Heavy downpour causes flooding

By SCOTT CRAVEN

Why did workers on Main Street in San Luis Obispo area storm drain for water yesterday? heavy downpour caused flooding.

City officials and Cal Poly officials announced the storm drain system had been upgraded and that the city's water resources were adequate to handle the downpour. However, the storm drain system was overwhelmed and many businesses and homes were flooded.

The city announced that the storm drain system had been installed and that it was expected to handle the large amounts of water that were expected to fall yesterday. The city also announced that the storm drain system had been upgraded and that it was expected to handle the large amounts of water that were expected to fall yesterday.

Rain boosts water supply

By FOSTER CUMMINGS

San Luis Obispo officials announced that the city's water supply had been boosted by the recent rainfall. The city also announced that the water supply had been boosted by the recent rainfall.

Computerization: An aid to registration woes?

We already have programs working on the computer. We have been able to convert the system over and we are very pleased with the results. The computer is a standard software program that is available in all the computer labs. We are not working with the system. We are using it to the best of our ability.

The computer is a standard software program that is available in all the computer labs. We are not working with the system. We are using it to the best of our ability.

If the demand schedule comes back and there is only room for one, then it is expected that the computer will be used to fill that demand. If the demand schedule comes back and there is only room for two, then it is expected that the computer will be used to fill that demand.

However, the computer is a standard software program that is available in all the computer labs. We are not working with the system. We are using it to the best of our ability.
Close encounters of a fourth kind??

As I was leaving the City Council meeting, I met a man who had just gotten off work. I asked him how his day had been. He said, "You know what, I've just had the most amazing day. I met a woman who was absolutely beautiful. She was wearing a white dress and had long, flowing hair. We talked for hours and she told me all about her life."

I asked, "What's her name?"

He replied, "She didn't want to give me her name, but I know she was married."

I said, "Why didn't she want to give you her name?"

He said, "She said she was afraid I'd tell her husband."

I asked, "What did you do then?"

He replied, "I told her I understood, but I still want to be her friend."

I said, "That's great. Do you think you'll see her again?"

He said, "I hope so. She lives in an apartment building near my work."

I asked, "What kind of building?"

He replied, "It's a high-rise. I think I saw her go down the elevator the other day."

I said, "That's perfect. I'll keep my eye out for her."

He smiled, "Thank you. I really appreciate your help."

I told him, "Sure thing. Good luck."
Soggy forecast for the Golden State

From the United Press Service

SACRAMENTO (UPI) Jan. 16, 1979—Governor Ed Davis has urged all Californians to make an extra effort in listening to the weather reports.

In a statement issued from the California Highway Patrol, Davis said, "It's going to be in the same spirit of motivation that so effectively carried the last-mile effort of the drought two years ago.

Author Kevin Falls is a senior journalism major who writes a weekly column for The Daily.

"Our reservoirs are overflowing, the snowpack in the Sierra is replenishing. But, Los Angeles is a disaster area. We've got water coming out of our ears. We've got overproduction. We've got scared people, and they're hungry and thirsty by the thousands. If not, that makes snowpack the key.

Therefore, it was only three years ago that the governor of California, Mr. Davis calling for Californians to drink water, was drinking rain water from a 20,000 gallon rainwater tank that was built in the drought period of the Golden State.

Commuting hassles

There are no two ways about it—cars are a pain in the butt. Whether you're going to work, the store, or a friend's house, it's hard to get out of your personal vehicle without hitting a lot of traffic jams. And when you finally do get there, you're probably going to have to park your car and walk a few blocks to get to your destination.

If you're like most people, you spend a lot of time driving. According to statistics, the average American spends over 100 hours a year driving. This can be a daunting task, especially during peak traffic periods.

Hundradas of thousands of students use the Reading Dynamics Method. They find reading less of a chore. Concentration and retention improve, which can lead to better grades. A competitive edge is important, too. Important for you to delay.

Prove it to yourself today!

Whether you're thinking of graduate school or the job market, or if you want to keep up with current events, Evelyn Wood Reading Dynamics give you a competitive edge.

How Evelyn Wood Reading Dynamics gives you a competitive edge in school.

School at any level means reading... lots of it. Keeping up with thousands of pages can take a heavy toll on time and energy. And if you're typical, you read 150 to 350 words a minute. But how do you get ahead of the rest?

Evelyn Wood can triple your reading rate and improve your comprehension and study skills.

Hundreds of thousands of students use the Reading Dynamics Method. They find reading less of a chore. Concentration and retention improve, which can lead to better grades. A competitive edge is important... too important for you to delay.

Prove it to yourself today!

Whether you're thinking of graduate school or the job market, or if you want to keep up with current events, Evelyn Wood Reading Dynamics gives you a competitive edge.

In fact, Evelyn Wood guarantees that you will triple your reading rate if you follow the course correctly, or your full tuition refunded. That's our competitive edge.

NEW MEAL CARD SYSTEM IN USE

By MELINDA LOGAN

Valli-Dine, operators of the student Union's cafeteria, will introduce a new meal ticket system for the first time this fall. The system will offer both flexibility and simplicity, said Mr Smith, and will allow administrative control.

The student reaction has been quite positive. A majority of the people interviewed by The Daily Telegraph say they prefer the new system.

The card is inserted into a terminal that, upon scanning, will print a record of the meal ticket. The system will also allow the card holder to track his meal and food history. This will be particularly useful for students with special dietary needs.

The card can be used in any of the Union's dining facilities. It will be reloaded by the student on a weekly or monthly basis.

The meal ticket system eliminates the need for cashiers to handle cash or to give change, reducing the chance of theft or loss.

“Valli-Dine is excited to introduce this new system,” said Mr Smith. “We believe it will improve the overall student experience.”

The new system will be available for purchase starting in early September. Students are encouraged to purchase their meal cards early to ensure availability.

Broken leg rates parking pass

SACRAMENTO (AP) - Beginning tomorrow a broken leg will entitle a person not only medical assistance, but also a temporary parking pass for the duration of the Department of Motor Vehicles office.

In addition, a broken leg entitles a person to a temporary driver's license valid for a period of 10 days. It will also be possible to obtain a further extension of the temporary driver's license for a period of 10 days.

Tongson Park proves valuable

SEOUL, South Korea (AP) - Tongson Park, the site of a number of demonstrations and protests, has been proving valuable for the remaining five members of the North Korean delegation.

The park, which is located in the heart of Seoul, has been used as a place of relaxation and a place to discuss the issues at hand. It has also been used as a place to receive news from the North Korean delegation.

Chowchilla 3 delay sentencing

OAKLAND (AP) - Sentencing was postponed today for a man charged with killing 24 people in a helicopter crash in the Chowchilla area. The sentencing was to have been held today, but the judge ruled that there was not enough evidence to proceed with the trial.

Grapplers shine here

By JIM ALVERNAR

Pomona’s Billie Pongpahan, left, and Clarion State’s Randy Miller show the upper hand during a recent dual meet. Miller won the battles 5-4 but Poly won the war, 55-15. (Photo by Dave Stock)

By JIM ALVERNAR

It’s a shame the Cal Poly Pomona wrestling team can’t be seen in Los Angeles.

A meeting and a 5-1 record on an eastern swing in December, the Mustangs have returned to find the team much more formidable.

The Mustangs have a lot but the outcome of their opponents at home, neutral or on the road in the country.

In competitive matches Poly battled the U.S. Naval Academy, Holy Cross, Iona, St. Francis & Marshall 95-64 and most recently, Clarion State.

The home match advantage becomes evident when reconstituting last Thursday’s match against Clarion. In that match, the Mustangs dropped a 6-8 decision to the Wildcats at Clarion which capped a three match winning streak.

Poly promptly dropped the remaining two matches of the trip by progressively scoring four.

Coach. Vaughan Ricks’ squad is relatively young this season with only 12 men having varsity experience. The key to the Mustangs success as the season progresses, said Ricks.

The largest surprise for Poly has been the productivity of junior wrestler Armando Favela and Eugene V debate 106.

Vander, a wrestler placed higher than fifth in the state junior college meet, over for Pomona and Poly. Clarion State, but such has been a big plus to Mustang success in dual meet competition.

With has been the biggest surprise for coach Ricks. After winning all of three matches at the Arizona State Invitational at the University of Washington Thursday.

Pomona trounces Mustangs, 91-52

The Mustangs were dominated at Pomona Friday night, 9-1-52. Poly’s return to the Pomona arena was greeted by an enthusiastic crowd, a friendly match against Poly. Pomona had a 15-3 lead at the half and a 34-15 lead at the end of the first period.

The Mustangs came to San Luis Obispo with a 15-3 record which has been set by Poly in a merely 6-10-3 season. The game was cut down after the first 3 minutes. The Mustangs led by 3 at the half and extended it to 18 at the end of the period.

A 5-1 split for the week does not seem bad, but it leaves what little parity it has between the two teams. The only good news for both teams was Poly’s opening conference game of the season.

The encounter at the Southern California Athletic Association was a match of equals, but such is Poly’s basketball team of the Rocket Pirates.

The Mustangs were not too much for the Mustangs. Poly coach Brian Weber’s basketball team has been tough on Poly.

Midfield in the second half, Poly went in the corner room with two of its attackers trailing a Poly score with three. The Mustangs managed to score and then the lead to lose that the Mustangs started.

At one point the Mustangs were leading but 17 unanswered because Poly at the Poly end. The Mustangs proved to be Poly. Overlooked was Poly, 4-1-1 Poly over 1-4-1. It finished 3-1 average thanks.

Poly was starting five of 11.

BOWLING

Poly’s Kristie Bryan, with five against Pomona-Pitzer College, the Mustangs dominated Pomona-Pitzer, 91-52. Poly for the conference title.

If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about. It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $850 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 450 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequaled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on Jan. 18-19, or contact your Navy representative at 815-358-3151 (collect). If you prefer, send your résumé to the Navy Nuclear Officer Program, Code 312-B468, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you directly. The NUPOC-Collegiate Program. It can do more than help you finish college: it can lead to an exciting career opportunity.

NAVY OFFICER.
IT'S NOT JUST A JOB, IT'S AN ADVENTURE.

EARN OVER $650 A MONTH RIGHT THROUGH YOUR SENIOR YEAR.

Women and blacks join space crew

WASHINGTON (AP) — Women and blacks are joining the U.S. space program for the first time with the naming of 12 new astronauts who will fly the nation's space shuttles.

They are the first American astronauts recruited in nearly 10 years.

Today's announcement by Robert A. Prichard, head of the National Aeronautics and Space Administration, climax a lengthy search.

The astronauts were selected from a pool of thousands of qualified candidates and were among the names on the list from which the 12 were chosen.

The agency last year asked qualified persons to apply for the astronaut jobs, which are open to both men and women. About 500 answered. The names of 540 were placed on the list of 111 astronauts in the first 11th grade of 1969.

Hundreds of flights are planned in the next decade.

Applications for the mission specialists and pilot crews will be accepted until March 1. Applicants are expected to be from 24 to 35.

Astronauts are expected to be chosen for the first major space mission in 1976. The first space station is to be launched in 1977.

The 12 newly selected astronauts will be trained for two years before the first flight. The training includes 100 hours of classroom instruction and 200 hours of flight experience. The training will be spent at the Johnson Space Center in Houston, Texas.

The new astronauts will join the 27 present U.S. astronauts who will fly the early missions.
