Sound approach to family farm rule

Every high school has one: The Face

Breaking the monotony
A cellar for meeting and eating

The Cellar, located in the lower level of but to which the dining room is attached, is open for the first time as a place to meet friends, to eat and to enjoy

The Cellar is a comfortable, intimate place where people can relax and have a good time. The food is excellent, and the service is courteous and efficient.

The Cellar is run by a group of dedicated workers who are passionate about their craft and take great pride in their work. They are committed to providing the best possible experience for their customers.

The Cellar is open 7 days a week from 11 a.m. to 11 p.m. and is available for private functions. We look forward to seeing you soon at The Cellar.

Sophisticated horns and bells to signal fires

By CAROL PROVIDENIA

The days of simple fire alarms have given way to the post show Polv is installing more sophisticated equipment in campus buildings.

Bellesis North, Graphic Arts, Graphic Arts Computer Center, Health Center, Architecture and Engineering, Administration, Physical Plant, and the student dorms all have systems which relay alarm to the campus fire station. An example of the new type of equipment is in the most recent addition to the list, Graphic Arts.

Graphic Arts has a system of alarms which measure the rate of heat rise. If the heat rises at an abnormal rate an alarm is switched in both the Graphic Arts building and the fire station. Then kinds of alarms are used—horns and bells. A bell shows that the circuit to the freshman has been broken. Horns are a signal to start evacuating personnel.

C.W. France, fire apparatus engineer, stressed that anyone hearing the alarm should tell the fire station because not all the alarms have a circuit to the fire station.

At any price you can afford to be choosy.

Because the value of every diamond is determined by four characteristics (cut, color, clarity and carat weight), you can always use these qualities to your best advantage.

Perhaps you're attracted by the grandeur of a large diamond. Well, sometimes a large stone can cost the same as a smaller one. Simply because it has a little more color. Or a delicate birthmark hidden inside.

On the other hand, you may feel size isn't the most important quality. Then you could choose a diamond that's small, but perfectly cut to sparkle with an icy-white elegance.

In any case, you'll be able to find one to suit your personality. Because each one is an individual, with its own combination of characteristics. And you can use these qualities any way you wish, to help you decide what's precisely right for you.

But the important thing to remember is to buy a diamond engagement ring you'll be happiest with. You'll be sharing it for a lifetime with someone you love.

And for that reason alone, you should be choosy.

A diamond is forever.

Blame it on the American sports fan

With baseball's second free agent draft under way on Monday, the opportunity for professional baseball is once again upon us.

Are the athletes in the middle of a summer lull and are the fans happy? With the All-Star Game drawing near, we are closer to the end of the season. The fans have been waiting for this moment for months and are eager to see how their teams perform in the final stretch.

These are just a few of the many questions that pop up as the baseball season reaches its conclusion.

We are here to discuss some of the top teams and players in the league and their prospects for the remainder of the year.

Blame it on the American sports fan.
Dean given highest educational award

The highest educational award of the Cal Poly Alumni Association has been awarded to George J. Hasbrouck, the rector of the School of Architecture. Hasbrouck was selected for the award by the committee for his exceptional leadership and service to the university.

Bigfoot scaring away South Dakota Indians

LITTLE EAGLE, S.D. (AP) Indians in this remote hamlet on the Rosebud Reservation are so convinced that Bigfoot is running nearby that some even go out and try to trap him.

"It's not just a legend," said Chief T. J. Black Eagle. "We've heard stories of Bigfoot, and now we're seeing him."

But Bigfoot's presence in Little Eagle has led some residents to call for more protection.

"We need to protect our homes and lives," said one local resident.

GEORGE HABRENIK, result of the energy and devotion of one man who has impressed his students with the passion and innovation of his teaching.

Fraise from California architects for Hasbrouck's contribution to the profession included this statement:

"Cal Poly's architecture program has been an inspiration, and his leadership has been an asset to the university."
