Pick a nook for a picnic
Enough Amy-ness

The American people are a forgiving people. They have forgiven draft evaders. They have forgiven a president who was left with Billy Carter as a companion.

But, because her father wanted to be President, she became public property. By some magical process, she belonged to America. And the reporters, by God, were going to get the story. Even if there wasn't any story.

Amy did not take it well. Right after her father's election, while he was sitting with the press in a restaurant near Florida, Amy interrupted from the table and locked herself in the bathroom.

While the leader of the free world and his wife were talking to each other, Amy suddenly burst out and, on her hands and knees, crawled under the tables and then ran out the front door.

Things got worse. I stood across from the presidential review stand at the inaugural parade and watched Amy. Most of the time she sat on the floor, refusing to sit up while the TV camera could capture her. When she finally got bored with that, she went outside and placed the Secret Service agents with snowballs.

Amy's first day at school was given press coverage surpassed only by the D-Day invasion. She was given a dog that got its picture taken more than Laos. And when Amy saw the reporters, she did what she usually does—she winces.

And we have only begun with Amy. The first time something happens to her, the school—if somebody steals her pencil box or pulls her pigtail—it's going to be national news.

I suggest we just leave the kid alone. I don't want to write about her. I don't want to read about her. She is not sugar and spice and she is not a little kid anymore. She's a kid who has passed these days and a little bit of a brat. And I don't blame her.

Next time, let's pick on somebody of our own size.

What I have to say has been said before and will be said again. However that doesn't make it any less important. As many of you may know, we are approaching a very serious water shortage. Apparently many people won't be concerned until there is actually no water available. Because of waters past abundance, wastefulness was not discouraged. The time has come for wasting water to stop.

Try to think where the water is wasted. The first thought may be toilets. The average home toilet discharge 5.8 gallons per flush (National Plumber Code). The average campus, the California State University, San Luis Obispo, uses 7.5 gallons per flush (National Plumbing Code). The average campus discharge 5.5 gallons per flush (NSCF). Assuming that the student uses a flush a toilet five times a day, and assuming 50,000 people in this town, that is over 500,000 gallons of water flushed per day! Imagine being able to save over 150,000 gallons of water a day by only flushing half as much. Some of you may think this is crude, but it is reality, damns it. If we don't do something now, we may end up with a rationing program. We should not ever need such a program, we are supposed to be able to control this kind of problem by using our heads.

Next time you go to flush a toilet, first decide whether or not it is ABSOLUTELY necessary.

Jim Greenewich

As we conclude our 1977 activities, the Cal Poly Rose Parade Float Committee would like to take this opportunity to thank all of the people who gave their support during the past year. Our float—the Princess Award winner of 1977—gave an excellent showing as it moved down the parade route in Pasadena on Jan. 1. This was a high degree, due to the help of the local area residents, merchants and news media.

We would like to specifically thank the restaurants in the area which participated in our donation drive, and which donated materials for the float construction and and the people who participated in the flower harvest on Feb. 4. As we prepare for the 1978 parade, we at Rose Parade Float Committee look forward to another year of community interest and participation and toward another winning float.

Legal services ad stirs concern

by BETSY SUSHMAN

Daily Associate Editor

A full page ad for legal aid services which appeared in the Feb. 1, 1977 issue of Mustang Daily has stirred a controversy.

The ad, submitted by attorney Joseph Woff, is for a new legal aid program at Cal Poly, to be located in room 2330 of the Ag Building. According to the ad, applications can be made from 9 a.m. to 5 p.m. Monday through Friday.

The ad was submitted on Feb. 2, 1977, and it was given a favorable opinion from the ASI attorney. Woff stated:

"I never received word that it would be run on Feb. 8, 1977, barring any unforeseen circumstances." He added that it was submitted to the Student Government Association (SGA) on Feb. 4, 1977, and that it was approved by the ASI attorney. The ad was published on Feb. 5, 1977, in the Daily.

"I still haven't got an opinion from my lawyer (Devlin)," said Woff.

The ad, which was published in the Daily on Feb. 8, 1977, consists of a one-column, one-page ad, and it contains the following text:

"The following are inconsistent, incompatible, or in conflict with duties as a faculty or staff employee. The use of State time, facilities, equipment or supplies at any time for any purpose other than the performance of official duties.

"I would say (Woff's use) was not approved by the public affairs office," said MacDonald. "To my knowledge, no one authorized the use of a university address.

"Another possible discrepancy is the $15 ad. Woff personally paid for the checkbook is designated as a Cal Poly Professor. A spokesman in the Personnel Office said Woff's office was not notified, and no action was taken.

"An ethical question now under debate in the State Bar is the advertisement of services and benefits by attorneys."
If you're planning a picnic, you'll want to consider the following tips to ensure a successful outing:

1. **Location:** Choose a spot that is easily accessible and offers a pleasant environment. Consider factors such as shade, facilities, and views.
2. **Facilities:** Check the availability of facilities such as restrooms, water, and electrical outlets before heading out.
3. **Preparation:** Pack a good mix of food, drinks, and snacks to ensure everyone is satisfied. Don't forget to bring utensils, plates, and cups.
4. **Cleanup:** Be sure to clean up after yourself to keep the park and its facilities clean for others to enjoy.

Here are some scenic spots to consider for your picnic:

- **Monte Vista State Park:** Located on the southern slope of the Santa Lucia Mountains, this park offers breathtaking views of the Pacific Ocean.
- **Black Mountain:** This park is ideal for hikers with its challenging trails and stunning views of the surrounding landscape.
- **Santa Margarita Lake:** This lake is perfect for picnics with its beautiful shorefront and opportunities for fishing and boating.

Remember, the key to a great picnic is a good time with friends and family in a beautiful setting. Have fun and enjoy your meal!
Prof lives a part of history at inauguration

by Bonnie Burnett
Special to the Daily

Flick 17, 1977

A historian’s dream come true. This year’s inauguration was just that for Cal Poly history professor Donald Hensel.

On the second day of rehearsal for an inaugural parade, Hensel received an engraved, distinguished-looking invitation from the Inaugural Committee. He was proud to attend the parade and the everything-including excitement.

He concluded he had received the invitation because he had supported Carter before the California primary. He was a Democrat supporting Gov. Edmund G. Brown and Carter had written off California, according to Hensel.

For over six years, she continued to perform with the Cal Poly Chamber Orchestra and the Ojai Music Festival orchestras. She has appeared with the English Chamber Orchestra, where she played harpsichord and harp.

Dr. Donald Hensel (Daily photo by Betsy Udenau)

South Brook on way to The Graduate

It was a happy, jubilant crowd from all over the country. Hensel was surrounded by people from Indiana, Florida and Texas. A musical concert played over the public address system during the two hours prior to the inauguration.

According to Hensel, the crowd was thrilled to see Carter get out of his car and walk in the parade, the first president to do so since Andrew Jackson.

"I felt the parade was the truly nationalistic aspect of the whole thing," Hensel said.

Carter asked the crowd how they liked his wife’s "old dress." Mrs. Carter had chosen a print in fashion circles by wearing the same dress she had worn at Carter’s inauguration as governor of Georgia.

"Speaking as a historian, everything seemed more democratic," Hensel said. "Carter getting out and walking in the parade—assuming new—and his wife, the First Lady, walking in the air for the first time, was a thrill.

The inauguration as governor of Georgia.

"And finally, to be able to say, ‘I was there.’"
Poly swim enthusiasts try to keep club afloat

by DUNCAN MACDONALD
Daily Staff Writer

Every weekend when most people are sitting down, enjoying a warm meal and the temperature outside starts to cool, 21 dedicated female swimmers slide into the outdoor pool to begin a two hour workout.

The team swum under the banner of the Cal Poly Swim Club, but they are not officials of such a team. They have been working hard this year to establish themselves as a team and to prove to the Women's Athletic Department that there is a definite interest in starting a women's intercollegiate swim team.

Indications from the Women's Athletic Board are that if interest is still high next year they will fund the team. But there has been no official decision yet.

The women were organized last October by Sue Heim, a PE major, and Eric Nicholaus, a member of the Men's squad and former All American. volunmeered to coach the women.

"We put up flyers announcing the team and looked for some response," said Heim. "We were very happy with the number of girls interested."

The roster shows some fine talent. Four swimmers have an excellent chance of placing in the Southern California Athletic Association championships on Feb. 18-19, at Northridge.

Heim is a strong swimmer in the distance events. She could place in the 500 and 200 meter freestyle events.

Karen Kielson, a PE major who has been swimming since she was nine years old, is very versatile, capable of placing in the 500 meter freestyle and the 200 meter individual medley.

Diana Berger is a freshman from Redwood City who has been swimming since she was eight years old. She has a very good chance of placing in both the 50 and 100 meter breaststroke.

Sue Larson has the fastest practice times. In a recent tri-meet against UC Irvine and Cal State Los Angeles she placed first in the 300 meter backstroke and second in the 100 meter individual medley.

She will be adding the 100 meter backstroke to her repertoire for future meets.

The team has only been able to compete in eight meets this year because they were organized late in the season. In November they met Fresno once, but the inexperienced team lost. They have competed against Cal State Los Angeles twice and won both times. They have also competed against UCI Irvine twice, winning the first and losing the second.

The conditioning paid off last weekend when the women travelled with the men's team to compete against Whittier College and Cal Poly Pomona. The latter women forfeited. But Pomona was a tough meet and won both events. They have also competed against UCI Irvine twice, winning the first and losing the second.

Eric Nicholaus oversees the women practice for the Cal Poly Swim Club. Nicholaus is one of three coaches, the others being Bob During and Sue Heim.

The three organized the club last October when Heim realized there was too little interest in the women's swim team. (Daily photo by Frank Laked)

**Advanced Building Studies**

**Graduate Multidisciplinary Programs**

**PURPOSE** - The program provides advanced training in planning, design, construction and operation of the built environment, by considering the interrelated esthetic, technological, financial and managerial aspects of building problems, embedded in a systems approach. The program integrates methods, knowledge and techniques which address problems of building simultaneously rather than following traditionally fragmented approaches to design of the built environment.

The program is designed to prepare future leaders in the building industry for opportunities of advanced practices which emerge in large architectural and engineering firms, construction firms, real property development and management organizations which emerge with building related products, and various local, state and national government agencies concerned with regulation of management of the built environment.

**TOPICS OF STUDY**

- Computer-Aided Design
- Energy Conscious Design
- Disaster Mitigation
- Low Cost Housing
- Project Management
- Real Estate Economics and Management
- Solar Utilization in Building
- Structural Systems in Design
- Systems Integration

**DEGREES**

- Master of Architecture in Advanced Building Studies
- Master of Science in Civil Engineering (Advanced Building Studies)
- Master of Urban and Public Affairs in Advanced Building Studies
- Doctor of Philosophy

**APPLICATION** - For students with first professional degrees in Architecture, Engineering and/or Management Graduate fellowships and research assistantships are available. Applications must be received by February 28, 1977.

Please request information from:

Wrestlers shutout Gauchos; ready for Oregon St.

by COREY BRITTON
Daily Nexus

UCSB's wrestling team scored a 36-3 shutout over UC Santa Barbara on Saturday at the Jack-In-The-Box Indoor Gym.

Head coach Vaughn Hinchcock had a totally organized line-up against the Gauchos. There were different men in the weight classes and the rosters were moved to different weights.

Les Immartelle (185), who has been out for two years after having surgery performed on his knee, won his first match since being injured.

Billy Fungillo (145) has won all five of his matches. He entered the 177-pound match with the score tied at 11-10. The Gauchos tied the score early in the second round with an escape, only to fall behind again on a takedown by Jones.

Ricardo scored a takedown with nine seconds left into the period, and led 2-1 at the end of the round. Ricardo came back and tied the score only in the second round with an escape, only to fall behind again on a takedown by Jones.

Ricardo, scored an escape to fall behind by one, 3-4, before scoring a two-point takedown and taking the lead at 5-4. Jones tied the score at five after gaining an escape to end the round. Jones grabbed the lead again on an escape and held it until Ricardo scored a takedown with time seconds left to take the lead and the match.

"I think we can win against Oregon State. It will be difficult. We will go with Kem. We will either have a second or third man (by points)," Hinchcock said.

Benjie Williams (184), who recently injured his knee, is expected to wrestle in both meets.

The Gauchos are scheduled to travel to Fresno Saturday to face the Bulldogs.

Hinchcock is expecting wins in both matches. 

Prep JV center already 7' NOVATO (AP)--At 15, Ricardo Harris already knows what he wants to be when he grows up. And so does his father.

"I don't know how much more I'll grow," the towering youngster says. "But I know in my grandfather's side who was 7-foot-11. He was so tall he wouldn't go to school because the kids kid-ded him so much.

"But, Ricardo's father is 6-foot-6, currently plays basketball for the Novato High School junior varsity. And although he hasn't been as long as his long, his coach isn't worried."

"Rogue, naturally, isn't as coordinated on the court as he's going to become," said coach Ed Antille. "But he's already shown a lot of improvement and once he starts growing, his coordination will catch up."

The Mustangs trounced UC Santa Barbara 11-0 in a practice match at UCSB's indoor gym.

"The race will challenge her to put out every bit of energy she's got and keep going," said Cadena. "Being that she has been running the mile for only five weeks, and adapting well, our primary goal is for her to continue to improve on her time and gain more experience on the track."

Up until last year, Rouda was strictly a half miler where she ran 8:15 and won her league championship in that event. During the summer she began a long-range program which included daily runs of eight to 10 miles. Combining her training into fall, Rouda turned in sixth place finish in the District AAU Three Mile Cross Country Championship and fourth place at the State Meet in Sacramento.

"Those two finishes pretty much convinced us that she has what it takes to go the half-mile but in the mile," said Cadena.

The coach thinks the team's talent can back up her sentiments.

"This is the strongest girls' tennis team so far at Cal Poly," said Cadena. "There's more competitive background among the girls as well as potential."

The Cal Poly tennis team hosts UCSB Friday at 4:30 p.m. in the Jack-In-The-Box Indoor Gym.

The Mustangs warmed up for their home contests at Cal Poly by sweeping UC Santa Barbara 6-2 at the Davis Center in a six-game match. This unseasonably warm weather brought out the best in the players, said coach Ed Antille.

"The girls had tough matches, but their experience was telling," said Antille. "Even though the score didn't show it, we gave them insight into what it takes to win conference competition">

Rouda eyes Jack-In-The-Box Cal Poly's Jani Rouda will find herself in the spotlight when she travels to San Diego Friday to run in the Jack-In-The-Box Indoor Gems.

Rouda will challenge indoor world records in the 1500 and 3000 meter races.

Rouda qualified for Friday night's meet when she won the 1000 meter race two weeks ago at UC Santa Barbara in a time of 4:34.

The displayed excellent discipline and running a 4:34.5. She then ran the District AAU Three Mile Cross Country Championship and fourth place at the State Meet in Sacramento.

"Those two finishes pretty much convinced us that she has what it takes to run the half-mile but in the mile," said Cadena.

The coach thinks the team's talent can back up her sentiments.

Tennis team hosts UCSB
Agricultural workshop

The American Society of Farm Managers and Rural Appraisers has announced a workshop, Feb. 19 and 20, designed at individuals who are involved in rural real estate, agricultural finance, farmers-ranchers, and others interested in agriculture and agri-business.

The two day affair is scheduled for the San Francisco airport Hilton and sessions are open to the public. The registration fee of $115 includes hand-outs and two lunches.

Crop science seminar

Farm labor, pesticides and legislation are the topics of a seminar for SF alumni of the Crop Science Department on Sat. Feb. 19.

Dr. C. B. Johnson, head of the department has announced that William Thomas, manager of California Food Producers Association, Stanley W. Sneed, executive director, Council of California Agricultural Pest Control Advisors, Inc. and Assemblywoman Carol Halter are the invited speakers.

Registration for the seminar at Cal Poly will begin at 10 a.m. in the Staff Dinning Room.

The ASI reminds interested students that live entertainment will be provided in the Mustang Lounge, downstairs in the University Union at 8 p.m. Feb. 19. Admission is 50 cents and refreshments will be available.

SpaceLab to carry international crew

WASHINGTON (AP) - An American scientist and a European scientist will fly in orbit together when the first Spacelab is launched in 1980, the National Aeronautics Space Administration said Wednesday.

The flight will be the second international space mission for the United States. In 1975, three American astronauts boarded up in space with a Russian ship carrying two cosmonauts.

Three other Americans will fly on the first Spacelab mission. They will be two pilots and the flight engineer who will man the U.S.-built Space Shuttle, which is to ferry the Spacelab into orbit from Cape Canaveral, Fla.

The two scientists are to work different skills so that experiments can continue 24 hours a day during the week-long test of the big laboratory. They will orbit 155 miles above the earth.

The Spacelab will remain attached to the Shuttle during the mission. On later flights the Shuttle will deposit the Spacelab in space and return up to 80 days later to bring it back to earth.
