Refining the supertanker issue.

Eastern snowstorms, the Lakers and Jimmy Carter have momentarily diverted attention from the West Coast supertanker port proposal. But the hotly contested issue is sure to buck the tide of public opinion more than once before it is resolved.

Opinion—earlier confined almost exclusively to the vicinities of most-mentioned California sites Long Beach and Avila Beach—is gradually beginning to rumble from as far away as Washington D.C. and Florida.

These gradually building rumbles are prompted by the prolonged Arctic-like weather conditions in the West and East, and the resulting fuel shortages in those areas.

The combination of the two factors has sent temperatures plummeting far below zero, killed factories and businesses, killed dozens of people and caused government and oil industry officials to again focus on the need for a West Coast supertanker facility.

But more than just the need is being discussed. Local, state and federal officials are concerning themselves with the aspect of time, asking when—rather than where—the first of more than 9.6 billion barrels of Alaskan North Slope oil will begin entering the 48 contiguous states.

Over the last six months, when Standard Oil of Ohio (Sohio) and state agencies had the luxury of time to back over optimal position for the port, Avila Beach and the San Luis Obispo County coast were most frequently mentioned.

But with the now pressing immediacy of need for the oil—coupled with the completion of the Trans-Alaskan pipeline this summer—"when" has become a prime factor and has thrust Long Beach back into the limelight.

With existing oil receiving and refining capabilities, Sohio officials say the Southern California site could be expanded to allow Alaskan oil tankers to begin unloading there as soon as next year.

An Avila Beach site would require virtual ground up construction and would not be operational for about three years.

This aspect of time appears to have closed the door on any immediate possibility of Sohio building the port at or near Avila Beach.

"I seriously doubt that we will ever put in here," San Luis Obispo County Councilman T. Keith Gormsen said last week. "Two state legislators recently told me that if we can count out Avila. They feel the pollution objections to Long Beach will be done away with.

These pollution objections have been the primary reason Avila Beach and the Central Coast have been so attractive to Sohio, the California Air Resources Board and the U.S. Environmental Protection Agency.

The latter two organisations, in particular, have opposed construction proposals in existing Long Beach Harbor and docking facilities.

They contend the already poor air quality of the surrounding Los Angeles Basin would be unable to safely absorb oil tanker and storage tank emissions. The gases have been estimated to equal the exhaust of between four and six million automobiles.

With the apparent rationale, "the cleaner the air, the more you can dump into it," both the ARB and EPA have favored a San Luis Obispo County site—largely because of the area's clean atmosphere.

Robert Carr, San Luis Obispo County deputy air pollution control officer, disagrees with this philosophy.

"We shouldn't have the project forced on us simply because the air where they (presumably Sohio and the ARB) want it is dirtier than ours," Carr said.

"We haven't as yet received any applications for the project, so simply because the air where they (presumably Sohio and the ARB) want it is dirtier than ours," Carr said.

"We haven't as yet received any applications for the project, so simply because the air where they (presumably Sohio and the ARB) want it is dirtier than ours," Carr said.
Where is the strength in nuclear power?

In his first White House press conference, Pres. Jimmy Carter said Tuesday the United States and the Soviet Union are about equal in nuclear strength. The strength, he said, is strong enough to destroy a large portion, 80 million to 100 million people, of either nation.

One-hundred million people. Numbers are so easily thrown out. But with our population at 220 million, that adds up easily to more than two children, one out of every two sốngs, one out of every two grandparents.

When we bring a suggesting number to home, it has more impact.

It is insecurity that we have the means to annihilate half of the world. It is insecurity that the nuclearраниц is a Japanese weapon. Japan has no standing army today, a recipient of the atomic bomb.

It is secure that we can destroy a large portion, 80 million to 100 million, of either nation.

The time for nuclear elimination was when its use was first realized. Today, at a stage where we have gone into cruise missiles and piloted jet aircraft, we seem to have reached the point of no return.

Our nation is based on advanced technology. We feel secure in knowing we have mass destructive capability, that is, in nuclear capability. We cannot retreat back to bikoisims simply because we have gone too far. Curiously, we are working with gays or by scientific readings, we are only one out of every two children, one out of every two grandparents.

It it interesting that those writing against homosexuality have little knowledge either from personal experience or scientific readings. We are unable to turn back the clock for the sake of peace.

The SALT II talks could be one of the most important meetings in modern history. The talks cannot be made possible without an understanding whether or not an optimistic Carter can persuade a bone fide world to power on the sincerity of his nation's willingness to disarm a vital part of itself.

If the U.S. is truly willing to go so far, we must ask, how far is the Soviet Union willing to go? And then, will England, France, China, India and others follow suit?

The world is sitting on an unlimited arsenal of nuclear warheads that unless defused or destroyed have the power of making future disarmament talks uncessary.

Homosexuality: Our readers write...

Rather, it is the result of biochemical and neurological differences during fetal development.

Two: The only "cure" that is effective for homosexual behavior is the use of a surgical technique which destroys the female mating center in the male homosexual's lower brain (hypothalamus). This operation is performed in West Germany. However, homosexual behavior does not result from this technique.

Three: Psychiatric and psychological professionals for the most part believe that homosexuality is not an illness and does not represent a threat to social or personal stability.

Four: Homophobia, the fear of homosexuality, is considered both by psychiatrists and psychologists to be a psychological condition which depresses both social and individual development.

Five: A number of Christian churches support the gay rights movement and at a minimum call for an understanding of the problems of those born homosexual. It seems perfectly logical to reason that if an attack should be leveled at those born with a particular sexual orientation which is not well understood by the majority.

Six: Homosexuals make up at a minimum 1% of the population of the United States and from most studies most likely more, possibly as much as 18 per cent of males. Female homosexuality is poorly studied and reported in scientific literature.

While these statements do not explain all about homosexuality, I would hope they help them understand a bit more about a subject which is veiled in mystery and fear.

Anthony R. Sasso

Editor:

Recently there has been a series of attacks and counter attacks from "straights" and gays springing from a letter that GSU president Michael Perlman submitted to Mustang. As this writing (Feb. 9) I've read most of the letters that Mustang has published, and now I wish to comment.

All sexual attitudes, from what I've learned, are learned, being gay is not some mental illness but responding to what one is born with. It is, in the case of gays, experimental, in the sense that people learn what they want if a person becomes gay, they usually choose the homosexual way of life. One should not be willing to rid your life of da signs.

Therefore I can understand why a per- son, who has gay rights, must be given their rights, but I'd rather not see them around.

What I've written may seem contradic- tory, I apologize, it is then, but I don't. In light of what I believe, I can come to no other conclusions. What is my belief? I try with God's help to live like Jesus. I'm human and I fall short of perfection, just like anyone else. The Bible makes it quite clear that there is no condemnation for those who love God and do not practice; I'm no different from any sin. I need Jesus, I straighten need Him and give up the sins.

To place a personal attack on this is not the way to go. I feel we should not attack on all others. This includes Christians and others who are easy to attack someone other than that group. Jesus expects all to be equal before our Lord. I think we are equal before our Lord.

To place a personal attack on this is not God's way. I think we are equal before our Lord. I think we should give our rights, but I'd rather not see them around.

What I've written may seem contradic- tory, I apologize, it is then, but I don't. In light of what I believe, I can come to no other conclusions.

Increase fees to finance stadium?

The renovation of the stadium is expected to cost between $600,000 and $800,000, reported Chandler. However, a good facility, or renovated stadium, is expected to generate a considerable increase in income.

"The excess income could possibly be channeled toward helping the athletic department become more self-sufficient," he said.

Chandler added that the stadium, which now exists, is inadequate for commencement exercises and concerts. Also, new bathroom facilities and better lighting are needed.

Although a contract has not been signed determining the cost of renovating the stadium, Chandler pointed out the figures will be too high to have the money raised.

"Therefore, we are proposing a raise in student fees to pay off the money that will be borrowed from a lending company," he said.

Chandler said the money would be tax exempt through the state, which would result in lower interest rates.

In response to the dean's request for feedback, SAC Representative Steve Haaslem, from the School of Engineering and Technology, said he did not believe the student body would be willing to pay the extra fees for the stadium.

"There was already a vote to cut athletic funds by 15 percent, so I don't think the students would pay the $2.1 increase," he noted. "I don't think they would pay the $2." SAC members voted to approve the proposal, stipulating that any changes must be scrutinized by spring quarter, with the exception of fee changes which must be moved or changed immediately.

The price of renovation was 'nippy,' and "gas prices had only been anticipated," Chandler emphasized. "We must expect to get all the money through guesstimates. The figures needed are too preliminary.

Tax return avalanche

"The excess income could possibly be channeled toward helping the athletic department become more self-sufficient," he said.

Chandler added that the stadium, which now exists, is inadequate for commencement exercises and concerts. Also, new bathroom facilities and better lighting are needed.

The frenzied regional office, which processes all returns, has a grand total of 5,500,000 reported Chandler.

"Five hundred and 55 thousand is pretty small," he said. "We've got a long way to go.

"It's called Sound Guard?" remarked Stan Haslam, from the School of Music.

Independent tests show that Sound Guard preserves 100% of the sound in your records, a new record preservative and played the first time.

Nominations for Academy Awards

LOS ANGELES (AP) — Peter Finch, who died Jan. 14 of a heart attack, was nominated Thursday for an Oscar as best actor for his performance as the messianic TV anchor man "Network."

Finch's Oscar would have tied him with William Holden, who was also a nominee for best actor, as well as Robert De Niro for "Taxi Driver"; Marisa Berenson, "Seven Beauties"; Sylvester Stallone, "Rocky.""Rocky"

Finch's "Network" and Talia Shire's "Rocky" were among the nominations for best actress of 1976. "All The President's Men" placed third in the number of nominations with eight, followed by "Bound for Glory" with six. Both were nominated for best picture, along with "Network," "Rocky" and "Taxi Driver."

Sports Information Director Wayne Shaw announced yesterday that the Cal Poly Mustangs have scheduled a game with Division II football powerhouse Portland State.

The Mustangs are slated to travel to Portland Sept. 10 to challenge one of the top-ranked teams. Portland was ranked first in passing and total offense for the last two years.

Rugby

Cal Poly's rugby team will host San Francisco State University today and Saturday at Poly Field.

Today's game will start at 2:30 p.m. Saturdays games a doubleheader, will begin at 6 p.m.

Basketball

The Mustangs basketball season will start with an exhibition game against the University of San Francisco tonight.

Saturday night's game will be at 8 p.m. The Mustangs, seeded seventh in the West Coast Athletic Conference, have a good chance of making it to the NCAA Tournament.

Basketball player of the week

Jeff Karl, Bakersfield Senior, playing center, received the nomination for this week's Player of the Week. Karl scored the final six points in the Mustangs 90-88 win over Bakersfield. His scoring total was 18 points and he pulled down eight rebounds in the game.

March 11, 1977

The Mustangs are facing a tough week end as they travel to Bakersfield to play in the CCAA tournament. The Roadrunner's five wins will be enough to win them the tournament, but they need to be careful not to let their guard down. Meanwhile, the Roadrunners are looking to solidify their position in the conference race.

The Mustangs have a tough game on their hands as they face off against Bakersfield. The Mustangs' record in the conference is not as strong as they would like, and they need to improve their performance to make a run at the championship. The Roadrunners, on the other hand, are looking to solidify their position in the conference race.

IT'S A KEY GAME. After their (Bakersfield) loss to us Fri day, they came right back and beat Irvine Saturday. We're not used to that kind of game, and the Mustangs need to be prepared for it.

The Mustangs need to be ready for anything as they face the Roadrunners. The Roadrunners have a strong team and will be looking to make a statement in the conference race.

A weekend for 54 happy hours

by WENDY HILL
Daily Bell Writer

So you want to become a mature, sophisticated college-type covering those grubby white places somewhere inside you.

The time has come to throw off the childish things and to become a person. Nothing wrong with being a person.

The world is your oyster! Now you can approach your male friends with a chip on your shoulder. It's going to be a fantastic weekend. Let's get started!

I. The sterling silver potpourri of your weekend begins Wednesday evening at 8 p.m. at the Rock Garden Ballroom. The evening will feature a semi-formal Valentine Dance sponsored by the Cal Poly Cutting and Reining Club. Come meet your future Carlotta Lyons or James Bond. Tickets are $3.50 per person and $6 per couple. A carpet hopped by Monte Mills and the Lucky Horsehoe Band and Horn d'oeuvres plus a no-host bar catered by the Muddy Springs Saloon. The ballroom is located in Pismo Beach at 181 Palmroy St. CHUMASH AUDITORIUM:

Auditorium: An on campus dance will be held Saturday in Chumash from 10 p.m. to 2 a.m. Sponsored by the Black Students Union, admission will be $1 per person.

FREEBIE DANCES: If you don't have two coins to rub together, a couple of freebie dances will be taking place this weekend. Saturday, the Music Club will hold a Square Dance in Grange Hall at 8 p.m. and Sunday, the International Folk Dance Club welcomes you to the San Luis Obispo Recreation Center at 7 p.m.

JAZZ CONCERT: A free jazz concert will be held in Mission Plaza on Saturday from 10:30 to 7 p.m. The Desolation Jazz Ensemble, an off-shoot of the Basin Street regulars, will provide the San Francisco-style jazz bands.

CAL POLY MUSIC: The Cal Poly Chamber Singers and Orchestra under the direction of John Russell and Clifton Swanston will present a benefit concert for the St. Stephens Episcopal Church choir and music fund. It will begin at 8 p.m. in the church, located at 1344 Nipomo St. Donation are $2 per person.

INDIAN EXHIBIT: The Chumash Indian, his life, customs and costumes, is the topic for the current exhibit at Cuesta College's Hollister Adobe. The show is open every Sunday from 12 to 4 p.m., courtesy of the San Luis Obispo County Archaeological Society. Articles in the show include: Olivella shell necklaces, bird bones, shell pipe and beads and a flint and leather handbag loaned by Harvard University.

THEATRE: San Luis Obispo Little Theatre will present Jean Anouilh's "The Waltz of the Toreadors" Feb. 11, 13, 18 and 19 at 8 p.m. in the Cal Poly Theatre. Admission is $2 per student and $2.50 general.
