Council waits for task force report

By RICHARD PRICE

The Los Lomas City Council special meeting of the noon-thru-1 p.m. was held Thursday to discuss a report from the housing task force. The task force, set up in February to study current housing problems in Los Lomas, represented a wide range of community interests. Membership included residents, empresarios, students and real estate professionals.

Joe A. Jenkins, chairman of the task force, told City Council Tuesday the group had met at least two weeks before his organization could produce a report.

The next meeting of the task force is scheduled for April 13 in 9 a.m. in the council hearing room of City Hall.

Task force co-chairman Larry Robinson said Tuesday the meeting is open to anyone interested in coming, but no decision has yet been made to allow either.</p>

Fountain needs recirculating pump

By JULIE MICHIELS

Water may soon again in the University Union.

The water supply to the fountain was shut off due to the water shortage. According to the Daily, the University Union Board of Governors was asked to consider a new recirculating pump.

Two students, John Allen and Mark Bland, UCD students, have discussed a new recirculating pump put in the fountain.

They say that the fountain is losing water and needs a recirculating pump put in the fountain.

The pump would be underground and would keep the water at a constant temperature. They said they have discussed the idea with the Engineering Technology Department to see if anyone was interested in helping. By April 6, 1978, California Polytechnic State University Vol. 42, No. 74
Rain creates problems for Poly crops

BY LEsl HALENBERG

Rain creates problems for Poly crops. The students are concerned with the effects of the rain on their projects. The rain has prevented the growth of the hay, Johnson said. He noted the wetness of the soil, machinery caught in the mud, and the need for more land. Johnson said he expects to decrease his crop yield for the season.

The rain has prevented the students from working on their project crops, said Johnson. As a result, the students will be late, he said.

The rain, however, does not prevent the students from working on their projects, said Johnson. The rain has caused water to be carried into the buildings, and as a result, many students were dropped the projects, he added.

The student who dropped his project because of the rain is Jan McBride, a senior agricultural management major. He had his quarter acre project of corn because it is a crop which caused a mold problem.

The rain pushed the temperatures below the soil where a fungus spread on the plant, McBride said. McBride said he doesn't know how the rain will affect his project crops, but he is hopeful the rain will improve the yield of his project.

In the sub-units, the water is saturated, and the water table is raised up to the surface and above, he added. As a result, irrigation is not necessary for another month, Johnson said.

"The pastures are back and we haven't seen one to two years," he said.

The pastures have been back for one year, and the students are looking forward to the next growing season. The pastures have been back for one year, and the students are looking forward to the next growing season.

**Engineering Design Careers**

Having completed most of your academic requirements, you graduating Seniors are about to make a very important career decision. John Fluke Company would like to help you make the right decision. We offer challenging and exciting Design careers.

Our physical location is the Seattle, Washington, area of the scenic Pacific Northwest, coupled with our Engineering Design Team excellence offers Seniors graduating with a BSEE or MSEEE outstanding career opportunities. At John Fluke Company, graduating engineers receive immediate "hands on" Design responsibilities within one of our Design Teams.

A representative of the John Fluke Company will be on your campus Monday, April 17. You've invested a lot of time and effort in developing skills for a career... Spending a few minutes with a John Fluke Company representative discussing career opportunities may be the most profitable time you spend in your career selection process.

Contact your Placement Center to schedule a time to interview with our representative.
World class runners at Irvine meet

This is the sixth year that track and field and swimming has been held on the gits
trains at Cal Poly. Over the years some great
athletes like Olympic torch
jumper Raymond Brem, world
record holder Sheriff Miller
Irvine, Calif., and currently
a world class swimmer at
Irvine, has never per-
formed on the Poly oval.
But it's a good bet that the
record book will be broken and two new world
records will be set, according to the U.C. Irvine-Cal Poly
Dual meet rules, Competition begins at 18.

Individually the men will always
drop out on less than four
world class athletes, one of
our two, and haven't the
fastest run time in the
state. But the Federal
Laguna and West Coast
League meet the

Scotts in currently
America's premier middle
distance runners coming in the 1500 and 800 meter
with. Two weeks ago he
posted the fastest indoor mile
run by an American
in a 3:56.8 performance
in the mile run. American
runners at Irvine
meet...

JOB OPPORTUNITIES

The U.S. Navy is looking for
young men and women to go into
the Navy as a middle manager.
If you are a U.S. citizen, less
than 27 years old and would like
to make over $22,000 a year after
4 years, we would like to talk to
you.

This is an opportunity to achieve
valuable management experience
and have the excitement of
an officer naval officer. Call collect
(station-to-station)
213-468-3321 for more
information.

NOBODY OFFERS MORE TO ALL MAJORS

Undergraduates

* No obligation (drop-out option) $100 a month while in college

* $1,000 pay while in summer class

* Guaranteed Aviation

* Free Flight Lessons

* $841 - $1,611 starting salary

* $19,735 in 3 years

* No Campus/NROTC type obligations

For more information on Marine Commissioning Programs see Capt. Johnson and Lt. Stewart
on Campus today in the Snack Bar or call

Sobriety is just a matter of time

The only way to sober up is to wait. Nothing else will do it; not cold showers,
not eating black coffee. Aside from the momentary exhilaration of cold water,
or the temporary caffeine jitters, you're still drunk — awake, but drunk.

Sobriety up is just your liver catching up with your drinking. The impor-
tant thing is to understand how you can drink and still avoid the consequ-
ences of drinking, or failing that, how much time you need to regain the control you need to function.
