It's not whether you win or lose...

By RANDY NORD

It is useless to compare the Olympics that are held in the Los Angeles area and the Olympics that were held in Berlin. When the Games were held in Berlin, there was a great deal of interest and enthusiasm. The athletes were given a lot of attention and there were many events that were watched by a large audience. However, when the Games were held in Los Angeles, there was much less interest and enthusiasm. The athletes were not given as much attention and there were fewer events that were watched by a large audience.

The atmosphere at the Games in Los Angeles was much different from the atmosphere at the Games in Berlin. In Berlin, the athletes were given a lot of attention and there was a lot of excitement. In Los Angeles, there was much less excitement and the athletes were not given as much attention.

The weather in Los Angeles was much different from the weather in Berlin. In Berlin, the weather was cold and wet. In Los Angeles, the weather was much hotter and it was much more pleasant.

The Games in Los Angeles were much shorter than the Games in Berlin. The Games in Berlin lasted for about 12 days while the Games in Los Angeles lasted for only about 8 days.

Dean of students opens for business

By BONNIE BURNETT

The new dean of students, Russell Brown, has been with Cal Poly for the past seven years. During his time here, he has worked closely with the student affairs department to improve the services offered to students. He has also been involved in various campus committees and has served as a member of the governing board.

Brown was named as the new dean of students in May of 1975. He has been working with the university administration to implement new policies and procedures. He has also been working to improve the communication between the administration and the students.

Brown is very pleased with the new position and is looking forward to the challenges that lie ahead. He is excited about the opportunity to work with the students and to help them achieve their goals.

The new dean of students has been welcomed by the students and is expected to be a strong leader for the university. He is well respected by his colleagues and is respected by the students for his knowledge and experience.

Housing issue before council tonight

The San Luis Obispo City Council is scheduled to meet tonight as the Housing Task Force, which was formed last year to discuss the housing ordinance that the council will consider, was a topic of discussion before members of the council. The ordinance was a topic of discussion earlier this week, and members of the council agreed to discuss the issue with members of the task force.

In the last few meetings of the task force, members have been working to clarify the wording of the ordinance and to ensure that it meets the needs of the community. The ordinance is intended to provide more affordable housing options for residents of the city, and members of the council have been working to ensure that it is fair and equitable for all residents.

The task force has also been working to address concerns raised by members of the public. Members of the council have been working to ensure that the ordinance is clear and understandable, and members of the task force have been working to address any concerns that have been raised.

The council is scheduled to meet tonight at 7 p.m. in the council chambers. Members of the public are encouraged to attend the meeting and to provide their input on the ordinance.
City Council to discuss housing tonight

By ROSE CHAVEZ
Daily Daily Writer
The San Luis Obispo City Council will hold a special session tonight to discuss a special session of the City Council. Discussions were postponed from the previous meeting to consider the city’s housing needs.

The ordinance prohibits more than three unrelated persons from living in a single dwelling. The purpose of the task force report, according to Councilman John Adams, was to investigate and recommend possible solutions to help alleviate the current housing crisis as it affects student housing in the community. The proposals are now being studied by the City Council in preparation for the meeting tonight.

One of the task force recommendations was to require the limit be raised to four in residential zones but not R-A zones. The committee could not come to a consensus about the limit in R-A zones. Eight members wanted the limit to remain at three and three members believed that a limit was not needed.

Another task force recommendation included—
- A mandatory meeting for student housing permits to those who apply. The permit, if approved, would be on the housing area on a single dwelling.
- The applicant must hold a certificate in student housing dispute.
- The availability of student housing permits to those who apply. The permit, if approved, would be on the housing area on a single dwelling.
- One resident who violates the existing noise ordinances will be fined.
- The citation could be compared in a parking citation.
- The establishment of an independent arbitration board to handle housing disputes. The board would act as mediator in any student-student housing dispute.

Events planned to celebrate Cinco de Mayo

By JACK SCHNEIDER
Daily Daily Writer
San Luis Obispo is like the city of July. Turn New Mexico at the base of the Ethnic Food Center.

Transitions
Program Board, defined the annual Mexican holiday.

Cinco de Mayo was the day the Mexicans revolted against the French in a battle at Puebla, Mexico. To de la Cruz, a Natural Resource Management major from Oxnard, Conco de Mayo is of special significance.

"It symbolizes a unity between Chiapas and their Mexican heritage," he said.

Marta Gomes, a dietetics senior from Paso Robles, said she didn’t know anything about Conco de Mayo until she came to Cal Poly. It was here that she got involved with the Ethnic Programming Board and started showing an interest in the holiday.

The theme for this year’s Cinco de Mayo, which is being sponsored by the Ethnic Programming Board, is "Education is a right not a privilege."

The campus events include a three band concert Friday, a native Mexican dance in the UU plaza Thursday from 11 a.m. to noon, a food competition with Mexican food, and a Mexican dance in the UU plaza Thursday by a group from the women’s march in Mexico. The Cinco de Mayo celebration will end Friday night with a Chivas in UU room 219 with a Cinco de Mayo theme.

"This year’s Cinco de Mayo will be Education is a right not a privilege," she said.

Sports can be a pain in the eye

By LAURA CHRISTMAN
Daily News Writer

Playing sports such as baseball, basketball, or soccer can be a fun and exciting way to stay active. However, if proper precautions are not taken, sports can also pose a risk to the eye.

The increasing number of injuries in sports is a major concern. A study conducted by the American Academy of Ophthalmology found that the majority of sports-related eye injuries occur in youth athletes.

Recent research has shown that the greatest danger of eye injuries comes in contact sports such as soccer. In soccer, the ball can reach velocities of up to 80 miles per hour, which can cause serious injuries if not properly protected.

In conclusion, while sports can be a great way to stay active and healthy, it is important to take proper precautions to protect your eyes. Wear appropriate eye protection when playing sports to minimize the risk of injury.

Engineering grads finding jobs

SOUTH BAY engineering graduates have a great year for finding employment, according to the latest report from the Office of Career Development at Cal Poly.

The Office of Career Development at Cal Poly

The Office of Career Development at Cal Poly has released its latest report on employment opportunities for engineering graduates. According to the report, the job market for engineering graduates in the South Bay area has been strong, with many companies offering competitive salaries and benefits.

The report noted that the number of job openings for engineering graduates has increased significantly in recent years, due in part to the growing need for engineers in the technology and manufacturing sectors. The report also highlighted the importance of networking and building relationships with potential employers, as well as the value of having relevant coursework and internships.

The Office of Career Development at Cal Poly has also been active in helping engineering students find employment. The office hosts regular career fairs and workshops, and provides students with guidance on resume writing, interviewing, and other job search strategies.

Overall, the report from the Office of Career Development at Cal Poly indicates a bright outlook for engineering graduates in the South Bay area, with many opportunities available for those who are prepared and willing to take advantage of them. 

The Office of Career Development at Cal Poly encourages students to take full advantage of the resources and opportunities available to them, and to stay informed about employment trends and job market developments.

The Office of Career Development at Cal Poly can be reached at (805) 756-7000, or online at https://careerdevelopment.calpoly.edu.
She's hot stuff... in the hot corner

By JANET KRISTEMEYER
Daily Sports Writer

Two are down in the top of the sixth. The runners take their lead off first and third base.

The batter hits one down the third base line, seemingly headed for left field. But on instinct, the short baseman dives for the ball. She scrambles to her feet, whips, and throws the ball to first base for the out.

Brooks Robinson? No. Just another typical play turned in by Lawrence Yoehlhera, the third baseman on Cal Poly's women's softball team.

Yoehlhera, a freshman PE major, has been playing softball since she was eight. She said when she played for the Argonauts, she played Bobby Bowden softball in San Jose.

Although she didn't always play third base, it's her home run away from home. Yoehlhera played second and short in her early days of the game. At Blackford High School she donned the mask and padding necessary for the catcher's job.

"At the beginning of this season I was doing a little catching, but mostly I've been at third," she said. "It's different out there because I've played the field and hit at you. You have to be able to react faster."

Yoehlhera is one of three women on the softball team who were given athletic scholarships.

"I know they gave scholarships here so I wrote a letter," she said. "Black Val (Poly Coach Val Pilie) was up in San Jose. I think she might have seen me play once or twice."

The Sunbirds invited Yoehlhera to tryout for the team, although she was still in high school. They invited her back and she says she probably could have made the team, but she was more concerned with her education so she turned them down.

"I say you can't play professional softball," she said. "My goal is to learn and get as much money as I can (playing professional ball) but if the Sunbirds are still around in four or five years I might play with them."

College softball is much more competitive than the high school level she used to play in. Yoehlhera said that the many college players are bigger and the coaches are more geared towards winning.

"If played with a broken bat too in high school. In the high school, I was a little bit better because you have coaching and help. But here you have to haunt your own."

Yoehlhera has no complaints about her coaching at Poly. She said she's loved being part of a team.

"We are all really close and I don't know why we have done so well. We have too much chemistry and we get along so well. We probably could have won more times we have won less," she said.

Yoehlhera thought the weather condition was perfect for the regional tournament, and Yoehlhera hopes that the responsibility of the players will help the Mustangs come out on top.

"We are seeded sixth (out of eight teams) and we should be higher. We'll just be ready and have fun and take it from there."

Yoehlhera will head back to San Jose to look for a job and to play Softball.

Poly nine drops four games

BY ANN FYRE

Inside the Sports room, eight members of the Mustangs were playing card games. A revised UC Riverside lineup and a variable weather pattern were two factors that made the Poly-Mustangs game today take place in three separate locations.

The first five innings were played in the Mustangs' gymnasium, which was located near the Poly campus. The second five innings were played in the Poly gymnasium, with the Mustangs' fans cheering them on. The third five innings were played in the Poly-Peacock field, with the Mustangs' fans cheering once again. The final five innings were played in the Poly-Peacock field, with the Mustangs' fans cheering for the third time.

The Mustangs' fans were the loudest during the first five innings, while the Poly fans were the loudest during the second five innings. The Poly fans were the loudest during the third five innings, while the Mustangs' fans were the loudest during the final five innings.

Despite the weather conditions, the Mustangs were able to drop four games against the Poly nine. The Poly nine was led by pitcher Tom Thompson, who pitched a complete game. The Mustangs' fans cheered them on throughout the game, with the Poly fans cheering for the Poly nine in the final five innings.

Thompson cancelled

Last night, Mustangs' pitcher Thompson was scheduled to pitch against the Poly nine. However, due to an injury, he was unable to pitch. The Mustangs' fans were disappointed at first, but they understood the situation. The Poly fans were excited, as they knew that their team had a chance to win.
