Epilepsy: The misunderstood attack
Driving ourselves to unlawfulness at 55 m.p.h.

Instead of increased enforcement, it is time the lawmakers realized the 55 mile-per-hour speed limit is a mistake.

Like Prohibition and the Boston Tea Tax before it, the national speed law is another example of hasty legislation which America can ill afford. If you disagree, drive the speed limit on a major highway—you'll feel like you're going backwards.

When both houses of Congress approved the speed bill—fined as a national Environmental Protection Agency President—President Carter was not consulted. If you disagree, drive the speed limit on a major highway—you'll feel like you're going backwards.

After three years of quiet suffering, the wound was reopened by a recent announcement of stern crackdowns on speeding drivers. A tally taken along a stretch of highway in the San Joaquin Valley reported a 95 percent in speed violations when police efforts were stepped up.

The legislation was enacted to decrease fuel consumption—mainly gas and diesel oil—in the midst of a national miseducation campaign against speeders in parts of California. A tally taken along a stretch of highway in the San Joaquin Valley reported a 95 percent in speed violations when police efforts were stepped up.

Police fund new traffic program

DENISE COLESTON Daily Staff Writer

The Traffic Safety Education and Enforcement program began January 1 and was sponsored by San Luis Obispo Police Department. The purpose of the program is to provide drivers of vehicles with pertinent traffic information, and to reduce accidents in the city.

The Traffic Safety Education and Enforcement program is being sponsored by the city of drivers, the traffic program in San Luis Obispo, hopes to reduce accidents in 1977 by 15 percent.

Police Officer Harold White, John Huelsman and Gary Orback have decided to begin the program. Their goal is to educate the people of San Luis Obispo about the traffic problem in the city.

One out of every 12 hours spent by the drivers on patrol is used toward education. Letters were mailed to the school principals with information on bicycle and pedestrian safety programs.

"We want to teach safety to students so it will be practiced as they grow older," said White.

Students interested in law enforcement, organized into the Explorers, are going through the accident reports and recording the location and cause of the accident.

"We are looking for the city's traffic hazards so we can reduce accidents in these areas," White said.

"Some students ride against the traffic on the sidewalks and any pedestrian do not have a light on their bikes for night riding. Bicycle riders must remember to apply all vehicle regulations.

Bike riders must drive more defensively than any other driver because people only look to see if another car is coming," said White.

White includes college students among the worst offenders.

All bikes must be registered with the Police Department. This aids the police in matching serial numbers to owners of stolen bicycles.

"The objective is not to ticket every traffic violator, but to talk to the people and tell them about the city's traffic problem," White said.

"In three weeks I have given 75 citations. Believe it or not, only two females on bicycles have been upset with me. Everyone else said thank you. I understand when they were told of the traffic problem. Most of the violators were stopped for speeding. The greater the speed, the greater injury in a traffic accident," White said.

A cooperative effort between the total Police Department and the community is needed to make this traffic program work.

White said. The traffic program officers will talk to any civic group to explain the do's and don'ts of driving.

Career Day coming

"Political and Social Human Career Day" is scheduled from 9 a.m. to 1 p.m. It is a program designed to help the student answer questions on career paths, how to apply and visit graduate study will be present Thursday in Union Union 307, from 9 a.m. to 1 p.m.

Career opportunity is open to all students on the topics of interest to them. There will be informational sessions on government, counseling, housing administration and related social work.

Bikes in the entry hall of the building contain additional information on opportunities for those interested in social science majors.

John Leiser, Cal Poly admission officer, will talk on career paths and city government in Cal Poly's Master Program will be discussed at 11 a.m.

Law enforcement careers will be discussed at 11:45 a.m. followed by probation officer careers at noon. Dr. David Harrow, Sal Luis Obispo County Environmental Coordinator, will speak at 12:30 p.m. At 1 p.m., students will find out what Cal Poly's Placement Center can do to help them. Marie Hickman, from Sears, will talk on managerial career opportunities.

The afternoon will be concluded with speeches on careers in personnel departments, counseling and careers in social work and related fields at 2:30 p.m.

Looking into the ill formed beliefs of epilepsy

by WENDY HILL
Daily Staff Writer

"I wish I was dead," the boy gasped at the corner and you're left waiting in semi-darkness. Suddenly the person in front of you sits against the building, he slumps to the ground shaking, his muscles tighten spasmodically; he gasps for life-supporting breath. It is a situation most people will never face—nor do they want to.

However, for the man at the theater line, it is a battle he fights every night. Put simply: An epileptic gripped by an attack, such as the man at the theater line, will go through a series of battles. This battle is what the man at the theater line is trying to explain.

The man who fell to Earth is the name of Ralston of the Cal Poly Mechanical Engineering major. He experienced his first grand mal seizure at age 17, while in high school. What Ralston didn't know was there had been two internal battle the battle for a few years and you don't know they do treat you funny that don't know you. "Most epileptics have problems because they don't take their medication. Also, lack of sleep or getting sick will bring on a seizure," said Oskin.

"Epileptics have a hard time socially, and people will panic when they have a seizure," Ralston continued. "The epileptic will usually lose consciousness and won't know what is happening. It is during this time of black out and collapse that they injure themselves."

Ralston emphasized it is critical not to panic and to observe what's happening to the person having a seizure. The doctor called to treat the epileptic will want to know how the seizure developed what the exact symptoms were and length of attack. Ralston also said it is necessary for someone to protect the patient during the seizure.

The idea epileptics swallow or bite off their tongue during a seizure is a misconception according to medical experts. This fallacy results in unnecessary injuries to epileptics—broken jaws, for an instance. Studies show epileptics do experience breathing troubles during attacks, which may lead to the misconception about tongue swelling. The proper way to assist an epileptic having difficulty breathing said Ralston, is to hold his head up to allow easier breathing.

Ron Oskin, a senior Mechanical Engineering major, explained Ralston's first grand mal seizure at age 17, while in high school. What did Ralston's doctor know was there had been two internal battle the battle for a few years and you don't know they do treat you funny that don't know you. "Then when I'm going to have one, my aura is like my epilepsy goes away—like walking into a quiet room. I guess I've noticed something different with me since then," said Oskin.

"It's not a super scary thing, you know the old myths about high risks of grand mal seizures, but I don't believe any of that. It is more important to control your seizures," said Ralston.

The idea of epilepsy is that it can be hereditary. "It can be hereditary. It's a constitutional thing for the epileptic is the manage their seizures," Oskin stressed it is important to treat epilepsy with medications as well as other forms of therapy. (Daily photo by Craig Ambler)

Epileptic seizures can be controlled through the use of drugs, as well as other forms of therapy. (Daily photo by Craig Ambler)

Epilepsy is a mysterious disease. There are two major types of epilepsy: grand mal and petit mal. The type of seizure most people witness is grand mal violent, dramatic, unconsciousness and can result in injuries. Petit mal is characterized by a slowing of speech, loss of control in a limb or other minor physical im­

Epilepsy is well-researched, understood and treatable. It's a constitutional thing for the epileptic is the manage their seizures," Oskin stressed it is important to treat epilepsy with medications as well as other forms of therapy. (Daily photo by Craig Ambler)
BERKELEY (AP)—Bored, done it all, your woman done you wrong? Expedition to the steamy jungles of French Guiana to sulk the world's biggest leech might be just the thing to perk you up.

For $1,375 you can join a band of adventurers who will brave snake-infested swamps to track the 18-inch bloodsuckers to their lair. It's the chance of a lifetime to help medical science, and the fee is deductible.

The invitation is from a University of California biologist who has been a leech-fancier from childhood. Roy Sawyer plans to bring back a batch of the creatures and breed them. Haemopis ghilianii, as these particular leeches are known, are Sawyer's candidates to become a standard laboratory research animal for the study of how the nervous system works.

The place to write is University Research Expedition Program, Department of Botany, University of California, Berkeley, Calif. 94720.

SPEED READING COURSE
IN SAN LUIS OBISPO

The Golden State Reading Lab is offering their famous speed reading course to a limited number of qualified people in the San Luis Obispo area. The average person who completes this course can read 10 times faster, and with dramatically improved comprehension and better concentration.

This famous course has taught thousands of people a way to read 1000 words per minute with the ability to retain and recall what they have read. A student's ability to read and comprehend at a speed of 1000 words per minute means he can read up to a thousand pages of material in an hour! With this speed, a whole novel can be read in an hour. It is possible to read material twice as fast as most people can, and still understand it.

Speed reading is an acquired skill that can be mastered by anyone. Courses are limited to 25 participants in each class. In the past, many students have been able to read most novels in less than an hour. 

The course is limited to 25 participants, and participants are limited places only. Class placement will be filled on a first-come, first-served basis. The course is open to all. Group rates are available upon request.

The speed reading class will be held in the Executive Conference Center in the Executive Conference Center. The classes will begin February 15, 1977. Classes will be offered at the following times: Monday, February 14 at 6:30 p.m.; Tuesday, February 15 at 6:30 p.m.; Wednesday, February 16 at 6:30 p.m.; Thursday, February 17 at 6:30 p.m.; Friday, February 18 at 6:30 p.m.; Saturday, February 19 at 6:30 p.m.; and Sunday, February 20 at 6:30 p.m.

3 Days Only!
Stadium Renovation: critical days ahead

The Cal Poly Stadium Renovation project started its "Scrimmage Campaign" yesterday in hopes to raise enough money to give Mustang Stadium a much needed facelift.

Entitled "Ten Days and Goal To Go," the campaign was started to demonstrate that the possibility is there to raise the necessary funds to back the project.

"We have $100,000 in checks and pledges already," advised fund raising coordinator Bob Brown. "Now we hope to obtain an additional $200,000 during a 10-day campaign. While we will concentrate on the sale of seat options, donations in any amounts will be accepted.

"By boosting our pledge total to $300,000 or more, we would demonstrate to the public that we are capable of raising sufficient money to complete the project," Brown noted.

"If we can show the board that significant progress has been made in the fund drive, it would spur that body to authorize the architect to proceed with the next phase of drawing plans.

The State Board of Trustees next meets on February 23.

Major phases of the Mustang Stadium Renovation Project include demolition of the wooden bleachers on the west side of the field, replacing the 1,900 existing seats with steel bleachers accumulating 5,200, installation of new seats on the west side of the field, construction of new restrooms and storage areas planned for the stadium.

Plans call for approximately 600 chair areas between the 55-yard lines in the west end. Three seat options are available for these choice seats. Back bench seats are priced at $800 with chair-type areas as both $600 and $1,200. There are payable over a three year period.

"Private funding is required because state monies are not available for such construction," Chandler advised.

In December the State Board of Trustees authorized the project for $200,000 to be paid by private funds and it appointed the architectural firm of Kerbee and Rhoda of Monterey to draw plans and bid specifications for the renovation.

"It will not be required that all of the necessary funds be donated from private sources," according to Dr. Everett Chandler, director of student at Cal Poly, who heads the campus committe on the stadium renovation project.

"If between $300,000 and $500,000 can be generated from the general public, there is an excellent possibility that the University could obtain long term loans to cover the balance of construction expenses," Chandler advised.

Brown noted that "It is very important that we raise another $200,000 during the "Scrimmage Campaign." A favorable showing prior to the board's February 23 meeting would demonstrate that we are capable of meeting the financial needs of the project."

Chandler added that a successful campaign "would develop a certain amount of credibility with loan agencies and make it clear that we have a solid project. It would be like having a big down payment."

Team captains and workers had a kickoff barbecue on Monday, February 7 at the Moor Lodge in San Luis Obispo.

Captains selected by Brown are: Donny Wheeler, Frank Shoshan, Bryan DuVall, Larry Meek, Gary Owen and Mrs. Doris Herrer.

By the Associated Press

Kentucky is again No. 1 in the Associated Press college basketball rankings this week but Coach Joe Hall wouldn't have minded playing spotless;

San Francisco or runner-up UCLA Monday night.

"I don't believe anybody could control us the way we played tonight," he said following Kentucky's 97-97 rout of Florida State. "There is no question that we're going for an improvement."

While in San Francisco, UCLA and Kentucky held onto the top three positions, Nevada-Las Vegas steamed from fourth place to 10th.

San Francisco, unbeaten in 23 games, routed St. Mary's, 109-71 and Nevada-Reno 98-81 last week so had to sit on its No. 1 ranking.

UCLA, which received six first-place votes and 1,099 points, beat Tennessee 109-81 and then upended Pacific 112-70, rival Washington 73-65 and Washington State 72-59.

The other first-place vote went to eighth-ranked Minnesota, which bowed to fifth-ranked Michigan 86-80.

Last week Kentucky shadshed Mississippi State 92-85 and buried Vanderbilt 115-75. The Wildcats received 800 points. Nevada-Las Vegas steamed from fourth place to 10th.

NBC wants Games to be big event

NEW YORK (AP)—The National Broadcasting Company is paying a record $85 million for exclusive U.S. television rights at the 1984 Moscow Olympics, and is predicting "the most massive array of people, techniques and equipment ever assembled for one event."

NBC President Herb Shkoeer said Monday night that "this will probably be the biggest event in the history of broadcasting."

And, he added, the network plans to milk "profit. "We expect it to work out as a venture where this company will make money."

The price is $60 million more than Montréal Games last summer cost NBC, which was outbid in negotiations for the Moscow rights by an estimated $80 million.

Roger Flock seems to be trying to drive his Stanford opponent through the mat in last Friday night's action against the Indians. Tonight's contest against Cal Fullerton in Fullerton, has been canceled due to scheduling difficulties.

The Mustangs will make up this match in two or three weeks. Cal Poly's next meet will be at home against UC teams.

This week's Top Twenty

1. Indiana, 10-0, in third place in the Associated Press basketball ratings this week.
2. UCLA, 18-2, in fourth place.
5. Minnesota, 10-3, in seventh place.
6. Stanford, 10-3, in eighth place.
7. Kentucky, 16-2, in ninth place.
8. Los Angeles, 14-3, in 10th place.
10. Arizona, 16-3, in 12th place.
12. Kansas, 14-3, in 14th place.
15. Oregon State, 12-5, in 17th place.
16. Wisconsin, 12-5, in 18th place.
17. Pennsylvania, 11-6, in 19th place.
18. Stanford, 11-6, in 20th place.
19. Michigan, 10-7, in 21st place.
20. Texas, 9-8, in 22nd place.

NBC, which made public some of its plans and current ratings on Monday, said it would release more details about about nine hours before the 16th of the day.

From Montreal, Ann B. Howard, president of NBC television and head of the network's negotiating team in Moscow, said after NBC announced its bid to raise its bid, apparently .*...*...*, to a last-minute offer by ABC.

Poly on top in CCAA

By Scott Caven
Daily News Writer

The Mustangs found themselves in the middle of the California Collegiate Athletic Association race as Cal State Northridge (7-10) at Cal State Los Angeles (10-7). Poly was at home Saturday night against Mission Mules (11-0), which has dominated both Cal State teams this season.

Northridge started the second half fast by going 11-3 to take a 16-3 lead. The Mustangs were led by forward Gary Smith, who had 23 points and 18 rebounds. He also had nine steals and three assists.

With the victory Saturday, coupled with Cal Poly's 89-80 triumph over Cal State Fullerton Friday, L.A. Diablos (10-7) moved into a tie with Poly for first place in the standings.

The first place man, Rico Stram-Brusan, of L.A. State, is averaging only 4.4 a game with a total of 74. The Mustangs are doing well in total team statistics. Their 49 percent field goal average is better than any other CCAA team, although Bakers- field is right behind with a 49 percent average.

Poly ranked third in three free throw shooting, hitting on 39 percent of their free throws for a percentage of 70 percent. In rebounding, the Mustangs are averaging 59.3 a game to put them fourth in the conference.

The green and gold occupy the second spot in total scoring as they are connecting on 77.5 percent of their shots. This fact combined with the fact that the Mustangs are holding their opponents to 71.3 percent is second in the conference, and accounts for their overall 15-7 record.

L.A. State, with a 15-4 record, is the only other team in the CCAA with a winning overall record.

Poly is in a good position in shutting down the opponents' ability from the field. Their foes are hitting on only 45 percent of their shots. The opposition is getting as many rebounds as they average 58.8 a game against the Mustangs.

Los Angeles (AP)- Bruce Jenner didn't have the hand that rewarded him, but he did suggest the Amateur Athletic Union could make improvements and improvements will be necessary to keep the United States competitive in the 1980 Olympics in Russia.

The 75-year-old who won a gold medal last year with a world record performance in the grueling decathlon at Moscow, became the 47th AAU Gold Medal winner in 1976, the state's decathlon winner.

Jenner, who scored 8,818 in the 11-event track and field event, passed 1955 and 1956 champions in the All-American of the Year. By The Associated Press.

In the AAU voting, the 195-pound trackman who stands 5-foot-11, outdistanced swimmer John Naber and figure skater Dorothy Hamill who also were gold medal winners.

That gold medal meant more to him than all the money in the world, declared Jenner, who now is a commentator for the American Broadcasting Company. This award is the perfect way to end a career.

After thusly acknowledging the Sullivan Trophy, Jenner said he believes the AAU and other organizations must make changes to keep America's athletes in top spots.

"I greatly think the AAU and the others must get their stuff organized better," Jenner said.

"We're able to win, but every year we slip and things will be particularly tough in the Olympics in Moscow.

"Our amateur athletes should have more support than they now receive and there are not some drastic things done in the next few years, there are going to be problems.

"Some potential Olympic gold medal winners will be left home because they do not have the funds to quit jobs and do the training necessary.

"I don't want to see amateur athletes go professional, but why not get some needed regulations into effect?" he added. "And the one thing is gorgeous."
