In reality, it is an intricate discipline still popular today for developing agility and appreciation.

The Cal Poly Physical Education Department offers fencing classes—two this quarter—which are usually fully enrolled.

According to Amy Pickett, fencing club president, the club and team are separate, but have virtually the same membership.

"There are nine students on the team," said Pickett. "The club is open to everyone, family and friends, and has 15 people who attend regularly, including the team members.

Although the club and team are technically separate, with two sets of officers, members work closely with each other.

"The team doesn't have the university's backing," said Pickett. "All funds in the team are a certain amount of money but it's not enough. Because we (the team) don't get enough money from ASF, the club supplies the extra funds needed for equipment through weekly meetings.

Equipment needed for fencing includes a wide variety of the foil, rapier or saber, and a two-sided apparatus with a cone in the tip. The team must also own electronic equipment to signal contact with the weapon for scoring purposes.

According to the ASF budget, the fencing club/team was allocated $196 for the 1977-78 fiscal year.

Pickett said she believes the fencing team does not get equal support in comparison with other Cal Poly sports teams. Lack of money is not the only factor hindering the team.

"I believe the team is not as competitive as it could be," said Pickett. "The club is open to everyone, but the team is competitive. The club members train at least five times a week and have maximized their potential."
Student reaction to Josh varies

Campus Crusade for Christ has done it again. This time they put Josh McDowell, a Christian author, on the Cal Poly campus to speak on Wednesday night. He was greeted with both applause and protests.

Josh McDowell is an internationally known author and speaker. His books have sold millions of copies worldwide and his message is one of love and inclusion. However, his approach can also be seen as controversial and polarizing.

According to eyewitnesses, the crowd consisted of a mix of interests. Some were there to hear McDowell speak, while others were protesting his presence. It appears that the Christian message is gaining traction on campus, but also facing resistance.

County Symphony: A note of despair hits the pit

The County Symphony received a mixed response from the audience last night. After an overture, the orchestra performed a piece that had a somber and despairing tone. The performance was well-received by some, but others found it difficult to connect with the music.

The Symphony is known for its high-quality performances and has earned a reputation for excellence. However, the current performance seemed to lack the usual energy and enthusiasm that are characteristic of their concerts.

**OUR READERS WRITE...**

Editor

In the past the Mustang Daily has made a conscious effort to print the views both for and against the Christian message. We believe that freedom of expression is a cornerstone of a democratic society.

Our hope is that by publishing these viewpoints, we can foster a dialogue and help readers better understand and appreciate different perspectives.

 monument. Who said he was?

He said the purpose of art is to be united, not divided, not experienced in a psychological way. It is to be united, not divided, not experienced in a psychological way. The title of the piece was "The Song of the lost," and it described the feeling of being lost in a world that seems to be going nowhere.

The piece was performed by the County Symphony, and was well-received by the audience. The performance was a moving reminder of the beauty and depth of human experiences.

Author John Harris, a recent journalism major, offered his thoughts on the performance:

"I found the piece to be very moving. It spoke to me on a personal level and made me think about my own experiences. It was a powerful reminder of the beauty and complexity of human existence."
**Poly horses recovering from recent illness**

by DEANNA MAMOT

According to Dr. Robert Hager, head veterinarian at the State Poly Clinic, at least 10 of Poly's horses are being treated for recent illness issues. The clinic is located in a building to the east of the gymnasium at Poly.

The horses were treated for illness issues ranging from pneumonia to cuts. Also, the clinic is responsible for the horses that are housed at Poly.

**Urbanites breed crime says SLO officer**

by RICHARD PRICE

Daily Dispatch

SLO--In a recent study by the city of SLO, officers stated that the crime rate is on the rise and that urbanites breed crime.

The study was conducted by officers who stated that they have seen a significant increase in crime in recent years. They stated that urbanites breed crime and that the city needs to take action to prevent it.

Fet in feet make footprints. Feet in Birkenstock footwear do the very same thing. The Birkenstock footbed is heat and pressure sensitive, to mold to your foot, and become the same thing barefoot in the sand, with one very convenient aspect. By KATHY ALLAIN Lull Obispo

The process of walking in Birkenstock is a lot like walking barefoot in the sand, with one very convenient aspect. The shop is situated in an old linen mill, with a state of the art printing press, a six-color press, and a staff of five who print custom T-shirts, ties, and pocket squares.

Volunteers needed abroad

Naturals, no one person is going to "solve" the energy problem singlehandedly; it's going to take a lot of concerned people, working together, to even begin to solve the problems of fuel conservation, wild life preservation, recycling, smog-free rapid transit, fume incineration and water purification.

The thing is... as concerned as we are about these problems, and others, at PG&E we don't think "concern" is enough. The concern has to motivate action, and that's what we've coming to grips with.

If you're a "how-to" person, a person who's more than an idealistic abstractionist, there may be an opportunity for you with us to work toward solutions to problems that concern you.

Sure, we've got the establishment benefits that make life a little easier to cope with, like good pay and employee benefits. But we've also got the things that make life worth living, realistic challenges.

If you're a graduating civil, electrical or mechanical engineer, and you've never thought about working (and/or with) us before, give us a thought. Send your resume to John Clemson at PG&E's Professional Employment Office, 245 Market Street, San Francisco, CA 94106.
Runners place fifth

The Cal Poly men's cross-country team placed fifth at the West Coast Conference Championships, which were held in San Diego on Saturday. The Mustangs scored 138 points, with Oregon placing first with 38 points. The women's team did not compete.

The Mustangs' top runners were Chris Wilson, who placed 15th, and Steve Lasky, who placed 20th. Other runners who competed included Kevin Ryan, who placed 26th, and Scott Knowles, who placed 31st.

The conference championships were the final meet of the season for the Mustangs, who will now prepare for the NCAA regionals, which will be held in early December.
Bob Trudeau has a plan for his future

by BILL ALVERNAS
Sports Staff Writer

Bob Trudeau is a man with a plan. He has a plan to go to the National Football League, and he's not going to stop until he gets there.

Trudeau, a 28-year-old former football player, has been working on his plan for more than a year. He has been studying the game, learning from other players, and working hard to make his dream a reality.

Trudeau was a star player at West High School and then at the University of Arizona. He was drafted by the New England Patriots in 1982 but was released shortly after. Trudeau then went on to play for the Kansas City Chiefs.

Trudeau has been working as a football coach at West High School for the past two years. He has also been working as a sales representative for a local car dealership.

Trudeau believes that the key to making his dream a reality is to continue to work hard and never give up. "I want to make it to the NFL," he said. "I'm willing to do whatever it takes to get there."

Trudeau's plan includes working on his skills, improving his leadership abilities, and networking with other players and coaches.

State driving program being held this week

The state driving program is being held this week at the West High School. The program is open to all students and is free of charge.

The program is designed to help students learn the basics of driving, including traffic rules, safety, and how to operate a vehicle.

The program will be held Monday through Thursday from 2:30 to 4:30 p.m. in the school's gymnasium.

Poly students profit by practicality

By RODDIE HARDBOARD
Daily Staff Writer

Some colleges carry the reputation of being intellectual ivory towers devoted primarily to educating students whom administrators seem to forget are growing up and practical experiences.

In contrast, Cal Poly's reputation was made on practical, not ivory, soil. Here, students are expected to utilize their hands as well as their minds.

This practical "job-oriented" approach to education has helped to make Cal Poly one of the more popular institutions in the West over the last 10 or 15 years by the wishes of many professionals.

As last spring, Poly ranked second only to San Jose State in the number of accredited degree programs (11), in the California State University, and Columbia Systems. Two other majors, while not accredited, are also officially recognized.

The Placement Center reported Poly's "placement rate" is now being recognized by both students and employers who ultimately determine the failure of a college for most students.

It is extremely difficult to determine exactly how many graduates have landed in professional jobs following graduation according to Valpey, director of the placement division. However, the number of job offers differ greatly each year due to the "hungry" job market which now exists and partially to the mailing campaigns of Poly itself.

"Ninety per cent of the time...the interest in employment activity is due partially to the favorable job market which now exists and partially to the mailing campaigns of Poly itself. "

Although polytechnic education may seem to be academic, Valpey indicated that, as a by-product, this philosophy has led to success in graduate school for continuing students.

Valpey's sentiments were echoed by Dennis Hamilton, director of the School of Architecture and Environmental Design.

"We have a well organized program which is geared toward the profession," Hamilton said. "We emphasize practice instead of theory.

As an engineering, Poly's philosophy of more by doing has caught the eye of architectural employers, to a survey done by the American Institute of Architects. Poly students were awarded first 30 to over any other graduates, according to Hamilton.

In recent years, Poly has had an overflow crop of incoming architecture hopefuls. Their number has increased, said over 1500 new students applied this fall.

"No other school in the nation had as many," he stated.

"We don't have to advertise ourselves because the professionals do it for us. "

"Our students...are advertised because we have outstanding professors..." Equinea adds...

"In my opinion, per cent...we have as many or more job interviews than any other campus on the West Coast," Poly administrators included.

"Although we over full time, Valpey and Hamilton said...

"No other school in the nation has...the number of job offers...the number of students..." and the students we have..." Valpey said.
