LNG terminal at Rattlesnake Canyon doubtful

Rattlesnake Canyon, a coastal area 37 miles north of Port San Luis, is one of five sites where the West Coast's first LNG terminal may be built. The other four sites are Point Conception and Los Varras in Santa Barbara County, Point Conception in Ventura County and Harbor Canyon on Camp Pendleton in San Diego County.

Western LNG hopes for an LNG terminal at Point Conception because it is a distance from populated areas and would be the only one west of Rocky Ridge, said McKinnon.

He said not even a proposed $200 million brent facility at the Rattlesnake Canyon site would allow oil sheen and adverse weather conditions for the 28 LNG tankers estimated to arrive every year from south Alaska and Indonesia.

The construction of the 160-feet tall LNG facility would involve the funding of $15 million out of the $90 million in funds to start work, said McKinnon.

After more hearings in Santa Barbara, Ventura and San Diego counties, the state commission must rank the sites and submit their decision to the California Public Utilities Commission (PUC) by May 31.

The least objectionable of the sites will be ranked number one and will be the only place where an LNG terminal can be built.

The PUC will then have two months to approve or deny a permit to Western LNG.

Plans for a west coast LNG terminal at Point Conception call for three 100-foot tall storage towers to be constructed.

The terminal would be one of four located in the United States. Terminals are in operation at Cypre Point, N.J., and Sarnia, Essex, Ont., and a third is expected to begin operation in Georgia in the next future.

State Commissioner Doris Wright said the PUC can ignore the state commission's first choice if the PUC decides there is a severe natural gas shortage that warrants a terminal to be built as soon as possible.

The Rattlesnake Canyon site is last on the list of proposed completion dates.

Countdown

10 days until the May 4 City Council meeting at which the more-than-three-year-old ordinance will be discussed.

NOTED PUPPETEER George Letheby will be one of many instructors and students to gather at Cal Poly this summer for the first California Puppet Theater sponsored by the Drama Department.

Puppeteering: the art of magic fingers

By KEN CROSBY

Cal Poly's puppeteering students will demonstrate to the public in an entertainment with the Puppet Theater by the Department of Theatre, Friday, April 12, from 10 a.m. to 12 p.m. in the auditorium of the campus union.

The puppet theater is a part of the drama department's puppeteering course and is a way to show the students' work. The students have been working for the past year on their puppet shows and are now ready to perform them.

The puppet theater will be an opportunity for the students to show their talent and their ability to create puppet shows. The students have been working hard on their projects and are excited to share their work with the public.

Puppet theater will feature a variety of puppet shows, ranging from classic stories to modern adaptations. The students have been working on their shows for several months and are eager to bring them to life.

The puppet theater is not only entertaining, but it also provides a platform for the students to showcase their skills and creativity. It is a unique opportunity for the students to express themselves through puppeteering and to share their passion for the art form.

Puppet theater will be a great event for the whole family to enjoy and learn about the world of puppet theater. It is a chance to see the magic of puppeteering and to be inspired by the creativity and imagination of the puppeteers.

Paraoquat pot: Is it worth the risk?

In its continuing effort to control the flow of marijuana entering the country from Mexico, the U.S. government has begun a program aimed directly at controlling the drug at its source: the field. Our government has been working with the Department of Agriculture and other federal agencies to implement a program in Mexico to control the flow of marijuana. This plan is intended to prevent illegal trafficking and reduce the impact of marijuana use within the United States.

Recently, the U.S. government has announced that they will begin spraying marijuana with a new herbicide to reduce its production. The herbicide is being sprayed in an attempt to reduce the supply of marijuana entering the country.

This plan is a significant step in reducing the flow of marijuana entering the United States. By controlling the production of marijuana at its source, the U.S. government can help to reduce the impact of marijuana use within the country.

Five year update on former grads

Dear Ann\n
Sure it looks as long as writing back to
us, but I can’t believe it’s been five years since you
sent us the news about your marriage. I don’t have
a lot of memories from that time, but what I can
remember is that you were a very nice person.
In fact, I think you were the best person in the
world.

I’m glad to hear that you and your husband are
still together. I wonder what it’s like to be married.
I bet it’s a lot of fun.

I hope we can keep in touch.

Sincerely,

Mrs. Smith, high school teacher of the early seventies

Let me tell you, Shah, the class of ’70 was a
special class. It was so much fun. I remember
the day in June, almost five years ago.

The class was a mess. We were all acting
like kids. But then, we all loved each other. It
was a really great time.

Well, back in my day, we didn’t have
homecoming or prom. We just had a big
dinner, and that was it.

By the way, I’m happy to hear that you
were a regular at the Homecoming. I’m
keen on hearing more about your life since then.

Well, I’m glad to hear that you’re doing
well. I’m sure you’ll have many more
surprises in the future.

Sincerely,

Joe Kim, who was a student in the class of ’70

Indian Springs at F.E. period three, as a
freshman at West, is now an engineering
student at Stanford University. He was
reared a year later than I was, but I think
he’s doing fine.

BACA ST, the former student at West, is
now working at a law firm in Los Angeles. He
was a real nice guy, and I’m sure he’s doing
well.

I hear that he’s also working on a
thesis about the legal system. I hope
he’s making good progress.

Sincerely,

Robert Jr., student of the class of ’70
From boat or shore, the fish are biting

By MICHAEL O'CONNOR

Sport fishing anglers out for trout, salmon, and other west coast species are enjoying the good weather and hope for the fish to follow.

The fishing at San Simeon is reported to be good with the salmon caught being very good. The fishing is very good off the coast and a lot of boats have been going out to catch them.

For those who are interested, there are still a few days left before the weather gets too warm for any significant fishing. The weather forecast is for continued good weather throughout the weekend and into next week.

The weather is expected to be ideal for fishing and the water temperatures are expected to be around 60 degrees Fahrenheit, which is perfect for salmon and trout.

San Simeon, which is located on the central coast of California, is a popular destination for sport anglers due to its abundant fish populations.

ASIS elections shortly

By TONY TRAN

All-Vote President Larry Robinson is running for re-election in the upcoming ASIS elections.

Robinson said he has enjoyed his time as President and is looking forward to serving the students.

The elections are scheduled for next week and all students are encouraged to vote.

The ASIS elections are an important event for the student body, as it gives them a voice in the decision-making process of the student union.

The ASIS elections are also an opportunity for students to develop leadership skills and to become more involved in their community.

The ASIS elections are scheduled for next week and all students are encouraged to vote.
Center offers cures for travel itch

By PAULA CHAMBER

Daily News Writer

Planning a trip? If you're not sure where to go, or how to get there, look no further than the Travel Center. Located in the University Union on the first floor, the Travel Center can help you get there, and probably for a lot less money.

Rod Neubert, director of the center, said that since the center's existence is not contingent on making money, students can get better deals than if they were to go to any other travel agency.

"We offer all the services of an ordinary travel agency," Neubert said. "That means we can tell the students about lower prices, and ways to save money.

Most airlines will not tell a buyer that it is possible to travel much cheaper than economy class, but according to Neubert, it is possible to get a flight at a cost that is sometimes hundreds of dollars cheaper. "Many airlines have super-saver and youth fares that are possible to find," Neubert said. "But there are savings that can be totally unknown to a student or anyone else, unless they have researched the alternatives."

One of the money saving methods is the International Student Identification Card. Neubert said that this card must be obtained before students begin their travels. With this card, students can save money on flights, hotels, and other expenses. "It's a good idea to have it with you all the time," Neubert said.

The card is also beneficial in getting passes to museums and other tourist attractions, he added.

Neubert said he decided to travel because he went to Europe, Asia, and the Pacific. "It's a good idea to have a trip planned before you leave," Neubert said. "You'll have an idea of how much you'll need to save for your trip."

The Travel Center can also help students with the inconvenience of different methods of booking flights, and how to take care of deposits. "The Travel Center can help you with any problems you may have," Neubert said.

The Travel Center also offers a commission on all bookings from Cal. "It's a great way to make money," Neubert said.

The Travel Center is open from 10 a.m. to 2 p.m. and 4 p.m. to 8 p.m. on weekdays and from 10 a.m. to 2 p.m. on Saturdays.

Talk on Swedish press

One of the Swedish government's answers to "national problems" is state subsidization. Lars Arne, a Swedish diplomat, will speak at Cal Poly on Swedish efforts to save the "national" newspaper and keep the freedom of the press alive by hearings press competition.

Arne will speak Thursday, April 21, at 11 a.m. in the Graphic Arts Building, GA-50. The talk will cover the interest in political science and economics, as well as those who would like to hear about Sweden. Since "sexual freedom," as a concept, is closely tied to the nation's identity, it is known as "national problems."
45 hurt in bus accident

LOS ANGELES (AP) — About 45 people were injured when two buses carrying 80 passengers crashed into a wall near downtown Los Angeles Wednesday morning.

The Los Angeles Department of Transportation said the accident occurred on the northbound side of the 110 Freeway near the 6th Street overpass. Two people were critically injured and two others were in serious condition.

The bus carrying the students from the University of California, Los Angeles, was traveling northbound when it collided with a wall near the overpass. The other bus was traveling in the opposite direction on the southbound lane.

The accident involved a collision between the two buses, resulting in a fire that spread to nearby structures.

In addition to the injuries, several passengers were treated for minor injuries including cuts and bruises.

The cause of the accident is under investigation by the Los Angeles Police Department and the California Highway Patrol.

Energy appointee recommended

WASHINGTON (AP) — The Senate Energy and Natural Resources Committee has recommended the nomination of Robert King, a former Energy Department official, to be assistant secretary for energy efficiency and renewable energy.

The vote was 10-0 in favor of the nominee, who has been criticized by some for his role in the Bush administration's policies on climate change.

The Senate energy committee's recommendation now goes to the full Senate for consideration.

Discrimination case investigated

WASHINGTON (AP) — The federal office charged with enforcing anti-discrimination laws has cleared a case involving a possible discriminatory action against a Jewish group.

The Equal Employment Opportunity Commission said it found no evidence of discrimination against the Jewish Labor Committee, a group that supports Jewish workers.

The case involved allegations that the Jewish Labor Committee had discriminated against a non-Jewish employee.

Non-smokers reap job benefits

BAYARD (AP) — With 50 or more non-smoking employees, the law allows for a $150 per employee tax credit for employers who encourage employees to quit smoking.

The Bayard, Colorado, city council voted to adopt a resolution encouraging employees to quit smoking.

The resolution was introduced by City Councilor John Young, who said he was prompted to bring the issue to the council's attention after learning about the tax credit.

Young said he believes the resolution will encourage other employers to adopt similar policies.

Student Senate topics

The Student Senate at California State University, Fullerton, meets to discuss topics such as the university's budget, facilities, and policies.

The Senate is composed of students elected to represent their respective colleges.

The meeting takes place in the Student Center, room 150, on the Fullerton campus.

Poly offering four extension courses

Four extension courses will be offered in Fall 1978 at the Polytechnic Institute, with field trips led by instructors.

The courses are in environmental design, computer science, visual communications, and industrial design.

The deadline for registration is October 15, and the courses will be held on weekends at the Polytechnic Institute's main campus.

Additional information can be obtained by contacting the extension office at 246-8000.

TV refereeing not the answer

In an ill-conceived attempt to avoid the distraction of televised refereeing, professional football has seen the referee roamed the sidelines.

This week, the television networks replayed scenes from the NFL's La Mesa League exhibition. The disembodied voice of head referee Paul Snively boomed out over the announcers as he announced decisions.

Because the television networks have no control over the NFL's officiating, there may be no relief from this refereeing scandal. Other sports such as basketball and hockey have been free of such controversy.

After each controversial call, the television networks can show the evidence of such a call. TV referees can not. In April, the TV referee will be forced to make a decision in a split second to avoid a replay, while the official will have a chance to review the decision and make an informed judgment.

If the evidence is "absolutely certain" as the announcers said, the TV referee will have no choice but to make a decision. If the evidence is "half and half," the money camera and the official's judgment come into play.

The ultimate decision belongs to the official, not the TV referee. In the NFL, no one is more honest about evidence than John Major.

Evidence Camera

Although the evidence would be recorded, it would be "quickly erased" from the computer and "never shown again" in the future.

Because the evidence can be stored and reviewed, the NFL may have an advantage in refereeing. The evidence can be stored and reviewed to make sure the referees are making the right calls.

If the evidence is "absolutely certain," it can be reviewed and the referees can make a decision based on the evidence.

A sporting view is a weekly column in the Daily Trojan.

Sports Editor

The men's athletic budget was set at $2.6 million for the fall of the 1976-77 year.

Men's athletic budget cut $3667

As indicated in Senate Bill 368, the money that is used primarily for scholarship aid is divided from the student body. The other money is generally given to the student athletes.

Although the money has already been allocated to the student athletes, the student body has no control over the money. The student body does, however, have the right to be informed of the allocation of the money.

Last year, prices for students to swim in the pool were raised to $1.65 for each session. Student athletes were informed of the raise before it was implemented.

Although the raise was only 25 cents, it was important to the student body. The student body is more concerned with their own personal finances than with the finances of the student athletes.

It is important to keep in mind that the student body has the right to be informed of the allocation of the money. The student body should be informed of the allocation of the money before it is implemented.

Although the raise was only 25 cents, it was important to the student body. The student body is more concerned with their own personal finances than with the finances of the student athletes.

If the student body is not informed of the allocation of the money, the student body will have no chance to voice their concerns.

A hint to the student body is to keep in mind that the student body should be informed of the allocation of the money before it is implemented.

The student body has the right to be informed of the allocation of the money. The student body should be informed of the allocation of the money before it is implemented.

Poly's track full of holes and cracks

by JOHN KEELER

The design and maintenance of Poly's track is a concern for many students, and with the recent rains, the track has become a problem for those who use it. The track is a source of frustration for many, as it is often muddy and difficult to run on. The track is not just a place for athletes to train, but also for students to exercise and relax. The recent rains have made the track even more problematic, as it is often covered in mud and difficult to navigate. The track is a vital part of Poly's athletic facilities, and it is important that it is maintained properly. The recent rains have made it clear that more attention needs to be paid to track maintenance, as it is a key component of Poly's athletic program. Careers

Having completed most of your academic requirements, you graduating Seniors are about to make a very important career decision. John Fluke Company would like to help you make the right decision. We offer challenging and exciting Design careers.

Our physical location is in the scenic Pacific Northwest, coupled with our Engineering Design Teams, we offer exciting design opportunities. At John Fluke Company, graduating Engineers receive immediate "hands on" Design responsibilities within our Design Teams.

A representative of the John Fluke Company will be on your campus Monday, April 17. You've invested a lot of time and effort in developing skills for a career. Spending a few minutes with a John Fluke Company representative discussing career opportunities may be the most profitable time spent in your career selection process.

Contact your Placement Center to schedule a time to interview with our representative.
Craft sale

Poly Royal Craft Sale applications are available at Craft Center. The deadline for submitting application is 11:15 a.m. between 11 and 12 a.m. in the Craft Center. No Poly students and faculty will be accepted April 11 and 12.

The sale will be held in the Craft Center from 9 a.m. to 10 a.m. April 11 and 12.

Limited spaces are available and are on a first come-first served basis. For more information, contact Sue Heath, plan coordinator in the Craft Center.

Homecoming

The Homecoming Commission will have planning every Wednesday at 5 p.m. in the B-2 plan for the Homecoming, 1978.

Racquetball event

The Oil Poly Racquetball Club is now taking entries for the Oil Poly, an open divisional racquetball tournament. All proceeds will go to the American Cancer Society event.

American Cancer Society event will be held April 11 and 12.

The tournament is 16 singles and 16 doubles. All matches are official, and the tournament will provide for $3 to be given to Wadnaaday's House of Hope. Free information and registration can be obtained by calling Lanie Wengler at 442-4992.

Disco dance

A disco dance with a drawing for prizes will be sponsored by Delta Tau Upsilon Friday, April 15 from 6 p.m. to 11 a.m. Admission is 50 cents.

Volunteers needed

Observers are needed to participate in a human rights experiment. Volunteers will be paid to observe on a specific date from Saturday and Sunday, April 23, 15, and 17 from 8 a.m. to 8 p.m. The experiment is conducted by the Industrial Engineering department. Call 442-1114 for more details.

Home concert

The 7th annual Home Concert, performed by the men's and women's Glee Club, will be held April 15 at 8:15 a.m. General admission is 10 cents, students 5 cents.

Rose float design

Friday is the last day to submit a design for Oil Poly's float entry for the President's Tournament of Roses Parade. The best design will be chosen by the students. The winner will receive $5 or two tickets to the 1978 Rose Bowl game. Rules and more information are available in the Activities Planning Center.

Food sale

Dietetics Club will sell reliable, fat-Eastern meat today, Wednesday and Thursday in the UG space from 11 a.m. to 4 p.m. Each half weight for 25 cents.

Tutorial workshop

The Student Community Services is offering a tutorial.

If you've got two years left in college, you're probably giving some thoughts to after college.

Army ROTC has prepared a briefcase to help you do just that. Arm yourself with facts on the job outlook, the job search and career statistics. Learn how to increase your career potential. You'll find all the information relating to your life after college. For a city that you're considering, civilian or military.

Stop by our department and get a free briefcase for your life after college.

A BRIEFCASE FOR YOUR LIFE AFTER COLLEGE

23155 233 from 8 a.m. to 8 p.m. The experiment will be conducted by the Industrial Engineering department. Call 442-1114 for more details.

Workshop begins at 9 a.m. Sunday and will be held April 15 from 9 a.m. to 4:30 p.m. to 5:30 p.m. to 4:30 p.m. for those interested.

Disco contest

M.S.B.A.C. is having a disco dance April 15 from 9 p.m. to 2 a.m. at the Oil Poly Dining Hall. It is free to all Oil Poly students. Ticket sales will be held in the Student Union from 5 p.m. to 9 p.m. The dance will be held in the Student Union.

If you won't read these 7 signs of cancer...

1. Change in bowel or bladder patterns.
2. A sore that does not heal.
3. Unusual bleeding or discharge.
4. Thickening or lump in breast or elsewhere.
5. Indigestion or difficulty in swallowing.
6. Abnormal change in wart or mole.
7. Nagging cough or hoarseness.
