City buses: alternative in travel

By JANET FRYE

Public transportation is a safe and convenient way to go to school, work and around the city. The buses are a great way to get around and save money.

Buses are convenient because they run on a regular schedule, unlike the bus routes. They also provide a safe and comfortable way to travel.

Bus drivers are helpful and efficient in getting passengers to their destination. They are also trained to handle any emergencies that may arise.

Bus stops are often located near major intersections, making it easy to get on and off the bus. They also have designated areas for passengers to wait and board.

Overall, public transportation is a great alternative to driving a car. It is environmentally friendly and provides a reliable and efficient way to get around.

He makes the ride ‘nice’

By JANET FRYE

Driving the bus is a big responsibility, but it also comes with its own challenges. The drivers have to be patient and understanding with passengers.

Drivers have to be able to handle crowds and uncomfortable situations. They have to be able to maintain a calm and professional demeanor while dealing with difficult passengers.

Drivers also have to be aware of their surroundings and be able to react quickly in case of emergencies. They have to be able to navigate through traffic and stay alert for any potential hazards.

Overall, driving the bus is a challenging but rewarding job. It requires a lot of patience, understanding and quick thinking.

wildlife

The blue city buses are a convenient and relaxing alternative form of transportation. They offer a comfortable and safe way to travel around the city.

The buses are well-maintained and clean, providing passengers with a comfortable ride. They also have plenty of seating, making it easy for passengers to find a seat.

The buses are equipped with air conditioning and heating, ensuring a comfortable ride during all seasons. They also have a variety of seating options, including regular and handicap accessible seats.

Overall, the blue city buses are a great option for those looking for a convenient and relaxing way to travel around the city.
They can't hold on anymore

They can't hold on anymore

Editor:

A large number of citizens of San Luis Obispo have evidently been aroused by the actions of a few members of the community in their determination to promote gun legislation. The citizens have poured into City Hall to protest the proposed Measure Z. They have written letters to the editor of the San Luis Obispo Tribune expressing their feelings.

In addition, there are the drug races and major residential developments. The city will have to deal with these issues. We are not one of the few who have had to deal with these issues.

Only a small number of citizens are responsible for the rapid deterioration of public safety and property rights. Many of those few are college students who have been awakened by the actions of a few very few. Students are not alone in this increase in crime. The number of those few who are college students is not enough to make up the majority of the population.

Students have their own rights, and one of them is freedom of speech. The students have a right to express their opinions in public. One of the rights of students is to be able to express their opinions in public. The students have a right to express their opinions in public.

Letters Policy

Mustang Daily welcomes letters expressing all viewpoints. Letters may be published, with a 100-word limit, although they may be published anonymously, as determined by the editor.

Editor:

I was very happy after reading an op-ed discussing the “Pepper” team by Jonathan Greenblatt. Much of what he said was true, but he missed a few key points.

The political is in part a question of how they see the world. They are in part a question of how they see the world. They are in part a question of how they see the world.

I know, because I was a member of the squad for the past two years. A lot of students have a difficult time dealing with the political aspect of good work. They really have a difficult time dealing with the political aspect of good work. That is true that this year's squad is part of stronger discipline. Considerable effort has been made to help students get involved in more policy-oriented courses. The squad is also doing a good job of promoting cooperation between students and city officials.

I agree that the squad is a great idea. It has been very helpful by helping students get involved in more policy-oriented courses. The squad is also doing a good job of promoting cooperation between students and city officials.

Professors debate space life's value

By SANDY NAX
Daily Staff Writer

Two Poly professors discussed space colonization in a lecture to students and faculty on campus yesterday.

Dr. David George, political science professor, opposes space colonization. Morgan, head of Poly's Industrial Engineering Department, supports it.

George pointed out the importance of providing a stable environment for people who could not normally inhabit Earth. Morgan, one of 18 scientists selected by NASA in 1978 to design a space settlement capable of supporting 10,000 people, said his research is based on the idea of living in space and it is an individual's right to live there.

George believes that space is not an abundant source of food and other necessities required for life. He stated, "We are not going to live in space because we will get nothing out of that black hole and we are going to go into something unknown.

Space will provide scientists with the ability to advance technology and produce materials never before developed on Earth," Morgan said.

According to Morgan and his colleagues, there are strong space colonies that can be developed in space. According to Morgan, everything that cannot be produced on Earth can be produced with the help of molecular separations which are in a gravity-free environment.

Humans will be able to establish space colonies that only people with the same characteristics could inhabit, said Morgan. He cited examples of polygamy and sharia law being practiced in space settlements.

Morgan said great social and political problems will evolve in space. "The world will consist of all Earth, all space, and all the energy available, because the development of space colonies without destruction, humans must give up the desire to kill and destroy," Morgan said.

The colony is economically feasible, according to Morgan. The cost of the project has been estimated at $100 billion, said Morgan. "But the actual cost always exceeds the estimated cost," Morgan said. The actual cost is estimated at $400 billion, according to Morgan.

The colony will be the size of a football field. "With enough money, the density would be comparable to New York City," Morgan said.

The colony will be surrounded by confinement in a closed environment. Morgan believes that all of the problems will be solved with the help of technology and science.

"We are going to make it so we can live in space and it is economically feasible," Morgan said.

Low bid is for Poly's new faculty office building

By SCOTT CRAVEN
Daily Staff Writer

Low bid for a new faculty office building at Cal Poly is more than $2 million lower than the estimated cost, it was announced Wednesday.

Bussell Construction Company of San Luis Obispo submitted the low bid of $2,540,000. Toma, the project, which includes offices for 156 faculty members, was scheduled for completion of the first phase in August.

Other bids were from Toma: $2,610,000; Robert E. Thompson, Inc., Las Vegas, $2,767,260; and Don Greene Contruction, Inc., Santa Barbara, $2,767,000.

"I am very happy with the bid," said Thomas Gerard, executive director, facilities planning. "I would have been happy with any of the bids because they were all below the estimated cost.

The estimated cost of the 53,100 square-foot office building, planned by Architectural Services, Inc. and the Poly Architects of Los Angeles, was $2.8 million.

"I think the low bid will be accepted," said Gerard. "Probably within two weeks we will formalize the contract and tell them they have the job."

Gerard said he expects the building to be in use within 45 days and work to begin immediately. He said there are many things that have to be worked out, such as furnaces being filled out and insurance in the building.

Completion of the project should take about 13 months, according to Gerard.

New stadium proposal to be reviewed

By TONY TRAPNA
Daily Staff Writer

A new proposal for a minor league stadium renovation was submitted by the Poly advancement team next week.

A committee formed to work on a proposal for the minor league stadium renovation will present its plan to the university's advancement committee next week. The proposal will include a new scoreboard, new seating, and new concession facilities.

Committee Chairman Bob Popp said the new plan will include some projects to improve the stadium and an attempt to satisfy those who had a different opinion of the project.

Roter said that the proposal will include new seating, new restrooms, and new concession facilities. The proposal will also include a new scoreboard.

"We are focusing our attention on the eastern side of the stadium because in order to do the western side we would have to complete the stadium," said Roter. The money has been made available to those who want it, he said.

The proposal will include a new scoreboard and restrooms, and a new concession facility. The proposal will also include a new scoreboard.

The new scoreboard will cost $10,000 and the restrooms will cost $5,000. The new concession facility will cost $2,000.

The project will cost $17,000 and the proposal will be reviewed by the university's advancement committee next week.
Sadat embarks on world tour

CAIRO, Egypt (AP) — President Anwar el-Sadat will embark on a world tour Thursday to try to get Arab states to lend their support for his peace plans. Sadat is scheduled to arrive in Washington on Friday for talks Saturday with President Jimmy Carter. Sadat, who is expected to get a better hearing as a leader waging a war against Israeli occupation, may have to appeal to his peace credentials before he can expect to expand his gains.

Exon fined for fatal violations

BURLINGTON, Vt. — The state has fined Exon Mobil for "serious" safety violations. The Peruvian Petroleum Company is alleged to have been opened at 6:30 a.m. to 10:00 p.m. without a safety permit.

The state of Vermont has fined the company $100 for violating the state's occupational safety and health laws.

Four workers were injured in the accident, which occurred at the Burlington station. The four workers were hurt when a car burst into flames after the fuel was released from the station.

End to coal strike may be near

CHARLESTON, W.Va. (AP) — The United Mine Workers' three-month-long strike in the Monongalia County, W.Va., area may be over. A new contract has been signed by the miners and the coal companies, ending the strike that halted the nation's second-largest coal producer. The new contract, which is subject to approval by the federal government, will provide for a 4% increase in wages for the first year, with a 2% increase in the second year. The strike had brought the nation's second-largest coal producer to a standstill. The new contract is expected to be ratified by the miners in a few weeks. The strike has been a major setback for the coal industry, which relies heavily on the Monongalia County coal. The new contract will provide for a 4% increase in wages for the first year, with a 2% increase in the second year. The strike had brought the nation's second-largest coal producer to a standstill. Poly holds off Warriors, shoot better in 79-71 win

By JOHN KELLEN

Behind a Cal Poly lead of 16 points, the Mustangs held Warrior basketball teams within six points, before the Mustangs scored Game II 79-71 Wednesday night.

Making twelve free throws during the last 1:11, center Kurt Lewis, in the final minute at the Montegue Bank on the first half of the game, able to win the game after a spirited lead.

Although both teams combined to score 12 points, the Mustangs outscored the Warriors 12-11 in the second half, the Montegue Bank a shooting along while leading 10 percent of their field goals.

Warrior coach Doug Peterson centered the Mustangs defense at the half. Peterson's Mustangs could only score 45 points, but played up two percent compared to Poly's 48 percent in the final period.

In the last period, the Mustangs score with 11 points, to the Warriors' 7. Peterson's Mustangs shot the scoring 3-4 in the final period.

Looking for the final time, the Montegue Bank out 6-7 in the second half. The Mustangs scored 17 points, the Warriors 14 in the final period.

With the help of Warrior forward, Jim Stephen's game high of 24 points and 13 rebounds, Rutland closed the gap to four points, Cohen scored the victory by flowing his 11th and 13th baskets from free throws with less than one minute remaining.

The Mustangs were continually frustrated in the final period by an efficient Warrior full court press. But the Mustangs shot only 50 percent compared to Poly's 60 percent in the final period.

Commenting on the team's shooting, Assistant Coach Don Wood said the improvement over the previous game (where Poly shot 37 percent, from the field) is one of the factors against Cal State Northridge.

An attempt to curb NBA violence

This will be a prime topic of discussion when the National Board of Trial Judges makes its annual meeting on the future of the NBA Governors meeting Saturday.

Was Commissioner Larry O'Brien justified in levying a fine of $100,000 and a suspension, without pay, for a minimum of 46 days against Kurt Washington, after he damaged Rudy Tomjanovich's face with a hard right-hand punch back in February?

It must be recognized that we are dealing with two great men—men in prevent fights from breaking out and how to keep things under control when fights do happen.

In the matter of preventing the threat of a high fine or lengthy suspension is inadequate. As Leonard Koppell pointed out in a recent column in The Sporting News, these measures can only be effective if a player is in control of his behavior and can stop and consider the consequences of his actions before he actually exists anything.

When Washington spun around and kicked Rudy's crotch, for example, it was an inrelative reaction to what his thought was a threat to his personal well-being and the perception of reality.

The threat of a stiff fine is a long suspension, while a little tempus is not a criminal offense, nor bad control.

Any player who would probably think twice of a number of referees is a reassessment of their role.

To accomplish this, referees would have to start a new buildup to the games a bit higher than is customary, further developing the proper discipline and act as referees, not as police officers.

It would take a while for the players to accept. It is a long process, and it is a process of mental education and a process of learning with a final result.

The question, however, is which of the NBA's referees will do so and which will only expand the program of police officers, not develop referees to the proper level? It is a matter of concern to the NBA and its leagues. Any referee who does not take more serious action

A SILICONIX RECRUITER

Must be on campus at the placement office on:

FEBRUARY 17th

We're SILICONIX, a leading manufacturer of micro-electronic components, we would like to introduce you to our company and the products we make... and tell you about the opportunities we offer you at SILICONIX.

If you are majoring in Electrical Engineering, Electronic Technology, Industrial Technology, Physics, or Mechanical Engineering, we would like to talk to you about challenging career opportunities.

APPLICATIONS ENGINEERING
DESIGN ENGINEERING
PRODUCTION ENGINEERING
MANUFACTURING/PACKAGING ENGINEERING

Please set your Placement Office to arrange an interview. If you are unable to meet with our personnel, you are encouraged to send a resume to our Employment Manager at 220 Laurence Road, Santa Clara, CA 95054. We are an affirmative action employer.

Aztecs get revenge on Poly Cagers

Players without the services of senior Jack Orzech, Poly women's volleyball team dropped a match yesterday in Oxnard.

That loss dropped the Aztecs' record to 6-4 for the year.

With Orzech missing due to illness, the Aztecs were defeated by Poly 15-1, 15-9.

The Aztecs, however, were able to blot out theShadow Blanks when the Aztecs defeated the Mustangs Wednesday in Oxnard.

The Aztecs were able to get revenge on the Blankenship's last game in Oxnard.

With the victory, the Aztecs now have a 6-4 record and are in the hunt for the Western Athletic Conference title.

Mustangs in Long Beach opener

Oil Poly's baseball team opens the season today at Long Beach State.

The Aztecs will return to Long Beach on April 16th to face the Mustangs.

Runners at indoor meet

The Aztecs women's team opened the season Saturday in the Los Angeles Invitational at the Forum.

The meet had three events: The 600-yard dash, the 1,500-yard dash, and the 60-yard high jump.

All three events will be held at the annual indoor event.

Spikers host SBCC

The Aztecs women's volleyball team opened the season Saturday in the Los Angeles Invitational, the Cal Poly volleyball team.

Poly gets a victory over Santa Barbara City College, 15-12, 15-11, 15-12.

Burt and the Angels

A victory over the Angels in the second game of the afternoon, a seven-inning zinger.

Commenting on the match-up, Poly Aztecs

Burt feels that the Long Beach is "much improved."

"They've got to go out and get it. We've got to go out and get it right now," Burt said.

The Aztecs have a 6-4 record and are in the hunt for the Western Athletic Conference title.

The Poly boasts the nation's leading team in the travel league.
