Daily Staff Writer

Not only do trout and baseball season open in spring, but the snow melts, flowers bloom and unwelcome birds return to Cal Poly.

Small, long-winged swallows, which migrate north in spring, lodge under the eaves of many campus buildings excepting straightly drooping that main walls and sidewalks. Native pigeons dump potentially dangerous bacteria in cattle feed bunkers.

Both the Pol. Maintenance and Crop Science Department have adopted a humanitarian approach in alleviating bird problems.

Prior to the arrival of swallows, said Dick Tartaglia, chief of Plant Operations, the maintenance department sprays the eaves of buildings with Roost-So-More, a repellant liquid that gives the birds a harmless hot foot. The liquid easily lasts a season and is very effective.

"Because a nest often includes eggs, we will not destroy it unless it's in direct line of a doorway. We allow swallows to nest on the east side of the Men's Physical Education building and some areas of the dorms. Swallows don't create a drastic problem on campus, it is the pigeon who is our biggest culprit," Tartaglia said.

Swallows are a persistent group of birds. Overhanging eaves afford a home protected from the wind and rain where they can lay their eggs. If you destroy a nest, the bird immediately starts a new one nearby. If that one is destroyed, he will not hesitate to start another. This critical pattern continues for weeks and weeks until the bird decides it is time to leave. The frenzied activity of nest building can end overnight.

Just up the highway, Cuesta College has a similar problem with swallows.

"Our theory," said Douglas Gabriel, Cuesta's Maintenance Director, "is to destroy the nest early in the season while it is still under construction. The Department of Fish and Game does not allow the elimination of a completed nest with eggs."

"We do not touch the nests on the old campus. This might encourage swallows to stay there instead of flying over to the new campus," Gabriel said.

"The architectural style at Cuesta is not feasible for Roost-So-More. This substance stains the white concrete of our buildings. In addition, Roost-So-More only prevents birds from perching. The birds here don't perch, they suspend their feet from the underside of the roofs," Gabriel said.

This season, Cuesta is experimenting with the Ultrason UE-120 T, an electronic high frequency siren that emits an intolerable sound to the birds, but at a decible range high enough to prevent human exposure, Gabriel said.

"The nesting period of swallows is our only concern. They tend to visit the same area each year. If we continue to discourage them, I think the problem will diminish," Gabriel said.

The pigeon problem at Cal Poly, however, is an annual headache.
BY JOSEPH KRAFT
President Carter's presentation of his energy program this week touches the deepest insurers of American life. It shows how much the deity to whom we all burn incense is an unknown god.

The striking feature of the energy unwrapping is the hard-sell quality. The President began the unwrapping last night with a fireside chat to the country on nationwide television. He will next present the program formally to the Congress in a nationally televised address. He will then take the matter up again in a nationally televised radio conference.

Joseph Kraft writes a syndicated column in Washington.

Even before the formal presentation, the package was put on display for interested parties at the White House. From those briefings it was only a step—and a predictable step—to mass leaks. Which is how come you've been reading authoritative stories about the imminent imposition of price controls. Which generated underlined by long lines to buy gasoline.

Once the embargo, the one difference was the phrase "energy crisis." The President's figure has been complete without an authoritative statement from major paper or news magazine has been talking about the subject. But that Niagara of publicity has all been unsaid by one singular experience. Back in 1973, President Nixon talked about the subject. President Carter must next show that his own rhetoric and public persuasion which generated a sense of urgency, the President faces a double task of public education. Which meant driving business as usual. Which meant driving mass leaks. Which is how in 1973, there was an Arab embargo on oil. The one singular experience. Back in 1973 there was an Arab embargo on oil. The one singular experience. Back in 1973 there was an Arab embargo on oil.

This letter is directed to the irresponsible student(s) involved with the latest massacre of Poly's "P." What kind of person or people would want to exhibit such a graphic display of pure hostility?

Editor:

We accept for informational purposes this letter written by student(s) involved with the latest massacre of Poly's "P." What kind of person or people would want to exhibit such a graphic display of pure hostility? The political correctness of business as usual was admitted amongst us, and there has been a need for political correctness in an unwrapping to impose penalties on constituents.

President Carter's energy package is not all that big a departure from the past. Its implicit rhetoric features such familiar values as promoting economic growth, maintaining international independence for America and concern with inflation. But there is a stress on environmental considerations and on conservation. The package does call for higher prices for gas and oil, and for more conservation of energy. So the President faces a double task of public education.

First, he has to dispel the comfortable notion that the crisis is a cooled-off con job. He has to demonstrate that, even if there has been some withholding by suppliers, the basic fact is that there just isn't that much oil and gas out there. He has to convince an instinctively dubious public that the country faces the prospect of a physical shortage of oil and gas so acute that it would lower living standards and reduce national independence.

If he can generate a sense of urgency, the President must next show that his energy prescription for meeting the energy problem is a fair one. That means demonstrating that the conflicting interests of consumer and producer generally located in the rival goals of the economy's two sides of the coin and that the national interest in ecological balance is preserved; that adverse inflationary impacts are contained; and that the decrees bring made in the arts are only minimal.

It is a very tall order. It demands skill of rhetoric and public persuasion which President Carter—was his decision to withdraw the plan for a $10 tax rebate indicates—has not shown. It requires a sense of leadership akin to that exercised by Franklin D. Roosevelt in preparing the country for World War II. Even he was only partly successful, which teaches that nobody can be fully confident when it comes to placing the unknown god.

This letter is directed to the irresponsible student(s) involved with the latest massacre of Poly's "P." What kind of person or people would want to exhibit such a graphic display of pure hostility?

Cal Poly's Rally Committee has been working on upgrading the "P" for over a year now. Within the last four months a resolution was considered by the Student Affairs Council to remove the "P." At that time Rally Committee led the crusade to save it. The student body was overwhelmingly in favor of its salvation, as substantiated in surveys and from school council's support.

As a result, Rally Committee was forced to speed up its restoration work. We have been working hard to get the "P" repaired prior to Poly Royal, so that it would show Poly's pride and heritage. We had to replace a portion of the concrete that was destroyed in January of this year.

Endless hours have been dedicated to see that this project was completed. Now, just a couple days before Poly Royal, on day before Rally Committee was going to give the "P" a brand new coat of paint, someone or some people have ripped off a large portion of the "P.", There was no need for this senseless action to take place. Why is it that only a few would destroy what others have cherished for so long?

Unfortunately, there is no way that any legal recourse can be taken against the responsible person(s). The student body will have to pay out of its own pocket to repair these damages.

Vandels hit Poly's 'P' once again

by DIERK BROERSMA
Daily Staff Writer

After several weekends spent refurbishing it, Cal Poly's 'P' was hit by vandals Monday night who destroyed the lower left of the historic landmark.

According to Steve Riddell, alumni services coordinator, the vandals used a sledgehammer to break up the concrete structure.

A note apparently left by the vandals was found near the damaged "P," by Mustang Daily photographer Ken Cleary. It reads:

"Dear Rally Club—I just wanted to commend you on the excellent job you've done restoring the 'P.' I am so glad to see it pulled back into shape and once again be an asset (not an eye sore) to the mountain. Thank you for your work." The note was signed "unknown." The damage was discovered Tuesday morning by a member of the Rally Committee which is responsible for the maintenance of the "P." The "P" had been scheduled for a fresh coat of paint today crowning many hours of work by the Rally Committee which has hoped to have the refurbishing completed by Poly Royal.

The Rally Committee had spent several hundred dollars restoring and replacing deteriorated concrete.

"They also had planned to put plans in the inner core of the 'P' and Riddell. Although he couldn't estimate the amount of damage done, Riddell said, "I do know the damage is considerable."

A similar incident took place earlier this year when part of the upper left corner of the 'P' was destroyed. At that time controversy surrounded the structure.

Some claimed it was an eyesore and should be removed while others pointed to the historic tradition and nostalgic value of the 'P.'

The Student Affairs Council eventually voted to keep the 'P' and have it refurbished.

FRAGS STRIKE AGAIN—The Poly 'P' on the hill overlooking the campus was once again the victim of vandals Monday night.

In an attempt to thaw the frozen dorm refrigerator proposal, Cal Poly Pres. Robert E. Kennedy will meet with student representatives this afternoon to decide the issue's fate.

Proponents of the measure—Larry Robinson, Student Affairs Council rep from Communicative Arts and Humanities and a major organizer of the proposal, Lynne Hinkleman, SAC rep from Interhall Council and Humanities and a major organizor of the proposal, Pat Lyons Hinkleman, SAC rep and architecture majors, and Larry Robinson, who is planing the "rally," are hoping that a compromise can be made so that the demonstration does not come about. Robinson, who is planning the "rally," is hoping that a compromise can be made so that the demonstration does not come about.

A spokesman for Kennedy said that the president was waiting for the meeting today and had "nothing to say at the time."

Robinson, who is planning the "rally," is hoping that a compromise can be made so that the demonstration does not come about.

Associated Students, Inc., Vice-Pres. Ray Davis, a proponent of the measure, thinks a demonstration will do more harm than good.

"Quite frankly, this act (protest) is an immature action to achieve their goal," Davis said. "Greed, it's an emotional issue, but such action may result in the position and decision going the other way (Kennedy's decision)."

A rite of Spring: Birds drop in on Cal Poly

(Continued from page 1)

Last Thanksgiving, whilemost of us were eating turkey, birds were dropping dead in the streets of San Luis Obispo. The incident occurred when, starting, bluejackets and other species are a mixture of grain and potato spread at the Dairy Unit and mingled for the pigeons.

The death of these birds raised such a controversy that some Cal Poly teachers will refuse to discuss it. Harmon Toone, Dairy Science Department head refused to comment on bird control on campus.

Crop Science Department Head Corwin Johnson, however, was eager to explain Cal Poly pigeon control.

"We do not usually eradicate all the birds, but rather discourage them with a toxic chemical called starficide."

"Our sanction to control pigeons comes from Earl Klar, San Luis Obispo County Administrator of any improper conduct."

The death of the birds was confirmed by investigators from Earl Klar, San Luis Obispo County Administrator of any improper conduct.

The probe of questionable expenditures about $100,000 was reported Monday.

UCLA Chancellor Charles E. Young said in a statement that Donald M. Bowman was cooperating with investigators and had promised to reimburse the Foundation for any improper expenditures.

"The major problem with pigeons," said Dr. Wallace Glidden of the Cal Poly Veterinary Hospital, "is their infection with a bacterial disease called salmonellosis. When the bird defecates, the disease spreads to cattle feeding areas."

Bird-proof feed buckets don't work. A cow spills his feed and returns later to finish the remaining tidbits on the ground where they may have become contaminated. Because of their inherent cleaning tendencies, calves lick fences and other objects that have bacteria and droppings on them. Also, cows will lay in an area covered with droppings. They then lick the disease. Glidden said.

Ex-UCLA chief target of probe

Los Angeles (AP) - The former chief administrator of UCLA's private fundraising program is the target of investigations into the possibility of about $100,000 it was reported Monday.

UCLA Chancellor Charles E. Young said in a statement that Donald M. Bowman was cooperating with investigators and had promised to reimburse the UCLA Foundation for any improper expenditures.

Agricultural Commissioner. The probe of questionable expenditures about $100,000 was reported Monday.

Until his suspension and resignation in the probe of questionable expenditures last month, Bowman was assistant chancellor for alumni and development and secretary of the UCLA Foundation. Officials said the foundation took in about $5.5 million in contributions from private sources and corporations during the last fiscal year.

The investigations are being conducted by the state attorney general's office and the UCLA administration.
Three dozen archies to study abroad

by J.N. SIRANTI Daily Staff Writer

Thirty-six Cal Poly architecture students have been elected to study abroad next year in conjunction with the California State University and Colleges International Program. The archies will be heading to Copenhagen, Denmark, and Florence, Italy, for nine months of training in landscape architecture. The students were selected from 13 Cal Poly applicants by the CSUC Chancellor’s office along with architecture students from Cal Poly Pomona to participate in the program which has been going since 1968.

Mexico to extradite minor drug offenders

MEXICO CITY (AP)—A foreigner caught in Mexico with a small amount of drugs for personal use will probably wind up on a plane home instead of in jail, the U.S. Department of State’s Consul General in Mexico, Vice Consul Ruth McLindon said they were reporting, Vice Consul Ruth McLindon said they were reporting. 

There is no point in arresting and jailing someone who possesses only a small amount of drugs for personal use. The students were selected from 13 Cal Poly applicants by the CSUC Chancellor’s office along with architecture students from Cal Poly Pomona to participate in the program which has been going since 1968.

Killer whale beached

by DOROTHY NEWELL Daily Staff Writer

A 21-foot male killer whale washed up on the beach above Hazard Canyon Saturday. It was the first reported beaching of that species of whale in San Luis Obispo County, according to its warden Tom Lipp of the California Fish and Game Department.

The whale was dead when found. The Fish and Game Department received a call about the whale around 8 a.m. Saturday.

At about the same time, the whale received another call concerning a second whale reportedly trying to beach itself near Morro Bay, but that whale was never found. A team of researchers from the Santa Barbara Museum of Natural History arrived on the scene Monday to perform an autopsy and collect parts of the whale for study.

The found no apparent cause of death in the marine mammal which they guessed to be about 20 years old. “Most of them get to be about 22 to 25 years old,” said Paul Collins, research associate with the museum. “About 50 per cent of the animals we get have man-caused injuries,” he said. “Some whales are shot by fishermen for interfering with nets, but we haven’t found anything like that on this animal.”

Parts of the skull of the animal will be taken to Santa Barbara for further study. The remains of the whale will be left on the beach.

The odor of this animal is going to get pretty bad in a few days,” Lippsaid. “I suppose we could bury it, but I think it’s important to leave it here for researchers and other scavengers and not interfere with the natural process of decay, no matter how much it offends our senses.”

Wrestling won't be the same with NCAA rule changes

by Corky Britton
Daily Staff Writer

Wrestling will be a little different as of the beginning of the 1977-78 grappling season. Some of the rules were changed, modified and deleted during the National Collegiate Athletic Association's Wrestling Committee meeting in Kansas City last week.

Head coach Vaughan Hitchcock noted that there were 28 rule changes, although not all of them would effect the wrestling during the regular season.

One of the more important rule changes dealt with stalling. As of last season, there were several calls made by the officials, and the NCAA has taken action.

Next season, if either wrestler has scored any points in the first period, and if no warning has been made, one wrestler must be warned for stalling at the close of the round.

"We will have to wrestle more aggressively in the early going because you can now be penalized in the first period," Hitchcock said.

A wrestler may be warned one time in the match without any points awarded to his opponent. The second time he is warned, the other wrestler receives a point. Upon the fourth warning, two points are scored and the wrestler is disqualified after five warnings.

"Before, we were getting hurt late in the match because our wrestlers were being penalized for stalling and it cost us some of our matches. We will have to be more aggressive," Hitchcock said.

A takedown, the basic maneuver a wrestler makes to gain control of the match, is now scored with the knees in bounds instead of the toes.

Last season if a grappler would score a takedown, just his toes could be inside the playing area and it would be legal. Next year the knees have to be inside the circle on the mat.

Speaking of the mat, the largest mat used is limited to 42 feet. Cal Poly went to Iowa State and wrestled on a giant 64-foot mat. The Mustangs have a mat of 52 feet.

The edge rule—the referee calls "edge" when the grapplers near the edge of the mat are thrown out and will now be ruled as stalling.

Hitchcock and three other coaches will get together and make a video-tape film of the officiating, the right way to do it, and the way to interpret the rules. Hitchcock said it "will greatly help in calling the plays."

Whenever a wrestler reproduces an edge, a nearfall was not previously called. Next season, if a grappler finds himself on his elbows, an automatic nearfall will be awarded in his opponent's advantage.

Only two wrestlers will be qualified from the Western Regionals as wild card choices to go to nationals. This past season three qualifiers were able to go to the NCAA playoffs. The reduction was because of the poor performances turned out by wrestlers from the far West.

"There were not that many changes that will drastically affect us next year. During our practices we will work on basically the same things and be on the attack much," Hitchcock said.

Rodeo team will try to win lead at Polv Royal

The Cal Poly men's rodeo team, traditional winner of the regional championship, will try to increase its substantial lead in the standings of the National Intercollegiate Rodeo Association's West Coast Region at the Poly Royal Rodeo on Friday and Saturday, April 22 and 23, in its home arena.

After competition at five previous rodeos this season, the Cal Poly Men's team has added up 1,466 total points, a 313-point lead over second place Central Arizona College of Gaillette, Ariz.

The Poly men's team is also well represented in regional standings in all of the standard men's rodeo events.

In the bull riding, Polv has a clean sweep of the top four places, with Donald leading the regional competition.

Team captain Jim Paull has a comfortable lead in saddle bronc riding with 369 points.

In the regional all-around standing, Pratt is in third place for Cal Poly with 49 points. Other Cal Poly men's team members in the all-around standings are Donald, fifth; Gay Hawks, sixth, and Gus Loken, eighth.

The Poly women's team is ranked third in the regional standings, 273 points behind Donald, fifth; Gay Hawks, sixth, and Cindy Van Horn, 12th.

The two-day rodeo competition of Poly Royal will begin at 7 p.m. on Friday, April 22, and 2 p.m. on Saturday, April 23, in Cal Poly's Collet Arena. Tickets are available at the University Union ticket office on campus for $4.50, $3.50, $2.50 and $1.50.

Other activities featured during the 1977 event are instructional displays in exhibits, mineral events, athletic events, fashion and flower shows, a campus pancake breakfast, a show with student and equestrian performers, a luncheon, tractor pull contest, and livestock shows.

Many skilled people are needed by Vista

Senior Orientation Week is May 18-19, 1977. The Vista Placement Center will conduct for April 25-28 Interviews with experienced and qualified Vista volunteers.

One year assignments in U.S. low-income communitics are available to social science and architectural majors.

Two year assignments are available to Vista Corps begin this summer for liberal arts, agriculture, foreign education and engineering seniors.

They travel the world in 160 countries on the Peace Corps Program.

A young man, who has graduated from Cal Poly and is serving in Ghana, talks about his experiences.

Deadlines for Vista application is: Vista turn forms in Vista Center.

Ted - Good evening, Sir. Want some Pepsi?

Ted has his way of saying things, but I understand from the notes that the man is a good fellow, a true gentleman.

Ted has been a good friend to me, and I am sure he will be a good friend to you as well.

Please accept this Pepsi as a token of my appreciation for your kind words and for the help you have given me.

Ted is not only a good friend, but he is also a good neighbor.

He has been a regular at our dinner table, and I have always enjoyed his company.

Please accept this Pepsi as a token of my appreciation for your kind words and for the help you have given me.

Ted is not only a good friend, but he is also a good neighbor.

Poly coed battle it out on the Powderpuff football field

by PAUL JARVIS
Daily Staff Writer

Nearly all college football players dream of playing in a bowl game, but for the women participating in the Powderpuff Flag Football Tournament, experience is certainly no exception.

The top two finishers among the five participating teams will square off during the Poly Royal's annual Powderpuff Football Tournament on Friday, November 8. The Powderpuff proposal is a successful attempt to provide women with a chance to play traditionally associated with males. By charging admission to the bowl games following the fall and spring seasons, the Powderpuff program helps to raise money for the women's athletic budget.

"Powderpuff football has been going on to some extent for the past ten years, it hasn't always been offered twice a year, and it was not always a money maker," said Mrs. Evelyn Pellaton, who oversees the Powderpuff program. "We changed the format over the last couple of years, and it's been very successful."

It is estimated that the two bowl games this year will turn in the dangling approximately $400 for women's athletics.

Over 100 girls are performing for the five teams this quarter. Each team consists of 18 to 22 players, with teams playing five and seven at the end of the season.

"We started out with two teams years ago. The freshmen and sophomores played the junior and senior girls. Now this year we figure there may be as many as six teams," Pellaton said.

A majority of those participating in the program are not physical education majors.

"Women have always enjoyed the game of football, and now they're allowed to play it," Pellaton added.

The Mustangs have their next home game Tuesday at San Luis Obispo Stadium at 7:30 p.m., against UC Santa Barbara.

SPORTS SHORTS

Honor Award

The California Association for Health, Physical Education, and Recreation (CAHER) has selected a physical education candidate from Cal Poly as a recipient of the CAHER Honor Award.

Dr. Robert A. Most, the head of Cal Poly's Physical Education Department, was given the award at the association's recent convention in Anaheim.

He was honored for his contributions to the success of the annual California workshops in elementary and secondary physical education, coaching, sports medicine, and athletic training held each summer at Cal Poly. The workshop series is known as the CAHER Honor Award.

Baseball

Still on the mud, the Mustang baseball team is still keeping their winning spirit up as San Luis Obispo fell in defeat Monday on the road, the Gators.

The California Association of Athletics and the baseball Association showed 14-7 against Mustangs.

Over 100 girls are performing for the five teams this quarter.

Each team consists of 18 to 22 players in addition to a coaching staff.

"We started out with two teams years ago. The freshmen and sophomores played the junior and senior girls. Now this year we figure there may be as many as six teams," Pellaton said.

A majority of those participating in the program are not physical education majors.

"Women have always enjoyed the game of football, and now they're allowed to play it," Pellaton added.

WASHINGTON (AP) — Owning and operating an automobile will cost you far more in the coming years if Congress enacts President's Carter's proposals to conserve energy and protect the environment.

The Carter administration acknowledges that its just unveiled plan to tighten auto emission standards could increase car sticker prices by as much as $330 by 1985.
