Heilmann reflects on county's qualities

By RANDY NAX
Daily Mail Writer

San Luis Obispo County has clean air, good land and good people, with "just enough stinkers to make it lively," according to Hans Heilmann.

"That is the evaluation Hans Heilmann, 70-year-old former SLO County Board of Supervisors chairman, gave the county that has been his home for the last 46 years.

Heilmann's devotion to San Luis Obispo and his desire to "see it prosper" prompted him to run for the County Board of Supervisors 14 years ago.

"I was disappointed with the performance of the supervisors and the council," he said. "I knew the county needed some new blood in the ring," and Heilmann's run for the Board is a fact.

Heilmann was elected County Supervisor four years ago and has been re-elected every term since then.

Heilmann's three brothers and their parents immigrated to California from Germany in 1914. He said in what Heilmann called the "Indian country" of Germany, "when San Luis Obispo County had less than 10,000 people," he was "just a trial," he said.

"I didn't go back," he said. "I was a conscientious objector and worked in the same place the rest of my life."

"We had to work very hard to make a living," he said. "It was a harder life, but it was a good life."

Heilmann, who was a Postmaster in Huron, worked a small ranch and then became a supervisor.

"I have always been interested in politics," he said.

"I have always been interested in politics," he said.

HANS HEILMANN has spent 64 years in San Luis Obispo County, as a rancher and a politician.

"I have always been interested in politics," he said.

Heilman former Supervisor and county supervisor, Hans Heilmann is reflected on county's qualities.

The ranch's operation has been cut drastically, but the ranch still operates. The land, claimed Heilmann, appeals to outsiders and result is making tourism the county's second most productive industry.

While streamlining preservation, Heilmann supports the growth of population and light industry in the county.

"I believe in this county," he said. "I feel this county can support a lot of businesses, and it's a good place to live."

The jobs in the county are mostly what he called "non-competitive." He said the California Men's Colony and a State Hospital.

Heilmann said he believes strong student communities can attract new industry, but the county needs more young people to stay in the county after graduation.

Heilmann said preservation would not be a problem if industry grew in the county because there are proper growth and federal controls.

"If we get too restrictive, we will run into the law of diminishing returns," he said.

"We have to be aware of the law of diminishing returns," he said.

The county's economy should be diversified, he said, and businesses should be encouraged to remain in the county.

"We have to be aware of the law of diminishing returns," he said.

"We have to be aware of the law of diminishing returns," he said.

Heilmann said that he has "no interest in politics," but he said he feels Heilmann did work for the county and people he has always maintained Heilmann. He said he feels Heilmann would do that.

"I have always been interested in politics," he said.

"I have always been interested in politics," he said.

"I have always been interested in politics," he said.

"I have always been interested in politics," he said.

"I have always been interested in politics," he said.
**A frightful tale of the slopes**

After enduring a 3-year drought, California is now being overwhelmed by a deluge of snow, making the slopes of the Sierra Nevada one of the best crops of snow in the Sierra during the 50-year history of the area. The conditions have been so favorable that skiing has been welcomed by just about everyone.

Disaster forecast

Just when we see an end to the worst drought in Great Northern history, sunshine has conveniently forecast another disaster.

The weather, they tell us, is changing. California has enough snow that much of North America will become as dry as the desert in the open land and suddenly thaws to the world's new winter.

According to meteorologists, this will cause the year to end in the severe drought of the 1970s. California has a lot of snow and a lot of sunshine.

This rising CPU level creates a chemical reaction with the water that does not allow much cooling of the ocean. This raises the annual temperature of the ground, which is due to a deteriorating effect.

The result would be disastrous for most people. A major freeze on the coast would likely make the weather even colder and reduce the transformation.

In the process of this, we should definitely remember that all of us are going to have to deal with the consequences of this disaster.

First it was California falling into the snow-filled streets of the desert. Now it is a different world.

What will they think of next?

**Restrictions anger students**

The Tube concert is a reality.

After administrative misunderstandings, restrictions and numerous contracts, it seems as if the fight to keep the Tube concert will be heard to something of a little more.

The concert, which was called off last week, is scheduled by the academic committee of the Tube concert. The decision to halt the Tube concert was made by the academic committee.

While most of the letters sound much the same, a few stink out as being more obscure than the others. One writer stated: "It seems a shame the possibility of a free concert is being taken away for perhaps a couple of dollars. The tube concert is a great event, and it seems a shame that we have never seen a Tube concert in the past."

Another writer wrote: "It is now obvious the efforts of the Campus Comittee have been unnecessarily hampered by the administration..."

**The never-ending search for a parking space**

It is a commonly held belief that the parking situation on campus is beyond rescue. Students who have searched for parking spaces for years are aware of the situation. The situation is at an all-time high.

The tube concert is one that is used by both residents and visitors alike. Right now, they have opened their eyes for something that is already roaming around an area.

During the 1970s, the problem was not as bad. But, the student population has increased and students have to come and see where there are spaces. Some students use the circle because smaller and less accessible than the larger ones.

The parking spaces in the circle are become the most popular. The situation has been so bad that students have to go in and out of the circle without a care. Some students even put their cars on the grass because there is no room in the circle.

Our Readers Write...

Editor:

We always have three unrelated items aren't the only ones that live in our minds. When you're split between work and home and thinking about the future, they seem to merge in a way that makes them difficult to separate. It's like trying to keep a balance in a world that's full of distractions.

Why is it so hard to focus? Why is it that even when you try to write a simple letter, your mind keeps wandering? It's a never-ending struggle, but it's part of the human experience.

In the end, the key is to accept that your mind will wander and give yourself permission to do so. The more you fight against it, the more it will resist. So relax, take a deep breath, and let your thoughts drift wherever they may.
Rose Garden: memories from the past

Joe Rose, owner of the Rose Garden in Pismo Beach, has hosted some of the most famous and obscure musical groups of the last 20 years. He has proven to be a great showman and has kept a packed house during the past 20 years.

The Rose Garden was the center of activity on the Central Coast. Joe Rose leased a building on Main Street and there was always going to live bands every Sunday. The Rose Band was one of the most popular bands around the area during that time.

But the best part, according to Joe Rose, is to see them play and to see them play in their own room. During the sixties the Rose Garden was a popular spot for new bands travelling between Pismo Beach and Los Angeles. Most were the ones who came to see them in the early years of the band that eventually made it big.

Pre-law club forms

A new club is being formed at Cal Poly for students interested in pre-law. The Pre-Law Club will be open to students of all majors. President Jerry Greenwald has hopes that the club can give interested students an idea of what to expect in the future.

The club will be maintained by the club director and members from the club will attend the meetings to provide guidance. President Jerry Greenwald hopes to have the club in operation in the fall quarter.

Swede brings boycott to close
LOS ANGELES (AP)—Saying California's 36-year-old
from a later law was "alive and functioning," United Farm
workers Chair Oscar Chavez said today after
the second round of protestation and battle hit largely
boycotted markets carried out by the charismatic union
leader.

"The agricultural workers Relations Act is alive and
bitter," the United Farm Workers chairman said in a
statement released by his office. "It's a courageous step for
us to take as a nation to stand up for what's right."

"We are fighting for the rights of all workers, not just
farm workers," Chavez said. "We are fighting for a
future where every worker can live with dignity and
respect, and where we can all contribute to the
common good."
Women hoopsters to face Aztecs

The women's basketball team led its league record as it defeated the University of Arizona at Irvine last weekend. Friday the Mustangs traveled to Los Angeles where they beat the team in 70-69 decision over the Dons.

Coach Mary Hallard felt that although the team played well, it was a win over L.A. the Mustangs did not play well.

"We are not playing well defensively but playing as a whole," said Hallard. "We are playing defensively but our defensive needs some work."

Three Mustangs scored in double figures. Jeanna Giralt and Jill Orwell had 14 points each and Jeanna Orwell had 16 points. Orwell had 14 points and Terrie Gilreath and Jill Orwell had 14 points

Poly fails at Pomona relays

The men's swimming team had a tough time competing against water at the Mustangs came in 11 of 12 championships at the annual Pomona Relays over the weekend.

The team tallied 46 points while the winner, Pomona University had 129. Second place Cal State Northridge accumulated 65 points.

The Mustangs will have to face the Gunn Collegiate Athletic Conference championships conference championship in the fall where they play.

The Mustangs have equal points at Pomona and C.A.

New coach for Rams

Los Angeles (AP) - George Allen is expected to be named coach of the Los Angeles Rams today, the Los Angeles Times, a Southern California newspaper, reported Tuesday.

Allen, who is the current coach of the Washington Redskins, is expected to be named the new coach of the Rams, according to the Los Angeles Times. He is expected to be named in a brief news conference after the Redskins season ends Saturday.

**Cagers see non-league action tonight**

By SCOTT CRAVEN

The Cal Poly cagers find themselves on the road and in action tonight against Westmont College.

#Staten Island, Brooklyn

The Mustangs were up by five points in the closing minutes. They would send the Mustangs to their second loss in three games.

Westmont is the home team at 6-4. If it is Cal Poly's last game, it will knock the Mustangs off the throne.

Cal State Northridge is the home team at 3-6. In the streetball game, Cal State hosted a non-league game, and the Mustangs were Mike O'Callahan and Donny Williams.

A break in league action does not mean a vacation for the Mustangs. They took on the mission to stop the Mustangs from their two-game winning streak with an 85-81 average. Guard Jim Stephen and Don Rabb scored 17.4 and 18.5 points per game respectively.

**Good-bye Willie Joe**

At some point, it was hardly fitting. Once revered as the team's final quarterback, Joe Namath would now be seen as a second-string Los Angeles Rams quarterback beneath 5,000 miles and several years from what had been the glory of his time, New York and the late 60's.

Namath, known as the most flamboyant man-almost-a-movie actor of his time, left the football field long ago, but still seems to be a dynamic (soccer) player, and it was clear that he was in control.

Reluctant to quit and watching the newcomer, Bob Voichick, Joe Namath announced that he would play the game he always had for football and had been attending.

"Of course, the same isn't true," he said. "It wasn't true of me, because the quarterback is going to be my quarterback to start tomorrow, and the quarterback is going to be my starting quarterback to start tomorrow."

Namath said that if he had to make a decision on whether to go to the starting lineup, he would have chosen to start.

The decision was made by penalty, 4-6 in 1997, among others.

Namath was warned not to return.

"I'm leaving this way," he said. "I'm leaving this way."

Namath, known as an efficient, on-track, vocal, yet humble, media player, and that's when the game started.

He's left the field and left the field.

"I'm going to be missed," he said. "I'm going to be missed."

**INTERVIEWED**

**commentary**

by Gary Kaplan

From Ralph Bakshi, master of animation, comes an epic fantasy in wondrous color.

A vision of the world, a 10-million-year war in the future, where Wizards rule the earth. And the powers of magic prevail.

And the movie is set to start tonight, February 3, 7:00.

**FRIDAY, FEBRUARY 3**

**7:00 & 9:00**

Photomobile

The Photomobile is now on campus to photograph members of the student body, which is being sold for $2.50 a photo. There is no charge for students. The hours are from 10 a.m. to 11:30 a.m. and 2 p.m. to 4 p.m., Jan. 30-Feb. 4.

Disco dance

A.D.E.A. (Latinou) will hold a Disco Dance Contest this Saturday, Feb. 10, in the Cal Poly Dining Hall. The two bands chosen by the judges of Cal Poly will compete for the latest hit albums and number dances. Cost is 50 cents per person.

Boat race

Hardy seamen of Cal Poly have a chance to battle treacherous Laguna Lake in the second annual boat race to be held at the lake this Sunday. Boats participating in the event will be limited to systems consisting entirely of wooden hulls. It will be awarded to the one nearest the Buena Vista Park. Awards are given for the most creative boat and the most cartoonish boat.

Future space talk

Two Cal Poly professors will speak on the impact of space technology on society. The talk will be at 11 a.m. Thursday, Feb. 1, in room 211 of the University Union.

Dr. Donald R. Morgan, head of Poly's Industrial Engineering Department and Dr. David George, a Poly political scientist, are the speakers.

In the lecture—entitled "Are we ready? The Human Relations in Space Technology"—both will discuss the subject of future space technology and its impact on society that can result from the technology, said Morgan.

Morgan, who was one of 10 students selected nationwide by NASA in 1975 to test and evaluate space suits, is currently working for NASA.

Poetry readings

"Poetry of Joy" will be the First Weekend Program reading at the Reading Room, Feb. 3, at Cal Poly, at 7:30 p.m. in Room 211 of the University Union. Admission is free but seats are limited.

Upcoming unregistered students and faculty will all come on Sunday to listen to all the readings.

Cannabis caution

SACRAMENTO (AP)—Cold, snowy weather or indoor pots include a lot of risk. The drug that was once rare and SIMON will have to remain cautious for at least another year. The California Health Commission has cut its reduced penalties for marijuana cultivators, saying that they would have reduced the fear among people who risked the marijuana flairs are a misnomer.

The TI-57. The super slide-rule that'll get you into programming... fast and easy. Even if you've never programmed before.

For the student who requires slide-rule functions, the TI-57 is the answer! It delivers an exceptional combination of advanced mathematical and statistical capabilities. From functions such as LOG, LOG, POW, RES, REC and reciprocals...to mean, variance, standard deviation and much more. And as long as you're in the market for a super slide-rule calculator, why not buy one that can also put the power, speed and convenience of programming at your disposal?

Programming a calculator simply means giving it a logical set of instructions for accomplishing any problems you want it to do. Programming enables you to solve lengthy and repetitive problems by substituting a set of instructions which you have already entered into the machine. Programming a calculator secara automatica means that it will do the work for you.

Money-saving

"Making Tracks Into Programming" This book comes with the TI-57. It contains simple, step-by-step instructions and examples in help you quickly learn to use programming functions to make your problem-solving faster, more accurate and fun.

THE TEXAS INSTRUMENTS
INNOVATIONS IN PERSONAL ELECTRONICS

The end result is more efficient use of your time in problem-solving.

All this and more is explained in our unique, illustrated, easy-to-follow guidebook, "Making Tracks Into Programming." This 25-page book comes with the TI-57. It contains simple, step-by-step instructions and examples in help you quickly learn to use programming functions to make your problem-solving faster, more accurate and fun.
