Lecture Fees: Abolishing The Limits?

WASHINGTON - There was something a little sneaky about George McGovern and Barry Goldwater teaming up in the House to overturn the limit on how much legislators could earn on the lecture circuit. The move would allow them to dodge the issue of the professionalization of congressmen.

It happened during what amounts to the presidential campaigns. From shoplifting to stopping dorm toilets, the students are answered. Permanently — places the position In the All American Council. The remaining proposals, however, go beyond mere questioning. They are the final step in establishing a new generation of prison reform. The 111,000 ceiling in the era of Watergate was recently, one U.S. senator was in the habit of bringing to the New York monthly to speak for $1,000 a month; a luncheon of businessmen, all of whom had business in the city. And the creation of a presidential commission on the subject. And the creation of a presidential commission on the subject.

The proposal is to give Congressmen the right to earn $1,000 a month. Whether this most recent proposal is in the interest of the students is unanswered. Permanently established staff assistants might do just that.

It is the last step in moving student government out of the hands of the student body and into the hands of the university.

The vote in the House may make the student body the last step in the student disciplinary procedures. From shoplifting to stopping dorm toilets, the students are answered. Permanently placed the position in the All American Council. The remaining proposals, however, go beyond mere questioning. They are the final step in establishing a new generation of prison reform. How a 19-year-old college sophomore can become a 21-year-old Army officer.

The Army offers college sophomores the opportunity to earn an officer's commission in two years. It's tough, but the people who can manage it are the people we want to manage the men, money and materials of the United States Army.

You apply for the special Two-Year Army ROTC Program during your sophomore year. Then attend a six-week Basic Camp, with pay. Approximately $500.

You'll learn what it takes to be a soldier—to have your body toughened, your confidence developed.

Do well and you can qualify for the Army ROTC Advanced Course in the fall. Do exceptionally well, and you may be heading back to college with a two-year full tuition scholarship.

For the next two years you'll learn what it takes to be an Army officer. You'll be challenged both mentally and physically. You'll get the kind of management and leadership experience that will be an asset to you in any career, military or civilian. You'll receive an extra $100 a month, up to 20 months. And when you graduate, you'll have earned your college degree along with the gold bars of an Army officer.

The Two-Year Army ROTC Program. If that's the kind of challenge you're looking for, you're the kind of student we're looking for.

ARMY ROTC.
LEARN WHAT IT TAKES TO LEAD.
They're Making The Cure Easier To Swallow

BY JANET McBRIER
Daily Press Editor

There was a time when the only treatment for an alcoholic was to place him in the county drunk tank or admit him to the nearest hospital emergency room. Those days are gone.

While Dec. 1, opening of the San Luis Obispo County Alcohol Withdrawal and Recovery Unit, alcoholics now have a place to go where they can dry up - a place specially designed to meet their needs.

The crooked doilies on the over-stuffed armchairs, the bowls filled with ripe fruit, the indirect lighting and the perspicuous pot of coffee all help create the warm and secure atmosphere which is a key part of treatment here.

Admission is granted only to those who meet two requirements: a person must be inebriated and must be there voluntarily.

Director of the unit Mike Franklin describes the environment as being naturally therapeutic. "It's the brightest shining light," he told a reporter. "The theory behind the withdrawal unit is known as 'social detoxification.' Developed in Canada in 1980 by a recovered alcoholic, the plan is the first according to Franklin to deal specifically with the needs of the alcoholic.

'"Traditional treatment of alcoholics in jail, hospitals and mental health clinics failed because it was developed for someone other than the alcoholic," said the youthful director. 'Here we give our drinkers a chance to stop drinking, eat good food and rest - the first steps in recovery.'

Franklin dressed in jeans and sweatshirts - something drinkers behavior as 'irreverent and non-judgmental.

"I don't know of any nurse, doctor or cop who enjoys working with a putting drunk," he said. "Here we've trained to deal with that. We try and let the alcoholic know that he's OK. The big thing is to offer a way to stay sober.'

The withdrawal unit uses only non-medical techniques of withdrawal. Alcohol is a drug and all drugs are people substitutes, claims Franklin. "It doesn't do any good to come off one drug and go on to another," he added.

Alcohol withdrawal takes anywhere from three to five days but an alcoholic can stay three months at the center if he needs the time to work out his problems. The unit maintains a bed, of which about half are in constant use. Charges for the services are based on a sliding scale depending upon how much an alcoholic can afford to pay.

In an attempt to halt the delivery of atomic fuel, the Mother's for Peace appealed Pacific Gas and Electric's Diablo Canyon nuclear fuel storing license on April 1 before the Atomic Safety and Licensing appeal board.

The alleged nuclear fact poses to the fuel pose to the county were outlined by the Mothers for Peace, Ray Fleming, chairman of the group, cited earthquake hazards, unattended sauce leaks and potential saboteurs as reasons for concern.

In an early December hearing, the Atomic Safety and Licensing board gave the fuel storing license to PG&E - but no safety issues concerning the fuel were resolved, according to Rayn. "Because of the earthquake danger, PG&E is saying they might have to strengthen the plant to withstand a 7.5 earthquake (measured on the Richter scale)." Fleming said.

"Our expert consultant says you can't strengthen a plant," Fleming said, "we can't put a foundation here and a brick there and raise it strengthened."

PG&E spokesman Dick Davis says PG&E hasn't said it might have to strengthen the plant. "The best as in NRC's court," said Davis. "If they tell us the plant needs strengthening, then we will have to strengthen it."

The Diablo plant is rated to be able to withstand at least a 7.5 quake from the Morgan fault - a Richter scale mildly measured at the epicenter of the fault - according to Davis. But, quickly added Davis, this "doesn't mean it won't withstand a 7.6 quake."

MOTHERS for Peace told Franklin, "If somebody wants to leave for a drink, no one is going to fight him. "But an alcoholic has taken the first step by just being at the center; he's admitted he's got a problem and tried to do something voluntarily about it."

When a drunk enters the center he is handed a cup of tea, "Drunks are in a state of crisis when they get here," said Franklin. "We try to lay off their fears and let them know they can stay here until they sober up."

Mike Franklin, Director of the Alcohol Withdrawal and Recovery Unit (Daily photo by Ellen Banner).

Franklin said Franklin. "If somebody wants to leave for a drink, no one is going to fight him. "But an alcoholic has taken the first step by just being at the center; he's admitted he's got a problem and tried to do something voluntarily about it."

A Move To Stop Atomic Fuel Delivery

In three bills that would prohibit construction of new nuclear power plants in California were met with mixed reactions here yesterday.

The package of legislation is viewed as an alternative to Proposition 19, the nuclear power initiative on the June Primary election ballot, according to a report in the Los Angeles Times.

The three bills were passed in the Assembly and now face Senate approval of the three measures are conditions for passage.

The bills reportedly would stop construction of new nuclear power plants in California until three conditions are met:

- The Legislature, by a majority vote, determine the federal government has designated at least one method of safely storing long-term radioactive waste.
- The federal government adopts satisfactory regulations for construction and operation of nuclear fuel reprocessing facilities.
- The federal government adopts satisfactory regulations for construction and operation of nuclear fuel reprocessing facilities.

Though shaky and futile, alcoholism, by the second day usually get up and drink with the center's housekeeping.

Franklin is quick to point out that at the withdrawal unit, creation of a secure environment is more important than laying alot of therapy on the alcoholic.

"That's not to say there isn't a lot of talk about other agencies," he added. "But the social setting detoxification is the mutual help, if we receive from somebody we who has just gone through the pain we're experiencing.

Peer group assistance is a prime feature in helping others to stay sober. "The most helpful thing for an alcoholic is to be with other alcoholics. "That is why some come here only their alternative is being alone," Franklin said.

The biggest problem alcoholics face is emotional isolation from a world that condemns them for being addicted. Franklin admires the treatment of alcoholism can be a frustrating occupation.

"It's a chronic condition and there's no such thing as a recovered alcoholic," he claims. "You're either practicing sober, or you can't cure anything but we can provide good care for those we see and help them along the way to sobriety."

Franklin speaks from experience. He considers himself a non-practicing alcoholic because he hasn't had a drink for five years. "If I had one drink now, he said, "I'd be dead by where I was before, only worse."

After coming to terms with his alcoholism, use the help of AA, Franklin began to do volunteer work at all alike where alcoholics were treated.

"After seeing how unsuccessful traditional methods of dealing with alcoholism was, I was very interested in the social detox model," he said. "I thought this was the answer."

Now located in a wing of San Luis Obispo County General Hospital, plans call for the Alcohol Withdrawal and Recovery Unit to some day move completely out of the medical setting.

Residents at the unit come from all walks of life and every age, from high school students to grandparents. Residents range in age from 18 to 70 and about 15 to 20 per cent are women.

And Three New Bills Draw Flak

---Three New Bills Draw Flak---

Three bills that would prohibit construction of new nuclear power plants in California were met with mixed reactions here yesterday.

The package of legislation is viewed as an alternative to Proposition 19, the nuclear power initiative on the June Primary election ballot, according to a report in the Los Angeles Times.

The three bills would have to pass through the legislature before being placed on the June Primary election ballot.

- The Legislature, by a majority vote, determine the federal government has designated at least one method of safely storing long-term radioactive waste.
- The federal government adopts satisfactory regulations for construction and operation of nuclear fuel reprocessing facilities.

- The federal government adopts satisfactory regulations for construction and operation of nuclear fuel reprocessing facilities.

According to Davis: "We feel they will renounce the legislation. The three bills are not likely to pass."

Franklin said no ruling was made at the hearing. "But one never knows."

---And Three New Bills Draw Flak---
Students Vote Will Decide Bylaws

The proposed changes represent the product of a close look at the total organizational structure of the Student Senate. At the present time in its current, disorganized and disfunctional condition. Our goal is to organize the ASI so that the leadership structure will have a common and functional form, all on the same wavelength. He added, "with a more efficient, smoothly running body, we can present a more solid front to the university — to the Administration, Academic and Student Senate and to the students.

The special election on April 14 will allow changes to occur to the general election, including election of officers. Further and more extensive restructuring may be added by SAC to the general election ballot at a later time. The most noticeable revision votes will be asked to approve the elimination of the ASI offices of Speaker of the Senate and of President. Bishop explained the reasoning behind termination of that position, saying, "Chief Justice is a position long ago that importance into impropriety, and that the problem is not due to specific former chief justice, but rather due to actions taken by the Board of Trustees, the Chancellor

and revisions in Title V, the educational code.

By voting Yes, students will be asked to approve the elimination of the Student Judiciary as it is now known, and replace it with another more relevant body, the Advisory Commission. The commission will have a membership of approximately 15 people, consisting mainly of students and supplemented by faculty, staff and members of the administration.

The purpose, explained Bishop, will include consideration of disputes within the ASI, as well as serving as the student disciplinary review process.

SAC has also recommended that students give their stamp of approval to the concept of appointing the rather than electing as ASI secretary, whereas last year's secretary would still be elected. If the new Secretary is a woman, he or she would be in a position to represent the president and vice-president, and approved by SAC.

This procedure would end the present practice of a campus-wide election for the secretary's position as a standing committee.

SAC has also recommended that students give their stamp of approval to the concept of appointing the rather than electing as ASI secretary, whereas last year's secretary would still be elected. If the new Secretary is a woman, he or she would be in a position to represent the president and vice-president, and approved by SAC.

The proposed student senate association was set up under the administrative supervision of Walt Lambert, coordinator of off-campus housing. Denny Johnson was the student director.

When Johnson graduated in 1971, the association folded. Recently, Kramer, acting chairman of the new student association, association said Johnson hadn't planned far enough in advance to keep the association on its feet. In recent years SAC made progress for an ad hoc student housing committee, one of the accomplishments most consistent with the students' interest in off-campus living.

Alcoholic Help

Continued from page 4

People that owe their own businesses come through the center as frequently as lodges and Franklins claims that no one could possibly tell which was which from their behavior at the unit.

"They're interested in doing something about their drinking we try to refer them to some community service that is prepared to work with them on a longer term basis than we are." Country Administrator of the Alcohol Abuse and Alcoholism Services, Helen Valley is a staunch supporter of the withdrawal unit.

I've known about mental setting deinstitutionalization and have believed in the idea for years," she said. "For almost long as I've worked at finding the money to support".

In January of 1979 Valley received one-time funding from the Department of Alcoholicism. The next step was approval by the Los Angeles Alcohol Advisory board and the county board of supervisors. Both groups granted approval unanimously.

Transit Problems Discussed

Mr. Jack B. Caldwell, manager of Ground Transportation Engineering for Airsearch Manufacturing Co. in Torrance, will discuss some of these solutions Thursday at 11 a.m. in E.E. 160.

Caldwell is sponsored by Cal Poly's Electric Power Institute (EPI). Saul Goldberg, electronic and electrical engineering professor and member of EPI, said Caldwell would restrict his talk to "the electronic propulsion systems rather than mechanical car engineering."

Pals Organizing Meeting

All Pals volunteers should attend the organizational meeting April 8 at 7 p.m. in UU Room 202. The activities for Spring 1980 will be discussed.

The idea of a workshop also will be introduced and debated. Seating at the meeting will be festival style.

Music Of Thailand

Stanley A. Mallon, host for the visiting college students and a member of the Music Department faculaty, said the program will feature traditional Thai music.

Admission to the concert, which is being hosted by the Music Department, will be free.

Keying On The Bicentennial

The by-now-oversold word "Centennial" may take on new meaning here Thursday morning with a piano recital at which the heads of attention will be those slightly younger than the American Revolution.

The recital will be given at 11 a.m. in Room 112 of the Harold F. Davidson Music Center by Prof. Ronald V. Ratcliff of the Music Department faculty.

Ratcliff is an internationally recognized authority on keyboard instruments as well as a virtuoso pianist, but he'll share the spotlight on a grand piano built in 1818 by the English firm of John Broadwood & Sons. And the music Ratcliff will play — alone and in concert with a violinist and cellist — is entirely appropriate to the age of the instrument.

Two of the selections — Beethoven's variations on the theme of "Rule Britannia" and "God Save the King" were composed while George Washington still was President of the United States and King George III still was on the throne in England.

This will be only the second time that Ratcliff has performed in public on the Broadwood grand, which he helped obtain for the university from the well-known Colt Collection in England.

Joining the pianist in playing other selections from the works of Beethoven and Haydn will be violinist Reba Brooks, concertmaster of the Kern Philharmonic and violinist Gay Kimball, a student in Graphic Communications here.

The recital will be the opening event in the Bicentennial festival called "In the Minds and Hearts of the People," which will continue through Sunday, April 26.

The next event in the festival lineup will be the 86th annual Home Concert by the Men's and Women's Oke Clubs and the University Jazz Band (Collegians), which will be presented in Chapman auditorium on Saturday evening, April 18. The festival is sponsored by the School of Communicative Arts and Humanities.

Farms Harassed

By Regulation

Claims State Ag Head

The self-reliant and independent farmer is a thing of the past because of federal and state rules and regulations, according to the director of the California Department of Food and Agriculture.

Dr. Tom Wallace, in his keynote address yesterday touched on issues he faces with as head of the state agency.

Wallace, who scrutinizes as one of the ways to control farmers said "California farmers are some of the most haraased."

"We feel that students and California oil corporation. The southern California communities of Bell, Bell Gardens and Bell Air supposedly were named after his ancestors.

Poly Does Well In Relays

At the Seventeenth Annual Sacramento State relays last Saturday, the Cal Poly track team performed well overall according to interim coach Eddie Cadena.

In a meet which featured some fine individual performances, the team managed to place in every event that it entered. Five members of the Mustang squad were captured by Cadena as particularly outstanding.

Bert Williams achieved his personal best in the high hurdles with a time of 15.05. In the 100-yard dash, he finished fourth in 10.43. He also ran the quarter mile in 55.05 and fifth in the 440-yard relay.

Another top performer was distance runner Randy Nisweld who finished ninth out of a field of thirty entrants in the 4:11.4 minute in the mile run. He placed tenth out of a field of thirty-two in the 4:30 mile run.

Dietanoa runner Randy Thaxton ran the 400-yard relay in a 4:30 time in the first mile and placed fifth in the second. Steve Bertolucci finished ninth in the javelin with a 190'-3" toss, his personal best. In the 440-yard event, Jeff Weissel ran well clocking in at 47.8.

Also at the meet, the Mustangs placed fourth in the 4-4 relay, 17.21 and second in both the sprint medley, 3:45.4, and the distance medley, 10:15.6. In the mile relays and 440-yard relay Poly placed third overall and fourth respectively with 1:18 and 1:46 times.

Gil Brooks turned in his fifth best time of the year in the triple jump with a 40'-6" in the first heat. Dan Lewis placed third with a 47'-4" jump.

Dave Haden, with a 39'-3" and one-half leap placed sixth in the long jump while in the high jump, Greg Cuff led the leap with a 6'-4" "barre."

This Saturday Cal Poly will be at home against UC Irvine and Cal State Fullerton.

Rodeo Team Wins Regionals

By just hanging in there and trying, the Cal Poly rodeo team came out of the National Intercollegiate Rodeo Association Western Regional Championship last month with a narrow second and one-half point victory over Pacific."}

Point totals halfway through the two-day competition found Fresno and Central Arizona atop the standings, with Cal Poly in third. But the Mustangs consistently did well in the final round to take the title. It was a winning ride on a Brahman bull by team captain John McDonald that put Poly in third place, 110 points, and enabled it to slip past Fresno's fifth.

McDonald managed to hold on to third in the final bareback ride, collecting the third place in the bareback competition. McDonald's score in the competition was 70 out of 100. He finished fifth in the saddle and seventh in the open cow scrambles.

Before McDonald's winning bareback ride, Pat Jones and Joel Luedtke took third in the open cow scrambles with a score of 75 out of 100. Bob Vorta finished third in the saddle and seventh in the open cow scrambles.

Top Quarterbacks Headed For Poly

Two of the top high school quarterbacks in California have signed national letters of intent to attend Cal Poly this fall. Mustang head coach Joe Harper announced that Craig Johnson from St. Paul High, CIF-CIF 4-4A, and Fred Moralez from Santa Ana Valley High, CIF-IFC 3-3, have signed letters of intent. In guiding St. Paul to a second place finish in the 4-4A Championships last season, Johnson completed 48 percent of his passes (110 of 231) for 1,668 yards and 12 touchdowns. His quarterbacked Santa Ana Valley to the 1976 CIF-CIF 3-3 title and a playoff berth as a senior.

Until that final ride, McDonald had had a poor showing in the saddle and bareback bareback riding events, being fifth in his first saddleback ride, falling with his mount in the second round, and holding only third place after his first bareback ride.

McDonald managed to hold on to third in the final bareback ride, collecting the third place in the bareback competition. McDonald's score in the competition was 70 out of 100. He finished fifth in the saddle and seventh in the open cow scrambles.

Before McDonald's winning bareback ride, Pat Jones and Joel Luedtke took third in the open cow scrambles with a score of 75 out of 100. Bob Vorta finished third in the saddle and seventh in the open cow scrambles.
