Trustees approve faculty evaluations

The California State University and College Board of Trustees recently passed a resolution mandating student evaluations of instructors at least once a year. Each Cal Poly professor is now required to conduct evaluations on two of his courses. The board called on each university in the 19-campus system to "set up guidelines for the design, administration, the interpretation and utilization of the student evaluation of instruction programs." The board said faculty, students and "other" persons shall be included in reviewing instructors' performance, for assignment of tenure and for consideration of promotion. The board's action climaxes three years of debate over how much input students should have in the performance and maintenance of CRUC faculty. The Student Presidents' Association has been pushing for student input on instructors throughout the year. The board's action was seen by Philip Johnson, the CRUC Chancellor's student affairs officer, as a compromise to the association's demands. The board in its action told the association that all student evaluations would be taken unsigned as a summary in analyzing any instructor's performance. Promotion CRUC faculty have been fighting against students sitting on faculty review committees, since tenured teachers are not allowed to sit on them. Johnson said that the resolutions would not be used in evaluation faculty performance. The results of the evaluations would be given to the instructors and the instructors' department heads in each university after the resolution came to a vote. The results would be then summarized and put into the professor's file.

Better late than never

We were delighted to see the California State University and College System Board of Trustees approve secondary teacher evaluation last week.

The new policy requires that students evaluate their teachers in at least two of the courses (not just different sections) at least once a year.

We believe this will finally give students formal input into the evaluation of instructors. Presently at Poly, teachers often give evaluation forms at least once a year.

Steve Martinis hotter than Saturday Night Fever

I ran across a rather interesting case this summer.

What is mind-boggling about this case is that it could happen to anyone. It may happen to you, even.

At any rate, it all started in July. I was sitting at the computer at my old computer, Xerox Supreme at Taco Bell. Just as I was

Author Kathy McKeon is a junior journalism major and a Mustang Daily staff writer.

Another university has not been so willing to allow students to participate in the evaluation process, and now the teachers and administrators are open to the door to formal student evaluations.

Perhaps once this channel has been established, future students will have the right to evaluate their instructors and they will allow phase two of the Student Opinion profile to become reality.

We believe that student evaluation should have been made official long ago, but will continue the system on their own.

Better late than never.

Students taking studies overseas

BY TRACY MURDY

If you're looking for a new approach to school why not send an academic year in a foreign country? The International Programs of California State University and Colleges offer students study opportunities at thirteen different institutions overseas. The programs are designed to offer students knowledge and understanding of foreign people and cultures at an economical price. According to Jodi Rathbun, secretary of International Programs, International Programs was established in 1961 and has enrolled approximately 5,000 students. Last year Cal Poly spent $30,000 per student to send students overseas to study. Rathbun states that Cal Poly has the greatest majority of students participating in the study abroad program, said Rathbun.

To qualify for the programs, students must meet requirements set by the state-wide Academic Council for International Programs. An on-campus interview and an application with a statement of purpose is required from each student. Each student must complete 43 units prior to departure and have an overall grade point average of at least 3.75. The New Zealand, Peru, Israel and United States are programs that require at least a 3.0 grade point average. Rathbun said at least two years of college-level foreign language or the equivalent is required for the programs in France, Germany, Mexico, Spain, and Sweden.

Transportation and housing are arranged by the International Programs. Most students are within walking distance of their study centers while the Russell Pines is popular for traveling long distances. University dormitory housing is offered to students in certain programs. Other programs offer the option of boarding houses or being housed with families.

The cost of a year overseas varied with each country, said Rathbun. Most countries have programs that will cost an average student about $3,000 to $3,500 with the exception of Denmark which will cost a student about $4,000. These prices include full room and board, transportation, computer fees, books and personal expenses. Students pay for the same amounts overseas they would pay for if they remained on their own campus.

Most students apply to the countries with non-language requirements and, the United Kingdom, Italy, and Sweden are the most popular countries. According to Rathbun, four specialized study programs allow architecture students to study in Denmark and Italy, agricultural students to study in New Zealand and social science students to study in Sweden. The other nine countries take students with any major, said Rathbun.

Sandy Cal Poly English major, Cathy McClellan, spent an academic year in South Wales while earning credits at Cal Poly, independent study and traveling made her year abroad more memorable experience, she said.

"You learn you have a lot of things to offer other people," said McClellan, an alumni assistant to the International Programs. Students have the opportunity to travel to other countries as well as their host country, said Rathbun.

"You're offered as many things you want to take advantage of them," said McClellan.

Students interested in the International Programs should attend an orientation meeting Oct. 26 at 11:00. Location will be announced later.

ECOSLO zeroes in on earthly concerns

BY PAT LONG

A small group of volunteers have taken an old building on Palm Street, converted it to an information center and are busy putting their interest in ecology to work. The volunteers comprise the staff of the Environmental Center of the San Luis Obispo (ECOSLO), a non-profit organization dedicated to environmental awareness. According to Patty Estrada, ECOBLO's community relations coordinator, the group is interested in finding more volunteers for the center's projects.

"We need public support," said Estrada. "One of our major problems is too small a core group of volunteers. There are so many things to offer people over here."

Quake shakes Bishop

BISHOP (AP) — A moderate earthquake shook the Owens Valley on Wednesday, causing landslides and temporarily knocking out power, officials said. There were no reports of injuries or major damage.

The 6.3-magnitude quake, registering 5.7 on the Richter scale, was centered in the Owens Valley northwest of here and was felt throughout the southern and central Sierra Nevada and the San Joaquin Valley. Residents of west-central Nevada also felt the tremor

"It was strong," said Bishop. The tremor caused several minor landslides in the area and rock slides were reported on mountain roads U. S. R. 395, the major highway through that area. Some residents described the sound of the earth as if a giant had moved by.

Effectiveness of popular contraceptive is questioned

BY MAC MCDONALD

Daily Staff Writer

Despite recent warnings from the federal government containing its reputed effectiveness, a popular contraceptive is still being distributed in large quantities in San Luis Obispo.

According to the Food and Drug Administration, Enceral Oval, a spermicidal foam obtained without prescription, has not been proven to be any more effective than similar products that work by killing sperm cells.

Enceral Oval, which was introduced into this country in the fall of 1977, was once touted as being 99 per cent effective, which would make it as effective as the birth control pill. This percentage is based on "human-years," that is out of 100 women, only one would become pregnant within a year if the product is used properly. Kerneids in general are reported to range in effectiveness from 71 to 98 per cent depending on how properly they are used.

Saturday, October 6, 1978 Mustang Daily

The manufacturer, Eiko-Meito Laboratories of Newton, N.J., has discontinued its 99 per cent effectiveness claim, but as of yet has not advanced a revised claim.

Oval's effectiveness claims were based on two studies conducted in Germany. There have been no studies conducted in the U.S. at this time. In the first study, 23 women were examined five to 12 years after intercourse and conception had failed to occur. In the second study 43 out of 107 women who used the product became pregnant, a success rate of 40 per cent. The study claims, nonoxynol-9, a widely used spermicide, while Enceral Oval 3.25 per cent nonoxynol-9 is widely used spermicide, while Enceral Oval is claimed to be 50 per cent more effective than its competitors.

In an informal survey of San Luis Obispo pharmacies, a current Enceral user said she had no unhappy reactions to the foam. She was satisfied with the product and found that it was simple to use even for a "novice." Those tests have not yet been substantiated in U.S. tests.

In the January 1976 issue of McCull's, a major woman's magazine, an article on the Oval was titled: "Another Alternative in the Pill."

In the article that followed it stated: "It has been used in Europe for over four years... it is more effective and more convenient to use than other similar contraceptives and provides double protection... tests show that the barrier it forms fuses sperm even without a spermicide."

Those tests have not yet been substantiated in U.S. tests.

In an informal survey of San Luis Obispo pharmacies, a current Enceral user said she had no unhappy reactions to the foam. She was satisfied with the product and found that it was simple to use even for a "novice." Those tests have not yet been substantiated in U.S. tests.

A spokesperson for the Family Planning Clinic in San Luis Obispo made it clear that the Oval is quite popular when women first hear about it, but after using it do not care to use it again. "Our girls are not happy with them."

Among the complaints are: slight burning sensation in both partners; maximal and nausea; irritation. "They say it's a mess."

In an informal survey of San Luis Obispo pharmacies, a current Enceral user said she had no unhappy reactions to the foam. She was satisfied with the product and found that it was simple to use even for a "novice." Those tests have not yet been substantiated in U.S. tests.

We are saying, NOT that vaginal contraceptive foams and gels are unreliable," said Commissioner Kennedy, "but that NONE has been shown by scientific evidence to be clearly more effective than its competitors in preventing pregnancies.

According to Jeanne Marie Rose of the Cal Poly Vaginal Clinic, a person should examine her in her lifestyle before choosing a contraceptive and also that they are only as safe as the individual makes them. She said to be wary of effectiveness claims, some are "theoretical" being completely effective only in the laboratory. Depending on how well directions are followed and utilized, the effectiveness can change dramatically.

Actual "use" effectiveness is a more realistic barometer of how a contraceptive is used. Both Rose and the Family Planning Clinic agree that when using foams, creams and jelly, even in conjunction with a diaphragm, a condom should be used to get maximum effectiveness.

The worst albums of the summer

BY JON IVESON
Daily Staff Writer

The summer of '78 was a great financial success for the music industry. However, the quality of the music produced cannot be measured by how many megabucks can be pulled in by record companies.

The purpose of this article will be to take a look at those albums that were unsuccessful at the cash register but which failed in our opinion to provide the listener with anything of merit. Let's face it, as long as radio stations insist on being music in their fabled top-ten categories, we are certainly entitled to list the ten worst records.

At the top (or bottom) of our list is the soundtrack from the movie, "Thank God It's Friday." Who needs it? ... will put a dump on your bump any night of the week. After all we can all agree on our own easy of "Saturday Night Fever" at the local disco.

Running a close second (to last) is the soundtrack album from Steppenwolf's "Journey to the Center of the Earth." This is an almanac of original music, but not only to waste the talents of Earth, Wind and Fire and the Bee Gees, the quality of the music produced cannot be measured. However, the album is a gem. Most notable is the piece "The Power of Gold," which is a thing to be avoided at all costs.

It is a shame to stretch it out, and to give a bell of a few "controversial" pop songs, let alone to waste the labours of Barth, Wind and Fire and from this come the feeling of intensity. The "Mozart" section, "Nacht und Tag," is a different matter. Of course, "You are the magnet and I am the steel," makes a lot more sense than "the head is rock 'n roll". But just that doesn't make me feel anything.

The record is sold, and the record company is happy. The movie is also a hit. And that doesn't necessarily mean it's a good album. After all we can all agree on our own easy of "Saturday Night Fever" at the local disco.

Billy Carter's much-abused brother, after whom Billy Beer was named, attended AA meetings for three months.

The group "helped Billy get away from the hopeless feeling he had married around for five years. And he lightened up on drinking," Mrs. Stapleton reports.

The 160-page book portrays the 41-year-old Carter as a complex man with a terrible temper and a big heart, who never quite got over his father's death, is terribly jealous of his wife, and regrets the "redneck" image cultivated for himself.

Billy, the younger Carter child, was admitted after the death of his father, James Earl Carter. Brother Jimmy returned from the Navy to run the family peanut business, dashing Billy's aspirations to follow in his father's footsteps. "He was now experiencing a sense of total failure, and he tried to drown his agony in beer," Mrs. Stapleton says.

Ten years later, in 1963, Billy accepted Jimmy's request to manage the business so that Jimmy could enter politics. That was the beginning of Billy's personal fulfillment as well as the friendship between Jimmy and his brother.

Billy's marriage was threatened again recently when he began a hectic travel schedule of personal appearances at $5,000 a show. Mrs. Stapleton says.

Mrs. Stapleton says Billy believes he "created a monster" by portraying himself as a "beer-drinking, lighted redneck who just happens to be a politician." That was the beginning of Billy's personal fulfillment as well as the friendship between Jimmy and his brother.

The album "is recorded well, but the band plays with enthusiasm, and the meaning is clear." Billy's music doesn't have to sound like a click on a white tile all the time.

The album "is recorded well, but the band plays with enthusiasm, and the meaning is clear. Billy's music doesn't have to sound like a click on a white tile all the time.

Women debut vs. LA State

BY MARK HENDRIX
Daily Sports Editor

After a successful start on the road, the Cal Poly women's volleyball team makes their home debut tonight against the Diahlos of Cal State Los Angeles. Coach Mike Wilson and his gang are 4-1 in match play and took third in the 16 team La Verne Tournament. After last year's disappointing season, the Mustangs have a bright and up and coming future under Wilson.

In 1977, Cal Poly finished dead last in the Southern California Athletic Association in a tie with LA State with a 1-9 record. Oddly enough the Mustang and Diahlos beat each other for their only conference win of 1977.

1978 is the year when Cal Poly will bounce back according to Wilson. Scuttlebutt from other conference members is that the Mustangs should wind up at the same place this year as last.

"We really would do something about those predications," the Santa Barbara native coach said. "We're trying to establish a good program here and the girls are working extremely hard to accomplish that goal."

Cal Poly has a totally different look this year with only 2 returnees off of last year's squad. Thus far the record would show the change has been for the better. The women suffered their first loss of the season to a much taller Fresno State.

"We really would do something about those predictions," the Santa Barbara native coach said. "We're trying to establish a good program here and the girls are working extremely hard to accomplish that goal."

The Mustangs outer tonight's game with ode Injury. Center Mocker Susan Desgnall, a 9-10 Junior from La Creseenta. Did a good Job In tournament over the weekend. She has the toughest serve on this veer's team. Improving her back row skills.

Joney Webster - M freshman from Ventura Outside hitter who was all Clf In basketball In high school. Lough serve who Is a talented athlete Posy to coach and has come a long way already. The sky is the limit for Joney. Done a areal |oh for the team.

USC feels they'll get better

LO ANGELES (AP) - The returning theme song of Southern California football Coach John Robinson this fall is not "Hey, we're not all that great."

"But he has trouble remembering that sometimes."

"The coaching staff were all going, 'Hey, let's go out this weekend and win of fill Michigan State and wanted to remember that sometime."

USC feels they'll get better.

"Hey, we're not all that bad."

Southern California football

The JO-9 victory over the Trojans was not heavily recruited by major schools.

While 4-0 and ranked No. 2 nationally, but they did appear fast and did not play with any sustained intensity.

The Trojans, who do not play this weekend, face Arizona State in Tempe, Ariz. Oct. 16. Oregon State the following Saturday, then begin their schedule California, Stanford, Washington, UCLA and Notre Dame.

Robinson, reviewing the season thus far, said he's just as pleased with the Trojans progress as he was with the perfect record.

One thing that particularly pleases me is the attitude of the players. We put them through a really tough, long drill Monday, so tough they could hardly talk after we finished. They thought it was great."

"Our defense has been the strength of our team," the Trojan coach said. "I'm very proud of them. We're fortunate in that we have good depth defensively and there are actually still backs going on for starting jobs."

Linebacker Dennis Johnson and nose guard Rich Finidire lead the team in tackles with 67 and 34, respectively, while three defensive backs - Herb Ward, Tim Ledlow and Daves Smith - have three interceptions.

Brown takes lead over Younger

SAN FRANCISCO (AP) - Gov. Edmund G. Brown Jr. has gained 14 percentage points over his Republican opponent in the gubernatorial race, Attorney General Evelle Younger, according to an early California poll released today.

The poll, conducted by the Los Angeles Times, showed Brown, a Democrat, with 49 percent of the vote and Younger, a Republican, with 35 percent. Seven percent of the voters were undecided.

Meanwhile, Brown's campaign manager, Gary Davis, held a news conference this morning and declared: "Brown is the No. 1 issue in every poll that has been taken since the campaign began in the race."

Younger's campaign manager, Robert Heim, conceded that Younger had been "outgunned by marines" in the race.

The poll results are based on a survey of a "representative sample" of 1,200 registered voters in a nine-county area of Southern California. Brown's showing is based on 70 percent of the poll's sample, while Younger's is based on 57 percent of the sample.

The poll showed that Brown's margin of support was up from 41 percent in August of the last year's primary campaign giving Brown a 44 percent margin of support.

The latest poll showed that 4 percent of those surveyed preferred other candidates and 14 percent were undecided.

Brown outsprints Younger

Sacramento (AP) - New financial statements reveal that Gov. Edmund Brown Jr. has collected and spent twice as much as his Republican opponent, Attorney General Evelle Younger.

The statements on file Tuesday showed that both are pouring half of their expenditures into television and radio advertising.

Monday night was the deadline for preliminary statements showing the period between the final primary election on June 30 and Sept. 23.

Another interim report by Jan. 31.

The election is Nov. 7.

The Younger Campaign Committee reported receiving $121,543.74 from contributions and $321,000 from the related Younger-Darnell California Committee.

Brown's campaign reported receiving $1.6 million and spending $1.5 million between June and Sept. 23.

Younger thus far spent $575,991.85 on television and radio advertising in the Palmdale Communications of Hollywood.

Younger's campaign press secretary, Barbara Mettler, said the governor has spent $125,000 so far on television and radio advertising.

The largest single contributor to Younger was Louis Nathan, a retired rancher of Lone Pine and Ashland, who gave $10,000. He was also the largest donor in Younger's primary campaign giving $40,000.

Busch pushes export beer

San Francisco (AP) - The head of the Anheuser-Busch world's largest brewer, says the American beer industry, predicted that Europe is turning toward the lighter beers, is planning a major push to export beer in Europe.

A few from what he perceived as changing beer tastes.

Anheuser-Busch's ls just the latest in a long line of foreign markets to liquidate the economic barriers that have been a part of the American beer business.

Each, pending here over the Anheuser-Busch 178 aboard some of the European countries are challenging the heavy beer in this country the way the country welcomes the foreign beers.

We're making a conscious effort to do that through the American Beer Association right now," said the 41-year-old president of the brewer's association which is to produce a record 40 million barrels of its products.

Quake rattles Sierra Nevada

Bishop (AP) - Minor damage was reported by an earthquake centered in the Sierra Nevada yesterday that measured 6.7 on the Richter scale.

The 12-second tremor centered 15 miles northwest of here, was felt throughout the sparsely populated southern and central Sierra Nevada area and much of the San Joaquin Valley.

"It was strong. I was standing up and it made me sway back and forth," said Bishop Policeman Earl Williams. Bishop, a town of about 4,600 persons is 100 miles north of Los Angeles.

The earthquake struck at 9:43 a.m. according to the California Institute of Technology in Pasadena and University of California at Berkeley. At least three aftershocks were felt in the next hour.

The officials of the quake's epicenter said they had quelled a power outage in the Mammoth area.

From the direction that was given on the quake's epicenter it appeared to be the under the Control George Power Plant," said Elmer Johnson, the Los Angeles Department of Water and Power.

The power plant is 15 miles from Bishop.

The city of Los Angeles gets much of its water from the area via aqueducts.

Glass windows were blown in the area but there were no reports of injuries from flying glass, a spokesman said.

Watermain breaks reported in the area were reported in the area of the quake's epicenter, said an inland County sheriff's deputy. Rockslides were reported on U.S. 95 the major highway up the east side of the Sierra Nevada.

Brown oeaks Pope mourners

VATICAN CITY (AP) - The rains that drenched mourners for Pope John Paul II (for the past three days subdued an occasional drizzle yesterday, and the Vatican hoped to be able to hold the pope's funeral outside at St. Peter's Square this afternoon.

The Congregation of Cardinals was to decide around noon whether to go ahead with the outdoor ceremony, where 300,000 could be present, or move the funeral into St. Peter's Basilica which has a capacity of 30,000.

The second penal funeral in less than two months was to be held at 6 p.m. local time, like that of Pope Paul VI on Aug. 13, it will be broadcast around the world.

The hailing rain on Thursday afternoon, and for the sixth day a steady stream of mourners filed past the marble containing the pope's body, More than 625,000 had visited it when the helicopters closed Tuesday night.

Inflation rate jumping

WASHINGTON (AP) - Consumer prices are rising substantially faster than in the past two years, further drawing the average person purchasing power, a White House agency said today.

The Council on Wage and Price Stability said the inflation problem is more than just rising food prices. Even without the sudden swings in food prices, the inflation rate is higher than last year, it said.

"White margins in fixed prices and housing costs have been singled out as the chief culprits in the recent price increases," the council reported. "The higher inflation rate of 1979 cannot be attributed to rising prices for these items alone," the agency said.

"Even when these highly volatile items are removed from the Consumer Price Index, substantial acceleration is still evident,"

The council said the underlying inflation rate, as estimated by removing sudden swings in prices, has moved up from an average rate of 3.5 percent in 1976 and 1977 to 7 percent this year.
