Marketing marijuana in SLO
Credit and attention go generally to politicians who create the new, not those who adapt the existing to changing circumstances or to those who scrutinize the anachronistic old. State legislators understand this familiar principle. That is one reason why California now has more than 420 separate state government bureaus and departments.

The incentives are set up wrong. They discourage the purging and pruning of government's branch to weed out deadwood, so that some programs together and separate others for maximum effectiveness and to keep productive branches healthy.

Last year the Colorado Legislature recognized these facts, and enacted something called a sunset law in hopes of reducing the tendency toward centralization and organizational clutter. The law calls for regular review of each and every bureau, agency and program of state government at five-year intervals. If the Legislature misses a program's review deadline, the program is automatically killed.

Florida and Louisiana quickly followed suit with similar laws of their own; variations on the theme were proposed, but defeated, in both the California Legislature and Congress.

Now several sunset bills have again been introduced in Sacramento as the new Legislature begins its work. They deserve the attention needed to make possible the enactment of a program review statute this year.

Sen. William Campbell (R-Whitster) has reintroduced a bill he proposed last year. It would subject all 800 bureau to a five-year review and confirmation cycle. Another pending measure, by Sen. Cence L. Raines (D-Ontario), would give the governor an initial set with thorough review of the California Department of Insurance.

And it's clear that California would benefit from adoption of ideas common throughout — a regular system for the state government to pare and prune, so that each new sunset law and sunset review call for one for California should be structured.

It's too early to say which of these approaches will prove the most realistic and promising; legislative hearings can be expected to provide more insight. The lawmakers might even decide on zero-based budgeting as practiced in Georgia and advocated by Jimmy Carter.

More rain on the way for crops

by ELENA KOSLER Daily Associate Editor

A new storm fronts brought enough rain to bring the winter season to a close on Friday. The storms were expected to continue through Saturday, bringing much-needed water to the crops in the area.

These new rains will benefit the local crops, but more rain will be needed for future crops, according to Dr. Corwin Johnson, crop science department head.

Winter enrollment stands at 14,737

by BETSY SUSMAN Daily American Editor

With the preliminary enrollment figures for this quarter in, it appears there will be more elbow room around Cal Poly for the next 10 weeks.

According to Donald McCabe, public information officer, a total of 14,737 students registered during the two-day period. This is down from the 15,198 students who signed up last quarter and also down from the 14,817 enrolled Winter quarter 1976.

"From our crystal ball we were shooting for 14,756," said Registrar Gerald Punce. "We have another week for late registration. This usually provides extra people——or rather money——worth.

"There were no figures available yesterday as to the number of full-time equivalent students enrolled this quarter. (FTE enrollment is based on students carrying 15 units or two students carrying 7.5 units.) Cal Poly's budget is based on the number of FTE students.

Registration was a time of frustration for many students as they waited in long lines for a chance to turn in a form or to pull cards for classes——usually already closed.

Punce, who is concerned with making registration run smoothly voiced his reaction to the most recent records:

"I was thankful that it didn't rain. It came down before hand and after which made it easier for us. I didn't hear too many complaints from students but I'm usually the last to hear."

A 44-day drought and a very dry 75-76 season has left the ground so dry that the rainfall seeps into the ground instead of running off into the reservoir.

The recent rains will be enough to fill the reservoirs on campus, according to Johnson. "What must be filled to insure campus irrigation is the Whale Rock Reservoir."

Whale Rock Reservoir is jointly owned by Cal Poly, California Men's Colony and the city of San Luis Obispo.

"So many acres of water are allocated to Cal Poly," said Johnson. "Last summer we used a large amount of our water allowances due to the drought. If Whale Rock Reservoir isn't filled, there will be a water shortage. In those instances, domestic use of water comes first."
Probing a SLO pot pusher’s mind

by CRAIG REEM
Daily Associate Editor

Like many Poly students, George H., gets up early, rides four miles to school on his bike and studies during class breaks. Yet, unlike most Poly people, George pushes drugs.

George learned about drugs and dealing from his friends in Los Angeles. They used to have marijuana collection contests on the block so they could accumulate the most. From there, they learned to sell it profitably.

"Last summer," George said in a recent interview, "I was making about $100 a week in Los Angeles. I was financially secure."

George, whose grade point average is 2.7, brought his business to Poly. Using certain safeguards he lowers the chance of getting caught:

"There are some rules you have to follow, the people I sell to are all my close friends, so I trust every one of them. I wouldn't sell to strangers—it's not a good policy. Most people are selling three to four pounds of marijuana nowadays and selling that to their friends."

Asked if he sells small quantities, such as lids (approximately one ounce), he laughed and said, "I never sell just a lid." Another rule is that he gets the money first, so he never gets ripped off. And the stuff is in and out of my room in about two hours, so there's little chance of getting busted. Does a pusher feel a lot of pressure?

"Last year it was really getting to me," he said. "A lot of rumors developed in the dorms (where he was living), like phones being tapped. But I didn't get depressed." Last quarter, George spent most of his time studying for finals. He also like to eat them for concerts, because you feel more like dancing.

"I'm sorta losing interest," George complained. "I'm going for quality instead of quantity." George made about $2000 on his last run.

"Usually I bring up 10-15 pounds of marijuana," he explained. "I sell a pound for about $100. But this quarter I'm sorta losing interest. I'm going for quality instead of quantity." This quarter could be profitable for George. He said that demand is high and he has a contact on a new shipment of "Columbian," a potent, expensive type of marijuana.

George is for the legalization of marijuana. He believes with it legalization, the drug pusher would be forced out of business. However, he opposes the legalization of other drugs, explaining that if "they opened up everything else, it would deteriorate the young people." George is for the legalization of marijuana. He believes with it legalization, the drug pusher would be forced out of business.

"I have mixed views on cocaine, like what it does to society. People steal for marijuana. I tried acid for awhile, but I don't do it anymore. It's not good for you, because it pops your brain cells."

GEORGIE POINTS OUT A drug user should understand the consequences of heavy drug usage. Drugs are "like anything," he said. "If you do too much of it, it's bad for you."

George is the "straight" crowd. George said, "They're both more or less ethnocentric. I'm sure the drug crowd is saying that this is where it's at, while the straight crowd is saying that they must be eternally." People have different values, George explained, and that makes a difference between the two.

When asked about his personal values, George recalled the time he was busted for possession of pot and just laughed. "It was totally mellow. I just went in and out of jail. All I did was get my papers out of bed."

George believes everyone should try marijuana and "at least give it a chance to see if they like it. I mean if everyone likes the feeling of being drunk, I'm sure they'd like the feeling of being stoned better. When you're drunk, you wake up the next morning feeling rough. But after being stoned, you just feel hungry."

There is a misunderstanding between the drug crowd and the "straights," George said. "They're both more or less ethnocentric. I'm sure the drug crowd is saying that this is where it's at, while the straight crowd is saying that they must be eternally."

George explains it "It's just the way they were brought up."
Former student loves being lost in his woodwork

From his twinkling blue eyes and easy chuckles to his trim army green work gear, Bob Hapgood could only dole out for a brown-haired Santa Claus.

Story and photos by LEA BROOKS

Hapgood graduated from Cal Poly in 1975. He returned to San Luis Obispo area from a high-paying salesman representative position with Fuller Paints in Northern California.

Now he works full time at the San Luis Obispo plant of that company's lab and took advantage of that situation to learn more about the different products.

Hapgood feels his five years of education (two years at Cal Poly and three at Poly) were well spent investments. He was a social sciences major with a political science concentration, but also took architecture and forestry classes.

"When I was working for Fuller, I had accounts with architecture firms," Hapgood said. "Every place I went had at least one Poly graduate. We had something in common to talk about. It was a good sales tool."

Hapgood said his education taught him logic and reason.

Hapgood was involved in architecture and a Leo's Club project. He ran for city council against Keith Gurnee and later used the experience as a senior project.

Hapgood's decision to return to Atascadero centered around the desire to be closer to his family. A major change in his salary came about with a recent conversion to Christianity.

A desire to work with his hands and produce a high standard of workmanship helped prompt the decision. In addition to his Fuller Paints job, Hapgood did refinishing and sold a little unfinished furniture in the evenings and weekends, but he lost money.

Now he works full time at refinishing.

"Some people want to forget the past," Hapgood said. "But there are a lot of beautiful things in the past. Antiques are a part of the past. I get a lot of personal satisfaction while I see a customer's happy face when grandma's antique is restored."

Jews for Jesus music
Jews for Jesus will sponsor a musical performance in the
University Union Plaza at noon Wed., Jan. 12.
A Jewish singing group, the "Liberalized Wailing Wall"
will give a musical presentation.
A second performance is scheduled for the same day, Jan.
13, at 7 p.m. at Grace Church (Ojai and Pismo).

Stop smoking now
Michael Looney, health educator at the Health
Center, is organizing a clinic to help students stop
smoking. Relaxation training, self-hypnosis aerobics
and reinforcer smoking training are some of the techni-
ques involved in the clinic.
Students interested in participating in the clinic
should call Looney at the Health Center. A evening
meeting will be arranged and the clinic is free.

Extends purchasing power
Are you wondering where all the money went after the
Christmas holiday? Learn to get more for the money you
have and extend your purchasing power through the
CARING and SHARING consumer-c Chef classes
on each
month in your location. These classes for both men and
women are free and available to anyone wanting to "live
better for less.

This week there will be two meetings presented in the
beach communities of the SoCal District. On Sunday, January
20, CARING and SHARING will hold a general meeting in Los
Oas at the Bevoyd Elementary School, 1230 8th Street,
and child-care will be provided at this location. On Friday,
January 21, a program will be held at 7:00 p.m. in the
Culver Veterans' Memorial Building on Ocean Avenue.
CARING and SHARING programs are sponsored by
Guests and Allan Hancock Colleges and are under the
Vocational Education Act, Part F. For more information
call 544-6545, Extension 388 or 340.

Republicans warm but Democrats cool to $3.3 billion school plan

SACRAMENTO (AP) - Gov. Edmund Brown Jr.'s $3.3-
billion five-year school finance plan is getting rave reviews
from Republicans, but Democrats are cautious in their
comments.
The Democratic governor unveiled the proposal, which he
says can be financed from surpluses and natural growth of
existing state revenue sources rather than closing state
budget gaps. According to the plan, a state school chief Wilson
Riles and 16 leaders of the
legislature.
Key elements of the Brown plan would grant almost all
new state school funds over the next five years to low-wealth
districts and repeal restrictions on funds for preschool,
gifted and slow-learning children.
The plan would continue to grant those special program
funds—currently about $195 million a year—to the same
school districts, but without requiring that they be spent
separately from other state and local funds.
The $3.3 billion in new state support for schools would be
phased in over five years. $294 million in the 1977-78 school
year and amounts of $407 million, $600 million, $818 million
and $1.17 billion in the following years.
Currently, local property taxes raise $84 billion for school
and the state puts up about $2.8 billion.
Brown unveiled the plan a week after the California
Superior Court said that the bill's $3.3 billion special state
support is unconstitutional because it provides less
educational opportunity for children from wealthy
school districts, but without requiring that they be spent
separately from other state and local funds.

CARING and SHARING programs are sponsored by
Guests and Allan Hancock Colleges and are under the
Vocational Education Act, Part F. For more information

Lake Tahoe trip
It's snowing in Tahoe! Now you have a chance to see the
new skiing equipment you got for Christmas.

The San Luis Obispo Recreation Department is sponsoring
two buses to Lake Tahoe. Both buses will leave,

Both Greyhound buses will leave from the Slo
Recursion Center building (664 Santa Rosa Street)
will return to SLO at 5:00 p.m. Monday, Jan. 22.
Cost for the trip is $4 per person (double occupancy).
The "Weekend Special" is leaving at midnight on Thursday, Jan. 21.
The "Weekend Special" will leave at 6 p.m. Friday, Jan. 21.
During October and November, Preston has been trimming a squad of walk on players to fit into a lineup that includes eight returning players. There will be nine players that will travel.

Asked about how a coach prunes a squad of hopefuls, Preston said, "It has a lot to do with their attitude, if they have a redshirt year left and of course if they have talent."

Polly is returning with last year's record of 15-8. How does this team fare?

"We were a very green team last year," Preston said, "A lot of the guys didn't know our system. But with the addition of a couple of junior college transfers and with our experience this will be the best team ever. We might have a losing season with the teams we're playing, but the talent is there." Perhaps the unsung hero of the Mustangs, the team leader and the player with the most experience is Steve Bartlett.

Long after volleyball practice had ended and most of the students had scurried to their dwellings Bartlett was still working on his spikes in the unusually quiet gymnasium.

When he felt he had enough, the captain of the Mustang team towed off and talked of the upcoming season admit a gym half-filled with volleyball. It did not take long for Bartlett to show that he was confident.

"There is no doubt in my mind that we can win the league," he said, rubbing off the beads of perspiration from his forehead. "We're improved and we're in better shape than last year. Eight of the six returning and five starters. They'll have to earn it of course, but you get the picture. But Ken Preston (volleyball coach) is the guy who has built the team to what it is. I can't emphasise that enough."

He went on to talk about how the school doesn't hand out scholarships for volleyball and that Preston has to rely on "walk-ons" to try out for the team.

Steve Bartlett reaches high to spike the ball during fall practice in volleyball. Bartlett is expected to lead the Mustangs, 15-8 last year, to another winning season. (Daily photo by Mike Ewen).
Sports Briefs

Big mat tourny here

Former Cal Poly wrestling great John Woods will bring his Palomar J.C. team to San Luis Obispo Saturday to defend the title it won a year ago in the Cal Poly Junior College Wrestling Tournament.

The 23rd edition of the sprawling mat carnival will unfold on six mats beginning at 10 a.m. Saturday in the Physical Education Building gymnasium. Consolation activity will commence at 3:30 p.m. with the consolation finals at 7 p.m. contested on three mats. Title bouts will start at 8 p.m.

Woods, an NCAA Division I runner-up when he represented Cal Poly in the 187-pound class in 1969, has an outstanding team again this season. Palomar has won every tournament it has entered this season.

But Woods figures to get his strongest competition from teams coached by other Cal Poly wrestling grads. There’s Ken Ren at Rio Hondo, Jim Root at West Valley, Jim Teem at Arizona Western and Sam Huerta at San Jose City College to name a few.

“Usually the top place winners in the Cal Poly tournament have gone on to place high in the California State J.C. meet in March,” Hinchcock noted.

Admission is $1 for students and $2 for the general public.

Iowa awesome again

Coach Dan Gable has his Iowa wrestling team in high gear in quest of a third national title.

The Hawkeyes easily breezed through the first month of their schedule with a 3-0 record, plus seven individual champions at the Minnesota Invitational. Gable has put together a team minus four NCAA Matrix in 1980, that has won every tour-

Northern Iowa (37-5) finished third in the NCAA Division II finals and Kent-

ucky (50-9) finished 11th in the NCAA last season. The most Im-

pressive win was over last year’s fifth place NCAA finisher, Lehigh, where the Hawkeyes rolled to a 54-3 victory.

The 18 Hawkeyes who have done most of the wrestling have won 86 percent of their bouts in dual meets. Their overall record is 76-12.

“We’re off to a good start, but we’ll have to keep improving if we expect to win the national title,” said Gable, in his first year as head coach.

Immediately ahead for the team is the Midlands two straight years.

Iowa City Poly’s going to be a good test, but we’ll have to keep improving if we expect to win the national title,” said Gable, in his first year as head coach.

There is an incredible amount of respect between Bartlett and Preston. Preston says that Bartlett has all the elements of a leader.

Kelly Blixton loves to travel. She went to technical school and became an electrician

Since she was a teenager, Kelly Blixton didn’t like the work she did, so she learned to do the work she liked. She can do the same job or over one million technical opportunities available in this country right now.

Kelly Blixton loves to travel. She went to technical school and became an electrician.
