The new archie building: an empty oasis
A bedtime story that needs telling, but no one wants to hear.
King and Queen of Diamonds

Scott Kelly and Barbara Kain were chosen as official host and hostess of this year's Homecoming activities at the Cal Poly Student Center. Kelly, Jr., was sponsored by Delta Sigma at University. Kain is a sophomore majoring in biological science. Kain is a sophomore majoring in business with a concentration in industrial relations. Scott was sponsored by the Student Government and was sponsored by the Student Government and was a candidate for the Queen of Diamonds and was chosen by the Sodality for Advancement in Management.

This year the host and hostess were named "King and Queen of Diamonds." In honor of Cal Poly's 79th Homecoming theme, "King and Queen of Diamonds" were selected by the Diamond Jubilee Homecoming Committee to honor Cal Poly's 79th anniversary.

The committee adopted the host and hostess idea in "get rid of the traditional beauty contest!" for this year's Homecoming.

Yates and Kelly will help in promoting Homecoming and will represent Cal Poly at all Homecoming events. They will act as a liaison between the students and distinguished alumni, host the Diamond Ball, and assist in the Diamond Jubilee Homecoming theme events.

Yates, a Junior at Upland, majoring in biology, and Kain, a Junior majoring in business, will act as a liaison between the students and distinguished alumni, host the Diamond Ball, and assist in the Diamond Jubilee Homecoming theme events.

The host and hostess idea was adopted by the committee in order to "get rid of the traditional beauty contest!" for this year's Homecoming.

also added "horrible face" masks of rubber, and "booby beads," long hair and "evil teeth."

Oatmeal—Bankroll starting at $15.75. Their selection is also top-heavy in the monster line and many have also won prizes.

Bears there may be one to be Synopsis, won or one of several lesser known ghosts. Curett also carries paper masks with a choice of skulls, ghost faces, batons, hangers, bones or skull and crossbones.

To help those with more feminine tastes, Curett also carries paper masks with a choice of skulls, ghost faces, batons, hangers, bones or skull and crossbones.

In the year of the heat and hot, "King and Queen of Diamonds" was appointed by the Sodality for Advancement in Management to honor Cal Poly's 79th anniversary.

Archies: nomads searching for classrooms

by BETSIE LOVELAND

“Learning by doing” always has been an important part of the educational philosophy of the Architecture department at Cal. P.

Working in lab situations to encourage student-teacher interaction has been praised by architecture students, as an extension of this philosophy.

After having this idea echoed in their minds for the first three years of undergraduate studies, this year’s fourth-

year archies find themselves, “out on the street” without a lab or drawing table to call their own.

The new architecture building, which was scheduled for classes this fall, was not completed in time. Fourth-year students who were to occupy the building were left without classrooms.

(The reason: Equipment funds, allocated by the state bureaucracy separately from construction money, was not approved by Gov. Brown in time to purchase adequate classroom furniture and equipment for full quarter occupancy.)

Students have been told to do their work at home—easier said than done.

“My wife and I live in a mobile home and she’s about to have a baby,” said fourth-year architecture student Gary Heathcote. “There’s not enough room at my place to do good work.”

Heathcote said working at home might hurt his grades. If he does, he said, he may be forced to rent some space in town to do his work.

Why are fourth-year students, in their last important year of school, the ones without classrooms?

George Hasslein, dean of the School of Architecture and Environmental Design explained the reasons behind the decision.

“Fourth-year students have already worked in a lab situation,” said Hasslein. “They are more mature and know how to work alone to make the process work for them.

“We realize this is a crisis situation,” he added. “The school is doing all it can to find space for these students who don’t have the space and facility to work at home.”

Hasslein concluded, “the students are handling the situation pretty well. They have been very cooperative and helpful.”

Yet a more serious problem than being without a lab for a quarter may result from the classroom shortage, according to Hasslein.

“We’re afraid students won’t want to work at school again after working at home with all its comforts.”

Jean Pohl, a fourth-year design instructor, agreed, getting students to work in a lab when the new building is open for classes winter quarter may be a major problem.

However, Pohl is more concerned with what the effects of not having a lab are doing to students right now.

“The students are missing out on the important discussions which should occur between them during the design process. These discussions are what occur in a real architectural office,” Pohl said.

He added that because students must work by themselves, pressure is placed on the student to discipline himself and to take the initiative to get involved.

Pohl said not having lab space for his class this quarter was a complete surprise, which he learned about at registration.

“My class is meeting wherever it can. We’ve met in the Union and even doubled up with third-year design classes,” Pohl remarked. “We move from room to room each session, which of course makes it difficult on everyone.”

“I’m curious that in a university this size there aren’t empty rooms during some hours that could be used.”

However, during and after voluntary service work, Pohl feels that the university hesitated to admit this.

“I think they were afraid it would bring down the standards of the school...and that women would demand more extras,” Pohl said.

New retired and doing voluntary service work, Pohl feels that 50 years of growth has not made a big difference at Poly.

“Don’t think the character has changed,” she says. “It still has a friendly small school at-

First female grad remembers the days well

by GINA BERRIESA

DAILY STUDENT WRITER

She remembers enrolling in Cal Poly summer school along with 18 other students.

She remembers attending classes in converted army barracks. And she will never forget the day in May when the first woman to graduate from Cal Poly, although women were excluded from attendance in classroom sessions.

Elizabeth Hanlon, who still lives in San Luis Obispo, was 48 years old, married and raising two children when she graduated from Cal Poly in the spring of 1962 with education degree.

Why was she allowed to enter the all male college? She doesn’t know... I still can’t figure it out,” Hanlon says laughingly.

Her problems registering for the classes, “but some of my professors told me, “you can take the class, but I’d like to see you get credit for it,”” she says.

Hanlon, who was then teaching in Morro Bay, had previously attended two summer sessions at Poly, open to women in 1964 and 1965.

She recalls “a lot” of females in the summer session classes, but only two enrolled in the spring of 62.

She doesn’t remember seeing the other women during the course, but believes the women were her same age.

Hanlon returned to college after quitting her teaching job due to a back injury. While recuperating she decided to finish school and get her degree.

“I had to work hard,” she says. “A lot of men had gotten out of the service and were taking classes as

refreshers courses, while I was taking them for the first time."

Women on campus presented problems, fearing the university to make unnecessary adjustments, in- including the opening of bathrooms for the two female students.

“When I was put on committees, most of the guys met in the all male classes so we had to find other meeting places,” she says.

Hanlon recalls why the university hesitated to admit this.

“I think they were afraid it would bring down the standards of the school...and that women would demand more classes.”

New retired and doing voluntary service work, Hanlon feels that 50 years of growth has not made a big difference at Poly.

“I don’t think the character has changed,” she says. “It still has a friendly small school at-

mooded.
Sorority social scene hits Poly

by GINA BERREYBA
Daily Staff Writer

Something old becomes something new—sororities at Cal Poly.

Sorority date back to the 18th century, but it wasn’t until 1973 that Cal Poly’s first sorority chapter was established. “If you want to say why I was the stimulator,” said Dr. Lorraine Howard, dean of women and Panhellenic adviser. “I just stimulated some girls and told them to find some more girls to start a sorority.”

Within three years, the Greek system has grown to include five sororities at Cal Poly, taking in from 225 to 250 currently active members.

Although sorority girls make up only a small part of Cal Poly’s female population, the numbers seem to be growing.

“Right now throughout the country toward the Greek system,” Howard said, “and sororities are becoming more popular at Cal Poly as women realize they’re here.”

According to Howard, this is the second year of formal rush for the sororities, and she anticipates about the same number of girls to pledge this year as last year—approximately 50.

“Sororities offer another alternative in lifestyle,” noted Howard. “They bring girls closer together and help them develop leadership qualities.”

Costs involved in pledging to a sorority begin with a deposit of $125, approximately $50, and about $150 a month in dues from then on. The money may keep a girl in pledges, but not in sorority.

“Like a lot of times it’s like a whole other world,” she said.

Sorority presidents at Cal Poly agree that sororities are gaining in strength.

“Sororities are gaining in strength,” said Kristi Byrd, president of Alpha Phi. She explained that sororities must stop at 10 members, and Alpha Phi now has 43.

Byrd, a senior business major, explained that one of the reasons she joined was because she found something in the sorority that wasn’t included in dorm living.

“There’s a good atmosphere in the sorority, and it’s something that gives you common ground with other girls,” she said.

Sorority presidents at Cal Poly agree that sororities are growing in strength.

“Sororities are naturally competitive to a certain degree,” said Byrd, who joined Alpha Phi. Since all the sisters agree to be “up house,” and they also have a mutual purpose.

“We pull for each other,” she said. “If I knew other sorority might fail, I’d do everything in my power to keep them going.”

Janet Muller, a charter member and president of Gamma Phi Beta, feels that people have a better attitude about sorority today.

She found that at Cal Poly, sororities do not have a strong stereotype “like the ones at USC or UCLA.”

“Their partners are just as strong as ours.”

The most recent addition to the growing sorority population is Kappa Delta. The chapter was formed last year and has a membership of 26 girls so far.

President Lori Clift said that sorority girls teach each other about the sorority.

“Sororities are a small-size example of what you find in the world,” she said.

Kappa Delta is now the only sorority that does not have a chapter on campus.

They have an apartment that serves as a sort of “sorority center,” but also has a sorority lodge, which is a common ground for the sisters.

Mike King
Kurt Kupper will get my vote because he has stood for openness, access, and public participation in county government.

Alpha Zeta applications available

Applications to join Alpha Zeta, National Honorary Agricultural Fraternity, are now available in the offices of the Agricultural Extension Service. Applications must be submitted to be considered for membership.

Skateboard championships

The San Luis Obispo Recreation Department will be holding the Second Annual Skateboarding Championships on Oct. 3. Those participating are asked to call 544-1664 ext. 41. Late registrations will be taken from 8 a.m. to 2 p.m. in the City Hall.

Pumpkin carving

The Delta Sigma Phi Fraternity will sponsor a pumpkin-carving event on Oct. 22, between 4 p.m. and 7 p.m. in an effort to bring a more enjoyable Halloween to the underprivileged children in the community.

Pumpkin carving will be held at 344 California St. A party with both the children and the members of the fraternity will take place afterwards.

Disabled Student Services

Did you break your arm or sprain your ankle? Are you hampered by a physical disability? If you are either permanently or temporarily disabled, DIS is here to help.

DIS is Disabled Students Services and its office is located in the University Union, Rm. 100. The office is open Monday through Friday from 9 a.m. to 4 p.m. The organization also meets regularly every Thursday at 11 a.m. in U.U. 235.

Hancock theater season

Hancock theater season includes a variety filled Proposition 14 discussion

Proposition 14 will be discussed at a public forum following an Ornamental Horticulture Club meeting at 7:10 p.m. tonight in the University Union, Room 104. The forum is open to all students.

Specific aspects of the proposition that will be discussed include the "access rule," Supreme Court rulings, property rights and the field workers rights.

Homecoming rally and dance

An all-Police Pep Rally and the Diamond Doo Doo Dance are the next two scheduled activities for Homecoming 1978. The Rally will be held at the University Union Plaza on Nov. 6 at 12 p.m., and the Diamond Doo Doo Dance will be held at the University Union on Nov. 6 at 5 p.m. Admission for the dance will be $1. The theme for this year's homecoming is "Cal Poly Diamond Jubilee." Homecoming activities will climax with the Homecoming game and concert on Nov. 6, the game at 1:30 p.m. and the concert that night at 8 p.m.

Athletes share the same fate—be in shape

With Iniseman, the emphasis is on weight training.
With the halfback, it's more on the running area.

—Harper

by CRAIG REEM
Daily Sports Editor

Despite the diversity of activity, one emphasis on the athlete is the same—be in shape—no matter what. Interviews with several coaches ranging from water polo to football, they discuss what's unique about their athletes.

A football player at Cal Poly is involved in a year-round program under head coach Joe Harper. The weight work (immediately after the season ends) involves weight training, running of basically a distance type and ball handling to increase flexibility and agility," said Harper.

The emphasis is on both the weight training and running. He said, "The workouts are too far a week.

Workouts last through spring training. Then the athletes begin a five-week session of contact. The emphasis shifts to basic running.

"After spring, we revert back to the program (or Individual basis. Emphasis is on both weight training and running."

Harper explained that the running and weight programs are different in each player. The "before" area shows a 150-pound baseball player, while the "after" area shows a 230-pound baseball player. "With the doubling, it involves on weight training. With the weight, it's more on the running area. Also they work on throwing and catching the football."

The coaches ask the athlete to be in touch weekly through a postcard system during the summer. "They realise the emphasis and the need for full practice," Harper said.

During the season, there is an emphasis on weight training but there is still "a tremendous amount of running," Harper said. "We work on a 40-yard dash area. There's very little distance work during the season."

What most important exercise for a football player, Harper said "running. You can't play in one piece.

Water Polo differs from most sports since it involves the athlete in water as opposed to land.

According to Dick Anderson, water polo coach, the athlete is not expected to have a set summer program. Most are involved in summer leagues which ends one month before training starts so that the athletes arrive at all levels of conditioning, said Anderson.

Practices last eight to ten days before the season starts. They practice twice a day. The first practice the players work on shooting, swimming, basic conditioning and ball handling, Anderson said.

The second practice each day is scrimmaging. "This gets you in shape," commented Anderson.

There is no running program outside of the pool, Anderson said. "You don't run for water polo as you don't practice swimming for track."

Weight lifting is done on an individual basis. Emphasis is on arm and shoulder strength.

During the season practices last about 1 1/2 and a half hours. On the day before a game a full scrimmage is scheduled. "We work on a very different set of things for the different competition."

The most important exercise for a water polo is scrimmaging, Anderson said. "The players have to know how to play. And speed and endurance are very valuable."

Baseball players don't have time to get into a physical conditioning program but are involved in summer leagues during the summer, according to head coach Andy Harr.

"Before they report to the pitcher must be able to pitch three innings and the players must be in shape to be involved in a rugged running program," Harr said.

During the fall baseball program the players continue their workouts until Christmas. The baseball team resume workouts in January until the season begins in February. At that time, Harr said it is difficult to work out on a regular basis. As practices everything is done on a run, he said. "We change stations, the players have to run from one station to another."

"There is more emphasis on weight lifting than running," Harr said. "It's more on the strength."

Weight lifting of at least three days a week. Weight lifting consists of speed lifting and repetitions, for the infielders and outfielders. "We don't want to develop bulk but strength through a range of motions relevant to baseball," Harr said.

After fall baseball the pitchers continue their workouts until Christmas. The baseball team resume workouts in January until the season begins in February. At that time, Harr said, it is difficult to work out on a regular basis. As practices are done on a run. He said, "When we change stations, the players have to run from one station to another."

"There is more emphasis on weight lifting than running," Harr said. "It's more on the strength."

All players run three days a week.

"Before they report, the pitchers must be able to pitch three innings and the players must be in shape to be involved in a rugged running program."—Harr

The difference between a good and an average hitter is strength.

Basketball coach Ernie Wheeler said, "Basketball needs to be in shape when he reports for practice after summer. The weight program involves lifting at a full range of movement so the athlete will not be hindered when shooting.

The weight and running programs depend on the individual," Wheeler said. "Sometimes an athlete will not be able to improve his performance on more stringent programs."

Wheeler's main concern now is to maintain the athlete's strength.

"This year for the first time we're going to lift weights three times a week on the lower body," Wheeler said. "We lose strength during the season so much running is in­volved."

The running program depends on the individual. The main thrust is to prepare the athlete physically and mentally, Wheeler said. "Weight is limited to the mile and most break six minutes. Athletes think that to be in shape you must do the 440 yard dash in under 60 seconds.

The most important exercise is stretching and running.

After the season is over, the players are given a month rest. Then it is back to weights and running. There is no running program except for a few players.
Poly to defend explosive Nevada

by KEVIN FALLS
Daily Staff Writer

The Mustangs are coming off a two-week rest or layoff at the case may be. Against a Rebel Squad that will be turning over their equal loss to Northern Arizona (1-8) last weekend that will drop them in the ratings. UNLV will be fired up hoping to gain some of that lost ground against the undefeated Mustangs.

On the other hand, Cal Poly has yet to crack the top ten after beating such formidable opponents such as Idaho State, Cal State Northridge and the last 17-13 win over Fresno State. In fact, Fresno head coach Jim Hennes said the Mustangs "are the best team we've played so far." That is quite a compliment considering Swaner's team was edged by holistic power San Diego State.

In essence, if the Mustangs beat Las Vegas, they may be considered one of the Division II's 10 best teams next week. No matter how the outcome is, it is going to be an exciting weekend in Las Vegas. It could boil down to a roll of the dice.
