Bridenbaugh: Now A Foe Of Nuclear Power

Photo by Gil Rocha  See story on page 4
The Case For Ford's Withdrawal

WASHINGTON—The morning after Ronald Reagan won the California primary, the American Conservative Union issued a statement calling on President Gerald Ford to drop out of the primary race. Despite the statement's bombshell, Ford is staying in the race. He is working, along with two other former G.O.P. candidates who have dropped out of the race, on a new initiative called, the Nuclear Safeguards Initiative.

The main thrust of the March 1 primaries was to see whether the nuclear issue could swing the results of the nomination. Ford says there are "plain, basic" facts in the design of nuclear reactors. Specific safety issues that remain unresolved, he says, are questions of whether the emergency core cooling systems in nuclear-plant designs would work, indeed, work if needed and what is to be done with spent fuel.

Because as many questions still remain, steps need to be taken to bring pressure to bear on the utilities to solve the problems. Bridenbaugh feels the initiative process is the way to do that and assigned a well

Opponents of nuclear power have long been written off as wild-eyed "neo-freaks" who have little knowledge of a complex subject. Ford has never let on by keeping quiet and letting the "experts" handle things. Nuclear energy is controlled by those who are knowledgeable of its ramifications, say the proponents.

But, recently, something has gone wrong with the line put out by nuclear power industry. Under strong pressure from the solid front of agreement on the safety of nuclear power, utilities are being urged to talk about the reliability of safety devices and the disposal of spent fuel. As long as the majority of the nuclear industry remains uncommitted, the power companies have continually squelched any dissent. But, a few voices have spoken out.

One of those men visited San Luis Obispo last week is a whirling dervish shouting to community groups in Dale Bridenbaugh, a former engineer with General Electric Co., who quit his job because of his concerns over nuclear power safety. He is working along with two other former G.O.P. candidates on a new initiative called, the Nuclear Safeguards Initiative.

Ford's incumbency argument is essentially nothing. Nevertheless, as the incumbent, Mr. Ford does have at his command the powers of the Presidency. He is very strong politically. And, he has used them to the best of his ability. Given his economic advantage, Mr. Ford's position should be secure.

Instead, he remains as much vulnerable as ever.

Moreover, he is the Republican most in tune with the mood of the electorate as a whole. It is an accident that in the primaries thus far he has consistently outpaced Mr. Ford in attracting the support of Republicans and independent voters.

Such appeal to vital because the winner at the Republican convention will be the standard-bearer for a diminished and shrinking party. If that party is to win in fact, to survive—it must have a leader who is able to energize its activists, attract a large bloc of Democratic and independent voters and create a landslide that will revalidate its powers by carrying a victory in a new wave of elections in the majority of states and the majorities of Congress.

Ronald Reagan, on the other hand, saw.

Ronald Reagan, on the other hand, saw.

For right years, Mr. Reagan was the standard-bearer for a standard-bearer for a diminished and shrinking party. If that party is to win in fact, to survive—it must have a leader who is able to energize its activists, attract a large bloc of Democratic and independent voters and create a landslide that will revalidate its powers by carrying a victory in a new wave of elections in the majority of states and the majorities of Congress.

Ronald Reagan, on the other hand, saw.

Mr. Ford in the next to do that—do it well. No gold Reagan, on the other hand, saw.

the gold Reagan, on the other hand, saw.

the gold Reagan, on the other hand, saw.

the gold Reagan, on the other hand, saw.

But with men of Bridenbaugh's credentials raising the questions, the nuclear industry is forced to raise the level of debate beyond mere sophomoric questions of personalities. Hopefully, a high level of debate can be maintained until the January primary. The real test will come in the next two months or so when delegates shape the media with their advertising.

The questions about nuclear debate that must be answered deal with nothing less than the quality of life for all Californians. With so much at stake, California voters should reject the notion that only the utilities know what's best for the consumer and give serious attention to the questions men like Bridenbaugh are raising.

---

Due to the growing need of our students, the Associated Student Body developed a tutorial service. This service is coordinated by the Educational Opportunity Program EOP, and all tutoring is done in the EOP office.

The tutorial service is to assist students in getting a better understanding of their subject matter. The best resource for any student having problems is to see his/her instructor, but tutors are available to assist when a student can't reach an instructor or needs a point clarified.

We are not able to hire individual tutors for each student, therefore we use a "drop-in" system. This means that a tutor will be working with more than one student at a time. Because of this fact, here are some things students should do before coming to see tutors:

1. Make sure you have read or at least gone over material you need help with, and bring books or whatever is necessary for the class with you.
2. Work problems on your own first, as much as possible.
3. Develop specific questions to ask tutors.
4. Define your problem area as clearly as possible.

By doing these things you can help make the tutorial service flow smoothly and be more efficient.

If there are any further questions about the tutorial program or any subject not listed, call 665-2801, or better yet come by the EOP office (Hillcrest Bldg.) and ask for Walter Harris or Gloria Butler.
The Two Sides Of Nuclear Power

Bridenbaugh:
We have pushed the nuclear industry too far...

Hollingshaus: More government intervention will create more bureaucracy, not more safety.

In a debate designed to promote "industry over fear," two nuclear energy opponents met at San Luis Obispo's Cambria High School Friday night to discuss the nuclear initiative, Proposition 18.

The debate—sponsored by the North Coast Property Owners Association—was done by Dale G. Bridenbaugh and Harry Hollingshaus, according to Bridenbaugh, recently resigned from General Electric's nuclear energy division after 22 years on the job, argued for a yes vote on 18.

Hollingshaus, an engineering manager with the Bechtel Corp. replaced the Bernaldo S. Bridenbaugh and Harry Hollingshaus.

Both speakers had well-documented—although often conflicting—studies to support their arguments. A model of a nuclear reactor, containing four units of fuel inside one another, was provided by Hollingshaus and his children to clarify technical points.

Bridenbaugh argued the industry needed to refine its methods before the country becomes totally dependent on nuclear power. Hollingshaus said the industry was doing well, and could solve any problems encountered along the way.

According to Bridenbaugh, Proposition 18 is a "simply reasonable act taken by the citizens of California to protect themselves against a very serious risk that has been underestimated and overtaken by the federal government and the wasteful interests of the industry.

Bridenbaugh also cited his side (and his main reason for leaving GE) in presentation in Chumash Auditorium the same day.

"We have pushed the nuclear industry too far...without taking the time to resolve many problems."

The problems he refers to are the possibility of an accident due to a loss of coolant to the reactor, containment of radioactive material should an accident occur, and the safe storage of radioactive waste. Proposition 18 also covers liability for damages from an accident, and evacuation plans for the public. said Bridenbaugh.

"My experience in the industry with close calls leads me to believe the probability of an accident is much higher than estimated," said Bridenbaugh.

He said there has not been sufficient testing done on the design of emergency systems and plant construction to prove that they were safe. He urged a yes vote on 18 to allow the industry to slow down for five years and evaluate the situation.

Hollingshaus said he thought the system had been tested thoroughly, and billions of dollars of damage resulting from a nuclear accident. He said the expected damage from an accident, "would be something of the order of a few fatalities, and I mean few, several people, and the order of the million dollar range of damage.

He stressed that damage would be contained within the nuclear plant.

But said, Bridenbaugh, "When something goes wrong, strange things happen.

A point both speakers agreed upon was the supply of uranium available for the light water reactors. Domestically, the US would supply the 8 reactors now under construction. After this, uranium would have to be imported, creating the possibility of uranium cartel.

In closing, Hollingshaus urged a no vote on 18 because it would still development of a vital source of power needed to make the United States self-sufficient.

"More government intervention will create more bureaucracy, not more safety," he said.

"More government intervention will create more bureaucracy, not more safety," he said.

"I think it's possible for anyone to satisfy the conditions of the initiative," he said of the proposal which calls for safety to be proven "beyond a reasonable doubt."

Hollingshaus said people have been asked to prove their case in Chumash Auditorium the same day.

"I think it's possible for anyone to satisfy the conditions of the initiative," he said.

"I think it's possible for anyone to satisfy the conditions of the initiative," he said.
El Corral: Coming Up Short

Director of the local food stamp program, Shari Wilson, will not order the food stamp bill passed last week in the Senate will affect Cal Poly students now getting food stamps.

Mrs. Wilson said, "I really don't know what effect the bill will have, but I think there will be a difference in the Department of Benefit Payments. We only know what appeared in the newspaper."

The bill, which still faces passage in the House of Representatives, proposes cutting 1.4 million dollars from federal food stamps. This would be a reduction of almost 5% of the outlay of stamps for lower income recipients.

The bill proposes to limit food stamps to households with an income below the official poverty line. The poverty level is $4,500 for a four-person, non-farm family. The program limits would remove 1.4 million dollars from the program.

Reprinted from the San Jose State Spartan Daily

San Jose State University Housing Director Cordell Keland met with dormitory residents last week as part of the campus-wide investigative following a Spartan Daily story on pornographic filming in campus dorms.

In a prepared statement released by James Noah, university relations director, Press John Ross said, "The university is conducting an investigation into the allegations reported in the Spartan Daily."

 obtener behavior is clearly outside university policy. Appropriate disciplinary actions may be initiated if evidence of violation in violation of university regulations is uncovered.

Bruce also said the university would contact the district attorney's office to "determine if it wishes to take any action in the matter."

**Prose Of Campus**

**Food Stamp Users Face Cuts**

The measure also calls for a decrease in the cost of food stamps for low income recipients while providing them an incentive to get jobs.

Under provisions of the bill, a family earning $1,200 a month from welfare will pay $172 for $96 worth of food stamps. The same family's income includes wages of more than $870 a month, they will pay only the cost of the stamps that they now pay.

Proponents of the bill, which passed the Senate 22 to 23, say it will trim $341 million from next year's food stamp program. The program will cost $1.9 billion, which is about 15 cents of any other year.

President Ford has called for larger cuts in the cost to the government, A White House spokesman has said the spending levels in the Senate bill "are not what we consider to be acceptable." from the program.

**Postal Services**

Grades will no longer be posted in a manner which allows them to be matched with the student who earned them. This has come as a result of the Senate's Action Rights and Privacy Act of 1974 (Bayh Amendment).

There can no longer be alphabetized, or by last name, or with the name on the back. Grades will now be posted by Social Security Number. Teachers may not release grades in code so only the student can know their grade. This can be arranged for by putting the original grade card in the teacher's file.

Some teachers have used this by passing grades to students. Others have changed grades when others were changed. However, they have all been found to have grades without much hassle," turbald said.

Other teachers have found it too time consuming to post them and said the students wanted their grades to post anyway.

Panetta To Speak

Bettty Hill, who says she experienced a brief encounter aboard a UFO, will speak in Chumash Auditorium on Thursday, April 13, at 8 p.m.

Mrs. Hill has appeared on numerous nationwide television and radio programs and has been interviewed in the writings of many popular and respected authors.

Admission for the lecture, sponsored by the Speakers Forum Committee, will be $1 for students and $5 for general admission.

Ag Study In New Zealand

Agriculture students who are interested in studying in New Zealand are invited to attend a slide-and-talk show April 18, at 8:30 a.m. or 1 p.m. in the University Union, Room 134.

The program is open to undergraduate students who will have at least junior standing by January, 1977 and at least a 3.0 GPA.

A full year of undergraduate or graduate credit will be given to students studying in New Zealand. For more information, contact the Evaluations Office immediately.

Patty Sentenced, Receives 35 Years

SAN FRANCISCO (UPI) - Patricia Hearst Monday was given the maximum sentence of 35 years in prison for bank robbery by a judge who said she would reverse the decision of a jury that found her guilty in a psychiatric study.

U.S. District Judge Oliver J. Carter imposed the sentence three hours after it was announced. Mrs. Hearst is eligible for parole in 1995.

The 28-year-old defendant made a bid for probation which was supported by a number of psychiatrists who said that because she was a kidnap victim she was not a blamesome robber.

Carter said he could not agree with this judgement because "it was the very issue about which the jury very strongly debated and was presented evidence and argument before them.

He added, "I believe the defendant had reached its decision with substantial evidence.

Miss Hearst was found guilty March 10 by a jury of seven women and five men. The four洗干净 members of the jury voted not guilty.

Miss Hearst twitched nervously during the half-hour court session but listened calmly and without expression as Carter read the verdict aloud.

"I'm my intention to later modify and not consolidate or extinguish the two counts," Carter told a packed and locked courtroom.

He said the maximum sentence he would impose would be 35 years and further reductions would depend on the outcome of the psychiatric study.

Carter also supported the jury's guilty verdict as he added all along to the deliberation.

"The offense of which she was found guilty is most serious and one that can be classified as both brutal and violent," Carter said. "The jury has seen the defendant and has determined the nature of the participation of the defendant and I see no reason to set the verdict aside."

In Washington, a Justice Department spokesman said Miss Hearst would be required to serve a minimum of 20 years, with parole set at 25 years.

Miss Hearst is scheduled to appear in court in Los Angeles Wednesday to see a plea of no contest read in a kidnapping, assault and robbery, in another case in which she appears to be in the process of plea bargaining.

"I do not think it necessary in all of the agencies that have processed this case so far," said the spokesman. "I do not think it necessary in all of the agencies that have processed this case so far, "I do not think it necessary in all of the agencies that have processed this case so far, "I do not think it necessary in all of the agencies that have processed this case so far, "I do not think it necessary in all of the agencies that have processed this case so far."

"I do not think it necessary in all of the agencies that have processed this case so far."

"I do not think it necessary in all of the agencies that have processed this case so far."

"I do not think it necessary in all of the agencies that have processed this case so far."

"I do not think it necessary in all of the agencies that have processed this case so far."

Men's Tennis Team Wins

by KENNETH HARCOURT
Daily Staff Writer

At the California Collegiate Athletic Association tennis tournament held this past weekend in Los Angeles, Cal Poly narrowly defeated every team it came across.

By virtue of their lopsided win over University of California Riverside, 9-1, Los Angeles State, 9-4, and Cal State Northridge, 8-1, the Mustangs currently hold first place along with Cal State Bakersfield in the CCAA.

Because of rain, the Mustangs were unable to play Bakersfield as scheduled on Thursday. The Mustangs however, hope to reschedule this match with their main CCAA rival at a later date, possibly at the Out Tournament, April 28th.

Cal Poly's victories were due to the fact that only three times during the round robin competition was a Mustang extended to a third set before winning. The two losses sustained during the weekend were at second doubles.

Coach Ed Jorgensen was not surprised by his squad's stunning performance.

"Things turned out just the way I expected," he remarked. "Our practices paid off here.

"I was the only one who didn't have to work very hard," he added. "It was a good team victory with everyone playing well."

Jorgensen was particularly pleased with the play of reserve player Tim Fiedler who replaced a tired Clay Denen Nordhage and later won in the number four slot.

"He came in and did a fine job for us," Jorgensen said. "By the way he played in that match, you can see why we have helped make a spot for himself on the team."

Scores for the remainder of the teams in the tournament are as follows: Renee Lachan 6-4, 64; James Friedrich 6-4, 6-1; Jan McBride 6-4, 6-4; Debra Lechtan 6-4, 6-6; Donald Smidt 6-4; Chapman and McNabb 6-4, 6-4.

Looking forward to the Southern California Women's Intercollegiate Tennis Tournament, Murray said:

"If we do well, we should be able to take divisional honors. Our toughest competition will be Pepperdine, Cal State Fullerton and Cal Poly, Pomona, at second.

In fourth and fifth, most of these schools offer scholarships for women athletes and do recruiting. We do not."

But Women Lose

The women's tennis team managed to squeak into a match against Bakersfield before the rain on Saturday and Sunday.

"The weather made it miserable out there," coach Jenny Murray said, "but the girls played as well as they could, as they all have season." One of the Mustang's three wins managed to squeeze in was a match against number three player Leslie Chapman, who was in three sets, 6-7, 6-4, 6-0.

Fifth player Heather Oyam won her eighth consecutive singles match 6-7, 6-4, 6-4. With her doubles partner, Debbie Cirvada, Oyam picked up the final Cal Poly win in three sets, 6-7, 6-4, 6-0.

Cal Poly's victory came in response to a match against Santa Barbara City College Foster Field.

"I told the team it didn't count (it was a non-conference match), but that's a feeble excuse for dropping our first two games and then the whole thing to a city college," said Murray.

The Mustangs played every way but consistently against Santa Barbara, making up large early deficits in the first two games before losing 15-16 and 19-16. They took the next two with 19-18 and 14-15 scores, but lost the finals, 9-15.

Cal Poly took its only lead in the fourth game and held it through the last five points of it. When it won the opening point, Santa Barbara, however, realized that the Mustangs played "straight to all but lose the match."

The Mustangs then scored seven straight of their own, making the score 10-4, but the two teams traded points the rest of the way and Cal Poly lost 13-15.

After City College took the opening point in the second game, Cal Poly stormed back to take leads of 9-1 and 14-6, but then stumbled and allowed their hosts to tie the game at 14-14. Santa Barbara took advantage of their momentum, and quickly posted the winning two points.

Down two games in none and needing a win to have a chance for the match, Cal Poly came back in the third game to completely dominate Santa Barbara, and took an easy 15-9 win.

The Mustangs also dominated the fourth game, thanks to many good offensive and defensive plays that rattled their opponents into disorganization. Poly scored from start to finish in the 15-6 win.

In the fifth and deciding game, Santa Barbara jumped off to an early 9-0 lead. Poly then scored two points of its own and later a third, to tie the game.

City College then ran off six straight points for a 9-4 lead, and looked as though they would run away with the game. But Poly came back with five points of its own, and the margin was back to a single point against.

The two schools then served five times each, with the net result being a point for both, and a 9-4 score. Santa Barbara then scored the last five points in succession to win the match and gain.

After the match, Preston saw his team's inability to make the ball as its biggest downfall.
