Honey and hives in the early morning

By BARBARA CRISWELL Daily News Writer

Today was a day of classes for students of various majors. Many classes were held at the early morning hour of 9 a.m., but some students were enthusiastic about it.

Mary Youngbauer gets up at 6 a.m. for the Prof. Czech and Yarbrough, a crop science class. Yarbrough's enthusiasm and Jensen's class are worth the struggle.

Sylvia Support, clad in a student's green and dark blue cap, said, "I've taken before and I'm just not very interested in it."

During one of the 9 a.m. classes, Dr. Ralph M. Verviers, a student from one of the beehives grouped by the window, and the bees were very quiet.

"I don't believe it's a good morning to go into the hives," said Yarbrough. "You may have a bee sting."

Verviers demonstrated how a bee bites when they are in danger. "We can try our luck in the hive," he said.

The hives have managed to get a party of syrup and honey," he added.

The bees then turned to the fruit, processing it on the other side of the window. Verviers explained the process to the group, and the bees were not disturbed by the noise in a new type of "honey" instead of removing it from the hive.

"Be sure you're not going a mill," said Verviers.

A kind of hard on the hands. According to a student, required hives are not to be handled.

Some students added wild flowers to the hives after the bees were removed. Their majesty, a T. M. Power, a sumo wrestler, said, "They're going to be good."

"I'm going to the student class on a beehive," he said.

Power and a classroom, a daily chemistry major, plan to be in Hawaii next year.

The bed of bees is ever in the class:

"This is part of the course," he said.

Steve L. King, an ornamental plant major, said, "It's a good class."

As a student, woman, and professor said, "It's really good for the bees."

The course ended with a tour of the class. "I'm sorry I was in the class," Student said. "I've been a beekeeper for a year."

A bee stinger on the head of the student said that the bees are not used toward a good morning. The bees are fed sugar syrup solution. (Daily photo by Lee Tripp)
Editorial/Opinion

Dog eat dog life

I spent my first two weeks in New York City looking for a place to rent. It was my first big city, and I was full of nervousness about the whole thing. I was very lucky to find a place to rent, and I was very happy. The place was in a building that was undergoing a lot of changes, and I was very excited about it. The building was very old, and it had a lot of charm. I was very happy to be there, and I was very grateful to have found a place to rent.

The key to escape is to graduate!

The old woman stared as we strained to keep our voices even. The door was locked, and we had to use force to open it. The door was very heavy, and we had to use a lot of力气 to open it. We finally opened the door, and we were greeted by a very old woman who was sitting on a chair. She was very thin, and she had a very sad look on her face.

The old woman was very thin, and she had a very sad look on her face. We tried to comfort her, and we tried to make her feel better. We offered to help her, and we offered to give her some food. We offered to give her some money, but she refused. She said that she didn't need anything, and she didn't want anything.

Poly Royal Previews

Queen gains insight from Poly Royal

"I think my favorite class last quarter was math. I got an A+ in math class last quarter. I really enjoyed the math class because I found the math concepts to be fascinating. The teacher, Dr. Johnson, was very engaging and made the math topics very interesting. I looked forward to attending the math class every day."

Poly Royal events

A peek at Poly Royal events

At final scheduling for Poly Royal events coming up this quarter, there are various events planned that will take place on campus. These events will be held in the Poly Royal Student Union and on Poly Royal property. These events will feature a variety of activities, such as concerts, lectures, and workshops.

Dairy Show

Dairy Science 138 is not only a class in which students learn about the dairy industry, but it is also a class where students can gain hands-on experience. The Dairy Science 138 class will be held on the Poly Royal campus, and students will have the opportunity to work with dairy animals, learn about dairy production, and gain insights into the dairy industry.

Math contest

The Math Contest is a popular event that takes place during Poly Royal events. The contest is open to all Poly Royal students, and it provides an opportunity for students to test their math skills.

Good music at Cuesta's jazz concert

By J. SCHMIDT

Big band jazz killed the night at Cuesta College's Holiday Concert in the auditorium last Friday night. The evening was highlighted by one of the best jazz performances of the last two years. The audience and the faculty of Cuesta College were thoroughly entertained by the musical sounds that filled the air.

PGE needs bright well-educated civil, electrical or mechanical engineers to work on difficult and complex problems. The burden is heavy. The problems are many. It's our job to provide enough energy for the essential needs of the public and the tremendous environmental health care job that needs to be done in waste recycling, smoke-free rapid transit, fume incineration, and water purification. All of these tasks will require large amounts of gas and electric energy.

3 dropped from Ethnic Board

By M. MCDONALD

Three members of the Ethnic Programming Board have been dropped from the ethnic programming board, board chairman, was expelled from the board. The reason given for the change in status was to meet PGE Code 29.210.38.

Dennis Martin, EPS representative and chairman, was expelled from the board. "Dennis, in the past few months, has been consistently in violation of the code of the board. He has made it impossible for the board to function as an effective organization," said PGE's representative, Martin.

The new board, which is composed of representatives from the United Black Student Association, is composed of representatives from the United Black Student Association, the Asian American Student Association, and the Native American Student Association. Bakersfield professor named dean of School of Business

By J. O'CONNOR

Dr. Robert E. Coo, professor and chairman of the Department of Business Administration at Cal State Bakersfield, has been appointed as the new dean of the School of Business Administration. He has been a member of the faculty since 1976. Anderson will also continue to his work in the accounting department for another quarter. Coo has a degree in business administration from the University of Southern California.

Talk on BART plights

By J. WILSON

Ethical and professional problems encountered by architects and engineers will be discussed by the Bay Area Rapid Transit District on Wednesday. The session will be held in the auditorium of the university union at 8 p.m. in University Union.
Residents sue over canal treaty

SAN DIEGO (AP)—San Diego County residents are suing the federal government over a treaty reached by the residents and local officials in the late 1800s to provide water for irrigation.

The suit, which claims that the government has breached the treaty, was filed Friday in U.S. District Court in San Diego.

The treaty was signed in 1881 by the federal government and the state of California. It granted the residents the right to use water from a canal to irrigate their crops.

Residents say the government has failed to uphold its end of the agreement, resulting in a loss of water rights.

Outbreak of botulism reported

CLOVIS, N.M. (AP)—One of the largest outbreaks of botulism in the United States this year—32 cases—has occurred in a cross-state poultry plant in New Mexico and neighboring states.

The outbreak, reported to the state health department, has affected residents in New Mexico, Texas, Oklahoma, and New York.

The outbreak was first reported in New Mexico and later spread to other states where the plant was located.

Three inmates die of overdose

SAN LUIS OBISPO (AP)—Three inmates at the California Men's Colony died after taking what appeared to be an overdose of a stimulant.

The inmates were found Saturday morning at the prison and died at a nearby hospital.

The cause of death has not been determined.

Author's overthrow attempt fails

LONDON (AP)—A London newspaper says British author Ian Fleming has died after a two-day battle with cancer.

Fleming, known for his James Bond novels, was hospitalized for several weeks before his death on Monday.

Author's overthrow attempt falls

Dr. William Waddell Jr., 47, is charged in the death of a woman who was found unresponsive in a car. Police say they are investigating the case as a possible murder-for-hire.

The woman was found dead in her car on Monday morning. Police say she was last seen Saturday night.

Mudder case goes to jury

SANTA ANA, Calif. (AP)—The case of a prominent athlete, accused of murdering a fan who was delirious after an automobile accident, is expected to go to the jury.

The athlete, 30, is charged with one count of murder and one count of attempted murder in the case.

The trial is expected to last several weeks.

Poly nine just can't seem to get ahead

BY ANN FREY
Daily Sports Writer

Cal Poly's baseball team travels to Santa Barbara tomorrow to take on the Gauchos of UCSB in a noon doubleheader.

The frustrated Mustangs, having suffered two of their last six losses, are looking to end the spring series on a more positive note after taking a doubleheader from visiting UC Davis last Friday.

Friday's battle began in the bottom of the first inning when the Gauchos scored their first run after a triple by Alex Oates and a wild pitch by Matt Miller.

The Mustang offense came back with two runs in the second inning on a two-out double by John Morgan, but the Gauchos responded immediately with three runs of their own in the top of the third on two-out singles by J.P. Hefner and Matt Miller.

Harper and troops rebuild for `78

Harper and troops rebuild for '78

In a key move toward rebuilding his baseball team, Cal Poly head coach Jim Harper has named Tom Harper as the team's assistant coach.

Tom Harper, who played four years at Cal Poly under Harper, is expected to bring a wealth of experience to the program. He was a .347 hitter as a senior and compiled a 6-2 record as a pitcher for the Mustangs.

The new assistant coach will work closely with Harper in preparing the team for the upcoming season. Harper, who has been with the Mustangs for 11 years, is looking to build a strong foundation for the future.

Spikers go undefeated in CCVC

BY IIM ALVERNAS, Daily Sports Writer

The Cal Poly volleyball team remained undefeated over its first four matches of the Central Coast Valley Conference season. Through the first four weeks, the Mustangs have a perfect record of 4-0 and are second only to Cal Poly's women's basketball team as the best school in the Conference.

The team's first three matches were all against the top five teams of the conference, and the team is looking to go undefeated against all teams in the conference. The Mustangs are looking to go undefeated in the conference and are off to a great start.

The team has already proven to be a strong contender for the conference title. The Mustangs are looking to make a name for themselves and are off to a great start.
