Searching for runaway parents
Editor: Now amusing to read that Mustang Daily and the School of Communication Arts and Humanities are still wrestling with the question "Who is Man?" The answer is obvious: Man is that creature who persists in using his own name as a label for all human beings. Since this is the case, I am not surprised that he has trouble figuring out who he really is. I am not Man or even part of Mankind, but perhaps I can help in the search, since I do belong to that larger clan called the human race.

May I respectfully suggest that perhaps you are asking the wrong question, and that is why you are having trouble with the answer? A more pertinent question might be: What is human?

Use of the word "Man" to describe all human beings is impermissible since man is also a gender-specific word meaning male human being. It is no more logical to use the word "Man" to describe the entire human race than it would be to use the word "Woman" for that purpose.

Granted that it is customary to speak figuratively of "Man" when one is referring to the human race, perhaps it behooves us to ask why it is customary to speak in this manner?

When the founding fathers signed that immortal document known as the Constitution of the United States, they were created equal, that they are endowed by their creator with certain unalienable rights that is the case, I am not surprised that he would have rebelled if they were not granted more rights in the new society than they had enjoyed in the old.

Now that many people in our society are realizing what it is to be male, female, and human, it is time to reevaluate our language habits to reflect more accurately what we mean to say.

Imperative language is a hindrance in the search for what it means to be a human being. We must expect more from a school that is dedicated both to communications and to the humanities.

I am both a pedestrian and a biker when it comes to getting around campus, and so the problem of pedestrians and bikers colliding is one of great concern to me. The newly proposed bike ban, which would prevent people from riding their bike in the inner core campus, seems to be an incomplete solution to the problem, there must be alternatives. Some sort of quick transportation is necessary and the bike is the most popular and efficient alternative since skateboarding has been banned and the why I am against the proposed bike ban and give you the following ideas to go on.

Different modes of transportation, like the bicycle, were invented to get people from place to place faster than walking, so that people could use more time doing other work. With the student bikes cut down on the time it takes to go from one class to another, wouldn't it be healthier for the student and fat and helpful for the student and come in the school building and make us on time for a class. In all cases, I will see that you have something. If you won't have to tell me on your bumper stickers.

Why did all the people in Georgia have peanut butter sandwiches for Thanksgiving? Because they are the only food left without support is a rising statistic that is of concern to all parents. The division's methods and people are on the road. (Cover art by Tony Herti and Rob Fawcett)

When you shed your worldly goods and possessions because they're in the way of your love, I'll look. And when you look from within us at our plight and crying for help and pain. And now in the early fifties, in the early sixties, known as the 'Trans Europ Express' and the "Direct Orient." It is this later train, which doesn't even have a porter in the room." This new sleeping car, which will die next month. Few have ridden it. I cannot but express my pleasure that I am the only one to pass and praise the new intercity express network formed in the states, known as the "Trans Europ Express," the new equipment, the courteous personnel, and timetable accurate runs which character it most to the new European railway systems. America's AMTRAK has tried there is much to copy, and is now looking towards to do so.

Solution offered for holiday bird deaths

by BETSY SUSMAN
Daily Aztec Edition

The flurry of death reports which began in November when over 400 pigeons and blackbirds in San Luis Obispo since the Thanksgiving holiday has apparently subsided as there have been no bird deaths reported in the city since Sunday.

Charles Mendenhall, Cal Poly agriculture information specialist, said the probable cause of the bird deaths was a chemical called stavicide used at Cal Poly to help control a weed problem. The university reported Friday that 70 pounds of grain treated with stavicide were distributed in a controlled application near Library on campus between 6:30 a.m. on last Tuesday.

Mendenhall said the birdcane was developed about 10 years ago as a herbicide to control the prevention of seedings. The herbicide works in the bird’s kidneys in the same way alcohol affects humans, deteriorating the tissue. The herbicide has no secondary effects.

Overpopulation of birds is a continuing problem in San Luis Obispo. The birds create a health problem by spreading disease to both livestock and humans and cause severe damage to crops and buildings.

Country Agriculture Commissioner Earl Kalar said the birdcane had been used at Cal Poly for several years to eliminate excess crops. According to Mendenhall, the university got a permit from the commissioner’s office to use the stavicide. Country representatives treated grain with the stavicide, delivered it to Cal Poly and supervised its use.

Although the herbicide had been used frequently in the past years at Cal Poly, the episode over Thanksgiving vacation caused a minor sensation in media throughout the state. Mendenhall said it was poor timing and a lack of communication that led to the mystery.

"This is the first time the birds have died in the downtown area," Mendenhall said, "They have previously died on campus and in the trees on California Blvd."

As a part of such a control program, workers go around and collect the dead birds. Mendenhall said apparently the street sweepers downtown got to the birds first and so county officials were not aware of the problem. People called to report dead birds were referred to the wrong offices.

It was Wednesday night before those in charge were aware of any problem and by Thanksgiving the people were not available for consultation, creating confusion in the media.

Mendenhall said communication was limited until Friday, when the mystery was cleared up. Media sensationalism included one speculation that the deaths were caused by fallout from recent nuclear experiments in China.

Kalar said they had no explanation as to why birds died in the downtown area this year in such large numbers.

"This is one we haven’t been able to figure out. They roost in town and fed at Cal Poly. In previous years the birds have not died on campus.

Mendenhall said some birds were sent to the State Department of Fish and Game for testing. He said apparently they have assumed the cause of death was the stavicide and have done no further tests.

The stavicide is no longer active in the grain around the campus and in the trees on California Blvd.

Engineers: Find out about the Nuclear Navy

This year the Navy will seek about 500 of the country’s top college graduates for its nuclear energy program. It’s the most comprehensive training available in today’s most exciting energy field.

It’s got to be. More than 70% of the country’s nuclear reactors are operated by Navy men.

So our standards are extremely high. To qualify, you must have a solid background in engineering, math or physics. And have what it takes to become an officer in U.S. Navy.

Undergraduates can qualify also. If you're selected as a junior or senior, the Navy will pay you over $100 a month during your senior year.

You can find out about the Nuclear Energy Program at the student career center on campus Dec. 7-9, 12-2, in Arts Building, Room 121. No charge.

SPECIAL FEATURE: Movies on Nuclear Propulsion and Naval Aviation will be shown Tuesday, Nov. 29, from 1 to 7 p.m. in Arts Building, Room 121. No charge.

In 1589 King Wilhelm IV established the German Beer Purity Code: malt, hops, and water were to be the only ingredients in German beer. Thus, legendary Bavarian beer was born.

And the beer Wilhelm IV selected as his royal brew or "Hofbräu" was, of course, the very best.

Still made today according to that old Purity Code, Hofbräu is available now in America. Imported and brewed under special agreement with the Original Munich Hofbrauhaus, Germany's monument to fine drinking and dining.

Put all that in your stein and drink it. Hofbräu is extraordinary. Hofbräu is available through all licensed outlets from your local Coors distributor.

The first beer came from Bavaria.
The best one still does.

**Opera night**

An opera program entitled "A Night in Vienna" will be held at the Cambria Pines Lodge on Monday and Tuesday, Oct. 4 and 5. The program will be presented by the California Opera’s Repertoire Theatre and will feature music from Strauss, Strohmeng, Mozart and Lehar, as well as gypsy and contemporary Viennese tunes.

A choice of Garden Bistro and print rib will be offered during the presentation. Dinner orders and reservations may be made at 927-4200. The price of dinner and the show is $10.50. Some seats are available without dinner for $4.50.

**Senior list in library**

A preliminary list of students eligible for preferential registration next quarter is now posted in the library. The list includes students who completed 155 units at the end of summer quarter and who are currently or have previously enrolled in introductory senior project courses.

The list will be updated to include last quarter grades and a revised list will be posted outside the entrance to registration on Jan. 3. Students should report any omission to the Registrar’s Office, Administration 219, before Dec. 10.

**Education conference**

The Far Western Philosophy of Education Conference will be held here this weekend. College educators from 10 western states will read and hear papers on the philosophy of education.

**Bird lore at Morro Bay**

Bird lore will be discussed by Ken Leigh, ranger at Mono Bay Museum of Natural History. The public is invited.

**Tax Information**

An advanced program on tax information will be held at the Cal Poly Theatre on Saturday.

The program is being sponsored by the accounting department in cooperation with the Internal Revenue Service. Topics will include estate and gift tax, non-taxable exchanges and current developments in tax law.

The registration fee of $20 includes outlines, refreshments and a luncheon.

For further information, phone 541-1600.

---

**Eight-mile run**

Runners will have a chance to test their speed and endurance this Sunday on an eight-mile trek through campus. Sign-ups will begin at 9:15 a.m. and the run will start at 10 a.m. Runners will start and finish in front of Kendall Gymnasium. Certificates will be given to all finishers.

In case of rain, the event will be cancelled. For more information, contact Mary Stallard at 546-2198.

---

**Human skills workshop**

A Cal Poly Extension workshop on human relations skills will be held Friday and Saturday.

Bob Orting, a counseling psychologist at the California Men’s Colony will teach the one-unit course. The theories of Carl Rogers, Gestalt, Transactional Analysis and assertive training will be emphasised.

The workshop will meet from 5:30 p.m. to 9 p.m. on Friday, and from 9:30 a.m. to 4 p.m. on Saturday at the California Men’s Colony on Highway 1. Preregistration and consent of the instructor is required and the course fee is $22.

For information, phone 546-2198.

**Way Campus Outreach**

Way Campus Outreach is sponsoring a public service project of power for abundant living. The event will be held on Friday at 7:30 p.m. in Room 219 of the University Union.

**Prescheduling**

Prescheduling for all continuing students planning Winter quarter will be held at 11 a.m. on Thursday. Consult your department office for information on locations.

**PALS meeting**

A PALS meeting will be held tonight at 7 p.m. in Room 219 of the University Union. Future events, organizational details and the recruitment of volunteers to work on the Luis Obispo will be discussed.

**Christmas crafts**

A Christmas fair will be held at the University Union Craft Center on Friday and Saturday from 11 a.m. to 7 p.m. Items such as leather work, ceramics, jewelry and hats will be sold.

**Social Science speaker**

Probation Services Coordinator Joseph Moso will speak as a Social Science Club meeting on Thursday at 11 a.m. He will discuss the duties and opportunities of probation officers. The meeting will be held in Room 219 of the Business Administration and Economics.
It looks like the basketball is stuck to the floor at Stanford. Transfer guard Lewis Cohen moves the ball upcourt for the Mustangs. He made an impressive debut with 13 points, 12 assists and seven steals in leading Poly to a 79-61 win over the Cardinals. (Daily photo by Alan Hafthill)

Poly shoots down Stanford in opener

by CRAIG REEM
Daily Sports Editor

Last week basketball coach Ernie Wheeler predicted that the Mustangs, 13-13 last year and last in the California Collegiate Athletic Association, would be a different team this season. He predicted better floor leadership, better shooting and more flexibility.

Saturday, Wheeler made true his promises as at least one game as Cal Poly shocked Stanford University there, 79-61 in its Cal Poly's greatest. He credited the win to preparation.

“Last week basketball coach Ernie Wheeler predicted that this win Poly's first victory ever over a Pac-8 team on the road.

Let by 8-4 Gerald Jones and junior transfer Lewis Cohen, the Mustangs left the Cardinals in the red as they outlasted, outplayed and stole everything except the Hoover Tower from the Palo Alto campus.

Jones, who made eight of eleven shots and shared scoring honors with Mike Bannone with 16, opened the Poly scoring by hitting two consecutive shots from the left side.

The Mustangs trailed most of the first half. Behind 32-25 with 2:32 Poly scored on successive lay-ins by Cohen, Bannone and Jeff Kerl. They took a 31-29 lead into the locker room.

With the score 56-47, Poly added 14 unanswered points to take a 70-47 lead and the game.

“One in five years here,” he said, “we had the best six weeks of practice ever. They (the players) all worked hard, they like Cal Poly and everything is right.”

“We played like we practiced. We did a much better defensive job defensively than I had expected. But we work harder, defensively than anyone else. To be successful, we have to play good defense.”

Wheeler said the team played without a lot of “fear.”

Poly was even for Cal Poly was out in the second half with a slim two-point margin and quickly ballooned in lead to 57-44. Jones and Bannone took turns scoring with shots that included one from 25 feet and two lay-ins.

By the end of the night, Wheeler made true his promises for at least one game as Cal Poly shocked Stanford University there, 79-61 in its Cal Poly's greatest. He credited the win to preparation.

It is no secret that Jackson loves the flair of publicity. New York can supply him with a better 1976 record than any other city in baseball.

Jackson became the first five free agents to sign with a club that had a better 1976 record than his former team. The Yankees made it to the World Series, while the Oakland A's missed the playoffs.

Ruth, Gehrig, Mantle and... Jackson

Rogge Jackson, the most celebrated of the free agents in baseball, officially signed with the New York Yankees for a reported $12 million to be spread over five years yesterday.

The 37-year-old outfielder turned two offers of lesser amounts. The San Diego Padres were willing to sign Jackson for more than $11 million, while the Montreal Expos were run-up with an offer of slightly less than $12 million.

Jackson will be getting $2 million in 1977, with $11 million of that amount payable over a period of 10 years.

Rogge Jackson was approached by Yankee manager Ralph Houk personally and Jackson, who has played for the Mets since 1970, decided to sign with the Yankees. He has

Mustangs end season on winning note, 34-10

by CRAIG REEM

Daily Sports Editor

In gaining 516 total yards—the equivalent of going up and down the football field 11 times—the Mustangs ended a successful yet frustrating season by beating the University of Nevada at Mustang Stadium Thanksgiving morning, 54-10.

While most of the nation was raving in anticipation of watching O.J. Simpson set yet another rushing record for the Buffalo Bills, 2,050 fans loyally attended the feast they were eating turkey or backs. On those Saturdays football as the jerseys on their backs. They were as green to college like falling dominoes. The Mustangs fumbled the open-

by KEVIN FALLS

Daily Staff Writer

For most of the seniors it wasn't four years ago when they were as green to college as the jerseys on their backs. On those Saturdays—days just like football for literally thousands of hours, it is all coming to a close. It seems an appropriate time to see what's going on in some of the senior's heads.

Rocky Chapman, the swift running back for the Mustangs likes the game but isn't going to miss it. He said he is not missing it because he is over. "Sure I'm a little sorry that it is over," said Chapman. "But I am getting a little old to be playing football for 14 years. I'll probably find something else that will demand from my homelife—as we all do."

Offensive tackle Paul Freberg loves playing but feels he doesn't have a future in the pros. "I had a super time playing at Cal Poly," said Freberg. "I enjoyed the game, but it is not a little old to be playing football."

We have to remember the real reason that we're in college," Chapman said.

Kevin Freberg. "But I am getting a little old to be playing football for 14 years. It all has to end sometime."

"And that's to learn. Don't get me wrong, I'm thankful for football in that it gave me a free education and a chance to know some great guys. But my major concern is getting into medical school." Dana Nabiger, the all-league tight end, who has been contacted by some pro clubs, agrees that football is the equivalent to a fine curriculum in that the two are supposed to produce winners. All the players interviewed felt the program at Poly was successful in doing so.

"It's not the big time," said Nabiger, "but people who have heard of us know we're hitters and winners. I like the atmosphere of closeness. I really can't think of a more enjoyable place to play."

All the coaches were interviewed in what you were doing in the classroom as much as how you performed on the field," said Chapman.

Now it has all ended. Gone are the cheers, winning and friends with a goal. But memories of a world that is looking the positive, said Chapman.
