Cal Poly runneth over

Cover photo by Alan Halfhill

See story on page 4
Welcome back to Cal Poly. Or welcome to Cal Poly, as the case may be. The campus simmered deserted without the 10,000 or so vacating students. Now the air is filled with the voices of students lamenting the end of summer and the coming of school.

The veterans of the university are back, mourning about waiting in line to pull a card to design the new architecture building. The campus should have pulled senior project four the same day. Then they'll be like stewing about waiting in line to pull a card to get an architect all the way from France. The rumor circulating is be got his experience stuck registering with the last group on the line.

The architectural critics can be heard mumbling about how fortunate Cal Poly was ahead of them got the last card. The criticism to come will be by those who didn't have the experience designing pillboxes on the Magdaline Line.

And they're deeply engrossed in calculating how many days there are before Christmas vacation starts.

Camp Pendleton to become national park?

The Marine Corps is a combat-ready fighting force that needs plenty of room for its troops and equipment. But does it need all of Camp Pendleton's 125,000 acres of coastline, canyons and rolling hills that are coveted by surfers, campers and nature lovers?

Rep. Alphonso Bell (R-Calif.) wants the interior Department to come up with an answer. As of his last acts before leaving Washington after his failure to win the GOP nomination for senator last June, Bell has introduced a bill calling for a departmental feasibility study for turning virtually all of the camp into a park. Bell would like the public to have the use could do much to relieve the growing demands for recreational elbow room. And, Bell points out, conversion to park use should not cost too much. It is acres of government property, and an infrastructure of roads and other facilities is already in place.

Marine Corps officials at Pendleton aren't saying anything about the proposal at this time. But we suspect that they are not too happy about it. They didn't like losing the five-mile stretch of beach to the state under Bell's California coastline bill.

The interior Department could work out that would enable them to continue to use part of the Pendleton oceanfront for such maneuvers during certain times of the year. At any rate, we think Bell's proposal deserves looking into, and we hope the interior Department can come up with an answer that would result in greater public use of Pendleton without impairing the Marine Corps' vital role in national defense.

Mountain air is tops

A researcher in the realm of science has come up with evidence he says shows living things do best in clean, crisp air, for example the winey ozone found in a quiet mountain meadow. It all has to do with the way air makes people feel better. A Berkeley professor cites growing worldwide evidence that the negative ions in such air make people feel better, while hot, dry winds—like the French Mistral—trigger feel moods and physical complaints. While we can't vouch for the validity of this theory, it's nice that science seems to be putting its imprimatur of approval on what backpackers and hikers have known all along.

Mustang Daily welcomes letters from all viewpoints. Length of letters should be limited to 500 words typed and double spaced. Letters will not be published without a signature and may be edited for length. Only one letter per user at a time can be published.
Hurtado sentenced to probation for voter registration fraud

Last year's student body president, Mike Hurtado, was sentenced to three years of probation for voter registration fraud Friday. He was convicted of the charge of perjury in connection with the same case.

Superior Court Judge William R. Fredman, said Hurtado must provide 250 hours of volunteer work as part of his probation.

The maximum sentence possible was three years in state prison.

Hurtado was accused of voter fraud after registering to vote as a US citizen in 1974. Hurtado was born in Ensenada, Mexico in 1966 and has lived in the US since the age of five.

Hurtado had registered to vote stating he was a US citizen and was born in California.

On March 88 a complaint was filed against Hurtado by the San Luis Obispo County District Attorney's office, alleging that he was an illegal alien and knew when he registered to vote. The case was tried on Aug. 17 and the conviction came three days later.

After the conviction immigration officials in Los Angeles said Hurtado would be required to show cause why he should not be deported for his crime. A hearing date has not been set.

Hurtado's attorney said the crime was one of negligence rather than a deliberate instruction of the law.

Patty's tale of woes heard by Grand Jury

OAKLAND, Calif. (UPI) — Patricia Hearst and her former boyfriend, Steven Weed, told a grand jury Thursday that a woman had shared their apartment with Miss Hearst, was struck on the head with a bottle during the abduction.

Miss Hearst, 22, daughter of San Francisco Examiner Press Randolph Hearst, spent a day and a half hours before the grand jury while Weed gave testimony for 30 minutes. Miss Hearst then was escorted back to the Federal Youth Center in nearby Pleasanton where she is serving a seven year term for bank robbery.

Miss Hearst presumably repeated what she told a U.S. District Court jury in her robbery trial. At that time, she said she had and a woman forced their way into her Berkeley apartment by the University of California and carried her off, half nude and screaming.

Weed, who had shared the apartment with Miss Hearst, was struck on the head with a bottle during the abduction.

She had registered to vote as a US citizen in 1974. Hurtado was born in Ensenada, Mexico in 1966 and has lived in the US since the age of five.

This is about 100 fewer new students than last Fall. More students returned than anticipated, boosting the total enrollment.

A spokesperson for the Registrar’s Office said the long lines and backup at Chumash were due to larger groups of students registering at a time. There were 200 monitors working during the two day period.

Robert Walters, advisor to the Week of Welcome committee, said 2,500 of the new students participated in WOW activities. This is about 100 fewer than last year,” said Walters, “but due to the new student cutback, there was actually a percentage increase.”
'We tried to reduce the number of students by 400. We did turn away 3000 applicants.'

The SR-56 is a tremendously powerful slide rule calculator. Yet you can program it whenever you're ready.

There are 74 preprogrammed functions and operations. You can do arithmetic within all 10 memories. It has AOS—a unique algebraic operating system that lets you handle problems with up to 9 levels of parentheses. There's also polar to rectangular conversion—built in. Mean, standard deviation, degrees, radians, grads. And, it works with TI's new printer—the PC-100.

Chances are, you'll be programming. That's what professionals in your field are doing—right now. And with an SR-56 you're ready. It has 100-merged prefix program steps, 6 logical decision functions, 4 levels of subroutines. You can decrement and skip, on zero to iterate a loop as many times as you specify. There are 4 levels of subroutine to let you use your program steps to maximum advantage. And, you can even compare a test register with the display to make a conditional branch. So you can check an intermediate result for convergence, or a maximum.

The edge you need. Now. And in your career.

Texas Instruments will rebate $10.00 of your original SR-56 purchase price when you return this coupon and your SR-56 customer information card postmarked no later than October 31, 1976. To apply:

Wien estimates the charges to be several hundred dollars, which the committee can't afford. The float, built in conjunction with Cal Poly Pomona, is financed by student body funds and a donation drive by students at both universities.

This year's float, entitled "Tons of Fun," will be a large elephant towing a baby elephant in a wagon. It is innovative because the figures will not ride on a flatbed truck.

The engine will be built into a frame in the large elephant, explains committee advisor Robert Reynolds. The elephant will be standing on roller skates and the engine will power moveable legs on wheels, so the elephant will appear to be skating.

In addition, the head, trunk and hips of the elephant will move as it tows the wagon and baby elephant similarly animated.

(The United Auto Workers have been on strike over contract negotiations against the Ford Motor Co. since Sept. 15. A key union demand involves reduced work time for employees.)

According to Wien, the 93000 engine will be shipped within 10 days after the strike ends and will arrive at Cal Poly in about another 10 days.

"If the strike isn't over by November 1," says Wien, "we will have to pay air freight. Actually we can get the engine anytime we want it, by paying air freight charges from Michigan on the 93000 pound engine."
Estrogen misuse revealed

WASHINGTON (UPI) — Estrogen drugs used by 5 million women going through menopause don’t keep women feeling young or maintain their soft skin, the Food and Drug Administration said Monday. Nor have the drugs been shown effective in treating simple nervousness during menopause, the agency added. It ordered a crackdown on the way such drugs are labeled, citing scientific reports linking them to cancer of the uterus and birth defects.

Hotel manager untangles Ford from towel swiping incident

NEW ORLEANS (UPI) — It looked at first as if President Ford did what many other hotel guests do—swiped a couple of towels from the room. 

But the manager of the hotel where the President and his party stayed, Saturday night said it was all above board. Secret Service agents asked for the towels and the hotel gladly complied.

Reporters traveling with Ford in a 180 mile Gulf Coast motorcade poked each other and grinned Sunday when they looked into the back seat of the executive limousine.

There they were—two gold colored, oversized towels. And though the name of the hotel was not visible, the crest clearly identified them as coming from the Hyatt Regency.

"We supplied the towels to the motorcade Secret Service agents at their request—and we were happy to do so," Tom Gaskill, hotel general manager, said Monday.

Pals re-unite

The first meeting of PAL’s, student community services, will hold its first meeting Oct. 8 in Library 138 at 7 p.m. Old and new members may attend. Plans for fall quarter will be discussed. For more information contact PAL’s Project Coordinator, Dave Perrin at 666-3475.

New NRM fund

The Department of Natural Resource Management has announced a new NRM scholarship of the 1976-1977 year. It is available through the Parks and Recreation Society. Any upper division student is currently enrolled in Parks and Recreation Concentration is eligible to apply. The award will be made on the basis of financial need, scholastic standing, and attendance.

Applications may be obtained from the office in Cottage 3. Please return with three letters of recommendation by Oct. 16. For additional information call 666-3478.

Males studied

"Examinating the Min Image," a Cal Poly extension course is being offered this fall. The course deals with the masculine image of behavior, will meet Fridays from 7:15 to 8:15 p.m. in room 303 of the Business Administration Building. The course is open to all junior and senior students, and will be open to the public in graduate standing or above. No application is necessary. An upper division student is currently enrolled in Parks and Recreation Concentration is eligible to apply. The award will be made on the basis of financial need, scholastic standing, and attendance.

Applications may be obtained from the office in Cottage 3. Please return with three letters of recommendation by Oct. 16. For additional information call 666-3478.

Square dancing

The Poly Twisters, beginners' square dance club, begins its eight-week session on Monday nights. Beginning lessons are held on Oct. 6 from 7:15 to 9 p.m. and 10:15 p.m. The first two Mondays are free.

Senator robbed

WASHINGTON (UP) Sen. Alan Cranston, Calif., was robbed at gunpoint of about $11,000 Sunday night when he returned to Washington following a weekend in California, his office said Monday.

An aide to Cranston said the senator returned to Washington about 9:30 p.m. Sunday and parked his car about a block away from Capitol Hill apartments. He was walking toward his home when three men passed him on the sidewalk.

As soon as the man passed, one shouted, "It's Cranston's aide said. The senator turned around a discovered one of the men was holding a handgun when Cranston said he was a "Saturday night special.

The robbers asked Cranston's watch and money from his wallet and gave it and the wallet to the assailants. The aide said the man then turned and ran Cranston was left behind and only his watch and about $11.00 in cash taken.

What he intended to tell the President was not disclosed.

Float committee

The Rose Float Committee is holding the first meeting of the new school year Thursday at 5 p.m. in U.U. 120. There will be a slide show of the planning, construction, decorating and performance of last year's float "High Hopes." New members are welcome to attend.

Child care

The campus Children's Center has openings for full and half-day attendance. The center is open to children between the ages of 20 months and five years whose parents are Cal Poly students, faculty and staff members. Fees are based on the family income. The center is located in Sierra Hall behind Dexter Library and is open from 9 a.m. to 5 p.m. on weekdays. For more information contact the director, Mrs. Althea Davis, 666-1297.

CHESS TOURNEY

A four round tournament for chess players to meet and compete is being sponsored by Cal Poly Chess Club. The tournament starts Oct. 2 at 9:30 a.m. and continues on Oct. 9 at 10 a.m. in the Math and Home Office building, rm. 128. The event is rated by the U.S. Chess Federation. Players must be members; you may join at the tournament. A $3 voluntary donation will be accepted.

JV’s pass for win over Porterville JC

Cal Poly’s junior varsity football team went to the air often and successfully in scoring a 32-21 victory over Porterville Junior College in Porterville, Calif. Last week, the Mustangs began the season with two wins.

FRESHMEN CRAIG JOHNSON and Mike Polig split time at quarterback and combined for five touchdowns passes. Johnson hit on two scores and Polig three. The Mustangs held the Broncs scoreless.

"We were fortunate to beat a junior college team this weekend against a much improved Porterville team," said coach John Hitchcock. "We really need to win our home games this season." Hitchcock said.

Wrestlers tuning up for season

Cal Poly’s wrestling team begins its quest for the office-class national championship with its first meeting Tuesday, Sept. 23.

"This year’s team has the greatest potential ever," Coach Vaughn Hitchcock said. "We have tremendous talent in the recruiting. Overall, we have an outstanding balance and we’re really going to make the big four this season." Hitchcock said.

The regular season is determined by the number of points scored in matches against nationally ranked teams.

In NCAA Division I, the Mustangs won the Western Regional last year to take the second straight year in 1978 and finished sixth in the nation, up one place finish the year before.

The first meet will be held as a regular season meet at Cal Poly’s P.E. building. Anyone interested in trying out for the wrestling team should see Hitchcock.

Conference round-up

With UC Riverside eing its football program and Cal State Los Angeles dropping to a lower division, the California Colleges Athletic Association has been reduced to just three teams.

Cal Poly, Cal Poly Pomona and Cal State Northridge are the lone holdouts.

"Cal Poly has always had the strongest football program in the conference but it doesn’t really mean anything with three teams," says Wayne Shaw, sports information director.

The Mustangs will attempt to get into the national championship playoffs, where six teams will be selected from NCAA Division I. This means every game is a must for Cal Poly. One loss could prevent their selection, two losses would ensure it.

"The Oct. 9 Boise State game is the pivotal game this year," Shaw says. But he does not dismiss the home games against Idaho State and Montana, For Harper, the Mustangs continued on page 18
Poly distance men impressive in win

by CRAIG REEM
Daily Sports Editor

In an impressive opening among the schools of the practicing Cal Poly band and the tranquility of Poly Canyon, coach Steve Miller's cross country team opened with a victory over Cal State Bakersfield Saturday.

After a false start, 13 Mustang runners, five Bakersfield runners, five Gal Poly women and a handful of enthusiasts from the San Luis Distance Club were off and running on the 8.1 mile course. The course took the runners through the streets of campus, into Poly Canyon by the farm units and back to the finish line by the tennis courts.

The pace was brisk right from the start. Cal Poly assistant coach Edy Dunne, running for San Luis Distance Club, led the way throughout the race. At the 2.5 mile mark, it was Cadena. Cal Poly All American Tony Reynoso and Jim Warrick in the lead. At the end, it was the same three. Officially, in this dual meet Reyenso won with a 36:22 time, followed by fellow Cal Poly runners Warrick (36:37), Randy Myhrvold (37:38) and Lagos Arredondo (37:13). Cal State Bakersfield's top runner, Larry Jordan, finished eighth with a time of 39:18.

Coach Miller was pleased with his team's performance. Many questions had arisen as to the Mustangs success this year due to injuries to Dave Stock, No. 3 runner on last fall's team and a five-time junior college All-American runner; prised recruit John Orose.

Stock is lost for the season due to a heel injury and will resist in gain a year of eligibility. Miller is hopeful Orose, who was injured in an auto accident, will be ready later this season.

Commenting on Poly continued on page 11

Your career options with General Dynamics

"If you are goal-oriented, and are now making specific plans for a future in an engineering, scientific or business field, write for your copy of this 16-page booklet. It describes the wide range of career opportunities with General Dynamics around the nation. Openings are at our corporate headquarters and in operations that are established leaders in aerospace, tactical systems, submarine and shipbuilding, telecommunications, electronics, building materials, natural resources and data systems services. Opportunities are offered regardless of sex, color or creed.

Campus Interviews: Oct. 13 & 14

Make an appointment through your placement office. Or if you can't meet with us, send a letter or resume briefly describing your background to Manager, Personnel Placement, General Dynamics, Pierre Laclede Center, St. Louis, Missouri 63105.

GENERAL DYNAMICS
An Equal Opportunity Employer, M/F
Poly runs through Bakersfield

continued from page 10 story, Miller said, "I was very happy for two reasons; we won. Second, the separation between our first and seventh man was very close and that's always important." Miller said the Mustangs ran much better than any other team this year and credited the early season hard training.

Raymondo also said the team's time, "is an indicator of the strong depth of the team and may well prove to be the edge needed to win in future dual meets.

The six women who competed ran a shorter two mile course. Cal Poly does not have a cross country women's team, so essentially, the women ran for practice.

"We like to compete and it gets us ready for the track season," Cal Poly Coach Schultz said.

Coach Miller explained that cross country differs from track in that it is a team sport as opposed to each individual running for himself.

"No matter how good an individual is, if he doesn't have support, his team won't win," he said. The scoring is added by the places finished, with the lowest points winning.

"It's a personal kind of thing," Miller said. He added, "For the cross country runner there's no failure, no crowds and no hands."
Why wait 10 years to get real management experience?

BECKY PUCKETT

With us you start moving up instantly. And you move fast. Backed by your college education and your ROTC commission you’ll be managing men and making important decisions long before your classmates who start theirs careers in business and industry.

What next? You might decide to stay with the Army. Up ahead you can see more responsibility: Greater authority.

Or you might decide on another career. In business, industry, the professions, or politics maybe.

Your experience gives you the assurance, the self-confidence that commands respect.

Great careers often start with ROTC and never stop. Let us tell you more.

GREG CLAYTON

Army ROTC.
Learn what it takes to lead.
