Our readers write...

Editor: Your recent editorial concerning campus skateboard regulations called for an administrative review of those regulations, which you posited as an unprecedented Sept. 7 editorial. The call for a review was timely, but not hastily conceived, as your allegations are the result of a recommendation developed this past summer by a committee of students, faculty, and administrators. The committee was chaired by the director of Student Affairs, the director of Judicial Affairs, the chief of the University Police, and the director of the Office of Travel and Tours.

The regulations were promulgated following discussions between the President and the Executive Vice President at the Fall Quarterly. hardwoods considered were those experienced both by campus residents and others. The recommendations were authored by all members of the committee with one exception: a portion of it which had to do with the rule prohibiting skateboarding at the main entrance to the student union. Your statement that this is the second time such regulations have been promulgated this year is incorrect.

You are correct in your statement that the "problem is compounded at night," which is one of the reasons for the evening ban. Some of the other reasons are: (1) the number of students involved in night classes, (2) the traffic to and from the library, (3) the many AU activities, (4) the traffic to and from both gymnasiums, (5) the number of late-night carbon monoxide and light pollution, (6) the number of students who utilize the dining hall, (7) the student organizations, many of which meet at night in various locations on campus, and (8) the potential for students to be injured from skateboarding and from athletic events, and (9) the ever-increasing number of special programs on campus. As a result, the student council has formed a committee of students to evaluate the regulations in light of the current regulations. As of yet, the committee has not reached any conclusions. However, the council is expected to make a decision soon on whether to retain the regulations or make changes to them.

I trust you find the above clarification helpful and that individuals and groups will praise the council for its decision. Several regulations will be discussed, and input from representatives of the residence hall area will be especially welcomed.

In addition to the residence hall area, which has a network of walkways, enclosed from the ban are the areas around the following: Music and Theater complex, Physical Education complex, Health Center, College Avenue from Perimeter Halls to the bridge of the canyon, California Boulevard, and Highland Drive. The committee is not satisfied that the regulations are not timely, but not hastily provided for in Pres. Kennedy's announcement of the regulations. In his memo, result of a recommendation developed this past summer by a committee consisting of a student representative, the director of Undergraduate Affairs, and that regulation will be subject to evaluation by any group, especially the AS, during the 1976-77 university year.

I have been asked by the President to provide any interpretations on the regulations. In this regard I welcome written suggestions from anyone, particularly groups of individuals. For example, your editorial refers to skating in the residence halls. I suggest you call for a review and the council for its decision. Several regulations will be discussed, and input from representatives of the residence hall area will be especially welcomed.

Nuclear waste: A political bomb

Pres. Ford is expected to propose several measures to face the potential dangers of nuclear reactors and fuel rods. The idea is to use American technologies to a larger extent, in order to reduce the risk of further incidents and to control the spread of nuclear weapons. However, there is strong opposition to the plan among various groups, including environmentalists and anti-nuclear activists. The president's proposal is expected to be met with criticism from those who believe that it is not a sufficient solution to the problem of nuclear waste.

The United States cannot cope with the proliferation threat by itself. International cooperation is essential, and the President's action is a step in the right direction. The construction of a demonstration plant can be used as an example to show the need for international cooperation and to move forward with the development of nuclear medicine.

The United States would welcome the ban on the export of plutonium to non-nuclear countries and the United Kingdom. It is also important to work towards a global nuclear fuel cycle, which could help to reduce the risk of proliferation. The proposal should be supported by the international community and by the United Nations.

The fact remains, however, that by building such a demonstration plant, the United States would be doing the world a favor. It is a step towards a safer planet and will reduce the risk of nuclear accidents. The United States should continue to work towards a safer and more secure future for all of us.
Politics and popular music: a People's blend

by BETSEY LOVELAND
Daily Staff Writer

Mix warm San Luis Obispo sunshine with 1,000 happy people and good music and you've got the Surfside Music Festival.

The People's Wedge, a group of concerned people dedicated to raising the political consciousness of the county, sponsored the concert at the Surfside Beach Saturday afternoon.

Everyone attending the concert received a membership card for the Wedge along with a "straw ballot." Proceeds from the concert will be used to support the candidates and groups winning in the straw ballot election.

Worries that local law enforcement agencies might break up the concert were dismissed when no problems occurred.

The concert was in direct opposition to a county ordinance which forbids such gatherings. One of the Wedge's founders, City Councilman Keith Gurnee has called the ordinance "trivial.

According to Gurnee, "the county officials tend to ignore the Wedge anyway. There hasn't been any direct opposition to the concert." The concert got underway at 11 a.m. with entertainments by local groups, followed by the Surfside Drumline, the town's well-known local group playing country rock.

Political speeches were interspersed in the entertainments. According to stage manager Jeff Jerusalem, local candidates were invited to speak at the festival but only "four candidates felt it was worth their while to show up."

The candidates who did make it to the concert were Richard Kreage, in the 6th District Supervisorial race, Kurt Cooper, running for 3rd District Supervisor, Dave Wall, a Peace and Freedom candidate for a senate seat and Orloff Miller running for San Luis Recreational District Commissioner.

All four candidates presented platforms favoring strong environmental controls, especially along the coastline, as well as opposing land development. Candidate words were replaced by the jam-rock of Pat 'N Sassy, offering contemporary hard-core songs as well as original numbers.

The Friese Kids ended the concert performing all their original "Until dust."

All in all the candidates seemed pleased with the concert.

Keith Gurnee said at the concert Saturday, "The crowd is as good as could be expected when we're competing with the Chumash and Governor Brown's appearance."

Gurnee added, "But whether we could go ahead for one ticket price got us near good hands on a great day. Politics speak and become a number of an organization."

It's doubtful anyone felt cheated out of their money after this festival.

Research grants will assist projects

Work in Poly Canyon resulted in six Cal Poly students winning $1,700 in research project. Their project involved integrating an environmental control system on a field supported prototype building.

Their research is being continued through a grant from the National Science Foundation.

The NSF offers a competition annually to support undergraduate student groups with interesting applied research projects. These groups should consist of at least five individuals and come from a variety of academic disciplines. The year's deadline and identification is Dec. 1, 1979, for projects to be run in the summer of 1980.

The Student-Originated Studies Program of the NSF has supported a broad range of topics including projects on natural resource utilization, pollution studies, waste disposal, urban studies, transportation, architectural engineering practices, land use, design, studies for improving the safety, efficiency, reliability and efficiency of consumer products. Proposals for 1977 should partially or directly contribute to the quality of human life, the conservation of scarce resources, or the social and physical well-being of the American citizen.

A special meeting to discuss the program and opportunities for Cal Poly students will be held October 12 at 11:00 a.m. in CNE 61. Students who wish to support for group interdisciplinary research that may be used for senior projects are encouraged to attend.

The program accepts only those proposed projects for competition that meet the following criteria:

- The approach is understanding the problem and the means for a solution are interdisciplinary.

- The problem has immediate relevance to society, and can be studied locally or regionally without extensive travel costs.

- Meaningful data concerning a science - or technology-based problem will be collected.

- The activity period is limited to 10-12 weeks of full-time participation for a group of from 3 to 10 students.

- Each group must select the project, design the study, draft the proposal, and direct the course of the study.

- The students involved in the project will select the subject-fieds under which work is likely to arise.
Cessna Pilot Education
gets you in the air fast.

Serves you time and money.
A recent survey shows that Cessna Pilot Education
enables you to cut your per-flight costs up to 50%.

Cessna Pilot Education's 20-hour ground course
prepares you for your solo flight. You'll learn to
understand the airplane, control, position, and
maneuver. You'll improve your flying skills in a
shorter amount of time. And when you're ready,
Cessna Pilot Education's Flight Test Program will
help you pass the FAA test.

wage agitation from plaza pulpit

by JAMES P. SWEENEY
Daily Co-Editor

Standing in the shadow of our projects, the youthful in-
mates of the University of California doesn't have all the an-
motions of the city's adult social scene to pull to it. The
recently retired California Governor Brown says he would have
reduced the prison population to one third of its present size by
January 1. Jerry Brown, the young governor, has embarked on a
radical political approach to the prison problem, and a con-
ference in the rear of the Cigar Club to see what the estimated 250 who-
edged to attend the Governor's press conference. It is an awfully
narrow road to drive on.

As the Governor answered a question-and-
answer session, he suggested a key charac-
teristic of his approach to the problem:

"We aren't just trying to make ends meet.
We are trying to get a sense of what the
inmates' lives are like."

"It's a real challenge."

Later in an appearance before an estimated 300 people in
the Student Center, Governor Brown declared the proposition was a "death
blow" for the Agricultural Labor Relations Board.

Brown's review: effectiveness and lots of class

by BETSY SUtMAN
Daly Associated Editor

Mellowed by the warm fall sunshine and a festive Oktoberfest atmosphere, a predominantly Democratic crowd, sporting partisan campaign buttons and signs, greeted Gov. Jerry Brown's appearance in the Mission Plaza Saturday afternoon with enthusiastic applause.

While some people had come for the Oktoberfest celebration, others had come primarily to see the governor. "I came by accident," said Bob Klein of San Luis Obispo. "I'll probably stay to see the impact. It depends on the kid." Klein's children were playing in San Luis Obispo and his wife was at a friend's house. "I'm people, I don't answer questions," Brown responded to questions about local problems, such as the supercenter issue.

"I thought he was very effective," said Harre Lents of San Luis. "He related to the young people. He is a breath of fresh air in politics." Brown's review:

Brown passes through Oktoberfest on the political torture trail

by ELENA-MARIE KOSTER
Daly Associated Editor

The whole affair brought to mind the mob scene in Shakespeare's "Julius Caesar," remember the required reading in high school. But instead of yelling "Live, Brutus!" the crowd of citizens and students at the rally called out questions that concerned the community. And Gov. Jerry Brown didn't tell us if he'd come to bury anyone, instead he came to praise Phil Marineau, candidate for the 17th state senate seat—and other Democratic candidates in a press conference, reception and public speech in the Mission Plaza on Saturday afternoon.

The political rally fell right in the middle of the city's Oktoberfest. The plaza had long been filled with people selling goods and cooking themselves by drinking beer when the governor arrived at the Oskar Factory for a press conference at 3 p.m.

It is hard to believe that the governor's impression of San Luis Obispo could be more than a blur. From the press conference, where he was literally surrounded by reporters and photographers, he was led outside to give a short talk at Mayor Kenneth Schubert's reception. He spent half of his time there shaking hands in a reception line before walking to the mission steps, shaking hands all the way.

At the San Luis Creek Bridge, Brown paused to listen to the country band performing on stages behind the blasts. This was one of the most peaceful moments for the 17th year old governor in his three hour campaign stop in San Luis Obispo.

On the mission steps in the plaza, Brown was greeted by opposition demonstrations. Supporters of Proposition 14 that limits the initiative process were there with United Farm Workers' flags and banner flapping in the hot breezes. Other pickets urged a no vote on Prop. 14.

Brown supported the proposition. Again Saturday Brown spoke to the masses

(Continued from page 4)

"I was trying to win—most of the places I went I did. I just ran out of primaries." He added he would probably stick to "youth and alternative ideas." He is the Democratic party nominee because of the short-lived presidential campaigns.

In a rare semblance of typical politics, Brown assured there would be no further endorsements to be added. "We didn't raise taxes which was the first thing I did as a coming governor. When asked if a reporter if he would like to comment on the Jimmy Carter "Playboy controversy", Brown smiled and replied, "I wouldn't want to comment on that." Then asked if he continually hammered on the separating partisan differences, Brown said, "I don't even know what it is all about. I can't just go back and forth. I don't know what it all means."
Mistakes leave Mustangs tied

Quarterback Bob Ansari feels a tug from Bronco defensive lineman Guard Mike Bailey (88) rushes to help. (Daily photo by Ellen Stammer)

by CRAIG REEM

The score should have been 21-14. It could have been 31-14, but Cal Poly suffered its second straight week of football mistakes and survived a 14-14 tie with Boise State Saturday in Mustang Stadium.

The Mustangs opening series was typical of the kind of night you don’t like to go home and tell your relatives about. Cal Poly opened its initial series with Roddy Chapman, starting running back, gaining four yards. Bob Ansari, who completed eight of 16 passes for 117 yards and one touchdown, threw his first series to leading receiver Rich Beatty. The pass gained six yards.

The first down and pass interference calls against the Broncos helped move the ball downfield. Fullback Jeff Jones carried three times in the drive for 17 yards as the Mustangs opened up Boise State’s defensive line.

There, they say that would be indicative of the fog-shrouded games normal. With a third and one on the Bronco 10-yard line, Chapman fumbled away the ball.

On the Mustangs next possession, Cal Poly started exerting its superior physical prowess on the Broncos. First, offensive end Dana Nahringer crushed Boise State’s Rich Brown on a crackback block. Then the rest of the team opened holes for Jones and protected Ansari on successful pass plays as they drove the ball to the one-yard line. With fourth down Ansari drew a quick pass to Jim Pettel. But it was incomplete.

Cal Poly, at this point, had two fine drives to their credit and no score. In the second quarter, the Mustangs were called for holding on a Bronco punt. This nullified a 14-yard possession on the play and gave Boise State a first down on the Cal Poly 34. Four plays later the Broncos punched it in for the score.

With 12:13 left in the half, Boise State led, 7-0. Nothing went right. A 31-yard punt return by Cal Poly’s Steve Speer gave the Mustangs excellent field position again. And again the Mustangs drove downfield. And again, Poly lost possession as Chapman fumbled it away on the three yard line.

On Cal Poly’s next possession, Ansari drew a perfect bomb to Jimmy Childs for a 90-yard TD. At halftime, the score stood 7-7.

The third quarter opened with a Cal Poly TD. Defensive back Rick Haycock intercepted Bronco quarterback Dee Pickett’s first pass and ran in for a score.

But the Mustangs (Contd. on page 3)
Harriers finish sixth at Cal-Aggie tourney

Cal Poly’s cross country team finished sixth for the second straight year at the Cal-Aggie Invitational Saturday.

Running a five-mile race at UC Davis, the Mustangs placed their top three runners in the top 20 finishers. All-American Anthony Raymone placed 16th (25:45.80) followed by Jim Wardle (17th at 25:50.11) and Luke Arnold (20th at 26:00.4).

Coach Steve Miller said yesterday, “I was very pleased in terms of the times we ran. Right now we have four people running well.”

Miller said that the team has still to reach its full potential.

“We’ve had only 13 practices together and three meets,” Millar added. “I think we have solidified our top three and four spots. When we get the kind of assistance from our five, six and seven men that I expect, we will be a very tough team to beat.”

Miller’s worry was in the Mustangs lack of execution in the tie.

“There was a lack of execution for the tie,” Miller said. “But they got 14 points and that’s not good enough.”

Harper blamed the Mustangs lack of execution for the tie.

“We played very well on defense,” Harper said. “But they got 14 points and that wasn’t good enough.”

Harper said the offense did well in the middle of the field but not when it came to a score.

Cal Poly’s last gasp for victory began in a familiar spot. The ball was on the Mustang two-yard line, a tribute to Broncos punter Vic Arias. He consistently left the Mustang inside their own 10 yard line with masterful punts.

Anseri quickly threw Cal Poly out of its end zone with a 40 yard completion to Jimmy Childs. Mustang fans, seeing a victory, nearly stomped the stadium into a quick renovation project.

But Ansari, after narrowly missing Childs in the end zone, threw into the flag and was intercepted.

Coach Harper remarked after the game, “The tie was a loss as far as we’re concerned. We had every opportunity to do it (win).”

Harper blamed the Mustangs lack of execution for the tie.

“We played very well on defense,” Harper said. “But they got 14 points and that isn’t good enough.”

Harper said the offense did well in the middle of the field but not when it was close to a score.

As Harper alluded, the 7,000 fans got their money’s worth. But for only a tie.

Cal Poly 14, Boise State 14

New Zealand opportunities

Qualified agriculture majors have the opportunity to spend a year in New Zealand. Cal Poly ag majors, along with the ag majors from other California universities have been selected to study there in various fields of the major. The program is sponsored by the International Programs Office.

The program begins in February and runs through October. Applications are available in Room 257 of the Administration Building and must be returned by Oct. 15.
