State budget may help Cal Poly

By SCOTT CRAVEN

Downtown Cal Poly's new life science building may be completed by 1980 as a result of the state budget approved by the legislature last week.

Officers arrest four for drugs

By TONY TRANFA

Four persons, one of whom allegedly carrying a large quantity of marijuana, were arrested yesterday afternoon at 2:50 p.m. by two Montery County sheriff's deputies.

City council votes to enforce ordinance

By RICHARD PRICE

The city council has approved an ordinance to increase the fine for violation of the city's drug ordinance.

Low cost shots available

By TODD NASH

Low cost shots for dog and cats will be available Jan. 14 from 1 to 3 p.m. at the San Luis Obispo County Community Service Center.

Other provisions of the plan include:

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.

- Requiring the same individuals for any other horses that may be involved in the use of drugs.
Land preserves needed

The time has come for a showdown. A unanimous decision must soon be made, a unanimous decision, preserving measured action we have of property rights.

The issue to be faced is the preservation, or non-preservation, of agricultural land. Will future generations be able to enjoy the beauty and productivity of our rural landscape? If not, the consequences will be grave.

There is a pressing need to act now. The issue is not whether we will lose our farmland, but how. With each passing year, the situation becomes more dire.

We are facing a crisis in our rural areas. The loss of farmland is not just a matter of the economy, but of our way of life. We must act now to preserve our agricultural heritage.

The time is now for bold action. We cannot afford to sit on the sidelines while our precious farmland is lost forever to the sprawl of urban development.

We must act with determination and resolve. The stakes are too high to allow any slack in our commitment to preserving our agricultural land.

As we look to the future, we must ensure that our actions today will be remembered with gratitude by future generations. The time to act is now.
Health board charges discrepancies

San Luis Obispo County's Health Commission has charged discrepancies in a recently completed county medical care study to health commission members.

The commission reviewed the health study conducted by San Francisco health consultant John J. Zimm over the request of the board of supervisors.

Commissioner disagreed with Zimm's findings and the board's charge to the study's accuracy to San Luis Obispo County health commission members regarding the number of people in the county who are insured.

The study was conducted by the San Luis Obispo County Hospital and the county's health study was based on the premise that all tril 3 ! iy the population was accounted for in the study.

Community Mental Health Services personnel could have all county population profiles thereby providing additional services.

The commission members argued a mental health professional in a community setting would be more effective than the Mental Health Services in providing additional services.

James said San Luis Obispo County Hospital could be more effectively utilized if it was managed by an outside agency.

Commission members disagreed, saying the hospital was more subject to political pressures and would be more expensive to run if it was managed by an outside agency.

The commission also recommended a separate study on the use and misuse of emergency services in San Luis Obispo County be conducted.

The Health Commission review also said voluntary efforts of community groups to health education and prevention services to receive and increased allocation of funding and resources among social service agencies is needed.

POLY may require budgeted funds.

Music laws may strike a sour note on campus

By JOY BERG Daily Staff Writer

Cal Poly's free music is about to be toned down. As of Jan. 1, the federal copyright law no longer exempts colleges and universities from payment of royalties on music played on their campuses.

"This not only includes music played by the university's own bands, but also records played at lectures and in dorms, frequently without the security blanket offered by the college and other clubs where a special license fee is paid. This is the case for hundreds of bands William Johnson, Head Librarian.

"Higher education is now meeting with representatives of the three performing rights organizations (APRA, BMI, SESAC)," said Don Vert, a former department chairman and service officer at Poly.

"Nearly all royalty payments for the performances of copyrighted music at the University are handled by these three organizations, which represent composers and publishers who own copyrights."

"We're not only concerned about royalty payments here, but also about royalty payments for the sale of recordings."

As an example of the type of recording that may be eligible to be sold in general stores, Vert would like to own a "Ride a Tiger" and the service officer at Poly.

A blanket agreement could be expected in some areas where organized performances are held, but this is not the case in most of the country. In spite of the blanket agreement, Cal Poly's royalty payments for 1980 are estimated to be over $100,000, which would mean a $10,000 increase in expenses.

"We are awaiting a decision from the latter, an agreement that will allow us to sell these recordings "and will not take any sales till that time," Vert said.

The[Continued from page 1] -- under no obligation to provide housing for students.

But Cal Poly students don't agree. Cathy Lane, a 19-year-old dormitory resident, told the council that it wasn't fair for students that San Luis Obispo has a housing problem. She pointed out that when she enrolled here, there was no reason for her to believe space was available.

"So why should students be forced to pay to rent space that is not even available?" she asked.

Debbie Peterson, a 19-year-old home economics major, said she believes the community at least over the student campus controversy for the tenure they would suffer if suddenly evicted from their home.

"To Joe Grafton, a 20-year-old industrial management major, assured the council that he was willing to take the issue to court if necessary and "tie the matter up for years."

"Our housemate, a 20-year-old architecture student, named Chris Galley, testified the only way he was able to purchase his $1,000 home was by renting it out to friends.

"I argued with the administrator of the house and he told me 'no one would be able to sell from the other house on that street,' he said, discounting earlier remarks that student home degradation neighborhoods.

A Cuesta College student, arguing that his life and his life with two male and two female undergraduate life and 7020060 including life and 220000 home was being rented it out to friends.

"We're not trying to make the matter up for years."

"In summary, the problem." Jorgenson observed that the students are probably innocent victims of the demise that has been exploited by landlords. Nevertheless, he said, the traditional single family concept is also being destroyed by failures to enforce the ordinance.

Jorgenson called for the "dissolution of the ordinance office and as fast as a man can move on prosecution of landlords who flagrantly violate the ordinance."

"Meanwhile, Mayor Mayor McBelcher admitted that the ordinance was "a necessary evil and unenforceable."

In voting to endorse the officers' comment, "some people who have already been hurt."

Rable of companies will offer you an important sounding title:

"But how many offer you a really important job?"

"In the Navy, you get one as soon as you enter your commission. A job with responsibility. A job that requires skill and leadership. A job that's more than just a job, because it's also an adventure."

"If that's the kind of job you're looking for, speak to your local recruiter."

Jobless rate falls to 3-year low

SALT LAKE CITY (AP) — President Garter hailed as "progressive" the Labor Department's report Wednesday that the December jobless rate fell to 4.1 percent, its lowest level in more than three years.

President Garter, during his speech on the economy, expressed his appreciation to the Labor Department for providing him with reliable, up-to-date statistics that show the economic recovery is well underway.

SCUBA DIVING

You can become a certified scuba diver before summer season ends. Mike Francis is beginning a basic NAUI dive class January 11. Bring your own suit to Nuss Pool in San Luis Obispo Monday mornings. For information call Mike Francis' Scuba Classes 528-1330.

Taiwan signs for nuclear plant

San Francisco (AP) — The Republic of China signs here today 40 million dollars in contracts with American firms for the construction of its new nuclear power plant at San Francisco, officials announced.

The contracts were drawn up in behalf of Westinghouse, International Telephone & Telegraph, Grinnell Corp., and Bechtel Power Co., the three commissioners of the project.

The nuclear plant, which is the world's largest construction project, has been financed almost exclusively by the Republic of China.

One. Two. Three. Go.
Nobody wins if sport turns violent

This year, the Montreal Canadiens and Boston's Stanley Cup is a symbol of the latest in the game to such a degree that they resembled a hit ball. Their players' efforts, efforts to be played. Often, the players are injured, and injuries are negative. The players no longer perform at their best, and the game suffers.

That is the way all games, in all sports, should be played. Often, the use of such collective action is so great, it becomes a symbol of the players' efforts to be played. It is true that, in some games, the players no longer perform at their best, and the game suffers.

When this happens, everybody loses. The players involved in the fight are ejected from the game, depriving their teammates of the opportunity to perform. The players themselves are often injured. The fans are deprived of being able to enjoy the athletes perform. Seemingly, only the sport suffers.

Women cagers take on Pomona

Cal Poly women's basketball team will return to action tonight after almost a month's layoff to take on Pomona College in a non-conference match. Pomona will carry a 2-4 record into the game.

Coach Mary Statler feels her team's progress in the early part of the season will be strong enough to give the Mustangs a good chance for the conference title. However, she knows it won't be easy.

"We can beat anyone in the conference including Cal Poly Pomona but we have to play smarter to do it," she said. "It makes the players understand that we have to play four good games in our conference."

Two of those four games will be tough games against Cal Poly Pomona, which the Mustangs play Saturday night.

The game will be played at Cal State Northridge.

Probable starters for tonight's game will be Shari Perffiti, Alex Vozhak, Jennie Cardlff at the front and Kerri Suter and Karen Boll in the back court. Carrell is leading scorer for the team averaging 13 points a game. Starting time is 8 p.m. at Grandy Gym.

Poly begins league play

The Mustangs will open the season at Cal Poly Pomona's basketball site tonight when they travel to Los Angeles for their first league match against the Mustangs.

Assistant Coach Tom Wood feels that Poly, who has a lot of pressure, is ready to begin regular play. Last year's Mustangs went all the way to the semi-finals of the Division II championships before being knocked out by Utah State University.

Poly's top three scorers all are in the top four in the conference. The trio are Cal Poly's top three scorers and in the top four in the conference. The Mustangs will be in Los Angeles on Saturday to meet the San Francisco State at 8 p.m. in the Main Gym.

Wrestlers to face Clarion tonight

Coach Vaughan Hill's Mustangs will have a chance to feel the satisfaction of victory tonight when they face the Clarion State Eagles in the dual meet.

The Eagles defeated the Mustangs 18-16 in Clarion, Pa., last Friday, and Poly has yet to win a three-match losing streak that has spanned two previous bouts.

One factor in the Mustangs' favor is Clarion's inability to win two after spending the last three days competing in dual meets with Oregon State, Oregon, and Utah. All three had won their previous matches.

A win by Clarion would make the four-match series between the two rivals. The Mustangs won the first encounter 19-18 in the 1974-75 season, then added a 30-0 win last year. The Mustangs led the Eagles 16-11 after eight matches of this year's first confrontation but a loss by decision in the 180 pound class and a fall at the hands of the Mustangs.

More importantly, in those two wins, Poly has won three of four matches in the 190 and heavyweight classes. On the five-match eastern swing, the Mustangs were 5-0 in those two weight divisions.

Knox to coach Bills

LOUIS ANGELES (AP)—In the last and dramatic turn of events yesterday, Chuck Lott resigned as coach of the Buffalo Bills and Don Knox is to coach Bills for the past 10 days to two weeks In naming a successor to Knox, the team's general manager, Don Klosterman.

But rose id) loom said that he would make haste to talk to other coaches.
Value found in shopping wisely

By GARY KAPLAN

People go through it, all the time. Make a list, review a list, put it on the shelf, put it on the list, throw it away, put it away, throw it away, put it away, throw it away, put it away. It never seems to get any easier.

But it need not be that way. There are several methods that will reduce the cost substantially. For instance, allowing the children to help with the family shopping can be a real money saver.

To start off, shop alone and after you have had a good meal when you buy more when you are hungry than when you are not. When shopping go in groups of three or more. This will likely buy anything that is not on the list, according to USDA.

Having a plan with the USDA will save a lot of time and energy. The plan is that when you shop alone, you have more likely to buy anything that is not on the list, according to USDA.

Sylvia Porter, in her consumer guide Money Savvy, suggests that time limit on weekly shopping:

"If you shop for longer than 30 minutes you will wind up buying more.

To facilitate the 30 minute rule, carry a list when shopping and allow the children to select items from the list. If the children are shopping for themselves, they will most likely be more likely to buy items that are not on the list.

A sure way to save money is to shop for your next week's supply. As an example, buy whole chickens rather than chicken parts. There will be an average savings of 6 cents per pound. Get out the cookbook and do it yourself recommended retail prices for an hour and a half.

"Leftover ideas:

C. Consider making your own acorn oil or butternut squash chowder. C. Consider making your own acorn oil or butternut squash chowder. C. Consider making your own acorn oil or butternut squash chowder. C. Consider making your own acorn oil or butternut squash chowder.

"If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about.

It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequaled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on Jan 10-19, or contact your Navy representative at 215-468-5121 (collect). If you prefer, send your resume to the Navy Nuclear Officer Program, Code 312-B468, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you directly.

The NUPOC-Collegiate Program. It can do more than help you finish college: it can lead to an exciting career opportunity.
