effort to remain in the Republican primary race with President Ford.

Reagan backers urged their candidate to abandon his "nerve gay" approach and directly attack Ford's record to counter the President's claim that after early round victories in New Hampshire, Vermont and Massachusetts he has moved into a slight lead over the former California governor.

State GOP chairman Bill Taylor of Jacksonville said Reagan's supporters "sense it's do or die."

Although officially neutral, Taylor said, "what I read between the lines from the Reagan camp is he's slipped to some point around 49.5 per cent. Ford has gained 10 to 14 points in the last few weeks, but there are maybe 10 per cent undecided."

Reagan arrived in Orlando Thursday after a brief trip from campaigning for a final four-day blitz before Tuesday's primary.

Ford probably will not return to Florida for a third swing through the state, White House Press Secretary Ron Nessen said, "virtually a very slight possibility" the President might make the trip but a lack of available campaign advance men probably will frustrate his desire.

Roseman said, "the President thinks he'll win because the momentum will carry him forward. But by no means is he taking it for granted."

Sen. Henry Jackson, claiming his Massachusetts primary victory now makes him the Democrat with the momentum, hoped that day from Orlando to the Kennedy Space Center for a crowd cornerstone ceremony.

He told reporters opposition Jimmie Carter has won a direct confrontation with the president, Alabama Gov. George Wallace, the acknowledged front-runner in Florida, stumped the Midwest for a vote; and he had relinquished Jackson's strength in Massachusetts, the former Georgia governor still predicted he would win Florida.

Wallace moved his political show from Miami to a nighttime rally in Melbourne. Pennsylvania Gov. Milton Shapp, fourth of the active Democratic campaigners in Florida, wound up the Miami Beach area Thursday. He said he would like to pick up two or three of Florida's 10 delegates and "four would be sensational."

David Bowie Spotlighted
KCPR will present Volume four of "Evolutions in Rock and Blues" tonight at 7 p.m. Spotlighted in tonight's program will be the career of British rock superstar, David Bowie.

Financial Aid Deadlines
The Financial Aid Department wants to remind students that deadlines for scholarships and financial aid programs are approaching.

Deadlines for Basic Educational and Opportunity Grants and Cal Poly Scholarships are March 15.

Summer quarter financial aid must be filed by April 1.

Fall Quarter financial aid must be filed by May 1.

Millionaire's Illegal Contributions
LOS ANGELES (UPI) - Millionaire oilman Armand Hammer, in a wheelchair and hooked up to a cardiac monitoring device, pleaded guilty Thursday to making illegal contributions to Richard Nixon's re-election campaign in 1972.

Hammer, 77, left a hospital bed to enter the plea in U.S. District Court. A doctor was in the courtroom and the industrialist was hooked up to wireless cardiac telemetry equipment which was being monitored in another room in the courthouse. U.S. District Judge Lawrence Leitz allowed Hammer to remain seated for his February sentencing as a later date, following a probation investigation.

Hammer's plea was to three misdemeanor counts of making secret contributions totaling $44,000 to Nixon's campaign.

For further information concerning special rates 546-1144

DEADLINE
Apr. 14, 1976
The power of the wind and sun could be a possible alternative to nuclear power, according to Dr. Kenneth Oiwa. Oiwa, a physics instructor here, is concerned about future energy and where it will come from.

He has been working on mapping the wind and sun of San Luis Obispo for the past year. He believes the future of California depends on its harnessed natural energies.

"We have a responsibility to explore all possibilities. I'm not saying nuclear power isn't the answer but we need to find other courses to take," said Oiwa. "Just in case."

The instruments Oiwa uses in his study are on the roof of the Science North Building. One of the instruments measures the wind velocity and the other measures the solar (solar) energy.

There are two goals — long and short range — which Oiwa and his instruments are striving for. The long range goal will have a future effect on the entire state.

"Our immediate purpose is to accumulate data for the solar and wind energy. This works toward our long range goal and also helps the University students and local utilities." said Oiwa.

The instruments have also helped some Cal Poly students. Recently a few architecture students used the data before working on their design project.

The total cost of the mapping to the department was $1,000.

Lenderts: Preserving

Continued From Page 4

Lenderts though does not just criticise advocates of nuclear power.

He is working to promote the use of "practical, economical and feasible" alternatives to nuclear power.

"Nuclear energy has its place, it's just not the only one," he says.

Oiwa supports the "practical, economical and feasible" alternatives. As an example, he says that his friend, Hewlett-Packard Co., in Sunnyvale, California, installed 16 solar panels at its initial investments of $8,000 and are now saving over $1,000 a month on its heating costs as a result.

"It isn't feasible!"

These potential alternatives which lend Lenderts to say, "We have a right here for an energy awakening."
Setting More Than A Volleyball

by JON HASTINGS

Thousand Oaks Editor

When Steve Bartlett, the 21-year-old captain of the Cal Poly volleyball team, was growing up, he didn't have any ambitions of becoming a first-rate college sailor. He could have cared less.

As a youngster, volleyball wasn't even in Bartlett's vocabulary. When he heard the word, he associated it with three or four big waves breaking in a row, something that was done with volleyballs.

But after Bartlett graduated from Canadera High, his parents moved to Manhattan Beach, the unofficial volleyball capital of the world.

It was here where Bartlett got turned on to volleyball. "I had played a little, but the summer before I came to Poly I really got into it," said Bartlett. "I just started playing more and more and I began to improve."

Infron to this he did, and now Bartlett is considered the best server in the California Collegiate Volleyball Conference. He was first team all CCVC as a sophomore last year. But it wasn't always that easy for him.

Mustang head coach, Ken Preston, said Bartlett was far from an all conference server when he first arrived. "He played junior varsity as a freshman and I can remember trying him up in doubles games," said Preston. "But he started getting smarter and smarter and he has now returned the favor many times."

Bartlett red-shirted his second year here and although he has been here four years he has junior eligibility. Preston considers Bartlett the floor leader out there. "He is the center of the backcourt and he is the only guy besides Mc-Mahon (Tom) that I never take out," said Preston. "He only throws a ball every five or six times that is pretty darn good," said Preston.

Although Preston has been more than pleased with Bartlett's play, the second year coach is expecting him to improve before the season ends. "He still hasn't cracked yet. He hasn't approached what he can do. At the end of last year he was setting balls while diving into the stands," said Preston.

While Bartlett is a lion out on the courts, he is more kittenlike off. His quiet dry sense of humor makes him very popular among his teammates. "He never complains, he just does what is asked of him," said Preston. "Unlike some of the other guys, he doesn't start griping when it's time for conditioning."

Sophomore red-shirt, Andy Shindler, said Bartlett sets a good example for the younger players. "He has fun at practices but he gets things done and the younger guys respect that," said Shindler.

Preston said the team would be a lot different without Bartlett.

"I like playing here, there is a relaxed atmosphere but we are serious about our volleyball," said Bartlett. "I want to build a fine program here and it is still building. I think this school has a bright future in volleyball."

"Bartlett will be in action tonight when Mustangs host NBC at 7:30 (Daily photo by Max Bover)."

Rugby Club Wins

The Cal Poly rugby club trounced Cal State LA last weekend. "Dad Billy Stevens, suburb halfback scored three tries. The club is off this weekend and will host Occidental Saturday. Mark 13, Hallman, Randy Wilson turned in another consistent performance.

Cagers Face CCAA Leader

The Mustang basketball team is in Bakersfield tonight with hopes of upsetting conference leader, Cal State Northridge. The Mustangs are 15-12 and need a win to stay above the .500 mark.

Rifle Team Places 14th

The Cal Poly rifle team placed 14th out of 33 teams this past weekend in the Nevada, Reno Invitational Rifle Tournament. This was a much better showing than last year's 50th place. University of Nevada, Reno retained its title by scoring 2,328 points out of a possible 2,400.

Cal Poly finished one place ahead of teams from UCLA, BYU and Oregon. Mike Brown was the top Mustang with a mark of 384, followed by Delphi Chase 324, Emmanuel Tompanas 490 and John homes 604.

Women On The Road

The women's basketball team travels down south this weekend for two conference games with UC Santa Barbara. The women are 24-1 overall and wireless in conference play. The two games this weekend mark the close of a frustrating season for the Cagers.

Basketball Semis Slated

The intramural 'A' league basketball semis finals will be held in the Men's Gym Monday night at 9:00 p.m.

The first, and perhaps the premier game of the night, pits Schulerungs against 'Born To Run'. Schulerungs by example of the varsity starter and MVP of the Aggie Invitational, Dave Bush. "Born To Run", sponsored by Columbia Records, relies more on a balanced attack.

The second semi-final game sees Heron Hall taking on Hommes Hall taking on Hommes Hall, a team that has done more than anything to work with, the program without them."

Women's Volleyball Finishes Season

The Mustang women's volleyball team finished the season with a record of 11-15. The team played a total of 11 conference games and won 3.

The team's loss this season was mainly due to the absence of Steve Bartlett. The left side hitter had a bright future in the sport of volleyball.

The loss of Bartlett has affected the team in a big way. The team has been left with a lot of potential but nothing solid. The team is looking forward to next season when Bartlett returns to the court.
