Resurrecting the yearbook heritage
Non-cost parking

Little has been done about the parking problem.

Proposals have been made suggesting a parking garage at the ideal solution, or a change in the current parking plan. But, nothing has come out of these proposals.

Now, Michael Cirovic, a faculty member from the School of Engineering and Technology, can speak up with what he thinks is the ideal solution to one parking problem—the faculty's.

In a resolution to the Academic Senate, Cirovic asked that the faculty be granted free parking because the present system is "discriminatory in favor of the faculty. It is just another way of having faculty discriminate, a needless irritation to faculty, and a poor personnel management practice."

The issue has been brought before the Academic Senate previously and gotten nowhere. The minutes of the Academic Senate meeting of Feb. 7, 1971 records the Director of Business Affairs, James Landreth, in response to an almost identical proposal:

The simple reason faculty and staff pay parking fees is that the state requires them so, on all campuses, Landreth explained. It's the law.

Landreth went on to venture his opinion of the faculty-parking system and used the same argument that Cirovic used. Landreth said:

"I think the state should provide parking without cost to faculty and staff. Other state employes in the county (i.e., Men's Colony and Department of Transportation use the same system, so faculty has no excuse for not being provided free parking).

"We pay the same fees as the Men's Colony and Department of Transportation.

"The Men's Colony and Department of Transportation have a good point. Their state employees don't have to pay to park so they can go to work. They don't have to worry about stickers and different colored parking permits. They don't have to worry about parking fees or parking fines.

"But, there's another side to this proposal. The state doesn't charge the user of those facilities to park. There's no charge to use the parking lots at the Men's Colony. The state also doesn't issue temporary parking stickers to people conducting business with the Department of Motor Vehicles.

"If Landreth and Cirovic's resolution holds for faculty and staff it should also hold for students.

Students are here conducting business with the university. The students themselves have to be educated. The faculty and staff are here to help the students accomplish what they must. No, output is semester hours. Just like the Dept. of Motor Vehicles students are there to help people park their cars.

"If the faculty doesn't have to pay for parking, then neither should the students. It is the only fair and logical way to go.

And think of the results.

No more bitching and groaning about parking. No more parking space issues. No more needless irritation to the student body...An end to this source of student discontent...No more discriminatory practices.

In a world where everyday costs more, who could complain about the lack of space on campus? At least they wouldn't cost you anything. And, who can complain about a free lunch?"

The Chairman of Physics carried his lunch butterscotch diet-yogurt, cherry pie, and coffee) to where the Outside Expert was eating alone.

The Outside Expert puckered his brow. "My problem was, you put the Foucault Pendulum in an old ventilating shaft that is only 11 square feet in area, but runs up four stories. I was trying to decide whether to put you down for 11 square feet or 44."

"I hear you were inquiring about our Foucault Pendulum yesterday. What do you need to know?"

"Does it make any difference? Why do you care?"

"It makes a difference in almost everyone's right. I'm developing departmental cost figures for the trustees, and I have to allocate space costs. You guys already chew up a lot of space. Your incident is going to be a real black hole."

The Expert chortled grimly.

"The Chairman laid his spoon down and said slowly, "Let me get this straight. You're telling me that you are about to have an outside expert reviewing something that has to do with physics, and that the Foucault Pendulum is part of the presentation."

The Outside Expert said primly, "Don't put words in my mouth. I don't make policy. I only collect facts. I didn't say you use too much space. I just said you use more than your share."

"How do you mean, 'help them'?"

"Well, of course, some things are more important than others and might be expected to cost more. What they intend to do is to take the social significance of the different activities on campus and divide it by the expenditure index."

"Come on, you're not going to do that!"

"That's right," said the Chairman. The Expert said, "The expenditure index is supposed to help them decide what to eliminate. That's why they hired me."

"How do you mean, 'help them'?"

"Well, of course, some things are more important than others and might be expected to cost more. What they intend to do is to take the social significance of the different activities on campus and divide it by the expenditure index."

"You're just making plans to do that?"

"I've already started the groundwork. It's got to be done."

"The Chairman.spoiled the butterscotch out of the cup and dribbled it carefully on the cherry pie before he spoke again. "Social significance sounds awfully hard to measure. How do you propose to do it?"

"Oh, it isn't just a proposal. We're already making substantial progress. I've got a team of graduate students working on it. They go out to0 shopaholic corners with lists of the different things you're doing on campus and ask people in the parking lot to rate them for social significance. We're getting some very interesting results indeed. Even though we've got some bugs to work out of the present set, the results are remarkably consistent."

"Bugs?"

"Oh, just little things like confusion between physical education and physics and the fact that nobody ever knew who was the Head of Physics."

"The Chairman poured a little bit of coffee into his empty cup, sloshed it around carefully, drank it, then said, "You sure that the parking lot contains a truly random selection of modern society?"

"I don't know. But I'm not saying so. We've got a selection using a set of random numbers and a set of automobile ownership profiles to synthesize a surrogate for socio-economic class. Then we have five racial categories, and an equal male-female split. We've got a stochastic sample that way, with a kind of 'closed experimental protocol in a three-parameter space.'"

"It sounds complicated," said the Chairman.

"Oh, no. The only real trouble we've had was with the students who had to pay. They got real mad when we said we didn't want any more of this. I simulated the questionnaire to a student in Oklahoma. I didn't want to skip any of the facts, because I wanted the experiment to be absolutely right and not have any possible complaints."

"That's right," said the Chairman. "The interesting thing about it is that it always does exactly the same thing, no matter how far you carry it around."

"Oh, just little things like confusion between phydcsl education and physics and the fact that nobody ever knew who was the Head of Physics."

"That's right," said the Chairman. "The interesting thing about it is that it always does exactly the same thing, no matter how far you carry it around."

"Social significance sounds awfully hard to measure. How do you propose to do it?"

"Oh, it isn't just a proposal. We're already making substantial progress. I've got a team of graduate students working on it. They go out to shopaholic corners with lists of the different things you're doing on campus and ask people in the parking lot to rate them for social significance. We're getting some very interesting results indeed. Even though we've got some bugs to work out of the present set, the results are remarkably consistent."

"Bugs?"

"Oh, just little things like confusion between physical education and physics and the fact that nobody ever knew who was the Head of Physics."

"The Chairman sponsped the butterscotch out of the cup and dribbled it carefully on the cherry pie before he spoke again. "Social significance sounds awfully hard to measure. How do you propose to do it?"

"Oh, it isn't just a proposal. We're already making substantial progress. I've got a team of graduate students working on it. They go out to shopaholic corners with lists of the different things you're doing on campus and ask people in the parking lot to rate them for social significance.
Oil tanks insure Poly fuel source

By TONY TRAMPA
Daily Bell Writer

In the midst of a rainy winter and colder days ahead, Cal Poly has taken measures to keep your homes heated and your space heaters burning all season long.

The construction project to expand Cal Poly's fuel oil storage capacity has been shut down and is off by a bit of a few weeks. It means, with no signs of early release, weather delays will continue.

Fuel oil storage tanks are located under the tennis courts and the Graphic Arts parking area. The $25,000 tanks will come online when Cal Poly's natural gas service is interrupted by rain and delayed construction projects.

Something for everyone in budget

RICHARDSON (AP) — Governor Jerry Brown's proposed state budget apparently is something to celebrate for everyone. Inflation, education, health care and the prison system are all viewed as a positive aspect of the $50.5 billion plan.

Democrats want more money for public schools, community colleges and teachers. They view Brown's proposal as a step in the right direction.

Republicans, on the other hand, want more money for schools, health care and the prison system. They view Brown's proposal as a step in the right direction.

Neither Democrats nor Republicans seemed eager to embrace the $15.5 billion spending plan for 1977-78.

Sen. Robert Nisbet, R-Arroyo, a member of the Senate Revenue and Taxation Committee, said he was pleased by the thrust of Brown's budget proposal.

Break the ice with the icebreaker.

Fill a glass halfway with ice and the rest of the way with frosty, cold Gallo Rhine Wine. You'll have the kind of drink that breaks the ice at any party.

Gallo Rhine
The premium dry wine with a whisper of sweetness.
Faculty pass the art test, as annual show opens

Kevin O’Connor, Cal Poly Journalism major is mesmerized by Helen Kelly’s description of her photographs, some of the many works currently on display in the University Union Galerie. The exhibit, entitled “Faculty Meeting,” opened Monday night and will continue through Jan. 29. (Daily photo by Dennis Suarez)

by FRAN JENSEN
Daily Student Writer

Opening nights glamour, stars and fans. Cal Poly’s “Faculty Meeting,” an art show, which opened Monday night in the University Union Galerie had all those ingredients, but the real center of attention was not the people but their creations.

As in all art shows there were musings... “What could that mean?... absolutely exquisite,” and stronger but simpler phrases of “This is crap.” Whether the show revealed masterpieces or reeked of amateurism is debatable.

One thing is for certain, however. The faculty art show, open to public and on display through Jan. 29, exhibits a wide range of artistic accomplishments.

Within the four walls of the Galerie, one will discover something that appeals to the genius as well as something that should have been thrown out with yesterday’s (or eoneder’s) newspaper.

The baby of the show is Pierre Rademaker’s “Depossessed,” a series of six pencil drawings which illustrate the historical account of the American Indian. In the transformation of the Indian from warrior to Uncle Sam, Rademaker portrays the coming of the white man, the confusion that followed and the deterioration of the Native American way of life. The viewer is ultimately left with the feeling of degradation. Like the Indian, he is depossessed, perhaps not of the land, but of his integrity.

Most works did not have such a strong social statement. Indeed, some had no statement at all and were simply there as an entity in themselves.

Such was Thomas Johnston’s “Troutnet,” a lacquered black walnut creation hung from the ceiling with fishing line. Johnston’s credibility as a craftsman is evident in this particular work, (his sculptures are also exceptional), but one may question whether or not a troutnet is a pure art form.

Photography is a new addition to the show this year with Helen Kelley, Robert Howell and Allen Pierce as contributing artists.

The grades are out and the verdict is in: Whitney Hall, pro of the North Mountain dormitory winner of the quarterly grade point average derby with a 5.03 cumulative GPA.

Kelley’s “Bengal Tiger” is so soft and alluring that one might be tempted to take it home as a housepet. The detail in her photograph, “Misty Web,” shows the beauty of that natural phenomena and the expression of delicately... one will discover something that appeals to the genius as well as something that should have been thrown out with yesterday’s (or today’s) newspaper.

Within the four walls of the Galerie, one will discover something that appeals to the genius as well as something that should have been thrown out with yesterday’s (or today’s) newspaper.

by BARBRA ANDRE
Daily Student Writer

The grades are out and the verdict is in: Whitney Hall, part of the North Mountain dormitory winner of the quarterly grade point average derby with a 5.03 cumulative GPA.

Every quarter the Cal Poly Housing Office computes residence hall GPA’s. Customarily, North Mountain Halls are at the top of the pack and fall quarter proved no different, though Tenaya Hall slipped into second place to break North Mountain’s stronghold with a 3.94 GPA.

Residence hall GPA’s for fall quarter follow: Whitney Tenaya, Diablo 3.86, Shasta 3.82, Lassen 3.76, Palomar 3.76, Fremont 3.74, Trinity 3.70, Sequoia 3.66, Yosemite 3.68, Santa Lucia 2.64, Sierra Madre 2.64 and Muir 2.58.

Barbara Andre, associate director of housing, explained the procedure used to compute residence hall GPA’s.

“Within the four walls of the Galerie, one will discover something that appeals to the genius as well as something that should have been thrown out with yesterday’s (or today’s) newspaper.

“Much colder and abstract are Henry Wessel’s ‘Romance Series I’ and ‘Romance Series II’…” Not much can be said about these pieces, abrupt, even and complete.

Sterling and wood, hall and pepper shakers are a part of Clarissa Hewitt’s works on display. Uniquely designed, they show the creativity of Hewitt’s mind and the skill of her hands. This particular piece should not be misted.

There is a little of our home town character in Robot Reynolds’ “Mr. Chong—The Candymaker,” and then that is the graphic and exacting quality in Charles Jennings’ pristine color drawings. Although the colors in Joyce Remond’s “Crucifixion and Resurrection” are a little gross, the texture is fine and the spiritual message absorbed. The ceramic works of Roger Kelly may seem static, too many, but the design and symmetry of his work is superb.

Within the four walls of the Galerie, one will discover something that appeals to the genius as well as something that should have been thrown out with yesterday’s (or today’s) newspaper.

Cal Poly's new yearbook is at high school prices

by JAMES P. SWEENEY
Daily Co-Editor

The Academic Senate and student government approved a resolution yesterday asking President Robert S. Ingersoll to take whatever action necessary to grant free parking privileges to students.

Students also are not asked to put any money on the line. Instead, just mailed picture appointments—131 provided sufficient material and postage—to about 4,000 students. The list of eligibles, he said, was compiled by the University Special Collections Head Fred Genthner, outstanding senior* and past significant campus and national events.

The composition of the planned book is also a surprise. Sandwiched around the main body of student portraits will be the introductory pages and a closure of local student autobiographies, according to Meland. There will be no company-composed, canned pages said the ASI chief.

The number of introductory pages depends on the total yearbooks sold. Meland said he is banking on a minimum 20 pages to...
Vegetarian meeting

The Central Coast Vegetarian Society will meet Jan. 15 at 4:30 p.m. in the Security Pacific National Bank Building, 1149Fourth. The meeting is open to the public. For more information call 588-7401 or 775-7777.

Rape Crisis

The San Luis Obispo County Rape Crisis Center offers free crisis intervention services for rape victims. Trained advocates are on call 24 hours daily to assist and support victims during hospital, police and courtroom procedures. Professional counseling can be arranged and share sessions are also offered by the center. To be placed in contact with a member of the Rape Crisis Center, call hotline 944-5185.

Aldino club

The gentle self-defense practice of alidino is taught by the Cal Poly Aldo club every Tuesday, Wednesday and Thursday from 7 p.m. to 9 p.m. in the men's wrestling room. For more information call 586-8746 or 584-4566.

Casino Night

Gambling, crap, blackjack and the wheel of fortune will all be included in Casino Night in Chumash Auditorium, Jan. 31 from 1 p.m. to midnight. There will be no cover charge. Prizes and live entertainment will be included in the evening.

Nutritional Counseling

Two hours worth of nutritional counseling is offered through the Health Center with dietetics and food administration majors. The service is offered Monday through Friday starting Jan. 17. Exact hours will be announced.

Dorm GPA...

(from page 6)

halls put an emphasis on study. Plus the possibility to commute is so much better because you don't have to get in a car and drive to the library, you just walk there. There is a lot of routines and the everybody spends their time studying, but there is also a lot of sharing between students about points toward school," she said.

"Traditionally, North Mountain Halls are populated by upperclassmen and returning students who are more concerned about grades and who are more stationary. There's a central area where you can go and joke around, either, so the whole structure and atmosphere

Violin instruction

Techniques and interpretation of viola and violin for advanced students is being offered free of charge for Poly students. Teaching, in individual and group sessions, is handled by instructor Carol Kristen. Sessions are held Tues. and Thurs. at 11 a.m. For more information contact the Music Department, 544-8404.

Engineering scholarship

Second year engineering students may apply for $8,500 in upper division scholarships through the Consulting Engineers Association of California (CEAC). Deadline for application is Jan. 25, 1977. The scholarship will be awarded in spring.

The scholarship competition is open to all students entering their third year of studies in engineering in schools accredited by the Engineering Council for Professional Development.

Students will be judged on scholastic and extracurricular achievement. They must indicate an interest in the possibility of entering the private practice of consulting engineering.

Obtain applications from the dean of engineering.

Submit completed forms to CEAC, 1956 Bayshore Highway, Burlingame.

Glee Clubs' Winter Concert

"Songs of the People" will be the theme of the Men's and Women's Glee Clubs' Winter Concert, Jan. 21 at 8 p.m. in the Cal Poly Theatre. The program will include music from England, the Soviet Union, Poland, Germany and the United States.

General admission tickets are $1.50 for adults and 75 cents for students at the Information Desk in the University Union and Brown's Music Store in San Luis Obispo.

Cutting and reinier clinic

A cutting clinic and parade of stallions is being presented Jan. 14 and 15 by the cutting and reinier club in the indoor arena at Doug Ingersoll's Training Farm on Devonsport Creek Rd., in San Luis Obispo.

The Parade of Stallions begins at 1 p.m. on Jan. 14. Included are nationally known horses representing Quarter Horses, Arabians, Morgans, Appaloosas and ponies. There will be no charge.

The clinic begins Saturday at 8 a.m. Leon Harra, a national champion cutting horse trainer, will demonstrate cutting a horse in action and will offer riding training and showing a horse.

Golf Club meeting

There will be a general meeting of the Cal Poly Golf Club tonight at 7 p.m. in Room 110 of the University Union. New officers will be elected and all students are welcome.

Tay Sachs Disease testing

Student Community Services holds a meeting to discuss Tay Sachs Disease testing in University Union E10, on Jan. 17 at 1 p.m. Tay Sachs is a genetic disease which is passed to a child through two dominant, recessive gene carriers of the disease (their parents).

The disease is always fatal. Tay Sachs can be avoided through pre-natal testing and selective pregnancy.

The meeting is for volunteers who would like to help test students and community members. For further information call Lisa Dillier at 584-3651.

Elementary school tutoring

Tutors are needed in all majors for students in local schools. Volunteers are needed however. Students interested should contact the Volunteer Office.

Learning center

Located in University Union 117, the Learning Center is open Monday through Friday from 8 a.m. to 4:30 p.m.

Tutors are available in Math, Science, Social Science, English, Business, Computer, Music, Foreign Languages and more.

Available subjects include the following:

Math: Arithmetic, Algebra, Trigonometry, Calculus
Science: Physics, Chemistry, Biology
Social Science: History, Government, Economics
English: Reading, Writing, Grammar
Business: Accounting, Marketing
Computer: Basic Programming, Programs
Music: Theory, History, Composition
Foreign Languages: Spanish, French, German

Cal Poly to host volleyball power from Pepperdine

By KEN MARTING
Daily Cal Poly

Cal Poly’s women’s volleyball will be treated to a sold out game Thursday night when it hosts perennial power Pepperdine in the Biocultural Education Center at 7:30 p.m. Pepperdine, led by former Tennessee head coach Chuck Conley, has been ranked No. 1 in the nation since September, and has won all 14 of its matches this season.

The Pepperdine team is led by junior setter Merry Ann Lummis, who has been named the nation’s Most Outstanding Setter in the past three years. Lummis is joined by senior outside hitter Patty Scherer, who has been named the Pacific Coast Conference Player of the Year for the past three seasons.

The Mustangs are led by senior outside hitter Jennifer Davis, who has been named the Big West Conference Player of the Year for the past two seasons. Davis is joined by senior middle blocker Sarah Cline, who has been named the Big West Conference Defensive Player of the Year for the past two seasons.

The game will be held in the Biocultural Education Center, a 2,000-seat facility located on the Cal Poly campus. The Mustangs are currently 9-7 on the season and are looking to improve their record against Pepperdine.

Jones goes to hoop at Poly and hopes to score in pros

by SCOTT CRAVEN
Daily Staff Writer

The Mustang Basketball Press Guide describes him as "an excellent all-around player with the quickness which should put extreme pressure on opposing forwards." Other words used to describe him are "dedicated," "hard-working," and "consistent." These superlatives could apply to only one man—swingman Gerald Jones.

This season is Jones' fourth as a varsity player and to far probably his best. He it currently second in California Collegiate Athletic Association scoring, averaging 18.3 points a game. He is also sixth in field goal percentage, hitting on 54 per cent of his shots.

Pretty good for a person who didn't even figure on going into basketball.

"When I was little I wanted to be a baseball player," said Jones. "That's what my father wanted me to be, too. He just didn't want me playing football because I was too skinny."

"I'd like to play football though. But some of those big boys are tough to keep up with."

It turned out that Jones wasn't too hot in baseball.

"I was no good, but I kept growing and growing so in junior high I decided to try basketball," recalls Jones.

It turned out to be his sport. At Fremont High he was named "Oakland Player of the Year" and as a senior Twice he was named the all-city team. A player of this caliber would figure to go to a big name college to continue his career. But not so with Jones.

"A lot of people asked me why I chose Cal Poly," said the recreation major. "Why not a big name college so I would be noticed by the pros? But I figure if I'm good enough they'll find me, regardless of where I play."

Jones has received letters from the Golden State Warriors and the Seattle Supertsonics, so somebody must be noticing him.

Is Jones thinking of a career in the pros? "That's hard to say. The future holds a lot for me, but first I have to finish school. I can't doubt myself—I believe I can hold my own with the pros."

He has already had a little practice with the pros. Over the summer Jones played with the likes of Phil Smith, Charles Dudley, and George Johnson (all Warriors) in his home of Oakland.

"I'm not drafted, I'd probably try as a free agent, but that'd be very tough," said Jones.

Now he is more concerned with the present than the future, though.

"This team has the talent and, when the season ends we'll be right up there with the leaders. This is my last go-around, and I see something coming my way."

The CCAA season starts in a week for the Mustangs and Jones feels they will be ready.

"I think by then everybody will know the responsibilities of his position. The league is really balanced, and we know we can win."

Although Jones is high in CCAA stats, he still feels there is room for improvement.

"I know I can offense it better, but I think I can improve that."

There is little doubt that Jones will do his best to improve, as he is aiming at a basketball career.

"I would have to say basketball is more important to me than school. A lot of people say that college is more important, but I've been people with college degrees working in car washes."

Gerald Jones, the Mustangs outstanding guard, brings the ball down court against teammate Mike Bastone in a recent practice. (Daily photo by Nila Ewen)

Poly tanks help expand oil storage capacity

(continued from page 5)

"The Chancellor's office has given us some money and we're also looking at an engineering study of our energy system," said Phillips. "Any improvements to our problem will have to come in phases and will take time. We'll have to get a completely different controlling system, but in the long run we won't have to worry about it any more and in the long run we'll have a lot of money and we'll save a lot of fuel."
