Creep!, diarist of the supernatural seeking the Bay of Moi called the locality Ban Lula Ray salt was the eve of Diez Day of Louis, King of Pranaa. The soldiers, being more rat and observing a seagull on the igot, gave it the Spanish for the Bird.

GOING NORTH

Brady-60 mile-Panorama for its next stop, the name honors Bradley Varnum Sergeant, who came to California in 1849 searching for gold. He eventually journeyed to Hawaii before returning to go into sheep and business with his brothers in the San Joaquin Valley. Later, Sergeant acquired La Pecosita Rancho on which Bradley is located.

King City-81 mile-The town was named for C.H. King who, after a varied career that included an unsuccessful attempt to carry ownership of redwood bearing lands, sold the San Lorenzo Ranches in 1884. On the property, which King coveted to stock raising and dairying, the city started with the advent of the Southern Pacific Railroad in 1886.

Salinas-144 mile-The community takes its name from the Salinas River. Origin of the name of the river is obscure. In Spanish, it means "salt marshes." The early Spanish explorers and missionaries referred to the river variously as Santa Delfina, San Blasito, San Antonio, and Rio de Monterey. Nowhere in the first diaries and chronicles is it called Salinas.

Gilroy-145 mile-The community is a community historically notable because it was founded by the first English speaking visitor to settle permanently in California. John Gilroy, a Scottish sailor, left schooner Monterey in 1824 by the Hudson's Bay vessel Isaac Todd because he was sick with scurvy. His real name was Cameron, but he changed it to his mother's family name because he had left home as a minor and was in danger of being sent back. He settled in the Santa Clara Valley where he married Maria Clara Ortega, the grantee of part of the San Isidro land grant. The settlement which developed on the rancho became known as San Isidro and later as Gilroy.

San Francisco-154 mile-You've made it. Chinatown, cable cars, fun, and fog are yours to enjoy.

GOING SOUTH

Carpi-More-IBS mile-They are a number of legends as to the origin of the name Oeleta, Spanish for schooner. It may have come about from the construction in 1839 of a schooner of 33 tons, known as the Santa Barbara. The ship was designed for coastal trade and whaling. This was the first vessel of any size to be built in California.

Colma-94 mile-It is used in geographic nomination for "many."
It's only rock 'n' roll

By BRYAN KENNEDY

Most people think he's buried there in Arlington because of the silent millions who marched around his name. They are wrong. The myth is perpetuated on days of traditional luminaries when the Cologne cathedral-styled chateau with its painted borders and admiral statues across the Pennsylvania to yield giant three-level busts of John F. Kennedy on his grey box.

The television cover version which, like therein on a couch, has become a popular standard and a cash-in, will be on hand to record the melancholy for John Chancellor and Walter Cronkite's after dinner dance. The song will not be covered.

The same will repeat itself tomorrow and, after the 100th anniversary of the veteran's death, the veteran has not been forgotten. But the people has its own ideas of what a veteran is and what the wars that negate his kind should be like.

Any Suggestions...

Vietnam vet's view of Veteran's Day

By BRYAN KENNEDY

Even the cautious can't avoid injury

It's just isn't fair. Especially after I've gone to all the trouble of avoiding accidents and staying safe. I don't walk in bike lanes. I stop at stop signs to give spaces drivers and speeding vehicles to pass. I follow traffic rules on the front of the Southern Pacific. I don't run up the hill.

Most people think he's buried there in Arlington because of the silent millions who marched around his name. They are wrong. The myth is perpetuated on days of traditional luminaries when the Cologne cathedral-styled chateau with its painted borders and admiral statues across the Pennsylvania to yield giant three-level busts of John F. Kennedy on his grey box.

The television cover version which, like therein on a couch, has become a popular standard and a cash-in, will be on hand to record the melancholy for John Chancellor and Walter Cronkite's after dinner dance. The song will not be covered.

The same will repeat itself tomorrow and, after the 100th anniversary of the veteran's death, the veteran has not been forgotten. But the people has its own ideas of what a veteran is and what the wars that negate his kind should be like.
Ellsberg lashes U.S. nuclear policy

By DEB BOREMMA
Daily Staff Writer

In a recent television appearance, Daniel Ellsberg told a Cleveland audience that the proliferation of nuclear arms presents a threat to the survival of the human race.

Ellsberg, of Pentagon Papers fame, stirred up the United States' chief defender in threatening the extinction of humankind.

"A world in which the United States leads 100 countries in attempting to contain the threat of nuclear annihilation is a world in which I don't think humans can exist," he said.

Ellsberg said if the United States policy of "first use" of nuclear weapons is not changed, other countries with the potential for nuclear attack will emulate the policy.

He said use of nuclear weapons for retaliation is necessary.

The Harvard-Cambridge MIT graduate, who helped draft the Pentagon Papers to the New York Times in 1971, formed one of the most controversial decisions in the country's history.

The government's right to keep secrets in the face of the press.

A decision by the Supreme Court upheld the right of the press to print the Pentagon Papers.

Ellsberg said use of the atomic bomb on Hiroshima in 1945 marked not only an age of new technology but also a "step into a world in which humans could eliminate life on earth."

He said the United States has always been proud of its ability to produce nuclear arms since the Hiroshima explosion.

He held little hope that any president would reverse this trend.

"We're not going to do any better than Eisenhower or Kennedy or Johnson," he said. "Even Carter has appointed the same people to his administration."

Ellsberg said any change in the country's policy would have to be demanded by its citizens.

"It calls for more change in attitudes than in the last 4,000 years," he said.

Ellsberg was profiled in his presentation by Natalie Shivas and Diane Thomas, both anti-war proponents.

Shivas, co-director of the Mid-Peninsula Conversion Project in Santa Clara County, spoke on her group's goal of converting the use of nuclear power from military to more humane projects.

Thomas spoke on the University of California's involvement in nuclear weapon development.

Ellsberg claims that the United States is the chief offender in the proliferation of nuclear arms. (Daily photo by Ken Creley)

Guadalupe.

"No nuclear weapon for retaliation is needed," he said.

"There can be a world in which the United States leads 100 countries in the war and the Vietnam war can be quieted," he said.

"But we don't think concern is enough The concern has to motivate action And that's what we're coming to grips with.

Here-and-now, how-to realities."

So, if you're a "how-to" person, a person who's more than an Idealistic abstractionist, there may be an opportunity for you with us to work toward solutions to problems that concern you.

Sure, we've got the establishment benefits that make life a little easier to cope with, like good pay and employee benefits. But we've also got the things that make life worth living. Realistic challenges.

If you're a graduating civil, electrical or mechanical engineer, and you've never thought about working for (and/or with) us before, give us a thought. Send your resume to John Clemson at PG&E's Professional Employment Office, 245 Market Street, San Francisco, CA 94106.

Naturally, no one person is going to "solve" the energy problem single-handedly; it's going to take a lot of concerned people, working together, to even begin to solve the problems of fuel conservation, wild life preservation, recycling, smog-free rapid transit, fume incineration and water purification.

The thing is... as concerned as we are about these problems, and others, at PG&E we don't think "concern" is enough. The concern has to motivate action. And that's what we're coming to grips with. Here-and-now, how-to realities.
Ask a banking question. We'll give you a full report.

If you have a banking question you'd like answered, Bank of America is the place to come. In fact, we can probably give you a full report on the subject. That's because our Consumer Information Reports cover a wide variety of banking subjects. Including, "A Guide to Checks and Deposits," which explains what you need to know about cashing and depositing checks, holds, and other banking services. We also offer Reports on, "How to Establish Credit," "Ways to Save Money," and more. So, if you're thinking about banking, this report can help you make the most of your money.

We offer a variety of banking services, as well. So, if you're thinking about banking, this report can help you make the most of your money.

Like College Plan, Checking, Personal Choice Savings Plans, and more. If you qualify, Student BankAmericard Visa and overdraft protection. But you can pick up our Consumer Information Reports with no obligation to sign up for anything. You see, we figure the more you know about banking, the more likely you are to bank with Bank of America. And we're hoping you'll come to the same conclusion.

Creek bridge gets reprieve

By TONY TRANPA

Daily American Editor

The controversial Steenar Creek Bridge has been given a reprieve and will not be removed until the rainy season, a city official said this week.

David Romero, public service director, said Tuesday his office is doing absolutely nothing about the bridge and that it would be left for local residents to use until late November when the rainy season starts.

Controversy arose last month when the bridge was found to be in violation of a city ordinance. City standards specify footbridges across small waterways be removed at least three feet above the high water line. The high water line of Steenar Creek is near the top of the bank. According to city officials, the creek has repeatedly overflowed in past years.

Romero said his office staff was concerned about the bridge washing downstream so it was in the past. He said it clogs the flow of water and creates massive "back-up" problems.

Steve Bertain, Steenar Creek Marina complex manager, said he is working on solutions to the problems that could be created by not having a bridge over the creek.

Shortly after a feature story on the bridge and the walking path appeared on the cover of Mustang Daily last month, Bertain called city officials to check on the legality of the bridge. He was told the bridge was legal.

As of last week, Bertain bed removed from traffic by the blue Pacific. After meeting with residents, Bertain said to his office staff, "It's another bridge and one more we'll have to live with."

As of last week, Bertain may not make a formal decision on the reprieve until the season begins in November when the bridge will be removed.

Bertain issued a three-page letter to Steenar Creek residents within a few days, stating the bridge was illegal and the questions of legality arose because of Mustang Daily questioning.

After meeting with residents, Bertain said to his office staff, "It's another bridge and one more we'll have to live with."

As of last week, Bertain may not make a formal decision on the reprieve until the season begins in November when the bridge will be removed.
Promoter denies wrongdoing

Buffy St. Marie hasn't been paid in full for the two performances she gave at the Festival of the Sun, her agent said yesterday.

Agent Sam Goldstein, speaking from his office at Magna Artists In Los Angeles, said St. Marie was paid only $2,000 of the $4,000 owed her.

The agent said festival representative Lester Licht told him between St. Marie's two shows that the festival was unable to pay the other $2,000.

"But I told Licht that St. Marie would complete her performance," Goldstein said.

"We're not doing nothing wrong," he said. "We did a beautiful job. We poured $9,000 into this county enterprise."
Most Poly teams take to the road this weekend

Three Cal Poly athletic teams will take to the road, and two will take to the air this weekend. The women's volleyball team will be the lone team at Poly for home games. Within California will be Cal Poly's women's cross-country team in San Bernardino, and the water polo team will be in Los Angeles.

Poly's football, men's cross country and soccer teams will travel out of state. The gridders will be in Idaho to face Boise State, the hurriers in Chicago for the National Invitational, and the indoor hurriers in Nevada to take on the University of Nevada at Las Vegas.

The women's volleyball team is destined to meet an end to their six-game losing streak. Hopefully, the streak will end soon, as they have compiled a 1-7 Southern California Athletic Association record, and are 4-6 overall.

The women, led by head coach Sally Kent, will host the University of California at Irvine Saturday at 7:30 p.m.

Our thanks to students

Both the outdoor pool and Monday through Thursday from noon to 7 p.m., and from noon to 5 p.m. Friday.

Festival hussles

(Cont. from page 5)

The festival, in several Southern California counties, is "I don't understand how I could be refused licenses when I haven't even applied for any," Backlund said. "I want to be a community service and I'm going out of the festival to help make it as bad as possible."

The promoter said he intends to remain in the festival business, however.

"We've got a lot of things to work on," he said. "The Philippines are a lot of disappointment involved in this."
Scorekeeper watches the bases

By J.J. KREITMEYER
Daily Staff Writer

Scorekeeping is a far cry from what the average fan does on opening night in a baseball program.

Ann Fritz, a junior transfer from Sacramento City College, is the new Cal Poly baseball scorekeeper. She has more responsibility than just keeping track of runs and walks.

She must know each player’s ability. It is up to her to decide whether the ball that gets by the second baseman is an error or a hit. When a player gets thrown out at first base, she should be able to tell if she would have beaten the ball out.

The scorekeeper also compiles the statistics of each game and announces the names of the players at bat.

Last fall, Ann helped scorekeeper Bob Bley with the junior varsity and the varsity. This past summer she worked in the baseball offices again, writing better to improve her skills and getting to know the coaches.

During the winter the baseball team played once a week. This gave Ann the chance she needed to get to know the players better.

“Ann’s happy, but someone will come up to her and I won’t know who they are,” said Bob Bley, who works in the baseball office. “I have to ask the coach, ‘Is this your son, or what?’”

During the summer Ann became involved in baseball two summers ago when she and her father started attending Sacramento’s Big League games.

“We picked out our favorite teams and went to every one of their games. At the end of the summer the coach came up to me and commented about how much time Ann spent there all the time,” she said.

The coach of the Catholic Chapists team during the summer turned out to be Jerry Weisheit, coach of San City’s team. He asked her if she would be interested in keeping score for the team.

She accepted the offer and went to work. That season Ann, a journalism major, not only kept score for the team but served as the sports editor and only sports writer for SCC’s newspaper.

When she came to Cal Poly last spring the first step she made was the baseball office.

“Ann came in, introduced herself and asked us if there was anything she could do to help us out,” said Coach Harr. “With Bob Bley leaving, we needed someone to take his place and Ann had all the qualifications.”

Ann enjoys playing softball and volleyball. She used to swim competitively for Olympic champion Debbie Meyer in Sacramento, but feels she doesn’t have the drive needed to be a first-class athlete.

“I’m really a spectator,” Ann said. “I just don’t have the desire to compete in a sport. But when I’m watching a baseball game from the stands, I sure as heck know who I want to win.”

If she gets the chance to follow in the steps of another Cal Poly scorekeeper and work for a professional baseball organization she’ll take it. Cindy Loomba, who worked in Poly’s baseball program for four years, is working for the San Francisco Giants.

“This is probably not as glamorous as it sounds but I think I’d like to try it anyway,” said Ann. “I really want to do, though, is be a sports writer and specialize in baseball.”

Next March when you’re sitting in Simonian Stadium watching the Mustangs play baseball and you hear, “The batter is... first baseman, Danny Gane.” you won’t be able to see her, but you will hear the voice of Ann Fritz.

ANN FRITZ, new baseball scorekeeper at Poly, has a big job ahead of her recording players’ statistics. (Daily photo by Piper Parry)

FOOTBALL PLAYER OF THE WEEK

PAUL HODGSON

Hodgson, junior fullback from West Covina, rushed for three touchdowns in the 42-14 win for Cal Poly over Cal State Northridge. With plunges of 1, 1 and 2 yards, the 6 feet 2, 220-pounder became the 19th player in Cal Poly history to rush for three touchdowns in one game. Hodgson ran 14 times for a total of 42 yards. His outstanding blocking throughout the game contributed to the win last Saturday.
Spotlite: guide to entertainment

by TONY TRANFA

The Spotlite has hit San Luis Obispo.

What began nearly a year ago as a brainstom of two old friends has now blossomed into Spotlite, an entertainment guide for the Central Coast California.

Covering the area from Salinas to San Simeon, the monthly magazine has evolved through a variety of stages. "We were looking at a lot of publications in the area," said Dan Cervanak, co-publisher of the Spotlite. "We had nearly five mock-ups before we came up with our final idea."

"When we sat down and talked about the magazine, I knew it would work. That's such a void for something like this around here," he said.

"We've been in existence for six months. It is a five-person staff. We've had a few problems, but we're stickin' with it. We're now just building a ground-work and foundation for the whole project."

"I think we'll be successful," said Cervanak.

"We have nearly around 30,000. The publication is distributed to hotels, motels, restaurants, liquor stores, saloons and gas stations.

"We drop off 600 copies to each major outlet we deliver to," said Cervanak. "By the end of the year, we would like to deliver to three places. They're actually runnin' out of it.""...

Cervanak's main function, according to Cervanak, is to provide both tourists and locals the opportunity to see what is happening in the area.

"It's the drat Mint with Journalism for Cervanak and hit the hout that is."

"We're going to make it work," he said. "Number one, we have a lot of time and money in this project, and number two, we have too much pride to let it go down. We'll make it."

Moiio takes its toll

The state and strain of college applications is taking its toll on many Cal Poly students, according to Health Center officials.

"The Health Center diagnosis approximately 80 cases of mononucleosis a year," said a Health Care Center official.

"In the past year and a half, we have seen an increase in the number of cases."

"Normal cases of the virus last three to five days, but extreme cases can last up to two weeks or more with lingering fatigue."

According to Dr. Davis Blaner of the Health Center, mononucleosis is transmitted only to a slight degree. It is known as the "kissing disease" because the virus is present in saliva.

"It is possible to transmit the disease to someone else, however, particularly when the other person is in poor health."

Birkenstock

"Feet in the sand make footprints in the Birkenstock footbed do the very same thing."

"The Birkenstock footbed is heat and pressure moldable to your foot, and becomes your footprint."

"So walking in Birkenstock is like walking barefoot."

"Let your feet make a place for themselves."

DAN CERVANAK, left, and Rick Nelson are co-publishers of Spotlite magazine. (Daily photo by Bill Featherston)
