Land ho!
Poly seeks
further growth
From Plains to Poly

It came too late, but the Baptist Church in Plains, Ga., has decided to allow blacks to join.

On Sunday, after intense lobbying by President-elect Jimmy Carter, the congregation voted to end the church's 1931 resolution barring "Negro's and other civil rights agitators."

Under its Constitution, the policy of a small town church isn't news in the nation's press. However, today it is the President-elect policy to exclude blacks and the town is in the South, it makes headlines.

The ban became an election issue just before the polls ended. At that time, a black minister tried to integrate the church but was prevented by black members.

Carter, clearly embarrassed by the incident, said he would stay in the church and work towards civil rights policy. Many people had urged him to quit the church in protest instead of trying to return it.

True to his word, the President-elect has continued the controversy in what he considers the church's decision. Carter, a deacon in the church, had been opposed to the ban when it was first issued in 1931.

It's good that our future President's church is open to all people, regardless of race. It stops the U.S. from being two societies: one black, one white. It stops the country from being divided.

And it's good that all Americans believe that, unfortunately, for this, not the least being the GOP's unfortunate role in divisive politics.

Under his thumb

Sinking GOP may require major overhaul this time

by J.R. WERTH

WASHINGTON—Will the advice for those of us who are tempted to pick over the wreckage of the Republican Party in the wake of last week's defeat amount to "tough love"?

"I generally give the party in power the more digs," he said, "because they are generally doing the country more harm than good. I don't think it is fair to pillory a generation who are the great-grandchildren of the people who did the things I am talking about, but it is fair to pillory a mechanism when the machine is no longer working.

But as every fire inspector knows, you have to poke around the burned-out house and discover what burned it down. And it wasn't the Democrats who in the White House. It looks like they already had a lot of the blame. The President Ford does deserve some of the blame. So does Ronald Reagan, his press, and his administration.

But it is the old Republican establishment, the corporate suits, that is the problem. They are not my words, but those of House Republican Leader John Rhodes.

"We give the impression of not caring," Rhodes observed in his speech on the House floor yesterday, "as if Congress, the 'Futile System.'" He applies terms that imply the House "as the worst possible image a political party can have."

The election results proved it. In a year when people have been demanding change, the voters did not reject candidates in Congress, the voters turned to candidates who have promised change. Their perception was that the Republicans cared more for the big business, for big business, Wall Street and right money.

The Republican Party must rein its concern for career and party control on the party. It has to be a party of principle and principle and principle and principle and principle. Well, money isn't everything, especially when it's in the wrong hands. Jimmy Carter understands that, which is why he will proceed more cautiously than a lot of Democrats wish he will. And voters understand it, too. Poor Carter, after all, can be more caring than the rich. It is an economy and compassion that we are talking about, not gold. And it is in this capacity that the Republican Party has been weighed and found wanting.

Now a Republican, conservative, compassionate, who demonstrates that he truly cares about the little guy, who is black, and black, in the big city or the farm, and I'll bet you who will be elected.

End their tribe increase.

WANT TO Prm, go to (661) 379-7222

HOLAM, ANGIO?, EL REFIRTO AGAIN. I WANT TO WRITE ALL OF YOU DOWN THE LATEs TO GET INTO THE EARLY CALIFORNIA THANKSGIVING SPIRIT.

YOU LIKE MY NEW SOMBRERO?

TOMAS, HERE, AND I ARE GOING TO HELP YOU WARM UP TO THE BEER BIRD FIESTA BY SERVING TURKEY TACOS THE WEEK BEFORE THANKSGIVING.

DO COME ON DOWN AND "GOBBLE" (HEH, HEH) SOME OF MY FAMOUS TURKEY TACOS OK?

BOY, ARE THIS GUY'S PUNS UNBEARABLE!

Cal Poly, the largest campus in California, is nothing to add, 1,200 acres of federal land across from Coast College to Air, 1,167 acres of vital total. But, the Morristown Recreation Commission also has some ideas for the best use of the land. For instance, on pages four and five. (Cover photo by Bill Pfeiffer)
**Bike use may be banned**

NATIONALLY KNOWN

SPEAK READING COURSE TO BE
TAUGHT HERE IN SAN LUIS OBISPO

S.L.O. (Spec.) Golden State Reading Lab will offer a 4 week course in speed reading to a limited number of qualified people in the San Luis Obispo area.

This recently developed method of instruction is the most innovative and effective program available in the United States. Not only does this famous course reduce your time in the classroom to just one class per week for 4 short weeks, but it also includes an advanced speed reading course on cassette tape so that you can continue to improve for the rest of your life. In just 4 weeks the average student should be reading 2-3 times faster. In a few months some students are reading 35-40 times faster, and 200 times faster in rare instances. Spending 10-15 hours studying, most students average 1,718 times faster following completion of this course with special advanced speed reading techniques and concentrated instruction.

The program is designed to appear homely and to appeal to people who constantly desire the seemingly hundreds of books coming out at these times.

There have been several injuries on campus involving bicyclists striking pedestrians or other bicyclists. The number of bike-related accidents has never been as prevalent as in the past, according to a spokesperson for the Health Center.

By not allowing bikes to be ridden in the crowded core of campus, the S.A.C. Administration Committee is attempting to alleviate these accidents and to create a safer place for both pedestrians and bicyclists.

If you have to rush out and sell your bike, Boero said the law will not go into effect immediately.

"The ban is still in the planning stages," Boero said. "By presenting it to S.A.C., we are presenting its proposal to SAC, who must then send the proposal to the School Administration Committee who has the final say on the matter of the ban or lifting of the ban on skateboards, according to Boero.

The School Administration Committee, which is comprised of members of the administration, is the group responsible for implementing the ban on skateboards, according to Boero.

"Banning bicycles in inner campus was first proposed by Ali Vigneaux, Ray Davis," Boero commented. Davis was unavailable for comment. The ban on skateboards, the bicycle ban would be enforced by the campus police who would take the names of offenders, according to Boero.

Bike riders would be able to park their bikes outside the outer perimeter of campus. "We're not trying to cut out people who depend on bikes for transportation," Boero said.

**Spend the holidays on the buddy system**

**By ELENA-MARIE BLYTH**

Daily Student Editor

The Cal Poly Housing Office has devised a buddy system to connect students during the holidays.

For those who live in residence halls and for those who will be alone in their apartment or off-campus home, the Campus Housing Office is acting as a referral service to help students arrange to spend the time together.

"Each break," Lambert said, "I have students stay in touch with each other so that each became like a feel good. They are amazing." Lambert finds that many students stay in touch with the Cal Poly Housing Office over the holidays. And one of the best ways to stay in touch with them is to have someone your friends meet other students downtown over the break and make plans to get together then.

"Normally students find someone who may vary themselves," Lambert said. "This service is designed to speed up that process for you, especially for those students who are fairly new to campus and don't know many as many students.

The housing office is acting simply as a referral service. The students will be given the list of students in town and they will be left with the responsibility of getting in touch with each other.

"We will leave the arrangement of what they want to do up to the students. Whether they're looking for someone to stay with from the whole time, or a short period of time, or one day, they should be able to make the plans themselves."

Since the program is new at this campus, and has never been tried at other campuses, there is a way of knowing what the response will be. The service will be available for as long as students need it.

All information collected for the service will be confidential to all except the students participating in the program.
Land is possible off-road site

Park and Recreation with the stipulation that it was to be developed within a year, said Gerard.

The land was not developed as a park site because of the possible hazards in the area. "The land was zoned as cropland, and the Army has stated that it has been set aside for federal purposes for the next three years," said Gerard.

The university satisfied itself that the land was safe, he said. "The only reason that Cal Poly has not yet developed oral the land to the public is because the university decided to await the situation under the OBA." the planner

The site of 1,380 acres of federal land which Cal Poly would like to acquire as a possible agricultural training site. The Merri Bay Parks and Recreation Commission would like to acquire the land. The Torrey Pines State and Natural Preserves of Cal Poly's Agriculture Department, said Gerard. "There are tracts of land that it was used as a fishing ground by Camp Brown." "It is not too likely that the land could be used," said Gerard. "It has been granted to the university as an experiment, and the Army assured us that it has no plans for further development.

The university satisfied itself that the land was safe, he said. "The only reason that Cal Poly has not yet developed oral the land to the public is because the university decided to await the situation under the OBA." the planner

That's to save time. It saves a lot of time because it's built up so that it's fitting with our main part. Their parts, which are needed, could be different from ours, so we have to stop here and stop there and stop here... Also, when it's not signed for a particular orchestra, it's really for all orchestras in a sense, but it fits into it and it's already set so you don't have to do any matching and it saves a lot of time. Mr. Cal Poly is basically a technical college, but music is part of the arts. What do you see music having in a technical college?

One thing it's very important because I think the technician, the technician does his job when he can appreciate the arts, not just simple. When he has cross-pollination of ears, I think it is much more important. The musician should know something about other arts and should know something about science, and should know something about painting, and should know something about history, and should have a lot of general history, social history, something he can appreciate and his craft as well. And if he somewhere develops a justification or the 1,380 acres, said Gerard. "The school is growing, especially in the agricultural field, and we need more land.

"Acquiring the land is greatly needed if we are to expand our agricultural programs," he stated. The site is suitable for our purposes because it is largely range land.

"I think it's an important part of the whole procedure," he said. "It's not just something that we have to do, but it's important for us to do it. It's important for the university as well as the university.

Poly Pak Cheese Gift Boxes

Searching for that perfect Christmas gift? The Poly Pak Steaks has the secrets of Christmas Cheese Gift Boxes, delicious concoctions of cheeses, meats and other foods packed in a beautiful box that will leave everyone enjoying a different combination in his every cheese-lover's heart.

The gift boxes are priced at $15, $25 and $30. Supplies are limited on orders, must be in by Dec. 5.

Track Team meeting

There will be an informal meeting held for all Track Team members who would like to try out for the team. The meeting will be held Monday night on Nov. 18 in Room 200 of the senior Physical Education Building.

 Classifieds

Announcements

OH Club meeting

A former Cal Poly graduate will be the featured speaker at the Ornamental Horticulture Club meeting Thursday, Nov. 18 in Room 101 of the University Union. Dr. Richard Sosmaner, superintendent of a major California landscape company, will be on campus Wednesday for job interviews and will speak the following night at 7:30.

Acupuncture film

"Acupuncture as Anesthesia," a film showing the variety of techniques performed on patients using acupuncture as the only form of anesthesia, will be shown Nov. 18, 6-7:30, in the Student Recreation Center.

Solar cell discussion

John H. Lawrence, president of Gillson Material Inc., will give a talk on the economics and technology used in converting arrays of high performance, low cost solar cells Thursday, Nov. 25 at 5:15 in Room E-40 of the Student Recreation Building. The lecture is sponsored by the Cal Poly chapter of the International Society for Hybrid Microelectronics.

Samantha meeting

There will be an 11 a.m. general meeting of the Student Union, Nov. 18. The meeting will be held in Room 100 of the senior Physical Education Building. The topic will be elections.

"Nutmack Suite"

Tickets are now on sale for the Santa Barbara Ballet presentation of the Nutcracker Suite at Santa Barbara Community College, Sunday, Dec. 4. Co-sponsored by the Santa Barbara Ballet Association and Santa Barbara Community College Services, the Nutcracker Suite will be performed at 2 and 8 p.m. in the Santa Barbara Community College Theater. Admission to the matinee performances will be $6 for students and children. The evening performance tickets will be $8 for general admission, $7 for students and children. Tickets are available at Brown’s Music, Alesandros Pharmacy, Arroyo Drug, Payson’s Music in Mission City, and at Santa Barbara Community College Services Office.

WOW counselor meeting

There will be a meeting of returning and new WOW (Women on WOW) counselors for the Winter quarter, Tuesday, Dec. 19, 3-5 p.m. in the Student Union. For further information contact Cheryl Woods, 644-0817.

Attempted suicide pact fails

BAY LAKE CITY (UPI) — A man who attempted to carry out a suicide pact Tuesday, swallowed two sleeping pills and then lay down on a couch in his apartment, was taken to the hospital.

Harth: A master violinist

Continued from page 5.

I imagine that the audience would love to hear a master violinist perform at the Oscar in the near future, since the concert was so delightful. I was further impressed with the fact that the soloist played virtually all of the music without a violinist's aid. The only section of the program that I had trouble following was the final movement of the second concerto, but the music was so beautiful and well played that I was able to enjoy it nonetheless.

Land ho: Poly's new acreage quarry

Continued from page 6.

The quarry is located in the northwestern part of the county, near the city of San Luis Obispo. It is owned by the local government, which purchased it in December 1988. The quarry produces a variety of building materials, including granite, sandstone, and limestone.

Dear recreation major--sorry, but no faculty

by RANDY NAX
Daily Staff Writer

The newly approved Recreation Administration major is a welcome addition to Cal Poly's Department of Business Management and Administration but like a player on a baseball team there is no recreation facility to back the course.

The RA major is a separate major administered by both Men's and Women's Physical Education departments. The program is being directed by PE teachers, including Marilyn Shank who is also a member of the faculty. Because of the low level of support a small group of students have been enrolled in the major.

Presently, only PE, Natural Resources and students who have taken some courses at the California Manpower and Development offices may transfer to recreation.

The reason for this restriction is that the program isn't fully integrated into educational curriculum, Shank said.

According to the program, the public is being offered to change the PE major to recreation will be be given when the PE major is moved to recreation off the program for the California Manpower and Development offices.

The major was proposed in 1975 and it was first offered in 1975-77 at Cal Poly Pomona. It was approved by the Board of Education and the California Manpower and Development offices, which could be a sign of things to come.

Consistently students who have been accepted as RA majors have been offered the program as seniors. In order to graduate, these students, PE teachers will have to teach more students or the students will have to divide these courses, according to Shank.

The major was proposed because of an increasing demand by RA majors for a better recreation administration major, Shank said.

The program is no longer being offered since the program was moved to recreation.

The new major has a Bachelor of Arts degree in Recreation Administration and will be offered to students at the California Manpower and Development offices.

Juniors in recreation are currently available. A 1975 study by California Manpower (a state employment survey) revealed an increase in the demand for recreation administrators.

The survey predicted by the end of 1980, there would be more jobs available in recreation than people to fill them, Shank said.

To get the program really moving, we need a full-time recreation specialist—Shank

Soccer squad set for finale

Cal Poly's soccer team defeated Loyola University Friday and was even to a league record of 6-4. The Gauchos will end their season Thursday on the neutral at Fresno State University.

Intramurals
cagers playoff

Paly's intramural basketball playoffs have been underway for over a week and continue Monday, Tuesday and Wednesday at 7 p.m. in the Men's Gymnasium. The Intramural League will get started.

Young's feature game plus two late defections change, "20th to Rule," and a subsequent 2-1-1 record has them out of the tournament in the first round. 2-1-1 is the best record that the Gauchos have got. The Gauchos have got two and dropped one game in a tournament at Cal State Northridge, Nov. 14 and 16.

The Mustangs finished with a 9-6 overall record and placed third in league play with a 4-6 record. Cal Poly’s biggest loss was to Cal Poly Pomona who won the California Collegiate Athletic Association title with a 6-3 record. "We played Pomona even the second half," said Dick Anderson said of the 1-6 defeat. "We didn't play against them, but we should have played better."

Cal State Los Angeles, which finished last with an 1-6 record, won the Mustangs, 1-6-4. After a disappointing 1-6-4 defeat to Northridge last week, Cal Poly managed to score 2-1-6 in 16:13. In one of the most exciting games of the tournament, Northridge took an early 3-4 lead before Cal Poly outscored its opponent 6-1 to be in the last quarter. Northridge placed second in the league with a 4-6 record.

Asked about his feelings toward the season, Anderson said, "I wasn't pleased with the season. But we're a good team. We just started to play this weekend and we should have three weeks ago."

Hunter was named to the first team all-CCAA squad, according to Eric Burdick, publicist director for the CCAA. Griffin joined Dave Parnaf on the second team squad.

Water polo ends season in third place

Cal Poly's water polo team ended its season by winning two and dropping one game in a tournament at Cal State Northridge, Nov. 13 and 14. The Mustangs finished with a 6-4 overall record and placed third in league play with a 4-4 record. Cal Poly's largest loss was to Cal Poly Pomona who won the California Collegiate Athletic Association title with a 6-3 record. "We played Pomona even the second half," said Dick Anderson said of the 1-6-4 defeat. "We didn't play against them, but we should have played better."

Cal State Los Angeles, which finished last with an 8-4 record, won the Mustangs, 1-6-4. After a disappointing 1-6-4 defeat to Northridge last week, Cal Poly managed to score 2-1-6 in 16:13. In one of the most exciting games of the tournament, Northridge took an early 3-4 lead before Cal Poly outscored its opponent 6-1 to be in the last quarter. Northridge placed second in the league with a 4-6 record.

Asked about his feelings toward the season, Anderson said, "I wasn't pleased with the season. But we're a good team. We just started to play this weekend and we should have three weeks ago."

Hunter was named to the first team all-CCAA squad, according to Eric Burdick, publicist director for the CCAA. Griffin joined Dave Parnaf on the second team squad.
