Creep!, diarist of the supernova seeking the Bay of Moi called the locality Ban Lula Ray salt was the eve of Dies day of Louis, King of Pranalaoo. The soldiers, being more rat and observing a seagull on the igot, gave it the Pranalihi for the Bird.

GOING NORTH

GARY KAPLAN

Daily Staff Writer

Whether going north to San Francisco or south to Los Angeles, Highway 101 is a drag. It passes through mile after mile of monotonous scenery and a number of drowsy little towns spaced too far apart. But the towns aren't that dull. Well, at least their origins aren't! A closer look might make your next trip more enjoyable.

GOING NORTH

Brady-69 miles-Panonia for its neat stop, the name honors Brady Varunni Sargent, who came to California in 1849 seeking for gold. He eventually journeyed to Hawaii before returning to go into hardware business with his brothers in the San Jose Valley. Later, Sargent acquired the Panonia Ranch on which Brady is located.

King City-61 miles-The town was named for C.H. King who, after a varied career that included an unsuccessful attempt to secure ownership of redwood bearing lands, owned the San Lorenzo Ranch in 1864. On the property is King's original stage coach station and the city started with the advent of the Southern Pacific Railroad in 1868.

Salinas-134 miles-The community takes its name from the Salinas River. Origin of the name of the river is obscure. In Spanish, it means "salt marshes." The early Spanish explorers and missionaries referred to the river variously as Santa Defina, San Biterio, San Antonio, and Rio de Monterey.

GOING SOUTH

Chualar-15 miles-The name means "the place where the Chual grows." Chual, or white pigweed is a plant common to the area.

Gilroy-191 miles-It is a community historically notable because it was founded by the first English speaking visitor to settle permanently in California. John Gilroy, a Scottish sailor, was left ashore in Monterey in 1814 by the Hudson's Bay vessel Issac Todd because he was sick with scurvy. His real name was Cameron, but he changed it to his mother's family name because he had left home as a minor and was in danger of being sent back. He settled in the Santa Clara Valley where he married Maria Clara Ortega, the grantee of part of the San Isidro land grant. The settlement which developed on the ranchos became known as San Isidro and later as Gilroy.

GOING SOUTH

San Francisco-45 miles-It was named for Father Pedro Potes, Franciscan missionary diarist, who accompanied the 1776 expedition of Captain Juan Bautista de Anza to San Francisco. Reaching this point on March 9, 1776, Father Potes recorded, "About six leagues from... is a place called La Soledad. They told me that they gave it this name because in the first expedition they asked an Indian his name and he replied 'Soledad', or so it sounded to them."

Chualar-15 miles-The name means "the place where the Chual grows." Chual, or white pigweed is a plant common to the area.

Salinas-134 miles-The community takes its name from the Salinas River. Origin of the name of the river is obscure. In Spanish, it means "salt marshes." The early Spanish explorers and missionaries referred to the river variously as Santa Defina, San Biterio, San Antonio, and Rio de Monterey. Nowadays in the first diaries and chronicles is called Salinas.

Chualar-15 miles-The name means "the place where the Chual grows." Chual, or white pigweed is a plant common to the area.

Salinas-134 miles-The community takes its name from the Salinas River. Origin of the name of the river is obscure. In Spanish, it means "salt marshes." The early Spanish explorers and missionaries referred to the river variously as Santa Defina, San Biterio, San Antonio, and Rio de Monterey. Nowadays in the first diaries and chronicles is called Salinas.

King City-61 miles-The town was named for C.H. King who, after a varied career that included an unsuccessful attempt to secure ownership of redwood bearing lands, owned the San Lorenzo Ranch in 1864. On the property is King's original stage coach station and the city started with the advent of the Southern Pacific Railroad in 1868.

On the property is King's original stage coach station and the city started with the advent of the Southern Pacific Railroad in 1868.
It's only rock 'n' roll

By SRIAN KENNEDY

Vietnam vet's view of Veteran's Day

Unfortunately for the Vietnam vet, both concepts are so set and patterned as an ad for financial calculators in a comic book, With Americans couldn't find a landing for Vietname in its tale of commerce, veterans were left in the dust.

For all veterans are inevitably tied to the war of their participation. Everybody wants to forget the mistakes of Vietnam, but nobody wants to point out the errors of the past. Memorial Day and the Fourth of July rolled into one.

We didn't need an Evelyn Prine movie to remind us how much horror veterans were nonexistent because flowers just don't grow on tragedy. Dying as well.

The real unknown soldier is probably sitting next to you in your shoes and dresses here at Cal Poly. He's buried under the yawn of the nation's administration bureaucracy. And he lives from month-to-month, cheek-to-cheek. And he's out there hustling, breaking cement or trimming trees, hanging tough just like he was up in the middle of a fire, while he's flipping coins m to what to do next.

His, you'll only find one Vietnam veteran in all the pomp and circumstance this Friday, and he won't be available for interviews. He's plying his own fishing in his own gas and oil under the ground along with the unidentified remains of Vietnamese from other three major wars this century. Ironically, these are the most known of soldiers.

The volleyball match was scheduled for the gym—not the athletic teams. Each year the committee would have a show with a women's volleyball match on the last Saturday, but this time the name shows go away.

The volleyball match Nov. 18 will be in the gym. The show would have earned me $200. It's a lot better than $10, Anybody want a ride to Los Angeles?

Even the cautious can't avoid injury

It just isn't fair. Especially after I've gone to all that trouble to avoid accidents. I don't want to walk in bike lanes. I stop at all stop signs to give eaves drivers and speeding trucks in front of the Southern Pacific. I don't run up the hill.

Author Virginia Lee Baze is a senior journalism major.

I held onto the rail when using the stairs, and I sat down the entire time to avoid eaves drivers that swing out. Despite all of my precautions, I was still leaving the Ensign building the other day when a young man came bounding down the stairs. He ran into me at the wrong time, and I got pinched by a swinging door.

To the best of my recollection the door was ajar. It swung wide and it caught me along with a bicycle. One shoo came off, and I twisted back and forth expecting to connect with the floor for what seemed an eternity. A friend was waiting with leaned toward, she was in the bag. She was leaning over me for help. I expect I turned white.

Since my mishap, I've talked to others on campus who have had similar experiences. At least one of the accidents was with the same wayward door. One person suggested that the door was a minor issue and some want to warn people of the danger of doors opening suddenly. Finally, I heard why there was a yellow line in front of the posterior doors in the library.

I checked with Peter Phillips, Cal Poly facilities planner. He said his office usually gets a lot of complaints about people walking with an agenda, but he said there are ways to avoid such problems concerning safety.

So much emphasis is being placed on recording the many obvious architectural barriers on campus. But one...for example, a simple as a door opening the wrong way, without any warning, or even thinking, can be entirely...with some warning, can be entirely:

Hopefully very soon we will see a lot more yellow lines in the hallways.

As far as I'm concerned they are certain to continue. That yellow line the begin the end of the walk. I've had my initiation, and I'm a change agent in the newly formed Door Club.

Any Suggestions...?
Ellsberg lashes U.S. nuclear policy

By DEB BROEMER,
Daily Staff Writer

In a recent address, Daniel Ellsberg told a Church of Scientology audience that the proliferation of nuclear arms presents a threat to the survival of humanity.

Ellsberg, a former Pentagon Papers hacker, spoke out about the United States' chief defender in preserving the proliferation of nuclear arms, rewriting its own threat to the survival of humanity.

Ellsberg said if the United States policy of "first use" of nuclear weapons is not changed, other countries would realize the potential for nuclear attack and institute their own policies.

Ellsberg said use of nuclear weapons for retaliation is unnecessary.

The Pentagon Papers detailed the government's involvement in the Vietnam War and its heavy handedness.

Ellsberg claimed that the United States is the chief offender in the proliferation of nuclear arms.

"I don't think humans can solve the energy problem singlehandedly; it's going to take a lot of concerned people, working together, to even begin to solve the problems of fuel conservation, wild life preservation, recycling, smog-free rapid transit, fume incineration and water purification.

The thing is... as concerned as we are about these problems, and others, at PG&E we don't think "concern" is enough. The concern has to motivate action. And that's what we're coming to grips with. Here-and-now, how-to realities.

So, if you're a "how-to" person, a person who's more than an Idealistic abstractionist, there may be an opportunity for you with us to work toward solutions to problems that concern you.

Sure, we've got the establishment benefits that make life a little easier to cope with, like good pay and employee benefits. But we've also got the things that make life worth living. Realistic challenges.

If you're a graduating civil, electrical or mechanical engineer, and you've never thought about working for (and/or with) us before, give us a thought. Send your resume to John Clemson at PG&E's Professional Employment Office, 245 Market Street, San Francisco, CA 94106.
Creek bridge gets reprieve

By TONY TRANFA
Daily American Editor

The controversial Stenner Creek Bridge has been given a reprieve and will not be removed until the rainy season, a city official said this week.

David Romero, public service director, said Tuesday his office is "doing absolutely nothing" about the bridge and that it would be left for residents to use until late November when the rainy season starts.

Controversy arose last month when the bridge was found to be in violation of a city ordinance. City standards specify footbridges across small waterways be raised at least three feet above the high water line.

The high water line of Stenner Creek is near the top of the bank. According to local residents, the creek has repeatedly overflowed in past years.

Romero said his office staff was concerned about the bridge washing downstream as it has in the past. He said it chokes the flow of water and creates massive "back-up" problems.

Dave Bertain, Stenner Creek Bridge manager, said he is working on solutions to the problems that could be created by not having a bridge over the creek.

Shortly after a feature story on the bridge and the washing path appeared on the cover of Mustang Daily last month, Bertain called city officials to check on the legality of the bridge. He was told the bridge was illegal.

Bertain issued a three-page letter to Stenner Creek residents within a few days, stating the bridge was illegal and the questions of legality arose because of Mustang Daily questioning.

After meeting with residents, Bertain said he has been asked by another bridge and residents to make a final decision on what needs to be done.

As of last week, Bertain had not made a final decision on what needs to be done.

Nilan said it is not clear what would happen to the bridge and the walking path.

"My office is 'doing absolutely nothing'" about the bridge," he said. "We'll wait and see what happens."
Promoter denies wrongdoing

BUFFY St. Marie hasn't been paid in full for the two performances she gave at the Festival of the Sun, her agent said yesterday.

Agent Sam Goldstein, speaking from his office at the Kink Corral's in Los Angeles, said St. Marie was paid only $2,000 of the $4,000 owed her.

The agent said festival representative Lester Licht told him that the festival was unable to pay the other $2,000.

"But I told Licht that St. Marie would complete her performances," Goldstein said. "Because her fans were expecting it. I also told him he would have to honor our contract."

Goldstein, who has heard nothing more from Licht, said he was concerned because Licht is the only one responsible for the $2,000.

"The festival had no corporation," Goldstein explained.

"Licht signed the contract, and Licht is solely responsible for the other $2,000."

Goldstein said he has filed a formal complaint with the mediator's union in New York City.

Says promoter

The promoter, George Rachlin, told the Telegram-Tribune that his group had failed to pass county health and safety codes.

"But Rachlin pointed out that the festival did pass the codes by opening day," he said. "He added that his relationship with county officials has been friendly."

"The county and I have always gotten along well," Rachlin said. "Several of them even said they were surprised at what a good job we did preparing to put the show on."

"All this talk about having troubles with the county is completely untrue."

Rachlin admitted his festival was about $13,000 in debt, but he denied any wrongdoing.

"We've never been in the red," he said. "We did a beautiful show. We poured in $35,000 into this county, but we broke even. I'm sure that was a boost to the economy."

"And we gave all the talented people in this area a chance to show their stuff. It was a fantastic opportunity for them to perform."

The promoter claims his only mistake was assuming the festival would draw a substantial turnout for its 6-day run.

"We needed 1,000 people a day to break even," he said. "I thought that it was pretty reasonable to expect at least that many for a show with so much to offer."

But the festival only averaged a little over 300 people a day, and it turned out to be a financial bust, prompting complaints from creditors and unpaid employees.

"Rachlin cannot explain all the reasons for the small crowds, but he is determined to work out any problems remaining from the show's failure," he said.

"Most of the businessmen have seen Rachlin," Rachlin said. "They've realized that the show was simply a financial failure and have come to discuss the situation rationally without causing a lot of future."

The promoter said he has already settled with most of the businessmen, but he added that "a few of them insist on being ungentlemanly about things. They feel they have to make a fuss in the newspapers."

Rachlin admitted some of his employees are disgruntled, but he said it was natural for them to seek back pay. "We paid in full for the two performances," he said.

He noted that all festival workers were only promised a "worker's share" of any profits the festival might generate.

"We have nothing left," he said. "But festival workers were only promised a "worker's share" of any profits," he said.

The promoter, George Rachlin, told the Telegram-Tribune which said Rachlin is the (Cont. on page 6)
Most Poly teams take to the road this weekend

Three Cal Poly athletic teams will take to the road, and two will take to the air this weekend. The women’s volleyball team will be the lone team at home this week.

Poly for home roster. Within California will be Cal Poly’s women’s cross country team in San Bernardino, and the water polo team will be in Los Angeles.

Poly’S football, men’s cross country and soccer teams will travel out of state. The footballers will be in Idaho to see Boise State, the favorites in Chicago for the Nationals, and the runners in Nevada to take on the University of Nevada at Las Vegas.

The women’s volleyball team is destined to meet an end to their six game losing streak. Hopefully, the streak will end soon, as they have compiled a 1-7 Southern California Athletic Association record, and are 4-8 overall.

The women, led by head coach Sally Kent, will host the University of California at Irvine Saturday at 7:30 p.m.

Head coach Bob Druing’s team will face tougher competition than it did at the district tour because it is set to go to Pomona this season.

"I think you can place in the top three, but I’d be happy if we finish in the top four," he said.

The team consists of Maggie Keary, Jeni Renda, Pam Con, Elise Knepper, Amber Pappas, Margie Webster and Carrie Walters.

Running on club status this season, the team is not eligible for national collegiate championships.

The California Colleges Athletic Association’s tournament will be held this weekend for the water polo team, and the Mustangs will be among three teams vying for second place.

Other teams shooting for second are Cal State Los Angeles and Cal State Northridge.

Pomona, last year’s NCAA champion, is going into the tournament undefeated.

Head coach Bob Druing’s team lost a 13-11 decision to Pomona earlier this season.

During his first team will have a good outing.

"This should be a good tournament," he said. "We don’t have anything to lose, so we’ll just give it a shot."

Football coach Joe Harper will take his squad to the Pac-12 conference this season.

"We are capable of playing well enough to beat Boise State. We played well enough to beat Arizona State. We will play well enough to get better if we are to be competitive," Harper said.

Chicago is the setting for the National Collegiate Athletic Association Division II championships for men’s basketball.

Head coach Steve Miller has compiled 13-11 recordthis season. Last week, Miller had an opportunity to earn a berth at the nationals. The CCAA again saw the top team and top two finishers from the conference meet.

Miller feels his team has a shot at a top spot.

"Absolutely, we have a shot at finishing in the top five and if we can really hit on things could end up in the top three," he said.

CCAA individual shot, Jim Beggs Poly’s top runner, and has a shot at All-American status. Other teams are supplied by the West Coast Conference. Billy Wood, Ken Capritto and Larry Atwood.

Both the outdoor pool and indoor pool will be open for student use for the remainder of the quarter, it was recently announced. The outdoor pool will be open from 7 to 8:30 p.m. Monday through Thursday and from noon to 5 p.m. on Friday.

The indoor pool, located in the Student Recreation Center, will be open from 7 to 8:30 p.m. Monday through Saturday and from noon to 5 p.m. Monday through Friday.

Festival hassles

(Cont. from page 5) being denied freedom to cut out the forecasts for several Southern California counties. "I don’t understand how I could be refused freedom when I haven’t even applied for any," Rothchild said. It seems to me someone is going out of his way to keep me in the dark."

The presenter said he intends to remain in Seminole. "I’ve got a lot of things to do and I need a lot of disruption and trouble."

"We are in the business of making people uncomfortable," Rothchild said. "It seems the whole thing is just a way of making people uncomfortable."

"The whole thing is just a way of making people uncomfortable," Rothchild said. "It seems the whole thing is just a way of making people uncomfortable.

Scorekeeper watches the bases

By J.J. KEHRMEYER
Daily Staff Writer

Scorekeeping is a far cry from what the average fan does at a baseball game.

Ann Fritz, a junior transfer from Sacramento City College, is the new Cal Poly baseball scorekeeper. She has more responsibility than just counting strikes and outs.

She must know each player's ability. It is up to her to decide whether the ball that gets by the second baseman is an error or a hit. When a player gets thrown out at first base, she should be able to tell if he would have beaten the ball out.

The scorekeeper also completes the statistics of each game and announces the names of the players at bat.

Ann Fritz, now baseball scorekeeper at Poly, has a big job ahead of her recording players' statistics. (Daily photo by Piper Parry)

Last year, Ann helped scorekeeper Bob Riley with the team and the past summer she worked in the baseball office again, selling tickets, renewing memberships and getting to know the coaches.

During the winter, the baseball program held a week of tryouts. This gave Ann the chance to get to know the players better.

"It's fun, but someone will come up to me and I won't know who they are. I have to ask Randy Harr, who's here, and he's great. The coaches have been great to me—I was able to learn from them anything. But now is the time to be on my own, and I have to make sure I'll be on my own."

Ann became involved in baseball two summers ago when she and her father started attending Sacramento's night league games.

"We picked out our favorite team and went to every one of their games. At the end of the season the coach came up to me and mentioned about being there all the time, " she said.

The coach of the Culji Chapel team during the summer turned out to be Jerry Weinsteil, coach of San City's team. He asked her if she would be interested in keeping score for the team.

She accepted the offer and went to work. That season Ann, a journalism major, not only kept score for the team but also worked as the sports editor and only sports writer for SCC's newspaper.

When she came to Cal Poly last spring, the first step she made was the baseball office.

"Ann came in, introduced herself and asked us if there was anything she could do to help us out," said Coach Harr. "Win Bob Riley leaving, we needed someone to take his place and Ann had all the qualifications."

Ann enjoys playing softball and volleyball. She used to swim competitively for Olympic champion Debbie Meyer in Sacramento, but feels she doesn't have the drive needed to be a first class athlete.

"I'm really a spectator," Ann said. "I just don't have the desire to compete in a sport. But when I'm watching a baseball game from the stands, I sure as heck know who I want to win."

If she gets the chance to follow in the steps of another Cal Poly scorekeeper and work for a professional baseball organization she'll take it. Cindy Leonis, who worked in Poly's baseball program for four years, is now with the San Francisco Giants.

Ann became involved in baseball two summers ago when she and her father started attending Sacramento's night league games.

"I was probably not as glamorous as it sounds but I think I fed to try it anyway," Ann said. "When I really wanted to do it, it was a sport and something I could specialize in baseball."

Next March when you're sitting in Staubmiller Stadium watching the Mustangs play baseball and you hear, "The batter is first baseman... "you won't be able to see her, but she'll be back with the voice of Ann Fritz.

FOOTBALL PLAYER OF THE WEEK

PAUL HODGSON

Hodgson, junior fullback from West Covina, rushed for three touchdowns in the 42-14 win for Cal Poly over Cal State Northridge. With plunges of 1, 1 and 2 yards, the 5 foot 2, 220 pounder became the 19th player in Cal Poly history to rush for three touchdowns in one game. Hodgson ran 14 times for a total of 42 yards. His outstanding blocking throughout the game contributed to the win last Saturday.
**Spotlite: guide to entertainment**

by TONY TRANFA
Dallas Correspondent

The Spotlite has hit San Luis Obispo.

What began nearly a year ago as a brainwave of two old friends has now blossomed into Spotlite, an entertainment guide for the Central California Coast.

Crawling the area from San Luis Obispo to San Simeon, the monthly magazine has evolved through a variety of stages.

"We were looking at a lot of publications in the area," said Dan Cervanak, co-publisher of the Spotlight. "We had nearly five mock-ups before we came up with our final idea."

This is the first start with a partnership between Cervanak and his partner Rick Nelson.

"We came from the same area (Whittier) and we grew up together. When we were younger, we had all kinds of big plans for ourselves. Most of them didn't amount to much," laid Cervanak.

"But when we sat down and talked about this magazine, I knew it would work. That's such a void for something like this around here," he said.

Spotlite has been in existence for six months, and it has a six-person staff.

"We've had a few problems, but we're working with it. We've just now established a groundwork and foundation for the whole project. I think we'll be successful," said Cervanak.

With a circulation of near 2,000, the publication is distributed to hotels, motels, restaurants, liquor stores, saloons and supermarkets.

"We drop off 400 copies to each major outlet we deliver to," said Cervanak. "By the end of two weeks, we usually get calls to deliver them to these places. They're actually running out of the Spotlite," said Cervanak.

"Our San Luis Obispo's main industries is with tourism. Publications have been avoiding them. That's one point we're trying to serve," said Cervanak.

"The issue of the magazine are free, and they can be picked up at any time in Obispo motel or restaurant, said Cervanak.

"Adventures are just now being made aware of what we're doing, and we're getting more cooperation from them. Soon, we hope to have more pages and full cover on front and back," said Cervanak.

"We're going to make it work," he said. "Number one, we have a lot of time and money in this project, and number two, we have so much pride to let it go down. We'll make it."

**Mono takes its toll**

The stress and strain of college life is taking its toll on many Cal Poly students, according to Health Center officials.

The Health Center reports approximately 80 percent of mono casuless of mononucleosis a year during midterm and finals.

Normal cases of the virus last three to five days, but extreme cases can last up to two weeks or more with lingering fatigue. According to Dr. Davis, a physician of the Health Center, mononucleosis is most contagious only to a slight degree. It is known as the "kissing disease" because the virus is present in saliva.

It is possible to transmit the disease to someone else, however, particularly when the other person is in poor health.

**Birkenstock**

Feet in the sand make footprints.

Feet in Birkenstock footwear do the very same thing.

The Birkenstock footbed is a heat and pressure sensitive material that molds to your foot, and becomes your footprint.

So walking in Birkenstock is a lot like walking barefoot in the sand, with one very convenient difference.

You can walk in Birkenstock all year long.

Let your feet make a place for themselves.
