Showcase trial of ‘Diablo 20’ to begin

BY JOS BTERIN

Although the design is “very attractive,” construction of a $7 million housing complex for married students and their families on Poly’s campus may never get off the ground.

Oerard Gerard, Poly’s executive dean of facilities planning, said he and other Poly administrators are reviewing the design and “economic viability” of the 360-apartment complex, which would be located at Grand and Monterey streets.

If approved, the apartments would be ready to move into in the fall of 1980. The site is now used to graze some of Poly’s cattle.

However, said Gerard, working against the proposal is its price tag. The Colorado development firm proposing the housing would take out a $7 million loan, which would be paid back over forty years, said Gerard.

Gerard said the loan and forty years of interest charges would total $21 million, all of which would have to be paid by renters. Gerard said Poly administrators want the cost, and therefore rents, of such a project to be competitive with rents charged by on-campus student housing. And said Gerard, “If we’re not satisfied with these requirements, we won’t go for it.”

Gerard said the master plan Poly uses in its housing policies does not call for more off-campus housing for single students.

Oerard, however, is a 204-unit addition to Mustang Village being considered by San Luis Obispo’s Planning Commission and city staff member Dan Staller. The commission, and Staller, will probably be approved when the commission takes final action on it on Dec. 6.

The addition is currently under construction.

Bunny is center of attention

December Playboy Janet Quist paid a visit to San Luis Obispo yesterday and residents were quick to take advantage of her appearance.

Quist was at Cork N’ Bottle Liquor Store on Foothill to publicize her appearance in the November Playboy centerfold. But Carter has set a ground rule that only two defense and two prosecution attorneys may participate at one time.

Observers of the “diplomats’ trial” view it as a possible precedent that some or all of the other 43 defendants remaining may want to follow. However, there has been no indication so far that any of the remaining defendants want to take such a trial.

Only two of the 20 representative defendants are from San Luis Obispo. The first is Roger resident Shirley Hendricks, 43. The other is 21-year-old John Roers, a former Cal Poly environmental biology student.

The other eighteen include:

— Retired Navy chief petty officer Brad Rylander of Santa Cruz.
— Retired junior high school teacher Lee Wood, 62, of Santa Cruz.
— Jim Adams of Humboldt County.
— Retired Navy chief petty officer Kenneth Winstrom of St. Helena.
— Retired postal employee Carol McDonald of Santa Barbara.
— Former Peace Corps volunteer Randy Pomerania, 27, of Santa Cruz.
— Retired Navy chief petty officer Brad Rylander of Oakland.

“We’re not going to gain anything taking them on one at a time” — Carter
The San Luis Obispo County Board of Supervisors took a step in the right direction this past weekend when it approved a plan for the new local transit system. The plan, which has been in the works for several years, will run between South Bay, Madonna and Downtown San Luis Obispo. The main feature of the new transit system will be a four-round trip every hour.

But the service should be organized properly and staffed by county and city officials who are seeking an additional program for the city. It will be a service for Amtrak a handicapped service for the county and service from Cambria to Morro Bay have all been proposed.

The new ideas are good ones. But the problem rests in funding for such programs. Money is needed for such and with all four concerned, the one might not be able to receive the necessary funds.

The county has added funds are available and there is still a need for dollars that comes from California Sales Tax. In addition the county proposes to use transportation revenues to fund the entire cost.

So the county states the money is there. Just how many students will ride the bus is not determined. But something will be done.

Driving out to South Bay on Los Osos Valley Road and during rush hour is like watching a busy giant stop in the air, the lower feet of the antigone have four wheels. It is an endless stream which no person is ever seen. The road needs to be widened to four lanes, if the low lying the two-lane is skinned on by bus service, driving will be a lot of times.

The bus system needs support from potential riders. Support is needed before the system can put itself in effect. County leaders need to know or have a better guess on how many students will be the buses ever it is executed.

The county bus service program has gone through many changes and challenges. What is needed now is some encouragement and planning to serve the needs of all students and all students need to know or have a better guess on how many students will be the buses ever it is executed.

The Cal Poly Geek Test
Do you pass or fail?

Are you a geek? Do you ever worry that there is a chance you may be becoming one? The National Lampoon once had a system implanted that made it easy to tell whether you were "a nerd." But it has been some time since any system has been established with regards to Cal Poly geeks.

How can you tell if this problem may be affecting you? First recognition of a melody has always been difficult, and in determining the extent of the disease it may be more practical to apply the list below to the other guy. However, in the event you have the courage to face up to this thing yourself, please read the accompanying questionnaire.

Do you wear a utility belt to school that is streaming with buttons at various levels including a garter belt and then carry enough clout to be appointed officer? If you can answer "yes" to five of the above, you are a true nerd. If you can answer "no" to the above, you are a true nerd.

Instead, he is smiling, waving and giggling in the rain. The film shown on the network news shows him waving, smiling and acting as though he were American war dead.

Nixon's "return" was simply an insult to his country. It is our representative. Nixon does not deserve to represent his country. The only way Nixon could ever again gain enough support to either be elected President or run for office is if he learned from the mistakes he made and not suffering. At least any government leader who wishes to be popular with voters would refuse to appoint Nixon in anything. Anyone who is a Nixon fan has suffered enough. Living in a quiet mansion in San Clemente while his buddies cool their manuscripts to anything but suffering.

The resignation of President Gerald Ford's first session after his pardon of Nixon and even his personal defeat at the polls at the hands of Jimmy Carter.

The Republican Party has finally begun to make believe it is returning to its original nature. The past election showed that Nixon is not the only one to blame, whether in the Democrats or are beginning to realize that every report is not like Nixon's. A moment of silence. We believe it is a moment of the peace. And while we will admit the Republican Party has come, we believe a forgotten Nixon has contributed to its right wing.

Do you wear matching Cal Poly Shirts and a shirt when you go to Avila on the weekends?

Do you wear sunglasses and try to pick up girls at Pirate's Cove?

Do you know anything about questions during your stance in hopes that the professors may remember you for a better grade.

The Cal Poly Gear Test

Homecoming events set for weekend

BY CATHY SPEARNAK

Homecoming at Cal Poly-Pomona kicked off just a Saturday night football game honoring the alumni. It is a weekend packed with events that take the entire year of planning.

Julie Levin, the year’s homecoming chairperson, has been working on the event for the past several months and has decided on a weekend packed with events.

Levin, a 19-year-old social communications major, said the event takes a year of planning.

“Homecoming is a little anti-climatic after Proposition 5,” she said. “But both have generated a lot of interest about smoking. Advertising campaigns correlate with diabetes instead of pointing out the realities of smoking. Even if people temporarily stop smoking there is a health benefit. It’s a real privilege for me to be a part of this 1971 Smokeout.”

The goal of the smokeout, Levin said, is “Get off your smoking habit,” to raise consciousness about the hazards of smoking, and to maintain the smokeout.

The media, said Postma, “bombards” people with positive aspects of smoking. Advertising campaigns correlate with diabetes instead of pointing out the realities of smoking, he added.

Cancer Society urges smokeout

The American Cancer Society and many other health-conscious people are hoping the smokeout will be a "smoke-free" event.

When the first nation-wide Great American Smokeout occurs tomorrow, it is hoped that the Cancer Society will be the first organization to take an entire year of planning.

The smokeout will be held in conjunction with the Health Education and Literacy program at the Poly-owned Poly Health Education Institute.

At Poly, Postma said, “we don’t really know what the level of participation will be on the Poly campus but he said he feels the issue is a community, not just a campus concern, and that the goal of the smokeout is to get everyone involved.

The exhibition will be open to the public on weekdays from 8 a.m. to 5 p.m.

Ed Asner, star of the CBS series, “The Lou Grant Show,” is National Chairman of the Smokeout.

“T’ve never been a real privilege for me to be a part of this 1978 Smokeout and no one needs it more than I,” Asner said in a message to volunteers.

Cancer Society and many other health-conscious people are hoping the smokeout will be a "smoke-free" event.

Tattoo artist has designing profession

BY PAULA CHAMBERS

San Luis Obispo's Don Brodar will tattoo anything from a small heart to a replica of a Frankenstein print on almost any part of the body. However, Brodar doesn't call the body illustration a mere tattoo - he calls it art.

"A tattoo is permanent," said Brodar. "When someone gets a tattoo they have to be sure it is something that they want to have for the rest of their life."

For that reason, Brodar feels that it is essential that the tattoo be a piece of art, something the owner is proud of and will appreciate. Only in Deep, located at 11558 Toro, is not just a tattoo shop according to Brodar. He prefers to call it a skin illustration shop because he concentrates on artistic aspects of the tattoo.

"Most of the time a person will give me an idea of what they would like, and I draw it out to see if that is what they like," he said. "Sometimes people bring me designs. But I find a lot of people like to see my original designs."

He added that it usually takes about only 15 minutes to get a basic design, and longer for more complex designs with many colors. Contrary to popular belief, it does not require the machete of a "hem-man" to sustain the tattooing.

Brodar said there are people who come in everyday who are worried about the pain in the administration of the tattoo. They always think it's going to hurt, he said. But it doesn't. It's just like getting a little sunburned, he said.

Women, according to Brodar, are much better at blocking out pain while getting a tattoo.

"It's just like getting a link tattoo."

Unlike men, women tend to get small tattoos in 'symbolic places' on the body.

"But the tattoo is not just a thing for sailors, or something a person does on a dare anymore," he added. "There are a lot of people getting tattoos, and every person has a different reason."

Brodar said there are people who come in everyday who are worried about the pain in the administration of the tattoo. They always think it's going to hurt, he said. But it doesn't, it's just like getting a little sunburned, he said.

Women, according to Brodar, are much better at blocking out pain while getting a tattoo.

"It's just like getting a link tattoo."

Unlike men, women tend to get small tattoos in 'symbolic places' on the body.

"But the tattoo is not just a thing for sailors, or something a person does on a dare anymore," he added. "There are a lot of people getting tattoos, and every person has a different reason."

Brodar stated that the most important part of the tattooing is the design. He emphasized this area is a well-controlled one.

As far as price is concerned, Brodar said it varies with the effort and time that goes into the design. The number of colors the person wants and the size of the design are the actual determinants.

"I can't just say each design is a certain price and the person has to take their pick from the designs on the wall," he said. "I just wouldn't be an artist then. I believe people should be able to get exactly what they want."

Brodar said that he has never done the same design twice.

"I give them an idea of how the tattoo is going to turn out. But I never know exactly how it changes a little as I do the work. There is no way I can tell exactly how it is going to turn out," he said.

This is a very intense art, he said.

"You have to spend many, many hours practicing before you can ever touch skin. You have to know about skin care and you have to be very careful with a steady hand and a good eye," Brodar said.
Skating enthusiasts rolling into SLO

BY CAROL EVANS

Muiting Daily

Two weeks after SLO Skate Co. has finally rolled into SLO town.
San Luis Obispo Skate Co., 1100 Garden St., rents skates to people of all ages seven days a week. Skating enthusiasts can rent skates from 10 a.m. to midnight Monday through Friday and from noon to midnight Saturday and Sunday, as long as they don’t skate in the downtown area. Skating is prohibited in the central business area by section. 120.14. of the city’s municipal code. Skaters should check a map and know these boundaries before leaving the premises.

The majority of our business comes from the 18 to 30-year-old age group,” said Guerin.

According to U.S. Forese, owner of Playland Skatedrome in Pismo Beach, one skate manufacturer has come out with a “gripper” model—a blue running shoe with yellow racing stripes mounted on wheels.

Forese said the impact behind the new skating craze is an improved variety of technology and exercise. “A friend of mine decided to trade in his bike for a pair of roller skates,” said Snowyard. “He wore his shoes in his belt loops and skate off to work.”

Students win scholarships

Four agriculture students at California Polytechnic State University, San Luis Obispo, have been selected to receive $500 scholarships from the William Randolph Hearst Foundation.

The four are Robert A. Deeban of Lodi, a sophomore studying ornamental horticulture, Debbie M. Jones, a junior studying ornamental horticulture, and Stephen P. White, San Luis Obispo, a senior studying ornamental horticulture.

Dr. J. Mac McRobb, head of the Industrial Technology Department, was recently installed as the vice chairman of the National Association of Industrial Technology’s Board of Accreditation.

McRobb, a member of the board since 1976, was elected to the national post during NAITA’s 11th annual convention held in Jacksonville, Fla. McRobb's term as vice chairman will continue through mid-October next year. He said the board takes final action on accreditation of institutions.

Forese said the impact behind the new skating craze is an improved variety of technology and exercise.

“Because of the coat, many people would rather rent their wheebs,” said Forese.

Rental rates at SLO Skate Co. range from 51.75 per hour on weekdays to 52.00 per hour on weekends, with specials for groups of over 10 people.

Technology and exercise are not the only reasons roller skating is booming all over the country.

“Roller skating is something that can be fun in all types of weather,” said Guerin. “The best thing is in cold weather or right after the rain when the sidewalks are dry.”

For many, roller skating has become a practical means of transportation. Cal Poly business major, Dave Snowyard, witnessed this firsthand while living in Southern California this summer.

“Because of mine decided to trade in his bike for a pair of roller skates,” said Snowyard. “He wore his shoes in his belt loops and skate off to work.”

If you want to get to the top in aviation, the Navy is the way to go. We offer unlimited opportunities to pilots and Naval Flight Officers.

As a pilot, you'll be trained to fly the most advanced jets ever developed. As a Naval Flight Officer, you'll operate the sophisticated weapon systems, computers and advanced electronics. As either, you'll wear the wings of Naval Aviation.

If you're a pilot and in good physical condition, Naval Aviation could be your route to the top. Find out about it and inquire about a free flight at our booth in the snack bar today and tomorrow from 9:30 a.m. until 3:00 p.m.
Teenagers get to rumble by stereos blaring... Five loud-looking guys, rolling up, move down the middle of the sidewalk. Every other word they say could drill a hole through a rock.

Two girls sit on a corner fire hydrant, just waiting to be picked up. It is a typical Thursday night on Higuera Street, downtown San Luis Obispo.

There is a longstanding tradition for downtown employees to keep their businesses open late on Thursday evenings. Teenagers from San Luis Obispo and surrounding communities take advantage of this and make Higuera Street their hangout.

There are many reasons to cruise Thursday nights.

"It’s fun, better than sitting at home," was the reason given by a number of young people standing in front of The Network on Higuera. Ranging from 15 to 17 years of age, they also say they are there to "make sure one is a while," "skate" (referring to their skateboard), "watch the scenery" and to "cause trouble."

While they were talking, cars of all types cruised by in ever-increasing numbers. They ranged from mom’s station wagon and an old hulk of a 1951 Chevrolet to hot rods of all sizes and shapes. As four teenage girls cross an intersection, a number of whistles arise spontaneously from the onlookers on the sidewalk and out of cars waiting at a red light.

The opposite sex is one of the main attractions to most of the young folk hanging out along the street.

"We pick up on girls all the time, at least once a month, says one 16-year-old San Luis Obispo youth. "We check them out the other times."

Numerous girls can be observed Thursday standing along the street eyeing the guys pass by in their hot rods, waving or shouting occasionally. It would be difficult for any young man to walk more than a block or two down Higuera Street at these hours without at least one girl saying "hi" to him.

While the Higuera Street scene on Thursday nights is dominated by the youth, there are still numerous families and couples strolling from store to store along the street. However, most of the businesses are dominated almost entirely by youth. An example would be Swee’s Ice Cream Parlor, which routinely overflows with people whenever the employees are on demand. A line of cars and people keep the sidewalk outside this business.

Meanwhile on the other side, a group of students is waiting for their ride home. They are on their way to their respective schools. After school Thursday, the figure at the school gate is considerable. The figure at the school gate is considerable.

Quaglino is a "doohickey" that houses between 150 to 250 students at any one time. Higuera Street students can be seen on Higuera Street throughout the school year. The figure at the school gate is considerable.

While the Higuera Street scene is typical of other such scenes, there are subtle differences. The people are there to shop. There are still numerous families and couples strolling from store to store along the street. However, most of the businesses are dominated almost entirely by youth. An example would be Swee’s Ice Cream Parlor, which routinely overflows with people whenever the employees are on demand. A line of cars and people keep the sidewalk outside this business.

Meanwhile on the other side, a group of students is waiting for their ride home. They are on their way to their respective schools. After school Thursday, the figure at the school gate is considerable. The figure at the school gate is considerable.
I'm getting bugged driving up and down the same old strip. I've gotta find a new place where the kids are hip.

My buddies and me are getting real well known; yeh the bad guys know us and they leave us alone. I get around.

—Brian Wilson and the Beach Boys, 1964

When they get bored they start to get around.

High school students from as far as Paso Robles, Morro Bay, and Santa Maria converge on San Luis Obispo every Thursday night to cruise and check out the downtown area on Higuera Street.

Patincher Mike Kennedy and his partner, Reserve Officer Dan Breineman of the San Luis Obispo Police Department, make it their job to patrol downtown on foot and maintain order while the cruisers and the rest of the crew drift by.

Kennedy, a four-year veteran of the department, said the principle job of a foot patrol is to be visible, disperse any large crowds that might form, and handle any situations that officers in a car would be unable to be of help.

Kennedy and Breineman said they try not to establish a routine beat, but rather go anywhere they want to in the downtown area where they feel their presence will be of some help.

Kennedy said the San Luis Obispo Police Department assigns four officers on foot and six more in cars to the specific duty of keeping downtown free of trouble on Thursday nights. They begin their shift either at 6:30 or 7 and stay on patrol until 10:30 or 11.

In addition to keeping the peace, Kennedy said the job of a police officer is largely one of public relations through talking to people on the streets.

Kennedy also said while the streets are generally crowded with high-school-age youths, Cal Poly students are fewer in number and are found mostly in bars where bands play.

While crime is generally rather low along the streets, Kennedy said, "We see at least three speed contests a night, and there's nothing you can do to stop them on foot." He also added in a while they are able to stop one before it starts.

The officers make only a few arrests in an entire month, and Kennedy said these are usually either traffic-related or for narcotics or alcohol. No arrests are made for loitering under normal conditions, he said, differing from many cities need for curfews where a large number of such arrests are routinely made. Kennedy explained such arrests would be made only if the police were having trouble getting a large crowd to disperse.

Kennedy and Breineman said there is little problem of disturbance from parties on Thursday nights.

For the city of San Luis Obispo as a whole, Kennedy believes that the crime rate is on the rise compared to when he first started in the department in 1974, despite the fact that he wrote a greater feeling of respect for law and order in the city as a whole. Kennedy also said there is a substantial drop in the rural crime during the summer when many Cal Poly students return home. He specified that theft, as well as alcohol and noise related crimes are the areas of greatest decrease.

Both natives of the Los Angeles area, Kennedy and Breineman enjoy their work and indicated they have a good rapport with the people they meet on Thursday nights and during the rest of the week.

Kennedy has a bachelor's degree in criminal sciences from Long Beach State University. Breineman is nearing completion of his degree in Natural Resource Management at Cal Poly. Currently a reserve officer, he hopes to become a full-time patrolman in the near future.

Both officers said they are happy with their environment in San Luis Obispo and plan to make it their careers here. As Kennedy put it, "I found a place where I want to be and I like it."
An intern who is miles from his home

BY LAURIE COX

Successful Internships do not just happen. They require hard work, patience and a desire to succeed.

David Panjul, 23, an ag business management major at Cal Poly is currently on an internship with Loomia, Inc., 1,300 miles away. He has been on the job since mid-July and even though he says the internship has been "a good experience" so far, he admits, "hard work" and a "desire to do well," have all played major roles in his success as a student intern.

Student internships also play an important part in Poly's "learn by doing" approach to education. Some majors require internships, others encourage them. They are generally thought of as being good experience and helping the intern look more desirable to prospective employers.

Early last spring, Loomia Inc., a locally based company, that sells and manufactures cattle feed, approached applications and interviewed students from Poly interested in undertaking six months of training to be sales representatives. Panjul was one of three young men chosen for the job.

He was trained during Spring Quarter under Loomia's direction. In July, he was sent to Houston, Kansas to begin his internship.

Panjul started not only a new job, but a new way of life as well.

In Kansas, he "was sent to an established dealer to try and expand sales in a new area."

In Panjul's area, which covered one county, there was the high competition, with many people vying for top sales, he said. Being new in the area as well as the job was tough but only "way," he said.

In Panjul's area, which covered one county, there was the high competition, with many people vying for top sales, he said. Being new in the area as well as the job was tough but only "way," he said.

The teacher for the one-unit course will be Dr. Jack Tobin, who is currently a Staff psychologist of the Psychiatric Services Department of the Men's Colony.

Participants are requested to refrain from wearing blue jeans, denims, and light bright shirts, because of candidate directives at the prison.

The course is being offered by Cal Poly Extension on Jan. 1, from 9 to 11 a.m., and Jan. 2, from 9 a.m. to 2:30 p.m.

The fee will be $25. Additional information on the weekend course can be obtained by telephoning 34A-6235.

The Cel Poly University also plans a free concert on Dec. 2, at 8:15 p.m. in the Cal Poly Theatre.

Directed by John Russell of Poly's music faculty, the 40-member choir will perform several songs including works by Shubert, Brahms, and Schumann. The concert will be joined by two famous soprano Helena Harwood.

Miss Harwood has appeared as a soloist with several orchestras. She was the winner of the Ogden Phillips Award in the final round of the Metropolitan Opera Auditions in 1971.
Acid is raining from above

WASHINGTON (AP) — Scientists say man's incessant appetite for fossil fuels has spawned a new menace to the environment. The heavens, they say, are raining acid.

Precipitation bearing sulfur and nitrogen acids is killing fish, eating away at buildings and threatening to destroy the delicate balance of nature in lush forests.

"From what we know, it is certainly a very serious problem in sensitive areas," says Cornell University biologist Carl L. Schofield.

"It precipitates the possibility of a major problem," says Norman Ola, a research scientist at the federal Environmental Protection Agency.

Glass believes the threat will worsen as the nation shifts to coal to fuel its power plants.

No one seems to have exactly why, but the problem of acid rain is especially acute in the Scandinavian countries, and increasingly so in the Northeastern United States.

Fed examines trash bins

WASHINGTON (AP) — Nearly half the nation's bulk trash bins are unsafe traps that have crushed three children to death since they were declared illegal last summer, a federal agency says.

The death toll over the past seven years has been 21 children. Costs to make bins safe about $35 to $75 each.

Aimed at those bins from a report by the Consumer Product Safety Commission, government investigations said today they will be trumping through alleys and parking lots looking for illegal trash bins in a crackdown on obsolescent forms still using them.

A nationwide survey by the commission found that about 40 percent of the country's half-million refuse bins "appear to be dangerously unstable and illegally in use."

The problem is especially acute in inner city neighborhoods, where many children swing from the handles of trash bins while playing.

A nationwide survey by the commission found that about 40 percent of the country's half-million refuse bins "appear to be dangerously unstable and illegally in use."

The June 13 basin surveys certain types of bins with closed sides that can allow the whole of gravity to shift under the weight of a child and possibly pin him or her underneath.

As opposed to the trash-heap bins often used around dormitories or construction sites, the refuse containers are shorter types that have been found around apartment parking lots or small businesses.

Sometimes managed on roller skates, they normally range from waist-high to short-high to an adult and frequently are not more than four feet to eight feet long and about half that deep.

"We're "close to you."
By John Keller

Davy bought me.

His career in football began 13 years ago. Twice of those seasons Mustang offensive guard Jim Shelton has spent blocking on the line. He says he would rather block than do anything else.

He was the tallest player on the team. The second year the 6'7 225 pound veteran became a starter and a permanent linemen. It did not bother him a bit however.

"I want to play the line," said Shelton. "It is such a great, personal satisfaction and self-confidence. If the ball moves on offense, it is because of the linemen."

He summed up the typical blocker's dream. "My goal is to get one of ball carriers to flip me the ball in the end zone so I can get one touchdown in my career," said the grinning Shelton.

The former Glendale High student said his shift coordinator is Coach Andy Brennan. "Coach Brennan somehow motivates me so well. He expects me and he is so hard to please. When he commends you it is worth 1,000 lecture articles in the newspaper," said Shelton.

At Glendale, Jim played for another Coach Brennan. John Brennan is the brother of Andy, the 11 year Cal Poly coach. Shelton met Andy in high school after a football game four years ago. The all-state was starting at center and linebacker. The Mustang coach became interested in the polite, quiet giant. His brother John suggested to Shelton he play for Cal Poly. With offers from Missouri, U.C.L.A., John State and Stanford, Jim picked to play at San Luis Obispo.

He planned to go to Stanford, but turned them down because of the lineman."

"That guy (Shelton) is very capable and intelligent man," said Coach Andy Brennan. "He keeps trying no matter what the problem is. He is better than a good and excellent student and he definitely has his future set," said Brennan. "Shelton said he could make any offer from the professionals to play if it came about. Because of his size, he said it is unlikely. He plans to venture into the business world with his degree."

"Football is a game of problem solving. The players are constantly being thrown physically and mentally while under stress," said Coach Brennan. "That is why Shelton does a good job. As a merchantable player he is good under the objectives."

His long career in football was complemented with a longer career in baseball. Until he graduated from high school, his years on the mound as a pitcher surpassed his glorified pigskin years.

Many spring seasons in Tennessee carried over into two high school years in Buffalo for pitcher Shelton. When his family moved to Glendale, Jim earned all-league both in football and baseball. He never seriously thought of playing baseball at Poly after suffering an arm injury.

Penn on top

Washington—Fresno St. play in 1979

Seattle (AP)—The University of Washington's football game at the University of Miami, Fla., scheduled for Sept. 29, 1979, has been cancelled and the Huskies instead will play Fresno State in Seattle, it was announced Monday.

Washington Athletic Director Mike Lude said the Miami trip "was financially unfeasible. We were looking at a loss of $25,000 to $35,000."

It was Miami officials who approached Washington about cancelling the 1979 game and a return trip to Seattle for 1980.

"Miami only has been drawing crowds in the neighborhood of 25,000 and Miami assistant athletic director Paul Massy said we couldn't expect much more than that for our game there," Lude said. "When we were able to schedule a home game with Fresno State, there was no choice but to cancel."

"At home against Fresno State we should have a net profit in excess of $175,000."

The addition of Fresno State gives the Huskies seven home games next season, one more than this year.

The nine-game schedule is apparently in conflict with the Fresno State-Building game against McNeese State. The buildings were defeated this year by the Cal Poly Mustangs 26-12 earlier in the 1976 season.

The Bulldogs are having an off year after winning a championships in the Pacific Coast Athletic Conference in 1977.
Cowens named as player-coach

BOSTON (AP) — Veteran center Dave Cowens was named today as player-coach of the National Basketball Association's Boston Celtics.

Cowens replaces Tom Jerram. Tired in his first full season as coach, Cowens, an 8-year pro from Florida State, becomes the second player-coach in the Celtics' history. Bill Russell, also a center, was player-coach from 1966 to 1969, winning NBA championships the last two years.

"We tried this experiment with Bill Russell and it worked," Celtics president and general manager Red Auerbach said. "It's a question of Dave's motivating the players and more importantly, motivating himself."

He will replace Joe Fratoni and Bob MacMillan on the bench working with him, and we feel confident that this combination will work around the clock."

Earlier in the day, the Boston Herald American had reported that Auerbach, who coached the Celtics to nine NBA championships, would take over as coach.

The coaching change was made with the Celtics struggling with a 2-12 record, including six consecutive losses. Auerbach said:

"As a result of our record, the club simply was not performing and a change had to be made," Auerbach said.

Auerbach, a former Celtics star, coached four years at Harvard before joining the Celtics last season as an assistant coach. He was promoted to head coach last January when Tommy Heinsohn was fired.

Cowens shared the NBA Rookie of the Year award with Geoff Petrie in 1971 and was the league's Most Valuable Player in the 1972-73 season.

In his first seven years in the league, he averaged 8 points a game. Although only 6-6 and 214 for a center, he is noted for his durability and toughness.

He has appeared in six All-Star games, missing in 1977 because of a bad back.
