Freshman--starting all over again
Government in the sunshine
by J.F. HOST
A hot sun is beautiful for basking but unbearable for forested land. Soon or later, workers are driven to seek shade. And there it will happen if President Carter declares that all Cabinet meetings must be held in bright sunlight... or at least in bright glare of news coverage.

Instead of more open government, we are likely to have more governing in the shade away from the sunlight. And shadow government is the type of government that pledged the country during his campaign. In the real world, no government worth the name can afford to seek or expect the kind of coverage the new President made much of the openness he wanted to bring to the conduct of White House business. He talked favorably of an “all-inclusive sunshine law,” under which “everything and everyone is on the table.”

The President’s desire is well intended. Openness is a worthy governmental goal. But he cannot be so naive as to believe that his Cabinet proposal will really work. It will be of no shade. First, the effect of breathing such secrecy, not less. And it will be the perennial kind, the kind that Cabinet officers will have to deny having concurred in. For they will meet in secret so perform the real business of the Administration—getting their ducks in a row, so to speak, while pretending to open Cabinet sessions that they are actually making decisions then.

The President knows that as well as anyone.

When, as presidential assistant Hamilton Jordan told some of us the other day, the White House staff “gave him all the reasons why it wouldn’t work” and just on national-security matters. Are professors to keep silent about the purpose and function of life itself? Are we to have a background of education and experience without having reached conclusions worthy of being passed along—inevitable secrets of successful living?

Since it was asked—my education in the subject of homosexuality has come from working closely with the victims of this so-called victimless practice. I have spent 3 to 5 hours per week for five years for a layman—Help Goodby, hello hypocrisy.

First he wants to be perceived as the honest man that President is going to be different. Letting a reporter or two inside the Cabinet room would help prove it. Second, he wants to be perceived as a better President than his predecessors. Opening up the Cabinet meetings was supposed to suggest a lot of people that he has nothing to hide. It would make him look better.

For him, opening up Cabinet meetings isn’t primarily to let the public know who said what to whom. Rather, it is a way of using openness as an instrument to gain people’s confidence, so build trust in him, to make them his people, and so establish himself as the “people’s President.”

He wants immediately he uses it in this instance, the concept of openness is a Carter instrument to govern.

Kennedy: ‘Gurnee plan a ploy’  
by J.N. SBRANTY  
Daily Staff Writer
A call for immediate action to be taken on the forming of a relations board between Cal Poly and San Luis Obispo has been later set in play by Cal Poly Pres. Robert E. Kennedy. The relations board was called for at a press conference last week, by San Luis Obispo City Councilman Keith Gurnee, who is a candidate for mayor in the March Relection. Kennedy explained Monday Gurnee wants the announcement which expressed urgency in organizing a liaison group between the two cities and the city because he is running for mayor, and he has to say something to get people's attention.
Gurnee denies this saying it is a myth that his action was politically motivated. He said the forming of a relations board between the two institutions has been a concern of his for the past four years.
"Cal Poly is the engine behind the city's growth, and it is tied to every problem San Luis Obispo faces. We are a very tiny town with limited resources and we can't continue to cope with growth."
"Somehow the instructional aims of Cal Poly and the limits of San Luis Obispo have to be reconciled," Gurnee said.
Professor Edward Cairns.
"It boils down very simply to a question. Gurnee, a 1974 Poly graduate, is showing a relations board between Cal Poly and San Luis Obispo. (Daily photo by Bill Faulkner)

Freshmen struggle to cope with a college environment

by CRAIG REEM
Daily Associate Editor

Late last night a group of 90 freshmen and seniors gathered in the Environmental Science Building. TheSeniors and freshmen sat around a long table, passing word of mouth the latest news from the dorms.

The meeting lasted for two hours, and the seniors were the main topic of conversation. The freshmen were learning what to expect from college life.

The seniors discussed various topics, including the importance of time management, the significance of academic integrity, and the benefits of involvement in extracurricular activities.

The freshmen asked questions about their own experiences, and the seniors shared their insights and advice. The atmosphere was positive and encouraging, with everyone contributing to the discussion.

After the meeting, the freshmen gathered in small groups to continue the conversation. They discussed their plans for the upcoming semester and shared ideas for events and activities that could be organized for the freshmen.

The meeting was a great opportunity for the freshmen to get to know each other and to feel more prepared for the challenges of college life.

---

Dr. Greg Miller, a psychiatrist at the Cal Poly Health Center, is part of an effort by Cal Poly to help students adjust to college life. freshmen, he says, have three prevailing symptoms: anxiety and depression.

What is the best way to help a freshman who can't seem to cope with the new environment? Miller said that it is important to help students see the importance of a good support system.

"It's important for students to have someone to talk to, someone who can listen and provide guidance," Miller explained. "The Counseling Center is a great resource for students who are feeling overwhelmed or stressed.

Miller also emphasized the importance of time management and organization for freshmen. He said that it is crucial for freshmen to develop good study habits and to prioritize their tasks.

Miller pointed out that freshman anxiety and depression are normal feelings to experience during the first year of college. However, if these feelings persist for an extended period, it may be necessary to seek professional help.

Miller's advice for freshmen is to reach out to friends and family, to seek support from the Counseling Center, and to manage their time effectively.

The Great American MELODRAMA

February 10, 1977

MUSTANG DAILY

One thing they have in common is their true personal love for the theater. Whether they are working in the stage crews, the pit bands, or as actors, they share a passion for live theater.

The Mustang Theater Company, founded in 1975, is dedicated to providing high-quality performances and to supporting aspiring actors and theater professionals.

The company produces a variety of plays and musicals throughout the year, including comedies, dramas, and musicals. They also offer workshops and classes for students and the general public.

The Mustang Theater Company is a non-profit organization, and they rely on donations and ticket sales to fund their productions. They are always looking for new members and supporters to help make their dream of bringing theater to San Luis Obispo a reality.

Contact the Mustang Theater Company at (805) 756-2800 for more information or to schedule an appointment for tax preparation services.
Volunteer painters needed

Student Community Services needs volunteer house painters to help paint Casa de Vida, a home for the multiply handicapped.

If you are interested, meet in front of 879 Meineke at 10 a.m. Feb. 12 and 26.

Enjoy yourself for free.

Electric power institute

The Electric Power Institute will feature Fred MauU, Vice president of Engineering for P G & E, in Engineering East Rm. 190.

MauU will speak on "The Problems of Doing Business Within the Utilities Business Today."

Admission is free and faculty, students, and guests are invited to attend.

Campus relations board

(Continued from page 5)

progress that most universities don't have like

"The primary objective of the advisory boards is to assure that the regional campuses fulfill their responsibility to meet the educational need of the local regions they serve." Kennedy said.

But he does see a need to establish a panel of community representatives who could meet with university faculty and staff on matters of environmental, economic, and cultural impact on the community.

It said it had been working on such plans for eight months.

"As early as last spring, we began exploring the idea of a non-civic university group which would be nominated by the various interested segments of the county's population," Kennedy said.

They were advised at that time by legal counsel not to use a typical basis except unwillingness, the
to work in while you're an officer in the Coast Guard.

The Coast Guard's a lot to offer college graduates. So, before you decide what you're going to do after graduation, get the full story when our representative visits your campus. Your college placement office can arrange an appointment. Call us, toll free, at 800-424-8883 for the location of your nearest Coast Guard officer recruiter.

These are just some of the fields you're likely to work in with your Coast Guard officer in the Coast Guard:

- You'll get a lot of specialized training. Not in the classroom, but on the job while you perform your duties. That way you'll develop leadership and management skills. The Coast Guard's a small organization with relatively few officers. So we put your talents and ability to use as quickly as possible.

- The Coast Guard is a great place to start your career. And if you decide to stay, you can have a rewarding career.

- Your Coast Guard career can be a stepping stone to a management position with Troop's special situation of being a statewide campus whose primary purpose was to advise the relations board in Gurnee's plan on matters of environmental, economic, and cultural impact on the community.

They said Gurnee had been working on such plans for eight months.

"As early as last spring, we began exploring the idea of a non-civic university group which would be nominated by the various interested segments of the county's population," Kennedy said.

Mustangs give Westmont 7-5 win in opener

by COREY BRITTON
Daily Staff Writer

"Poor pitching and poor base running." Those were the words of Mustang head baseball coach Boby Harr as his team dropped their first game of the season to Westmont College 7-5 Tuesday afternoon.

The Mustangs, trying to get in the swing of things, but kept allowing the Warriors to score easily, and gave up key base hits.

Cal Poly gave up five walks, and one hit batter. Two of the six hits ended up scoring. Westmont gave up seven walks, only one of which reached home plate. Westmont scored the top of the first inning as they had two consecutive singles with none out. Mike Sanchez singled to left field with one out to get the first run of the game and give the Warriors a 1-0 edge.

The Mustangs came back in their half of the inning as Oatis Smith walked, stole second and scored on a ground ball hit by Tom Beyers, which was bobbled in the outfield, allowing everyone to be safe.

In the third inning, Matt Mullins hit a line drive double to left field, and later scored on a pop-up that dropped in between three Westmont fielders to give Cal Poly the lead for the first time in the game at 2-1. Westmont erupted for three runs in the top of the sixth inning when relief pitcher Doug O'Brien walked Mel Olds, gave up a single to Wes Weeks, and Jerry Walker hit a three-run homer over the right field fence to give Westmont a 4-2 lead.

The Mustangs did not give up easily, as they rallied two runs in their half of the inning.

Erik Peterson led off with a single, followed by a single by Gary Nelson. With no outs, and two men on base, Davis Daniels hit a grounder, forcing Peterson out at third.

Smith followed with a single to load the bases. Mike Daniels and Olds walked and scored on a wild pitch by Westmont relief pitcher Rob Hatch.

The lead was short lived, however, as Westmont jumped over the top of the seventh. O'Brien hit Tim Asler, and Roger Erickson was walked, followed by a double by Sam Cm to score two runs. The only scoring done in the remaining two-out and half innings was a home run by the Warrior's Sanchez of reliever 

Mike Pastas to give Westmont their 7-3 victory.

The Mustangs were out hit 13-8, but committed no errors. Cal Poly committed one error, in the first inning and Westmont had four errors. Cal Poly stranded 11 men on the bases, while the Warriors left nine.

"We had good enough defense to win, and we hit well enough to win, it was the pitching and the base running," Harr said.

The Mustangs got back-to-back hits just once in the game, which resulted in one run, while Westmont got back-to-back hits five times during the contest, scoring four runs. The Mustangs' leading hitter was Tom Beyers as he was for four with one R.B.I. Fischer Doug O'Brien was walked with the loss after he took over for starter Bruce Freberg in one and a third innings of work of O'Brien was belted for four runs and four hits.

The Mustangs have a three-game series with San Francisco State beginning tomorrow at 2:30 p.m. and a noon doubleheader Saturday. Admission is $1.25 general, and 75 cents for students. All games this weekend will be played at Poly Field.

"Poor' Johnny Miller

PALM SPRINGS CA The AP—Johnny Miller, who normally walked to fourth victory in the winter Classic at this time of the year, is looking for his second payday in the $200,000 Bob Hope Desert Golf Classic that got underway today.

"It's a matter of momentum," said Miller, who has won only $600. "I'm not as nervous anymore. It seems like I got on a hot streak, and I'm not able to get something going. I haven't had any momentum.".

"I'm not putting well at all hole-in-one. In fact, I don't want to use that as an excuse. I just need some rounds. And he had his second-best finish in the first round of this unique, 90-hole, five-day event. It's often out of the way of course, and he continued the momentum of his constant clicking of cameras. They're looking at you and I can't put on the course to the four courses, each day with a different set of partners today were host Bob Hope, Sammy Davis Jr., and an 18-handicapped named Gerald R. Ford.

Miller's directions are even greater. His amateur partners were former District Attorney Davis Jr., and an 18-handicapped named Gerald R. Ford.

Ford, who played two rounds with Arnold Palmer three weeks ago in the Bing Crosby National Pro-Am, announced Tuesday after leaving the office of President, is scheduled to compete four days here with Miller, Lee Elder, Pat and Dave Stockton and seven pro partnerships.

The format for this, the longest event the season is to play all season, calls for them to play one round each week. The players are paired with four courses, each day with a different set of partners. After 72 holes, the pros only compete for the $40,000 first prize at La Quinta. The other courses are Desert Winds, Bermuda Dunes, Indian Wells and Tamarisk.

Miller and Ford played together at Indian Wells, probably the easiest of four courses used for the event in the fall, last season, the San Francisco Giants hit the year with a 31-2 record. He has missed the cut twice, withdrawn and finished 41st in four earlier tournaments this season and has won only $600.

"I'm not as nervous anymore. It seems like I got on a hot streak, and I'm not able to get something going. I haven't had any momentum."

Spikers host San Bernardino

The Cal Poly spikers will be in action tonight when they host San Bernardino Valley College at 7:30.

The Mustangs are coming off a disappointing loss to second-ranked UC Santa Barbara last Thursday. Head Coach Ken Preston blamed it on a poor passing system.

"We didn't pass well and you can't beat anybody without passing," Preston said.

In their first match of the season, Poly was defeated by second-ranked Pepperdine. Going up against the strongest teams in the nation will be more difficult, but the Mustangs will try to come out victorious.

The spikers will try to get on the winning end of things this weekend when they meet San Bernardino at 7:30. It was the first dual meet victory this season. The Mustangs have come up strong against UC Santa Barbara, Chico State, and San Diego State.

Swim team

The Cal Poly swim team will try to make it two in a row when they visit Whittier today.

The team have come off with a 167-44 victory over Fresno State Saturday. It was their first dual meet victory this season. The Mustangs have come up strong against UC Santa Barbara, Chico State, and San Diego State.

Poly's Paul Gabriel polled to spike the set of teammate Gregg Kelly in loss to UC Santa Barbara. (Daily photo by Joy Berg)
NEW
LEGAL AID PROGRAM

On February 1, 1977 the A.S.I. entered into an agreement with Morro Bay Attorney and Cal Poly Professor, Martin Wolff, for a new legal aid program at Cal Poly.

Under the terms of the agreement, Mr. Wolff will be available in U. U. 217 B, Monday through Friday, between the hours of 10:00 and 11:00 a.m. to render legal counselling and advisement to anyone with a current and valid Cal Poly identification card. There will be no charge for this service but each person utilizing the program will be limited to one-half hour consultation. It is believed that most problems can be resolved within this amount of time. Appointments may be arranged by calling Extension Number 1291 or 2476.

For those persons in need of additional services beyond the gratuitous one-half hour, Mr. Wolff has agreed to a reduced fee rate of $10.00 per half-hour for students and $35.00 per hour for faculty and staff. These services must be arranged through Mr. Wolff's Morro Bay Office, telephone 772-7808.
