The enrollment roller coaster starts down
Pedaling politics

Cal Poly may soon be a pedestrian’s paradise if some members of the Student Affairs Council have their way.

The SARC Administrative Committee is investigating a proposal to ban bicycle riding in the academic core—the heart of campus bordered by North and South Perimeter Roads.

The ban would not affect bikes in the core, but it would require bicyclists to walk their vehicles through the area.

As all pedestrians, and many cyclists realize, bikes can be hazardous to one’s health. It may be very healthy to pedal to classes, but it gets awfully damn hazardous when some idiot rolls a big hill by the Administration Building is the ideal defense course if the walkers are used as pawns.

Bicyclists have been involved in a number of accidents on campus.

Friends too far?

It’s often loudly said that the streets of San Luis Obispo roll up after 5 p.m. While it may seem that way during the school year, it really happens during the breaks.

Vacations mean a mass exodus of SLO’s annual behaviors, such as the Philbin Program, Cielo Ambiente, Agatha Christie, Graham, and Joan Rivers, and I am sure that many cabinet members can try to find somebody looking for something to do.

Backwards movement

For 11 years, the Orient Express has been the world’s most glamorous train. It inspired writers of tales of mystery and adventure, such as E. Phillips Oppenheim, Erle Stanley, Agatha Christie, Graham, and Joan Rivers, and I am sure that many cabinet members can try to find somebody looking for something to do.

The proposal is still in the planning stages and must be approved by the Student Educational Affairs Committee. The proposal, a report by the Administrative Committee, is to be recommended to the Student Affairs Council, then to the Student Affairs Council Committee, then to the SARC Committee. The proposal then will be approved by a majority of the student body.

The ban would not affect students who live in campus dorms, but it would require bicyclists to walk along the one-way roads.

To make it easy the Housing Office has started a referral service for students needing help. The service supplies a list of names of students in a similar position.

If you’re going to be in town over Christmas vacation and want to meet some people, go sign-up at the Housing Office. You’ll hate yourself if you don’t.

The fan’s best friend

Our readers write...

Editor: The ongoing “I found it” campaign has been wearing on my nerves. It reminds me of “christians” who are constantly preaching, their rationale being that they “care about” me. Somehow I don’t think very highly of people who say they know what is best for all of us. Better for us to have a say in what we want.

In effect the “christians” are saying they know more than “non-christians.” I grant that they believe in something different than I do, but to say that belief is better than mine is highly egotistical, and obnoxious to me.

I won’t argue the right to believe in anything; I just ask that my ability to manage my own life be respected by you and by this incessant call to “believe.”

Cris Vanderwall

Editor: The bicycle issue was initiated by a SARC rep, from Business and Social Science. The issue was presented before SARC and was referred to the Administrative Committee. Concern was expressed for the safety of pedestrains within the academic area. There has been a history of bike-related accidents involving pedestrian-bicycle-cyclist collisions. The current proposal would require bicyclists to walk the bicycle within the academic area. There has been a history of bike-related accidents involving pedestrian-bicycle-cyclist collisions. The current proposal would require bicyclists to walk the bicycle within the academic area.

Test cancels science requisite

Representative of biology that the CSUC thought was important," said Thomson. While the CLEP test still being considered, the committee has opted to develop a test of its own. The test will be given in an experimental capacity to biology students at several campuses in the CSUC system, not including Cal Poly.

"The reason for the experimentation, according to Thomson, is to help standardize the test for the entire CSUC system," Thomson said he hopes for a final version in February. Thomson emphasized the test is not for biology majors. It is only for students who need a single course to satisfy a life science general education requirement.

The test would be worth four and one-half quarter units—three percent units—and would be given on a credit basis, without grades.

Students already enrolled would be able to take the test before proceeding with the course.

"My estimate would be not more than 10 or 15 percent of all students could pass the test," Thomson said.

"However," he added, "if those confident enough to actually take it, probably a good percentage would pass."

CLEP tests already accepted at Cal Poly for credit in general education classes include English composition, humanities.

Although the CLEP tests are usually taken by non-and transfer students, any eligible student may receive credit upon passing a test.
Although Cal Poly was part of a state-wide college and university full-time equivalent student enrollment decrease, the university reportedly turned away more than 400 applicants for fall quarter.

According to the latest Quarterly Enrollment Report on Student Enrollment, Cal Poly FTE enrollment this fall dropped by 1.4 per cent as compared to last year. But according to Lowell Dunigan, director of Institutional Research on campus, the decrease was short of expectations. (FTE enrollment is based on students carrying 15 units or two students carrying 7.5 units.)

Dunigan explained the applicants were turned away in an attempt to reduce the campus over-enrollment. The 1975-76 campus enrollment exceeded projections by more than 650 students. A three-year enrollment plateau of 15,000 FTE students has been adopted by campus administrators, but over-enrollment two years running has undermined the university's enrollment policy.

The result: The administration, which has been budgeted on the basis of 15,000 FTE, was under-funded according to Dunigan.

Dunigan explained this year's student applicants were turned away in an attempt to reduce the campus enrollment to the 15,000 FTE figure. But a higher-than-anticipated percentage of returning students and first-time students who received space reservation cards, lined up at registration, once again inflating the campus population and stretching even further the budgeted university dollar.

The quarterly report released by Dunigan's office, last week showed the official FTE enrollment at Cal Poly for this fall was 14,829 compared with 14,961 a year ago. Total campus enrollment however, increased this fall from 16,100 to 16,150.

"We were hopeful this fall enrollment would be reduced by approximately 650 students in bringing FTE enrollment in line with the budget, but predicting the number of returning students and other variables is a sensitive business and not one predictable," Dunigan said.

The university has apparently accepted the increased enrollment trend, because Dunigan and the policy to stabilize enrollment at the 15,000 FTE students has been abandoned.

University Provost Robert E. Kennedy recently asked for a budget revision for the current year and for the 1977-78 year based on an increase in FTE students. The requested budget-increases were based on 16,500 FTE students rather than 15,000 FTE students, which has been the base budgeting target for the past two years.

Cal Poly had a decrease in FTE students from last year, while the remainder of the 14-campus CSUC system experienced a 1.5 per cent increase in the CSUC system enrollment.

A spokesman for the CSUC Chancellor's office said that for the last 16 years enrollment had steadily increased. This was the first year showing a decrease. An unexpected increase in enrollment occurred last year, according to the spokesman. Instead of the 1.5 per cent increase predicted, enrollment in the CSUC system went up 3.4 per cent.

Unfortunately for many applicants, however, the campus is overcrowded and they are turned down. But in another two years or so, they might be turned down by even more overcrowded campuses.

Architecture building tentatively ready

The university campus next year will be served as actual architecture laboratories, but instead of using these rooms for instruction, faculty members have requested that the rooms be used for teaching and research. According to George Haslein, dean of the School of Architecture and Environmental Design, the concrete, multi-story building is scheduled for completion this quarter, but it will not make its expected completion date.

"We're trying to be optimistic that all the furniture will be here, but if for some reason it isn't, we'll rig up something temporary," Haslein said with a wry smile.

Third-year architecture and landscape architecture students will be moving into the completed building, according to Director of the School of Architecture and Environmental Design, William Brown.

Fourth-year students, who were veterans this quarter, will move into the area west of the library known as the "jungle." Haslein noted, "The students voted to have the library building moved out of there, so that's where we placed them."

But fourth-year archies may find themselves nomads once again.

If Cal Poly receives anticipated federal funds a new library will be built on the site where the jungle is now located.

Construction of the new library would begin immediately after the funds are received, which would leave fourth-year archies and landscape archies without a home once again.

Haslein added that construction of the building did not go over costs but some of the extras such as competition ceilings and an outdoor patio were eliminated to stay within the budget.

Campus groups to perform mass and concerti in concert

The traditional end to the quarterly Arts and Humanities series will be a concert by campus music groups. The fall "Who is Man?" series will end Nov. 13 with a concert by the Cal Poly University Singers and the Chamber Orchestra.

This is the first year the Chamber Orchestra has joined in the series. Under the direction of Clifton Swanson, the group will perform two works. W.A. Mozart's Symphony No. 37, one of his 40 symphonies, will open the concert. The Chamber Orchestra will also perform the Concerto Grosso No. 1 in D major by the Italian composer Francesco Geminiani, student of A. Scarlatti and A. Corelli.

The University Singers—John Russell conducting—will sing the songs of Incarnation by Earle Gove in the 8:15 p.m. concert in the Cal Poly Theater.

The two groups will combine forces for the performance of the Masa in C major by Franz Schubert, a work written early in Schubert's career and rewritten late in his life. Solos for that piece will be sung by Gerald Navarro, soprano; Michael Reynolds, tenor; Christopher Rutherford, bass. The site of this performance will be announced.

Admission to the concert will be free. The concert is the culmination of the "Who is Man?" series designed to "reflect the record of man's experience and potential as a creative, imaginative and reflective human being," according to Dr. Jen Ersson, dean of the sponsoring School of Communicative Arts and Humanities.
Happy fifty-four hours

POLY FOOTBALL: The Mustangs meet UC Davis in the Mustang Stadium on Saturday at 7:10 p.m. Price is $1.80 for students, $3.85 for general public. Reserved seats are $3.70 for students and $5.95 for general public.

VIETNAM PHOTO EXHIBIT: Vietnam war veteran and San Luis Obispo resident, Richard Yaco presents "Memories," a photo essay on the Vietnam war at the Art Center. The photos were selected from over 8,000 negatives taken while Yaco was on duty with the U.S. Marine Corps as a combat artist. Viewing hours are from noon to 9:30 p.m. Tuesdays through Saturdays.

CAR WASH: After the car wash and trucking around all weekend, Alpha offers you the chance to have your car washed and cleaned. Bring your car to the Sun Texaco Station on San Luis Road between 10 a.m. and 5 p.m. on Sunday.

Be listening Saturday night when the CAL POLY MUSTANGS meet the U.C. DAVIS AGGIES at Cal Poly. A must game for both teams.

Hear all the play-by-play action with Steve Gale and Danny Clarkson beginning at 7:10 p.m. on Mustang Radio Network. KPRP, Paso Robles, KHEZ Lompoc.

Poly, UC Davis to clash in highlight of year

by CRAIG REEM
Daily Sports Writer
With a combined record of 15-1, Cal Poly and the University of California at Davis will clash helmets in what should be the highlight of the football season at Mustang Stadium Saturday night.

Davis, 8-1, is led by quarterback Jim Speck. Speck has compiled roughly as many passes as the Mustangs have thrown this year. He has 112 completions in 208 attempts.

Speck will have the use of a multi-varied offense that tries many different patterns in trying to loosen up the opponent's defense. Defensively, "Davis is sound," said Head Coach Joe Harper Thursday.

Cal Poly, 8-1-1, will counter with two quarterbacks, a combination that has worked remarkably well the past two games. Starter Bob Ansari and freshman Craig Johnstone will split the action.

Harper said he will use two tailbacks in Bob Truders and Rocky Chapman. This season they have alternated in brilliance as well as in position. The Mustangs have finished last in total defense in the California Collegiate Athletic Association.

Defensively, "Davis is sound," said Harper Thursday.

Cal Poly Pomona. Poly has given up an whopping 550.5 yards each game.

Whatever the reasons, Poly has got to put together the type of game they are capable of. This season offensive lags have been coupled with defensive lapses and bad luck have undermined an otherwise sound football team.

On defense, the Mustangs have traveled well in the middle of the field this season.

A Poly win could help buoy a slim chance in post-season playoff. If the Mustangs are invited, next week's Thanksgiving game against Sacramento State here will be cancelled.

Who will win in Mustang Stadium? A difficult question. Both teams are coming off conference championships and each team thinks it can win. My choice: Cal Poly by one point.

**FOOTBALL PLAYER OF THE WEEK**

Dana Nafziger, Sr. Tight End. 6'1" 212 lbs. 23 yrs. old from Cypress.

Nafziger did an outstanding job of blocking which was instrumental in the Mustang's 26-22 come from behind victory over Cal Poly Pomona.

Women are winners in volleyball -- finally

The Mustangs have taken the 2003 season by storm, with women's volleyball the leader in the Western Intercollegiate Athletic Conference.

On Tuesday night in Santa Barbara the Women's volleyball team made an unbelievable comeback to defeat Westmont College there for Poly's first win of the season.

In the rainy campus gym the Poly squad, after dropping the first two games 25-19 and 25-14, shook the losing attitude that has been their trademark this season and came back by winning the next three 15-13, 15-8 and 15-8.

It was not done in the most hospitable environment, either. The home fans got so rowdy with their "cheers" that the contest had to be halted on two occasions.

Supposedly on a 6-13 team with those circumstances is supposed to crack. But you simply believe, "They finally looked on the other side of the court," said a happy Linda McArthur, "and realized they were better than Westmont. The girls believed in themselves."

Although it was tough to single out any particular star in the recording win, McArthur praised the blocking of Kris Funk and Tam Tirn.

Poly finishes its season at Cal State Los Angeles Friday.

"Now that we've got the first one," said McArthur, "I've no doubt we can go down there and come back a winner."
