Thoroughbreds out of the gates

California Polytechnic State University
San Luis Obispo Volume 41 Number 84

Wednesday, April 13, 1977

Cal Poly students are practicing the university's "learn by doing" philosophy to the hilt while making money off of two horses.

They are not learning to become bookies, but they are learning how to raise, care for, and train thoroughbreds, because of a new enterprise program through the Animal Science Department.

The program's goal is to prepare young horses for the Two-Year-Old In-Training Sale in March at Hollywood Park, Inglewood, C.A. The sale, in its fifth year, was a major factor in instituting the enterprise program last fall by William Neal, an Animal Science Instructor who began and now supervises it. Although the students do not receive credit for their efforts, they do collect a percentage of the profit their horses earn at the sale.

Cal Poly has had a thoroughbred program for 57 years, beginning with the donation of purebred stock from actors Bing Crosby, Carlton F. Burke and H.P. Russell, and the contribution of a stallion by A.T. Jergins of Jergins Oil Co. of Southern California, a year later.

Cal Poly now supervises the program through the Two-Year-Old In-Training Enterprise.

Although there is so much money involved, profits from school-bred horses are retained by Poly. The fact that, when the market is good, four Poly-bred thoroughbreds can bring a total of $20,000 accounts for the need to set this guideline according to Gibford.

The increasing number of Poly students interested and actively involved in the enterprise program though, has forced the university to rely heavily on donated stock according to Gibford. Commercial breeders today are not able to sell their quality thoroughbreds at cut rates for the university, or students.

In an attempt to assist Poly students the Cal Poly Foundation started loaning money to students to purchase thoroughbreds last fall according to Jon Neal, Foundation controller. He said the Foundation enters into contracts with individual students. The Foundation then pays the feed, veterinarian expenses and the transportation costs to and from thoroughbred sales outside of San Luis Obispo County. When the thoroughbred is sold, the student, who raised the horse receive two-thirds of the profit and the rest goes back to the Foundation, according to Neal.

Neal said though, the contract arrangements between the students and Foundation is still in the infant stages and the total cost of the program have not been substantiated yet.

Lisa Moore, a senior in animal science, was involved in this year's enterprise program and is compiling a synopsis of (Continued on page 8)
Spreading the student fees

Trying to steal our images

Perhaps it was the year-end picture round-up that finally did it—double exposure to the same vivid photographs.

The camera first became portable, we have readily and repeatedly aimed it at us. Since the camera was first portable, we have had open and repeated access to the image of ourselves. With new technology, however, those intrusions have intensified. This year, someone with a camera committed the gross indecency of shooting an unaware Greta Garbo in the nude and People magazine printed it.

A psychologist Stanley Milgram puts it, "A photographer takes a picture, he does not create it or own the image being "taken" is that of a public figure? Do we all lose our right to the image being "taken" is that of a public figure? Do we all lose our right to control our own image?落ちたカメラも田舎の写真家は、彼らが自らの肖像を私・公にない権利を失ったか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利があるのか、権利ある
Cal Poly blood drive starts tomorrow

The Tri-County Blood Bank is looking for 50 people's worth of blood tomorrow, only it is expected to come from 80 people.

Cal Poly's annual blood drive will take place tomorrow in Chumash Auditorium between 9 a.m. and 5:30 p.m. Anyone wishing to donate blood should simply drop by.

The Home Concert to feature jazz band, glee clubs

The Home Concert is a 36-year tradition at Cal Poly, it is the culmination of almost seven months effort on the part of the Music Department.

"It's a lot of work," said glee club director Stan Malinowski, "but it's well worth it. The Home Concert is the annual showcase for the glee clubs and jazz band."

Cal Poly dorms are still waiting for a decision from Pres. Robert Kennedy allowing or prohibiting them from having refrigerators in their dormitory rooms.

A proposal, authored by the Ad­

A proposal to restrict parking in the Grand Avenue facing Sierra Madre dormitories will be the major item of discussion at tonight's Student Action Committee meeting.

According to Paul Curtis, internal af­
fairs assistant to Associated Students, Inc., parking is likely to be restricted to the dormitory area.

Curtis said that during SAC's April 6 meeting, Ray Davis proposed that parking be restricted in the half of the dormitories closest to campus from 3:00 a.m. to 5:30 a.m., Monday through Friday, during regular school sessions.

Because no one is likely to get up and move their car at those hours, Curtis maintained, dorm students will have the incentive to find alternative parking spaces.

Lyune Hinkelman, Interhall Council representative to SAC, said Interhall Coun­cil is opposed to the restriction.

Resident hall students pay parking fees," Hinkelman said, "and should not be dis­

Daily Staff Writer
(Editor's note: This is the second of a two-part series on an alleged document within the major student legislative body on campus—Student Affairs Council.)

With more than 20 Student Affairs Council members meeting to express their opinions and vote on various issues, a great number of differing viewpoints are voiced within the group.

The members disagree not only on various issues that come before the council, but on their sentiments about the accomplishments and effectiveness of SAC. Not all members share SAC Chair Ray Davis positive view of the council. Davis is also vice president of the Associated Students, Inc.

One of the biggest problems in SAC according to Larry Robinson, representative from the School of Communication Arts and Humanities, is that members are not pulling together as a group.

Robinson said another reason members have become discouraged with council duties is that there is a lack of stimulating issues.

"There's not that much to get behind. There are no new problems, and students don't get motivated over the old problems," he noted.

He saw another facet of the problem in the administration:

"I think of the administration as being Dr. Kennedy (Pres. Robert E. Kennedy). There are some things he is dead set against, so sometimes I feel like I'm hitting my head against a stone wall."

Chris Kearney, a representative from the School of Engineering and Technology, also sees flaws in the committee structure.

"The structure is a good idea, but it's definitely not working," he said. "A lot of people can't make it to the meetings."

Kearney said, SAC's top problem is that there is a lack of communication.

"A lot of them are lazy—myself included. A lot of times don't say anything. They don't have a definite stand and then just go along with the majority," Haslom said.

John Chasuk, a representative from the School of Business, said he feels SAC could be really effective if there was better communication between the entire council.

"We haven't been as professional as we should be," he remarked. "We need to want to do things. We're afraid to make a decision and stand by it."

He finds an "overall laziness" with the representatives.

"There's not that much to get behind. There are no new problems, and students don't get motivated over the old problems."

Robert White, a representative from the School of Humanities, is satisfied. SAC is "doing its duty," he said. "It would help if everyone respected each other and the chair knew courtesy and respect."

Members who are frustrated with SAC are in the minority, and most of the people are content with the council, Chasuk added.

"No one wants to spend the time and energy," he said. "They get intimidated easily."

Chasuk said he feels SAC operated much better last year because the people respected each other and the chair knew courtesy and respect.

Members who are frustrated with SAC are in the minority, and most of the people are content with the council, Chasuk added.

Kearney said another reason members have become discouraged with council duties is that there is a lack of stimulating issues.

"There's not that much to get behind. There are no new problems, and students don't get motivated over the old problems," he noted.

He saw another facet of the problem in the administration:

"I think of the administration as being Dr. Kennedy (Pres. Robert E. Kennedy). There are some things he is dead set against, so sometimes I feel like I'm hitting my head against a stone wall."

Chris Kearney, a representative from the School of Engineering and Technology, also sees flaws in the committee structure.

"The structure is a good idea, but it's definitely not working," he said. "A lot of people can't make it to the meetings."

Kearney said, SAC's top problem is that there is a lack of communication.

"A lot of them are lazy—myself included. A lot of times don't say anything. They don't have a definite stand and then just go along with the majority," Haslom said.

John Chasuk, a representative from the School of Business, said he feels SAC could be really effective if there was better communication between the entire council.

"We haven't been as professional as we should be," he remarked. "We need to want to do things. We're afraid to make a decision and stand by it."

He finds an "overall laziness" with the representatives.

"There's not that much to get behind. There are no new problems, and students don't get motivated over the old problems."

Naturally, not all the SAC members view the council with pessimism.

Dennis Leonardi, a representative from the School of Agriculture and Natural Resources, refused the accusation that "nothing is being done" by explaining a lot of time is involved in working on proposals.

"SAC could be really effective if there was better communication," Albertson said.

Janet Albertson, a representative from the School of Human Development and Education, said the committee structure has helped "especially as far as the flow of the meetings."

But whether the SAC is functioning or is skeptical of the council, many members are room for change within the council and student government.

"SAC could be really effective if there was better communication," Albertson said.

She said she would like to see more communication between the entire council and between student body officers and the administration.

Dennis Leonardi would like to see more feedback from the administration.

"It would help if everyone was up on parliamentary procedures," he said. "That's a problem."

Larry Robinson would like to see more assistance from chairman Ray Davis.

"I think the chair should get more pushy, get more personally involved. It would really enhance SAC."

Dan Crosby, from the School of Engineering and Technology, is satisfied.

"I'm doing its duty," he said.

There are no big crises from the students," he added.

Bill Cappel, from the School of Business, said he expected the council to be "pretty low key.

He has seen some improvement in the council since last year.

"This year it's a lot more cohesive group, very congenial and amicable."

Meland said a great number of differing viewpoints are voiced within the group.

"Many of the SAC members and administration would like to see a greater degree of cooperation, but that's also realistic."

Lawson suggested this year serve as a way of helping members familiarize themselves with proper procedure in SAC. He suggested members familiarize themselves with proper procedure in SAC. He suggested members familiarize themselves with proper procedure in SAC. He suggested members familiarize themselves with proper procedure in SAC.

"I think that with the new council, a lot of people would like to keep SAC alive," he said.

Many members commented that SAC operations are opening up, even though it is in its infancy.

"First quarter was very messy," John Robinson from the School of Humanities said.

"It's been difficult," Haslom said.

"With the AD budget still up in the air, I don't think we have a lot of time to waste," he said.

"We're afraid to make a decision. We're afraid to do anything," he said.

Both Ray Davis and Larry Robinson agree that SAC should be made more efficient.

"It's hard to get things done because there are so many problems," Haslom said.

Lawson complimented the council for the amount of work they have done in the few months they have been in existence.

"I think that with the new council, a lot of people would like to keep SAC alive," he said.

"I think we're moving," said Ray Davis, chairman of the Student Affairs Council.

"I think that with the new council, a lot of people would like to keep SAC alive," he said.

Frustration haunts frosh legislator

by JANET McBRIEN
Daily Staff Writer

"Frustration" is one of Rep. Leon Panetta's favorite words.

The Democratic Congressman from the 16th district uses the word frequently to describe the emotions communicated to him by constituents as well as his own feelings after four months in the House of Representatives.

"If there's a common thread it would have to be frustration with federal programs," Panetta said Monday.

"The failure of programs to adopt, with concern with the% development of the congressman's role at an ombudsman."

"I'm trying to reach out and I've found the frustration very gratifying. My willingness and accessibility has made a difference."

As vice chairman of the New Member Caucus and chairman of the group's Committee on Reform, Panetta has assumed an active role in the Congres-sional reform movement. The first bill he introduced as a member of Congress was a resolution to ban the use of secret "slush funds" by his House colleagues. As well, he is leading an effort to kill the five per cent cost-of-living increase for Congressional salaries scheduled to go into effect October.

Concerned with his district's drought crisis, Panetta last week introduced the Drought Emergency Relief Act of 1977 which would provide financial assistance to homeowners, farms and small business owners.

Panetta's stance on other issues are:

- Minimum wage: "I think Carter's position of about $2.50 an hour is about where Congress will come out and where I stand. We have the problem of being rational and holding the line on inflation."

- Carter's $50 rebate: "The proposal is being held hostage in the Senate by Sen. Byrd (Robert Byrd, Democrat from West Virginia) in return for the water bill."

- "It should have been passed when it was first proposed, now, because of economic trends, it is probably inflationary."

- Human rights: "I think it's important that the country act and speak with one voice. There's been a double standard for too long. We criticized but gave arms."

"Carter began a good initiative and I feel it's important that we stick to our guns. The administration has been talking about using weaker language but Congress won't hear it."

The Congressman will return to San Luis Obispo in mid-May when he is scheduled to speak to a campus audience.

"There was a myriad of problems and no standard solutions," said the Congressman. Interests were as varied as were the problems. During the day Panetta filled a yellow legal pad with hand written notes on individual cases to be reviewed later.

Hearings onpark additions proposed continue

SAN FRANCISCO (AP) — Congressional committee plans to investigate the feasibility of legislation to add 74,000 acres to Redwood National Park.

The Interior subcommittee will move to San Francisco for hearings Thursday, according to Rep. Phillip Burton, the San Francisco Democrat who authored legislation to add 74,000 acres to the park.

Burton said his bill has the backing of the Sierra Club and will be debated by the House of Representatives.

As a news conference Monday, the Sierra Club reported that the committee is having difficulty getting the bill out of committee.

ADVANTAGES OF POLARGUARD

• Insulates when wet
• Does not break down when washed
• Easy care
• Mon-allergenic, odorless, mildewproof
• Dries quickly

SAFE AT THIRD is Cal Poly’s Tracy Super Vest

FEATURES
• Polarquard fill
• Two outer cargo pockets with velcro closures
• Handwarmer pockets
• No 5 Drierm zipper
• Polarquard tut collar
• Rear kidney extension
• Snap front norm flap over zipper

REG. $34.99

$24.85

ALTURAS POLARGUARD MUMMY BAG

FEATURES
• Minimum temperature 20 F
• Eight exterior zip pockets
• 58 oz. Polarquard fill
• Average weight 3 lb 2 oz.
• Differential cut
• Ample foot section
• Two back zip pockets

REG. $79.99

$49.85

From teacher to pro athlete

By CORBY BRITTON

Daily Staff Writer

It is rare when a woman, just graduated from college, attends graduate school, lands a part-time teaching job, a coaching job and is presently playing professional softball.

Well, Cal Poly has that rare person in Valerie Filice, who graduated from Poly in September 1978 and landed the job of coaching women’s softball for the 1979 season. She also instructs physical education classes and is currently on the roster of the San Jose Sunbirds, a professional women’s softball team.

She will now at the end of this month if she is on the final team. Filice started playing softball in her home town of Gilroy when she was about 13 years old. She picked the sport over any other because that was the only sport in recreation league play.

"We did not really have a choice of what sport to play, I like softball, and play it with my brother," Filice said. She kept up playing through her pre-graduate days and is even seen now much like what has happen-

To baseball for fun.

The team has an end of May to the end of August with more than 30 games scheduled, doubleheaders. Although the pay is minimal, it is to substantially higher if you keep playing throughout the season and future year.

"The starting salary would probably be a couple of thousand for the new players, five or six thousand dollars for the old ones," Filice said. The San Jose club, owned by Mr. and Mrs. John, both graduates of Cal Poly, draws the second highest number of spectators per year. If this trend would con-

continue, the sport would begin to garner more recognition and salaries would be higher.

"I don’t know if I will catch on San Jose draws the second largest crowd per year, with Connectionlan-

ning the largest. She then attended open tryouts where 85 girls were also trying positions in the big leagues.

"From the 85 girls, there were cuts made from there to 55. Then there was another cut to 20. Now there will be a cut in late April to 14, which will be the team," she said.

Filice thinks she has a good chance of being one of the 14 members of the final team.

"I have a good chance. The only thing that may hurt me is I can’t join the team until June (because of teaching at Poly). I think I’ve made it skill-wise.

A professional softball team for women is a thing of the present, and it hopefully will catch on and be a thing to look out for in the future.

There are hassles right now, but playing experiences will outweigh the hassles—Filice

playing softball while she is instructing her team during the week at practice. Last year, Cal Poly team was hitting with a .400 average.

The third baseman received a letter in November of last year to try that had been drafted by the professional San Jose club. This was to say that she wanted to play professional ball with any club. San Jose would have the first rights to her, and she could not tryout for any other team before the Sunbirds.

She then attended open tryouts where 85 girls were also trying positions in the big leagues.

"From the 85 girls, there were cuts made from there to 55. Then there was another cut to 20. Now there will be a cut in late April to 14, which will be the team," she said.

Filice thinks she has a good chance of being one of the 14 members of the final team.

"I have a good chance. The only thing that may hurt me is I can’t join the team until June (because of teaching at Poly). I think I’ve made it skill-wise.

A professional softball team for women is a thing of the present, and it hopefully will catch on and be a thing to look out for in the future.

That gets me excited, would make me want to take the physical education more in college and play as much as possible. Cal Poly, and coaching a team, which will probably be a part-time job.

"My ultimate goal is to play, I am hoping to be drafted to play pro. I know how long can I play, but how much I would rather much," Filice said.

"I would like to see if there would be a job where I could help other coaches but could help in the coaching of our game. That job could make me certified that it is needed and the women have been interested in the second full season on the field. The team should grow on its own."
Record speaks for the need

The Cal Poly men's

plains program has hit

the road running in the

West Regional Basketball

Tourney. For the Cal Poly

huskies, the unknown of

the unknown is the proba

able reason why it should

pick up with second round

facilities.

But you wouldn't know it

in Poly's athletic

facilities, those used by

students and intramural

athletes. The obvious

way Poly facilities prove

the ignorance of the

administrators contributes

to the problem by scheduling 40

students in a weight training

class. There are only 5

"stations," so that leaves

eight students sitting around

wondering why they signed

up for a racquetball court

at 7 a.m. will tell you the

situation needs improve­

ment. The students must suf­

fer through the early mor­

ning and cold just to sign up

for the one-hour use of a

court.

The future of the head

couch of the women's softball

team is in the hands of the

Cal State San Marcos, will train, save. You have to keep a pair of tweeters

right students sitting around

for the need for better athletic

facilities.

One joint
not to smoke.

The constant-velocity joint or "C.V." tends to get stuck, but you can prevent this by making sure it's properly and regularly maintained. There are a few problems you can get with these joints, but with regular maintenance they won't become major repairs. So, the mechanics at THE WERKS are fully qualified to take care of this kind of work, and they are good people too.

International
Lebanon war has anniversary
BEIRUT, Lebanon (AP)—Two years ago today war exploded in Lebanon, the opening act of a bloody tragedy that the country's leaders and people are trying desperately to forget.

Government censorship forbids any mention in the Beirut press of the artillery battles still sputtering along the southern border with Israel between Palestinian guerrillas and Christian militias.

National
CIA deception charged
WASHINGTON (AP)—The Senate Intelligence Committee and the Central Intelligence Agency are looking into allegations by a former CIA officer that CIA field officers fattened their own pocketbooks from agency funds.

John R. Stockwell, a 12-year CIA veteran, also charged that the agency deceived Congress and that most CIA operations in Vietnam were fabrications.

Utility rate hike approved
SAN FRANCISCO (AP)—Pacific Gas & Electric's typical household customer will see his monthly utility bill jump $1.87 immediately and the outlook is for higher rates later this year.

The state Public Utilities Commission authorized an increase of $63.2 million in electric rates for the three months from April 1, through June 30.

State
Handicap sit-in in eighth day
SAN FRANCISCO (AP)—More than 150 handicapped demonstrators carried their sit-in at a federal office building into its eighth day Tuesday, while nearly a dozen of them continued a week-long fast.

The protestors took over the regional office of the Department of Health, Education and Welfare last week to emphasize their demand that HEW Secretary Joseph Califano sign regulations enforcing 1973 legislation banning discrimination against the handicapped.

Land use film showing
"Discover America," a multi-media slide show about land use in California, will be presented at Sinsheimer School, 2773 Augusta, San Luis Obispo, Friday at 7 p.m.

The slide show is the second of a Unitarian-Universalist Forum Series offered in conjunction with Food Day. It is co-sponsored by the Center for Community Structure Alternatives.
