State budget may help Cal Poly

By SCOTT CRAVEN
Daily News Writer

Cal Poly's new life science building is under construction and is expected to be completed in 1978. The building will be used to teach and conduct research in the field of biotechnology.

Critics of the building project have expressed concern about the cost of the building and the need for additional funds to support the program. However, the university administration has defended the project, arguing that it is necessary to keep pace with the rapidly changing field of biotechnology.

City council votes to enforce ordinance

By RICHARD PRICE
Daily News Writer

The City Council has voted to enforce the ordinance that was passed last month. The ordinance is designed to prevent the spread of diseases that are carried by mosquitoes.

Opponents of the ordinance have argued that it is too restrictive and will lead to an increase in the cost of living. However, supporters of the ordinance have argued that it is necessary to protect the public's health.

Officers arrest for drugs

By TONY TRANFA
Daily News Writer

Four people were arrested for possessing and distributing drugs. The suspects were reportedly caught in the act of selling drugs on the street.

The suspects were identified as John Smith, Michael Johnson, Robert Davis, and James Brown. They were arrested and charged with possession of drugs with the intent to sell.

The case is being handled by the Los Angeles Police Department. The suspects are expected to appear in court next week.

**Land preserves needed**

The time has come for a showdown. A unanimous decision must soon be made, a decision that will determine the future of what we consider to be our property.

The issue to be faced is the preservation or development of our valuable agricultural areas. Will our prime agricultural areas be lost to the bulldozer, or will they be safeguarded for future generations?

Or, will this desperately needed land be absorbed by some monolithic control which will prevent their being lost forever?

The issue can no longer be avoided. The situation has become critical due to the inexorable spread of urban sprawl. More land is being taken away by the bulldozer, and we must act fast to save our farms.

One need only look at the Santa Clara Valley and the Los Angeles basin to see examples of this situation. These areas are full of prime agricultural land, but development is encroaching on them. We must act now to save our farmland.

New developers are seeing their sights turning green. They are setting their sights on the strawberry fields, the alfalfa meadows, and the rows of crops and orchards. They are considering these areas as potential development sites. If we don't act soon, our beautiful farmland will be destroyed.

The preservation of our farmland is an issue that requires the attention of all of us. We must stand together to protect our heritage.

**Good ol’ boys pitch-in to help Billy**

Billy Carter was down in the dumps last month after a seven county junket packed with photo ops. He was despondent at his inability to plug in to the political scene.

But still, despite his misgivings, Billy's name, Billy he was tagging along as a man of action. Billy decided to explore the possibility of getting into the taxicab business.

He decided to get his plate into the Los Angeles County Revenue Office. The clerks there, they knew, would be pleased to see someone so interested in civic duty. Billy was greeted with a smile and a wave, and he was given a copy of the application.

Arriving in New York in his pickup Billy headed for the offices of his partners. He stopped at a place bearing the sign, "Taxicab Service." Billy was greeted with an invitation to come in and discuss the matter.

"Hello Mr. Former Vice-President Richard Nixon," said Billy.

"Hello Billy," said Ron. "I've been thinking a lot about our business and the instrumental part I could play in solving this problem. If you have a bottle of your beverage, I could be of assistance. I feel certain, but we really need a third.

Fortunately, I knew just the man. He's even been up at the same business. He's run almost like this one. He's given me the name and an address and a phone number to let him know our plans.

"I'm more you'll like him. He's a man who's been very helpful to me. The person you're thinking of, the one who can solve the taxicab problem, is Mr. Former Vice-President Nelson Rockefeller," said Billy.

"I've been in contact with him," said Ron. "He's interested in the problem. He's suggested that we might work together.

"I think that's a good idea," said Billy. "He's a man of great influence. He could be of great assistance to us.

**Are we car junkies?**

It is said that Californians become nervous when they are more than 100 yards away from their automobiles. This may explain the drive-in banks, drive-in restaurants, and drive-in churches.

With this in mind, we aren't surprised by the latest study by the Federal Urban Mass Transit Administration which found that the number of people using mass transit in this country is made by automobile. Furthermore, the report says, even if the number of mass-transportation patrons doubled, the effect on the urban automobile would be only a drop in the ocean.

So much for the obvious. However, the study goes on to examine the basic causes instant.

"I called me last night right after Pat and I finished our evening tea and I was telling her a few chapters from my bestseller, soon to be published nationwide.

"Let me make one thing perfectly clear, Pat. I'm not going to write a sequel to my previous efforts. I think I've done the best I can with the work of fiction, and I'm going to move on to something different.

"It seems to me that the time has come to move on to something new. I think I've done my best with the fictional novel, and I'm going to move on to something different.

"I've decided to move on to something new. I think I've done my best with the fictional novel, and I'm going to move on to something different.

**None** is sometimes costly

Billy Swanson was driven to the hospital this week after he was hit by a car while running. He had just finished his evening tea and was walking along the sidewalk. His eyes had just met those of a young motorist who had slammed on his brakes.

Health board charges discrepancies

San Luis Obispo County's Health Commission has heard several discrepancies in a recently completed study, health care costs, according to health commission members.

The commission reviewed the health study completed by San Francisco-based health consultant John B. Howard at a meeting of the county Board of Supervisors.

Commissioner charged with James on several issues was a guest at the meeting of the Health Commission.

Commissioner charged with James on the subject of medically assisted living in San Luis Obispo County was a guest at the meeting of the Health Commission.

The commissioner charged with James on the subject of medically assisted living in San Luis Obispo County was a guest at the meeting of the Health Commission.

Poly may receive budgeted funds.

According to the commission, James figures were based on a study of Medicare and Medi-Cal eligibility, which was done by a different consultant than the one who did the review. According to the commissioner, in the report does not reflect the portion of population that was not accounted for in the study.

Community Mental Health Services personnel could be more effectively utilized if the hospital was managed by an outside agency.

Commission members disagreed, saying the hospital could be more effectively utilized by the community and said that the hospital's equipment and facilities need improving.

The commission recommended the hospital not be upgraded until the rate of the county's five hospitals is determined by the Mid-Coast Health Services Agency.

The Health Commission review also said voluntary efforts of community groups in health education and increased numbers of emergency services in San Luis Obispo County benefit.

Music laws may strike a sour note on campus

By JOY BERG

Cal Poly's free music is about to lose its luster.

As of Jan. 1, the federal copyright law no longer exempts colleges and universities from payment of royalty fees on music played on their campuses.

"This not only includes music played at concerts, but also the records played at lectures and seminars, even if the college owns the music," said Jennifer McFadden, manager of licensing for the Chumash Foundation.

"Higher education is now meeting with representative of the three performing rights organizations (ASCAP, BMI, SESAC)," said Don Vort, general counsel and service officer at BMI.

"Virtually all royalty payments for the performance of copyrighted music in the United States are handled by these three organizations which represent composers and publishers who own copyrights.

"The moratorium will not last beyond Feb. 1, 1978," said McFadden. "The law is not retroactive, therefore, no royalty fee will be due for any party in 1978 or 1979."

"We are awaiting a decision from the courts and the courts are not likely to rule, and until that time, the situation is up in the air.

"A blanket agreement could be worked out in areas where organized groups are able to make decisions about fee payments. However, it is certain that the colleges will have to work together and pay in thecoming year."

A blanket agreement will probably mean that colleges might arrive at a price tag for the performance of copyrighted music. The price tag may vary from college to college, depending on the size of the school and the number of students.

"A few colleges have already made arrangements with the copyright owners," said Vort.

"It is not yet clear, however, whether the new law will apply to other types of music that are played on campus, such as recordings made of music by the university band."

Housing ordinance to be enforced

By BENNO PIERSO

A Housing ordinance to be enforced.

10-year-old housing ordinance, said the council that it will be enforced.

"We do not want housing to be a problem," said the council.

"We have a problem in housing, and we have a problem in the community."

"The ordinance will take effect on January 1, 1978."

A Cuesta College student, said that his life with two male and two female roommates in one of the largest apartments in the city, said that he lives a family-oriented life and tries not to cause any problems for other families.

"We even carpooled to school," he said. "We even carpooled to school, but we didn't cause traffic problems." As summarizing the problem, Jorgenson observed that the tenants are probably innocent victims of the system that is being exploited by landlords.

"I do not think that we are going to be able to solve the problem by ourselves," he said. "We do not have the resources to do it ourselves."

"We are going to ask the county to come in and do the job," he said. "We are going to ask the county to come in and do the job, and we will be on the job ourselves.

"We are going to ask the county to come in and do the job, and we will be on the job ourselves."

Energy film

"The Last Resort," a film about the battle and controversy of Atomic Energy, will be shown today at 11 a.m. in Chumash Auditorium. The film is sponsored by the Ecology Club. Admission is free.

"Nashville"

The film "Nashville" will be shown in Chumash Auditorium this Friday at 8 p.m. Admission is free.

Country film

"Alleviation in Agriculture" is a film sponsored by the American Heart Association. The screening will be held at 6:30 p.m. in the Chumash Auditorium. Admission is free.

Research program open

The American Heart Association is offering a ten-week research program to students considering careers in cardiology.

"Students accepted to the program will work during the summer in laboratories of well-known medical centers," said the American Heart Association.

Applicants must be full-time students in college or university of any discipline and must have a strong background in mathematics and sciences.

Applications must be received by Jan. 15. Student who is accepted to the program will be held in residence for the summer in one of the nation's leading medical schools.
News in brief

Biofeedback reduces smoking

Jobless rate falls to 3-year low

CONCORD, N.H.—The use of biofeedback techniques may be working to help lower-agee New Hampshire quit smoking, according to a recent survey, according to early statistics.

The program, developed by the New Hampshire Tobacco Association, puts a trained health educator into a high school smoking class with the use of biofeedback machines that show how smoking a cigarette does to their heart rates and skin temperature.

Paul Lynde arrested in Utah

SALT LAKE CITY (AP)—Comedian Paul Lynde was arrested in front of a downtown tavern and booked into the county jail on charges of public intoxication and interfering with an officer, according to police.

City Prosecutor Phil Palmer said the public intoxication charge was most likely because it was a first offense and that arresting officer Kent Fondall signed a complaint against Lynde for the intoxication charge.

Lynde, 41, was in Utah for taping of the "Donny and Marie" television show.

Pelican Club, Sam Leaver said Lynde was arrested in front of the San Savoy at 11:30 a.m., while an officer was investigating a car burglary.

He said Lynde had been seen drinking and Lynde blamed off-duty officers to his problem. "The officer finally had to arrest him," Leaver said.

Lynde was released after posting $60 bond for the intoxication charge.

Disaster relief to nine countries

LOS ANGELES (AP)—Nine Southern California counties have been declared disaster areas as a result of last month's destructive windstorm, a spokesman for the state Small Business Administration said.

The declaration will aid individuals and businesses to apply for low-cost federal loans to repair or replace uninsured damaged property.

The counties involved are Kern, Tulare, Inyo, San Bernardino, Los Angeles, San Luis Obispo, Ventura and Santa Barbara.

The counties have been estimated $400 million damage throughout the state and were particularly damaging in the nine disaster areas.

A special Small Business Administration disaster officer will travel to the counties to help small businesses recover.

The counties involved are Kern, Tulare, Inyo, San Bernardino, Los Angeles, San Luis Obispo, Ventura and Santa Barbara.

Taiwan signs for nuclear plant

SAN FRANCISCO (AP)—The Republic of China signs here today $400 million contracts with American firms for the construction of the world's largest nuclear power plant in the state.

The contracts will be drawn up in behalf of Westinghouse International Corporation, New York, and Bechtel Corporation, San Francisco.

It will be the world's largest nuclear power plant in the Northern Chinese island, is designed to become the nation's largest nuclear power plant.

The plant will be the second such plant and the United States is the world's largest nuclear power plant in the Northern Chinese island, is designed to become the nation's largest nuclear power plant.

TAIWAN SIGNS FOR NUCLEAR PLANT

South American mining companies are now proving the long-term method to store nuclear wastes.

The three commissioners had to choose their minds by the date of a Jan. 8, hearing. Their decision could lead to an increase in nuclear power plant construction in the state.

Most immediately, it could strike a fatal blow to San Diego Gas & Electric Co.'s proposal to come before the commission this month. California enacted the nation's toughest nuclear safety laws in 1973.

Nader a winner in 'bump' battle

WASHINGTON (AP)—A federal judge has ordered Allegheny Airlines to pay consumer advocate Ralph Nader $8,395 in a "bump" battle over the future of nuclear power in California.

Nobody wins if sport turns violent

That is the way all games, in all sports, should be played. Often though, the use of an excessive and illegal amount of force tends to dominate the affairs and the normally cautious skills of the players become lost in a fury of fans.

When this happens, everybody loses. The players involved in the fight are separated from the game, depriving them of the benefits of their skills. The fans are deprived of being able to enjoy the athletic pursuit.

Seemingly, only the severest penalties against those who use their fists will have any effect in preventing such behavior in the future. It's that simple. Basketball Association

A sporting view is a weekly column in Mustang Daily

Commissioner, Lawrence O'Brien, has noted very clearly his handling of this one-outstanding incident. Commissioner O'Brien handed Washington a $5,000 fine. Security guards were suspended. The coach, Geppi, was not suspended for kicking the referee. Commissioner O'Brien also banned Washington in 40 games, 10+ games, and to the Reading Flyers.

Women cagers take on Pomona

Cal Poly women's basketball team will return to action tonight after almost a month's layoff to take on Pomona College in a non-conference match. Pomona will carry a 9-4 record into the game.

Coach Mary Shadle feels her team's progress in the early part of the season is strong enough that the Mustangs are a contender for the conference title. However, she knows it won't be easy.

Two of these four games will have to come against Cal Poly Pomona, which the women play Saturday night. The other two will come against Cal State Northridge.

Probable starters for tonight's game will be Betty Felitta, Alex Vossli, and Janis Zuniga.

“we can beat anybody,” Coach Shadle said. “we have the ability to do it.”

The Mustangs will play on the strength of their California Collegiate Athletic Association members, especially the athletes of Pomona College. The Mustangs, led by Coach Tom Jones, are in a close race for the title this year.

Poly begins league play

The Mustangs will be on the look out for their California Collegiate Athletic Association members, especially the athletes of Pomona College. The Mustangs, led by Coach Tom Jones, are in a close race for the title this year.

Wrestlers to face Clarion tonight

Coach Vaughan Hitl-eman's Mustangs will have the satisfaction of revenge tonight when they face the Clarion State Eagles in the boys dual wrestling meet tonight at 7:30.

The Eagles defeated the Mustangs 15-16 in Clarion, Pa., on Jan. 8. Polt will be a three-match losing streak after winning in two previous bouts.

One factor in the Mustang's favor is Clarion's lack two after spending the last three days competing in dual meets with Oregon State, Oregon and C. Berkeley. All three competition was stronger than Pac Eight meets.

A win by Clarion would give the Mustangs the highest seedings in the past eight years. The Mustangs won the first encounter 19-14 in the 1974-75 season, then added a 19-14 win last season. The Mustangs won the Eagles 15-11 after eight matches of this year's first confrontation but lost by decision in the 180 pound class and a fall at heavyweight hand Poly a win.

Since their return home the Mustangs have been practicing taking the U.S. Naval Academy 40-1 andates dominating the University of Arizona 34-1. More importantly, in those two wins, Poly has won three of its four matches in the 190 and heavyweight classes. On the five-match eastern swing, the Mustangs were 6-10 in those two weight divisions.

Knox to coach Bills

LOS ANGELES (AP)—In a brief and dramatic turn of events yesterday, Chuck Corvol, the constant coach of the Buffalo Bills, has died.

Corvol, the St. Louis Cardinals coach for the past six years, has been named the general manager, Don Klosterman, the team's general manager, said that he will make an announcement in 10 days to two weeks in naming a successor to Knox.

"We will make a decision very speedily," Reshmere said. "He will be named in several weeks. I am not at liberty to say who he is, but we will now announce a successor."
Value found in shopping wisely

By GARY KAPLAN

People go through it every day, but do you really take advantage of it? Why not go through all the hassle of buying groceries, and maybe even saving a little money in the process? It's not as hard as you think, and it's definitely worth your time.

Now, you might be thinking, "But I need to buy groceries, and I don't have the time to do it." Well, that's where I come in. I've got some tips and tricks that will help you save money on your groceries, even if you're on a tight budget.

First of all, try to shop when you're hungry. I know it sounds counterintuitive, but when you're hungry, you're more likely to buy things you don't need. So, try to eat before you go shopping.

Next, make a list. This will help you stay organized and focused on what you need to buy. Don't forget to check the weekly ads and coupons before you go, as these can save you a lot of money.

Another tip is to buy in bulk. This is especially true for items like rice and flour, which often come in large packages. By buying in bulk, you'll use up your supplies more slowly, and you'll save money in the long run.

Finally, try to buy generic brands instead of name brands. You might not notice a difference in quality, but you'll definitely notice a difference in price. And, you'll be doing your part to support local businesses.

So, next time you go shopping, remember these tips, and you'll be on your way to saving money and eating healthier.

If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about. It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequaled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on Jan 18 or contact your Navy representative at 218-168-5121 collect. If you prefer, send your resume to the Navy Nuclear Officer Program, Code 312-B468, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you.

The NUPOC-Collegiate Program. It can do more than help you finish college: it can lead to an exciting career opportunity.
